I. Introduction

Oregon law and the federal no Child Left Behind Act require the Oregon Department of Education to produce and issue annual report cards for schools and districts. The report card is a logical extension of other programs initiated to improve education in Oregon's schools by encouraging responsible action, identifying excellence, and driving improvement. The report card is designed to

1. communicate the many good things occurring in schools.
2. provide a fair and reliable means of reporting ratings of current school performance and improvement over time.
3. demonstrate to the public that the schools are accountable for their work.

The Oregon School Report Card Manual is a compilation of the policies, processes, strategies, and timelines that relate to producing and improving the report card. It is updated annually to provide you with the latest information about policies and timelines.

We are committed to making the report card a valuable tool for parents, educators, and community members throughout the state. We encourage your feedback. For additional information, comments, or suggestions, please call (503) 378-3600 ext. 2287 or e-mail report.card@state.or.us.

II. Purpose and Guiding Principles

SCHOOL AND DISTRICT REPORT CARDS

Purpose and Guiding Principles

To communicate information to parents about school progress and achievement while meeting the legislative expectation for school and district accountability.

The report cards should

- be clear, concise, well-defined, and understandable.
- use information that is valid, stable, and reliable.
- include all students.
- report current levels of performance and continuous improvement over time.
- rate school effectiveness, not individual student performance.
- provide an opportunity for schools and districts to define unique characteristics through local information.
- be viewed as one part of a larger accountability system.
- meet federal and state requirements.

III. Development of the School and District Report Cards

Created by the 1999 Oregon Legislature, the school report card is a part of other programs initiated to improve Oregon’s educational system. This legislation requires that the Oregon Department of Education produce and issue a report card to all districts and schools in the state.

At the Oregon Department of Education, a Report Card Team facilitates the updating, improvement, and production of the annual school and district report cards. Continuously identifying issues associated with the display of information and the methodology used in generating the school ratings, the team gathers input from parents, educators, legislators, advisory groups, community members, a national consultant, and all departments within the Oregon Department of Education.

Date	Significant Events in Development
June 1999	<ul style="list-style-type: none"> • The State Legislature established the rating labels and categories. • The Department of Education was instructed to research, develop, and implement all other components of the report card.
Fall 1999	<ul style="list-style-type: none"> • Several prototype report cards were developed and feedback was gathered from stakeholders throughout the state. • The Department of Education contracted with The National Center for the Improvement of Educational Assessment for assistance in the development of the report card. • The State Board of Education approved the first Oregon school report card.
January 2000	<ul style="list-style-type: none"> • The Department of Education issued the first report cards to over 1300 schools and districts.
Jan. – Dec. 2000	<ul style="list-style-type: none"> • Feedback helped inform the development of the second report card.
January 2001	<ul style="list-style-type: none"> • The Department of Education issued the second school and district report cards.
July 2001	<ul style="list-style-type: none"> • The Oregon State Legislature passed SB 811 mandating additional elements to be displayed on the report cards.
Jan. – Dec. 2001	<ul style="list-style-type: none"> • Feedback helped inform the development of the third report card.
January 2002	<ul style="list-style-type: none"> • The Department of Education issued the third school and district report cards. • Federal legislation “No Child Left Behind” was passed into law and will impact future school and district report cards with mandated federal requirements.
January 2004	<ul style="list-style-type: none"> • The Department of Education issued 2002-2003 School and District Report Cards that comply with the federal No Child Left Behind Act.
October 2005	<ul style="list-style-type: none"> • The Department of Education issues 2004-2005 School and District Report Cards using more closely aligned test and student inclusion rules for AYP and report card ratings.

IV. General Information

Scope of the Report Card

The report card is a snapshot of school quality. It is limited in its perspective because only data that are comparable from school to school can be used. The Department requires that all statistics used in the report card be reliable and consistent across the state. Data that do not meet this rigorous test are not included in the report card.

Because the scope of the report cards is limited, schools and districts are encouraged to use the local information panel on the report card to include information not currently available at the state level. This should be an important feature of every report card sent from schools to parents.

