

Best practices with Strategic Reopening

Progressive opening K-3, 4-12. Bringing Students back to in person learning strategically in sections.

Staffing has been a large concern that I have heard from others. Here is how I opened in phases and it was extremely successful.

- Opening K-3 I utilized extra food service staff from MS, HS locations to assist with putting systems in place for Grab & Go.
- This provided 2 things “Hands on Training for MS & HS food service workers” that in turn was taken back to their school sites.
- It also helped with Determining “staffing hours needed” for K-6, 7-12 locations.

Recommendation:

- Use a “closed site” in CNPweb to focus on your onsite Learning.
- Grab & Go: have onsite learning students have a signup sheet per class that Nutrition can pick up and prepare.

Equity:

- All Students in Cohort Onsite Learning will only take home Grab & Go on their second cohort day.
- ELD students or LIPI take home Grab & Go at the end of the day.
- Monday- Friday Students consume all meals at school.
- Online or Distance Learning Enrolled Students have a designated Date, Locations for Pick-up at school. Have Secretarial or Paras support with Verification of Distance Learning off the Updated Enrollment list.
- For Deliveries Have either a pre Sign-up or Quarantine List per Bus Route

All other accommodations outside of this Guidance will be made by a case by case basis by Nutritional Services.

When Thinking of Equity it is defined by the Program.

District wise all Students are verified per Enrollment as Meals Received.

Network Community wise sharing other CNP programs locally. I joined 2 Boards, 3 Counsels for Klamath County in order to remain effective in communication.

Setup a Feedback for Parents to communicate to Nutrition.
