Lead Organization	Ione
Goal #1	Student and parents will understand the state graduation requirements and put together an educational plan that best fits the individual goals of each student. This would include a knowledge of available classes through CTE, Eastern Promise, on-line, and classes offered at Ione High School.
Short-Term Outcome	Every parent/guardian who has a child enrolled in a Agricultural Education CTE class is contacted by the Agricultural Education Director to go over the student's education plan and the Program of Study for CTE throughout their years within the program. They go over course selection and scheduling beginning at the end of their 8th grade year or their beginning of their 9th grade year. The District will have a Freshman (and Parents) orientation night in the fall of each year to learn about and map out the required courses,as well as CTE, Dual Credit College courses they might like to take during their High School years. In addition, we will have a student/parent FAFSA night to info and fill out FAFSA forms for graduating students.
Long-Term Outcome	100% of our students will be taking CTE or College Dual Credit classes
Goal #2	Staff, parents, and students must understand the importance of attendance, grades, and interventions to help the students graduate and be prepared for college/careers.
Short-Term Outcome	During the following activities, we emphasize the importance of attendance, grades, and available interventions for all students. The District will have a Freshman (and Parents) orientation night in the fall of each year to learn about and map out the required courses,as well as CTE, Dual Credit College courses they might like to take during their High School years. In addition, we will have a student/parent FAFSA night to info and fill out FAFSA forms for graduating students.
Long-Term Outcome	Continued use of orientation nights
Career Technical Education Activity #1	Supporting Manufacturing Technology Program of Study.
Goal(s) this activity addresses	Goal 1 , Goal 2