Frequently Asked Questions

1. What are the report cards?

In 1999, ORS 329.105 was passed by the Oregon Legislature requiring that the Oregon Department of Education produce and issue annual report cards for all schools and districts. This law was passed in recognition of the desire of the public for consistent and reliable information about schools. In 2001, Oregon SB 811 was passed mandating additional requirements for the school and district report cards. In January 2002, Federal HR 1 "No Child Left Behind" legislated specific requirements for schools and districts that affect the 2002-2003 report cards.

2. What is the purpose of the report cards?

The school report card is one of several programs initiated to improve education throughout Oregon by providing an opportunity to communicate and celebrate the many good things that are happening in schools. The report card may assist in initiating discussions about areas targeted for improvement. Demonstrating that schools are accountable, the report card displays consistent and reliable information about each school and district directly to parents and community members.

3. Who will receive the school report card?

All schools in Oregon that meet the definition of a public school will be included in the Oregon report card system.

4. When will the report cards be issued?

The 2004-2005 school and district report cards will be publicly released on October 13, 2005. Under OAR 581-022-1060, schools and districts must provide copies of the report cards to all parents by March 31, 2006 and are strongly urged to distribute the cards sooner.

5. Do report cards give schools A-F letter grades?

No, schools do not receive letter grades. The law lists the five ratings as Exceptional, Strong, Satisfactory, Low, and Unacceptable.

6. How many report card ratings does a school receive?

As required by state law, each school receives an overall rating which is a composite of four ratings in the following categories: **Student Performance** (Academic Achievement), **Student Behavior** (Attendance/Dropout), **Improvement**, and **School Characteristics** (Participation in Statewide Assessments).

7. What happens if a school receives a *Low or Unacceptable* rating on the report card?

Low and Unacceptable ratings can be addressed and corrected. Report cards help focus local and state assistance with low-performing schools receiving technical assistance from the Department. A school must file a school improvement plan with the Superintendent of Public Instruction, the school district board, and the 21st Century Schools Council of the school.

8. Do districts receive report card ratings?

No, districts do not receive ratings in the Oregon report card system. District report cards contain district-wide statistics and list ratings for schools in the district. However, districts do receive AYP ratings.

Changes for the 2004-2005 Report Card

The following changes are incorporated on the 2004-2005 Report Card:

- **The participation denominator and numerator** will be based on students enrolled on the first school day in May, except answer sheets marked parent refusal for religious or disability related reasons will be excluded when calculating the report card participation rate. The results of students placed in district special education programs will only be included in district reports.
- Decrease the exceptional **cut point for report card participation** from 95% to 94.5% to align with AYP and increase the low cut point from 85.0% to 89.5%
- **The student performance denominator** will include only tests from students enrolled for a full academic year in the school of enrollment on the first school day in May taking a standard administration of a test at or above the student's enrolled grade.
- **Writing assessment results** will be displayed for grades 4 and 7 and will be included only in calculating participation rates for 2004-2005. In addition, results of students responding to a writing prompt in Spanish will be included in determining the percentage of students meeting standards.
- **Science assessment results** will be displayed on the school and district report cards, but not included in report card ratings.
- **Assessment results for Talented and Gifted students** will be displayed on page three of school and district report cards.

Overview of the Formula for the 2004-2005 Report Card

The following key points are discussed further in other sections of this Policy Manual.
Please also see the Technical Bulletin.

School Characteristics Rating

- Schools are accountable for all students' participation in 2004-2005 statewide assessments in reading, mathematics, and writing.
- If less than 89.5% of the eligible students participated in statewide assessments, then the rating for School Characteristics is *Unacceptable*, and the school's overall rating is *Unacceptable*.
- If 89.5% - 94.4% of the eligible students participated in statewide assessments, then the rating for School Characteristics is *Low*, and the school's overall rating is set at a maximum of *Low*.
- If 94.5% or more of the eligible students participated in statewide assessments, then the Overall rating is calculated following the established Report Card procedures.

Student Performance Rating

- Student Performance (Academic Achievement) is calculated as an average of student performance on the 2003-2004 and 2004-2005 Reading and Math Knowledge and Skills Statewide Assessments for elementary and middle schools. Ratings for high schools are based on Reading and Math Knowledge and Skills and Writing Statewide Assessments.
- Improvement is a factor in the Overall rating but is not a factor in this separate category.

