

The Oregon Department of Education Child Nutrition Programs (ODE CNP) has requested student data pertaining to eligibility for free or reduced price meals from all schools and school districts that participate in the National School Lunch Program (NSLP).

Below is a list of schools that have reported data. ODE CNP, in partnership with The Department of Human Service (DHS) is working to process the data in an effort to distribute the Pandemic Electronic Benefits (P-EBT) to eligible students.

**If you have questions pertaining to whether or not your student was included in school or school district data that was reported to the ODE CNP, please contact your student's school directly.**

**P-EBT Data column**

**Not Reported** = The school or school district has not reported data. If your child attends a school within a school district that has not reported, this may affect P-EBT eligibility of your student. Please contact the school district directly with questions

**Reported** = The school district has reported student data and the data has been accepted

**Partially Reported** = The school or school district has reported a partial list (please contact the school or school district for student specific questions)

**Incomplete Reported** = The school or school district has submitted data, but the data was not accepted. ODE CNP is working with these school districts to correct the issue.

School / School District	P-EBT Data
