## Fraction Bar Refresher

### Part I

Draw lines to divide the whole unit into equal parts. Then label each section.

<b>Whole</b>	1											
<b>Twelfths</b>	$\frac{1}{12}$	$\frac{2}{12}$	$\frac{3}{12}$	$\frac{4}{12}$	$\frac{5}{12}$	$\frac{6}{12}$	$\frac{7}{12}$	$\frac{8}{12}$	$\frac{9}{12}$	$\frac{10}{12}$	$\frac{11}{12}$	$\frac{12}{12}$
<b>Halves</b>												
<b>Thirds</b>												
<b>Fourths</b>												
<b>Sixths</b>												

### Part II

Using the fraction bars above, write the equivalent fractions.

$\frac{1}{3}$ is equal to $\frac{\quad}{6}$ and $\frac{\quad}{12}$	$\frac{8}{12}$ is equal to $\frac{\quad}{3}$ and $\frac{\quad}{6}$
$\frac{1}{2}$ is equal to	$\frac{3}{4}$ is equal to

### Part III

Split each of the following bars to illustrate the equality.

$$\frac{4}{5} = \frac{8}{10}$$

$$\frac{2}{3} = \frac{4}{6}$$

### Part IV

Compare using  $>$ ,  $<$ , or  $=$

$\frac{3}{4}$	$\frac{5}{6}$	$\frac{3}{3}$	$\frac{3}{4}$	$\frac{2}{3}$	$\frac{5}{12}$	$\frac{3}{5}$	$\frac{6}{12}$	$\frac{8}{12}$	$\frac{4}{6}$
---------------	---------------	---------------	---------------	---------------	----------------	---------------	----------------	----------------	---------------