Student Behavior Rating

- Student Behavior (Attendance and Dropout) is calculated as an average of attendance rates for school years 2003-2004 and 2004-2005 and dropout rates for school years 2002-2003 and 2003-2004.
- Improvement is a factor in the Overall rating but is not a factor in this separate category.

Overview of the Formula for the 2004-2005 Report Card continued

Improvement

- The component ratings for Student Performance, Student Behavior, and Improvement are calculated separately and displayed separately.
- The Improvement rating is based on four-year improvement in knowledge and skills assessment scores, attendance, and dropout rates.
- The Improvement rating is combined with the Student Performance rating and the Student Behavior rating to determine the Overall rating.

Overall Rating

- The Overall rating is a combination of Student Performance rating (2 year average) + Student Behavior rating (2 year average) + Improvement in Student Performance and Student Behavior (4 year average).

Distribution of the Report Cards

Districts must take responsibility for ensuring that the report cards reach the parents of all children enrolled in Oregon public schools. Most districts choose to mail their report cards, but it is not a requirement. By rule, each parent must receive a copy of the report cards by March 31, and the distribution procedures are left to the discretion of the district. The Department urges districts to distribute the cards earlier than March 31 now that the cards are available in November.

Guidelines for Reproducing and Distributing the Report Cards

Copies for Distribution

The 2004-2005 School and District Report Cards and supporting documents are available for download from the Oregon Department of Education website beginning October 13, 2005. Districts will not receive a packet of report cards and support documents for reproduction from the Department this year. Schools and districts are requested to copy all official report cards on 8.5 x 14 legal-size paper but are not obligated to reproduce and distribute any documents except the actual report cards.

Local Information Panel

Each district is required by state law to reproduce and distribute the report cards in their entirety, exactly as they are received from the Oregon Department of Education. Districts may not cut and paste, delete, or rearrange portions of the official report cards. The only exception to this rule is the design of the information presented by districts within the **Local Information** panel.

The **Local Information** panel is provided for the school and district to communicate local information that is not available statewide. This information might include additional data or honors particular to a school, school improvement plans, or a letter from a superintendent or principal focusing on successes and progress by a school or district.

Local information does not appear on the report cards displayed on the ODE website.

Boxes Marked for *Department of Education Notes*

Many schools have special circumstances that may not apply to all schools but which affect their data or ratings. To provide additional information about the circumstances particular to a school, the Department will use note boxes to reference explanations and clarifications with an asterisk or a superscripted number. The note boxes may not be altered by districts, even though the boxes shown on the report card may be blank. Most schools will have nothing printed in the boxes.

V. Assessment

The Oregon Statewide Assessment system is designed to be comprehensive and inclusive of all students. Options for testing conditions are designed so that every student has the opportunity to participate.

Testing Conditions and the 2004-2005 Report Card Formula

In the following chart, testing conditions are listed with the resulting formula considerations for Student Performance (Academic Achievement) and School Characteristics (Participation in Statewide Assessments). Specific details about the formula and rating of each report card component can be found in the Technical Bulletin.

Testing Conditions	Report Card Formula	
	Student Performance	School Characteristics
Standard assessments	Included	Included
Standard with accommodations	Included	Included
Challenge up	Included	Included
Challenge down	Not included	Included
Extended assessments/CLRAS	Not included	Included
Juried assessments	Included	Included
Modified assessments	Not included	Included
Exempted (First year ELL for reading or writing)	Not included	Included
Non-completers	Included as not meeting standard	Included
Non-consent of parent for religious or disability-related reasons	Not included	Not included
Non-attempt/Non-consent of student	Not included	Included as non-participant
Absent	Not included	Included as non-participant
Side-by-Side Spanish	Included	Included
Side-by-Side Russian (see page 11 for specific details)	Included	Included
Spanish Writing	Included	Included
Plain Language	Included	Included
Students enrolled on the first school day in May that were enrolled during a test window and not tested	Not included	Included as non-participant

Frequently Asked Questions

1. What is student participation?

Student participation is the percentage of students participating in statewide assessments in English/Language Arts and Mathematics at the benchmark grades of 3, 5, 8, 10 and grades 4 and 7 for writing assessments. The Oregon assessment system offers a variety of options for testing conditions with the expectation of including all students. For specific details about the testing conditions, see the table on the previous page.

