

High School Success Plan 2021-2023

Lead Organization **Bridge Charter Academy**

Goal #1	100% of 9th graders on-track to graduate.
Short-Term Outcome	High School teachers are meeting bi-weekly 1:1 with 9th-grade students with an emphasis on our focal students to review progress and set short-term/long-term goals. The High School teachers will check in monthly with parents of 9th-graders to discuss student progress barriers to achieving end-of-the-year goals. The High School team will meet monthly to look at relevant data and will assign and evaluate interventions they will collaborate on how effective they were and adjust accordingly. If needed the Growth/Intercession teams (relevant support staff and teachers) will meet with parents (with an emphasis on our focal groups families) to agree on a plan for additional school supports for students off-track.
Long-Term Outcome	We will increase our 9th grade on track by 25% by the end of the 2024-25 school year. We will also work to support Middle schoolers earning high school credit so that when they enter HS they are already working towards their 6 credits needed to be considered on track. We will expect the largest increases seen in our focal student groups identified in the district needs assessment.
Goal #2	All 11th-grade students take at least one college course or CTE option.
Short-Term Outcome	Middle and High school teachers will set college and career goals for students. Then actively encourage students who have not traditionally enrolled in advanced coursework or career paths to consider and test these options as appropriate to their post-high school plans as described in the student's educational plan in profile.
Long-Term Outcome	Establish a CTE team that would establish partnerships with other schools and local businesses in order to connect our students with CTE classes/programs in other public schools and internships with local businesses. These partnerships will increase student participation in AC and CTE courses by 5% each year.
Dropout Prevention Activity #1	We will encourage students to participate in dual enrollment opportunities through connected school districts and companies.
Goal(s) this activity addresses	Goal 1 , Goal 2
College Level Opportunities Activity #1	BCA offers a Dual Credit Scholarship opportunity for all HS students, including career pathway options.
Goal(s) this activity addresses	Goal 1 , Goal 2
