

School Accountability

Within Year Student Mobility Rate Calculation

1. Data source is 3rd Period Cumulative ADM 2013-14.
2. Select all students who do not have ADM program type codes = 2, 3, 5, 9 or 14.
3. Students are mobile if they experience one or more of the following:
 - attend more than one school between July 1, 2013 and May 1, 2014.
 - enter the Oregon public education system late.
 - Earliest ADM enrollment dates occurring after October 1, 2013.
 - exit the Oregon public education system early without earning a diploma, certificate, etc.
 - Latest ADM end dates occurring before May 2, 2014.
 - ADM diploma type code = 0.
 - ADM end date codes \neq 3B, 4B, 4C, 4D, 4E, or 6A.
 - have significant gaps in enrollment.
 - Gaps between ADM enrollment and end dates are \geq 10 consecutive school days.
4. Numerator = the unique count of all mobile students who attended the respective school between July 1, 2013 and May 1, 2014.
5. Denominator = the unique count of all students who attended the respective school between July 1, 2013 and May 1, 2014.