2. What tests are included in the calculation of student performance?

Student performance is the measure of academic achievement on required statewide assessments for 2003-2004 and 2004-2005 in the following subjects and grades:

- Reading/Literature from students enrolled at grades 3, 5, 8, and 10
- Mathematics from students enrolled at grades 3, 5, 8, and 10
- Writing from students enrolled at grade 10

Only standard administrations of tests at or above a student's grade level are including in the calculation of student performance.

3. What is a rated element?

A rated element is a set of data that has been assigned to a corresponding rating system. Other elements may be reported or displayed but not included in determining a school's ratings.

4. What is meant by the phrase "for display only"?

Many data elements are shown on the report card for informational purposes only, with no ratings attached to the data. The purpose of the displays is to give more information to parents.

5. Students may take benchmark tests that do not correspond with their grade levels. For example, a 5th grader who takes the 8th grade benchmark assessment is "challenging up". Similarly, a 5th grader who takes a 3rd grade test is "challenging down". Are these scores included in the report card calculations?

The scores of students who **challenged up** are figured into both the participation rate and the student performance. Scores will be included in student performance for the grade level in which the student is currently enrolled. The students who **challenged down** will be counted in participation but will not be included in the formula calculations for student performance.

Frequently Asked Questions continued

6. Are students with limited English proficiency included on the report card?

Yes, those students who are able to participate in the state mathematics assessments in Spanish, Russian, or English are included in **Student Participation**. Some scores will also be included in **Student Performance**. See the chart below for specific details. Students who participate in the writing assessment in Spanish are also included. Please see the chart below for specific details.

2004-2005 Oregon Statewide Assessments for English Language Learners	
Reading/Literature	Operational test. (No current English Language Learners test.)
Math Knowledge and Skills	Plain Language: Included in Performance and Participation. Spanish/English Side-by-Side: Included in Performance and Participation. Russian/English Side-by-Side: Included in Performance and Participation.
Writing	Spanish/English: <ul style="list-style-type: none"> ▶ Responses in English included in Performance and Participation. ▶ Responses in Spanish included in Performance and Participation.
Science	Spanish/English Side-by-Side: Included in Performance and Participation. Operational test. Russian/English Side-by-Side: Included in Performance and Participation. Considered a modified administration.

7. Beginning with the Spring 2001 assessments, ODE has provided extended assessments. How are these assessment scores included on the report card?

The scores of students taking extended assessments will be included in participation but will not be included in student performance.

8. Are students who are using the TESA (Technologically Enhanced Student Assessment) system included on the report card?

Yes, those students who are assessed using TESA will have their scores included in student performance and participation formulas.

9. What is the policy for students who fail to answer the minimum number of questions to determine a valid test score?

Students who fail to answer the minimum number of questions on a standard test administration will be included in the student performance rating in the category “very low” and will be included in participation as “Participated in Statewide Assessments”.

10. How will students of non-consent parents be included on the report card?

Students whose parents provide a written refusal of consent on the basis of religious or IEP disability related reasons will not be included in the 2004-2005 report card calculations for student performance or participation. The students are considered ineligible for testing.

11. How are the scores reported for 11th and 12th grade students taking the CIM assessments?

Students in Grades 11 and 12 who are taking the Grade 10 CIM test will not be reported in either participation or in student performance. Only the scores of students who are in benchmark grades are included in participation and student performance.

12. How are the scores reported for 9th grade students taking the CIM assessments?

Students who are in 9th grade may elect to take the CIM assessment. Scores will be held until the student is in Grade 10. If the student retests in Grade 10, the higher score will be reported.

13. If a student completes a writing assessment that is off-topic, how is the score used in calculating student performance and participation?

A writing assessment that is complete but off-topic is counted as a “Does Not Meet” in student performance. The score is included in participation.

14. How are Writing “Conditionally Meets” scores used in the *calculations* of the report card ratings?

A “conditionally meets” assessment score counts as “nearly meets” when calculating the student performance rating and the overall rating. The score is included in participation. See the Technical Bulletin for the cut points defining performance levels on the state assessments included on the report card.

15. How are “Conditionally Meets” in Writing included in the *displays* on the report card?

On page 2 of school and district report cards, the graphs entitled “Percent of Students Meeting Standards” include the “conditionally meets” scores on Writing assessments as “meets” the standards. In reporting statewide assessment results on page 3 of the report cards, “conditionally meets” scores are included in the column “does not meet” standard.

16. Where will the assessment scores be reported for the students who are in alternative programs?

Districts are responsible for attaching student test scores from alternative programs to report card schools in situations where the school is responsible for making educational decisions about the student. For alternative programs that have a direct relationship with a single high school, the Department will consult with the district about the addition of the test scores for the alternative program to the high school's results. For alternative programs that do not have a direct relationship with a single high school, it is the responsibility of each district to ensure the integrity of the system by accounting for all students' participation in statewide assessment.

17. Where can I find more information about state assessments?

More details about the Oregon Statewide Assessment System can be found on the Assessment and Evaluation website at <http://www.ode.state.or.us/search/results/?id=169>

VII. Ratings and Formulas

Please refer to the Technical Bulletin for a detailed explanation of the rating system and its calculations.

Circumstances Which May Prevent a School From Receiving a Rating(s)

All schools will receive report cards; however, some schools will not receive ratings.
See below for circumstances which may apply to particular schools.

Circumstances	Will the school receive a Report Card?	Will the school receive a Rating in				
		School Characteristics	Student Performance	Student Behavior	Improvement	Overall
Less than a 2-year combined total of 80 test scores in Reading and Math Knowledge and Skills tests.	Yes	Yes	No	Yes	No	No
During each of the two most recent years, fewer than 25 students attending the school.	Yes	Yes	No	No	No	No
Schools without a benchmark grade (Grades 3, 4, 5, 7, 8, 10).	Yes	No	No	Yes	No	No
Schools newly opened within the last year.	Yes	Yes	No	No	No	No
Schools with a significant population change due to boundary changes.	Yes	Yes	No	No	No	No
Schools with a significant population change due to grade level configuration changes.	Yes	Yes	No	No	No	No
Schools with less than two years of data.	Yes	Yes	No	No	No	No
Schools with only two years of data.	Yes	Yes	Yes	Yes	No	No

Years of Data

Using four years of data is optimal in calculating the Improvement rating and the Overall rating. However, some schools do not have four consecutive years of data. In these cases, three years of data may be used to calculate Improvement in Student Performance (academic achievement) and Student Behavior (attendance/dropout). The two most recent years of data will be used for improvement and the other year will be used for a baseline.

Please note that only one year of data is used to determine the school characteristics rating.

Confidentiality

Under certain conditions, summary data is not reported. The confidentiality data suppression rules are shown below.

Data Suppression Rules

Rating Category	Condition	Display
Student Performance Academic Achievement	Percent of students meeting benchmark is either 0% or 100%	Data is either categorized as <i>5% or less</i> or <i>95% or greater</i> .
Student Performance Academic Achievement	Number of students tested in a subject area or an ethnic group is 5 or less	Data is suppressed.
SAT	Number tested is 5 or less	Performance data is suppressed. Participation will be displayed.

Rounding calculations

Rounding to the nearest tenth occurs after every arithmetic calculation.

Overall Rating

Formula

The Overall Rating will be based on a weighted average of the component ratings:

Student Performance (Academic Achievement)

For Elementary and Middle Schools:

The rating will be calculated as an average of student performance on the 2003-2004 and 2004-2005 statewide knowledge and skills assessments in reading and math.

Student Performance (Academic Achievement)

For High Schools:

The rating will be calculated as an average of student performance on the 2003-2004 and 2004-2005 statewide assessments in reading and math knowledge and skills, and writing.

Student Behavior (Attendance)

For Elementary and Middle Schools:

The rating will be calculated as an average of student attendance in 2003-2004 and 2004-2005.

Student Behavior (Attendance/Dropout)

For High Schools:

The rating will be calculated as an average of student attendance rates in 2003-2004 and 2004-2005 and dropout rates in 2002-2003 and 2003-2004.

Improvement will be based on changes in performance on statewide reading and math knowledge and skills assessments, attendance rates, and dropout rates from 2000-2001 to 2004-2005.

School Characteristics will play a key role in determining the Overall Rating.

- If 94.5% or more of the eligible students participated in the 2004-2005 statewide assessments, then the overall rating formula will be applied to the school data. The Overall rating will be one of the following: *Exceptional, Strong, Satisfactory, Low, or Unacceptable.*
- If 89.5% - 94.4% of the eligible students participated in the 2004-2005 statewide assessments, the school will receive a maximum Overall rating of *Low*.
- If less than 89.5% of the eligible students participated in the 2004-2005 statewide assessments, the school will automatically receive an *Unacceptable* Overall rating.

Display

The 2004-2005 report card will again feature a continuum displaying the Overall rating.

State Average

The state average has **no** impact on the calculation of a school's Overall rating. The state averages are displayed on the report card for informational purposes only.

Student Performance (Academic Achievement) Rating

Performance Levels Used in the Report Card Calculations

Five performance levels of assessment results: Exceeds, Meets, Nearly Meets, Low, and Very Low.
The scale score ranges for each performance level are shown below by test and by grade level.

Oregon Assessments Performance Levels and Cut Scores by Content Area and Grade					
Content Area and Grade	Scale Score Ranges for Each Performance Level				
	Exceed the Standard	Meet the Standard	Nearly Meet the Standard	Low	Very Low
Reading/Literature					
Grade 3	215 & above	201 – 214	196 – 200	190 – 195	below 190
Grade 5	231 & above	215 – 230	209 – 214	201 – 208	below 201
Grade 8	239 & above	231 – 238	223 – 230	208 – 222	below 208
Grade 10	249 & above	239 – 248	230 – 238	214 – 229	below 214
Math Knowledge and Skills					
Grade 3	215 & above	202 – 214	196 – 201	186 – 195	below 186
Grade 5	231 & above	215 – 230	210 – 214	202 – 209	below 202
Grade 8	239 & above	231 – 238	225 – 230	216 – 224	below 216
Grade 10	249 & above	239 – 248	229 – 238	219 – 228	below 219
Writing					
Grade 4	40—48	32—39	28—31	16 – 27	0 – 15
Grade 7, 10	50 – 60	40 – 49	35 – 39	20 – 34	0 – 19
Science					
Grade 5	239 & above	223 – 238	210 – 222	202 – 209	below 202
Grade 8	247 & above	233 – 246	227 – 232	216 – 226	below 216
Grade 10	252 & above	239 – 251	233 – 238	222 – 232	below 222

Formula

Elementary and Middle School: Student Performance will be calculated as an average of scores on Reading and Math Knowledge and Skills statewide assessments for the two most recent years.

High School: Student Performance will be calculated as a weighted average of scores on Reading and Math Knowledge and Skills and Writing statewide assessments for the two most recent years .

Display

The percentage of students meeting or exceeding the standards will be displayed for Reading, Math, and Science Knowledge and Skills tests. Graphs will display the percentage of students exceeding, meeting, and conditionally meeting the state standards on Writing.

Weights

Elementary and Middle School: In calculations of the Student Performance ratings, results for Reading and Math Knowledge and Skills assessments will each contribute 50% of the total.

High School: In calculations of the Student Performance ratings, results for Reading and Math Knowledge and Skills will each contribute 39% and Writing will contribute 22% of the total.

Student Behavior (Attendance/Dropout) Rating

Grades Used in Calculating the Attendance Rate

Grades 1-12 are used in calculating the attendance rating. Kindergarten will not be included in the attendance rating.

Grades Used in Calculating the Dropout Rate

Grades 9-12 are used in calculating the dropout rate.

Formula

Elementary and Middle School: The Student Behavior rating will be calculated as an average of attendance rates during the two most recent years.

High School: The Student Behavior rating will be calculated as an average of attendance and dropout rates during the two most recent years.

Display

The attendance and dropout rates will be displayed in table format as shown below.

Attendance Student Behavior Rating: Strong

Attendance	School	District	State
2003-2004	95.0%	92.3%	94.1%
2004-2005	95.0%	92.3%	94.1%

Dropout Student Behavior Rating: Strong

Dropout	Number	School	District	State
2002-2003	3	5.2%	5.2%	6.2%
2003-2004	3	5.2%	5.2%	4.2%

Improvement Rating

Emphasis on Improvement

The Oregon Report Card rating system credits schools for improving student performance on statewide assessments, attendance, and the dropout rate. Because the Oregon Accountability System is a continuous improvement model, student growth is expected, and schools are expected to continuously update their school improvement plans.

Formula

The Improvement rating will be based on four-year improvement in reading and math knowledge and skills assessment scores, attendance, and dropout rates. The component ratings for Student Performance (Academic Achievement), Student Behavior (Attendance/Dropout), and Improvement will be calculated separately and displayed separately. The Improvement rating will be combined with the Student Performance rating and the Student Behavior rating to produce the Overall rating.

Display

Four-Year Improvement in Student Performance and Student Behavior will be rated and displayed on the 2004-2005 Report Card. Historical data for Reading and Math Knowledge and Skills, Attendance, and Dropout rates will be displayed on graphs. See examples below.

School Characteristics Rating

Emphasis on the Percentage of Students Tested

The percentage of students who participate in statewide assessments is a good indicator of whether all eligible students receive the same basic educational opportunities. High participation rates also help ensure sound comparisons over time, a key element of validity.

School Characteristics will play a key role in determining the Overall rating.

- If 94.5% or more of the students participated in statewide assessments in 2004-2005, then the Overall rating formula will be applied to the school data. The Overall rating will be one of the following: *Exceptional, Strong, Satisfactory, Low, or Unacceptable*.
- If 89.5%-94.4% of the students participated in the 2004-2005 statewide assessments, the school will receive a maximum Overall rating of *Low*.
- If less than 89.5% of the eligible students participated in statewide assessments in 2004-2005, the school will automatically receive an *Unacceptable* Overall rating.

Formula

The participation rate is the proportion of the number of tests from students enrolled on the first school day in May eligible to be assessed to those who actually received scores. The participation rate: The number of participating tests from students enrolled on the first school day in May **DIVIDED BY** the number of expected tests from students enrolled on the first school day in May **MINUS** the number of students that were ineligible for testing (exempted by parents for religious or disability related reasons). Note that registered home schooled students, private school students, tuitioned students and students attending public or private alternative programs that are not claimed by any district for ADM or did not receive instruction from the district in the state content standards during the 2004-05 school year are excluded from district and school report card and calculations.

Number of Participating tests in reading, mathematics, and writing

Expected Number of Participating tests in reading, mathematics, and writing — Number tests from students that were ineligible for testing

Display

The rates of participation in statewide assessment will be displayed in table format as shown in the example below.

Grade 10	School	State
Participated in 2004-2005 Statewide Assessments	98.0%	98.0%

VII. Data, Data Sources, and Key Dates

Data Validation

Schools are given multiple opportunities to validate the data that are used on the report cards. Data validation windows are scheduled in advance. If it is believed that an error exists, there are multiple opportunities for appeal and subsequent correction prior to the release of the report cards in October.

Report Card Preview Days

Report cards will be ready for examination on the ODE website prior to the public release. The purpose of this preview window is to provide schools and districts with time to prepare communication materials during the week of the public release. **Changes will not be made to the report cards during the preview window unless the Department made an error.**

After the Report Card is Released

If a district or school finds an error after the report cards are released to the public, a correction will be made only if the Department made the error. If the district validated the data as it is displayed on the report cards, corrections will be made for historical purposes, but the report cards will not be re-released.

Data Sources for the Report Card

Many data collection reports are *filed* each year with the Oregon Department of Education. Staff members in each school district are responsible for *reporting* the information and *validating* some of the same information later in the year. The Oregon Department of Education collects this information and annually displays the data on the school and district report cards.

Data Sources for the Report Card				
Report Card Element	Data Collection Survey	ODE Staff	(503) 378-3600 Extension	Due Date

Key Dates in Report Card/AYP Determination Process 2004-2005

May 1 - 30	Spring Validation Window of Report Card Data Elements. Changes made after this date to data elements included in the validation will not be reflected in AYP, Report Card or Assessment Group report results.
April 15	Spring Student Membership 04-05 Collection opens (required for AYP determinations)
May 1	NCLB English Proficiency 04-05 Collection opens (required for AYP determinations)
June 1	Student tests records for all subjects and tests (except Writing administered in Spring Testing Window) loaded in Student Centered Staging
June 3	Extract of data from Spring Student Membership 04-05 and NCLB English Proficiency 04-05 Collection for application to test records and generation of virtual records
June 13	Pre-preliminary school and district AYP data and report card detail data on ODE district secure website
July 8	Due date for Annual ADM 04-05, NCLB Staff 04-05, Class Size 04-05. Due date for Early Leaver 04-05 and School/Program Registration Collections 05-06 used for 05-06 AYP and Report Cards.
July 25	Last date for changes to: <ul style="list-style-type: none"> • Spring Student Membership 04-05 • NCLB English Proficiency 04-05 • Assessment test records For inclusion in Preliminary AYP reports. These data will be released to the media and general public. Districts that wish to have final AYP determinations match these preliminary AYP determinations should complete edits to these collections by this date. (Note: For the 2005-06 reporting year, this date is anticipated to be moved up to July 1, 2006)
August 2	Preliminary school and district AYP designations with supporting data on ODE district website Preliminary report card detail sheets on ODE district website
August 5	Public release of preliminary AYP designations for all schools and districts on the ODE website
August 5 – 26	Requests by districts for AYP data reviews prior to final designation of AYP
August 17	Due date for Suspensions/Expulsions/Truancy 04-05
August 26	Last date for changes to: <ul style="list-style-type: none"> • Spring Student Membership 04-05 • NCLB English Proficiency 04-05 • Assessment test records Changes made after this date to these data elements will not be reflected in Final AYP determinations, Report Card or Assessment Group report results.
September 1	Requested AYP data reviews completed for all schools and districts
Aug. 5 – Sep. 28	Fall Validation Window of Report Card Data Elements Changes made after this date to data elements included in the validation will not be reflected in Report Card publications
October 10	District preview of 2004-05 school and district report cards, including final AYP designations and supporting detail sheets, on ODE district website
October 13	2004-05 school and district report cards, including final AYP designations and supporting detail sheets, available to public on ODE website
No later than March 31, 2006	Distribution of school and district report cards completed by districts. Districts are responsible for downloading, duplicating, and distributing report cards as described in the <u>Report Card 2004-2005 Policy Manual</u>

VIII. Special School Situations

Boundary changes and grade level configuration changes

- Schools that had at least a 20% change in average student membership due to a boundary change or grade level configuration change will be noted with an asterisk.
- In cases where the change in average student membership is 40% or more or boundary changes have caused 40% or more of the students to newly attend the school, the school will be considered a new school and the data history will be removed. Consequently, the school will only be rated in school characteristics for the first report card issued after the change. The school will receive a report card.
- Districts must request “new school status” **by sending a letter to ODE**. The letters should be addressed to the attention of Jon Bridges before May 15, 2004, and provide evidence of the change that occurred between the 2003-2004 and 2004-2005 school years.
- Boundary changes will be noted with superscripted numbers or an asterisk next to component ratings. Footnotes will offer a brief summary of additional information.

Special Circumstances and Data

Attendance rates are not mitigated by excused or unexcused absences. Please refer to the Student Personnel Accounting Manual for additional information about student attendance.

<https://district.ode.state.or.us/docs/sfda/manuals/studaccman.pdf>

Alternative Programs

All students in Oregon public schools at benchmark years will have assessment scores, and all students must be accounted for. If students attend a district alternative program that does not receive a report card, the scores of those students will be reported with a school or district that does receive a report card.

Alternative and Charter Schools

Alternative and charter schools are subject to the same rating formula as regular schools. Many alternative schools do not receive Overall ratings because the school population is too small.

Private Schools

Private school students are not required to take statewide assessments. Unlike public schools, private schools do not receive report cards.

IX. Title I

Federal Requirements of *No Child Left Behind*

The report cards are the tools for displaying the reporting requirements of the federal No Child Left Behind Act. For specific information about AYP and program improvement status, visit the AYP Home Page at: <http://www.ode.state.or.us/search/results/?id=198> or contact the Oregon Department of Education at 503.378.3600 x 2287 or email ayp.reports@state.or.us. For information about accountability requirements for Title I schools and districts, please contact the Oregon Department of Education at 503.378.3600 x 4504.
