

Oregon Department of Education  
Rob Saxton, Deputy Superintendent

# 2013 Annual School Nurse Report

This report was amended on April 21, 2014 to correct the number of certified nurses on page 3 to 161.64 and to remove the language that defined a “school nurse” as a subset of registered nurse to align with district reporting.

*Sarah Drinkwater, Assistant Superintendent*  
*Leslie Currin, State School Nurse - 1-503-947-5812*

## Executive Summary

Many Oregon students arrive at school with health conditions that influence the student’s ability to access and benefit from the education provided. School nurses help to meet the needs of such students.

Oregon law sets forth staffing ratios for the following:

- nurses and medically complex students (1:225)
- nurses and medically fragile students (1:125)
- nurses and nursing-dependent students (1:1)
- encouraged: nurses and enrolled students (1:750)

Oregon law also directs the Oregon Department of Education to report to interim legislative committees information regarding the availability of licensed practical nurses, registered nurses and school nurses in each school district and the number of medically complex, medically fragile, and nursing dependent students in each school district. The report is due October 1 of each year and covers the prior school year.

### School Nurse Availability

<b>2012-13 School Year</b>			
<b>School Year</b>	<b># of Students Reported</b>	<b>Nurses Reported (total combined FTE)</b>	<b>Ratio</b>
<b>2010-11</b>	472,388	230	1:2,053
<b>2011-12</b>	428,421	235	1:1,823
<b>Data submitted by school districts during the annual collection</b>	414,058	177.74	
<b>Data solicited from districts by phone</b>	149,461	86.96	
<b>2012-13 Total</b>	563,519	264.70	1:2,128

The ratio of nurses to students, in districts reporting data for the 2012-2013 school year is **1:2,128**

## Students in Need of Nursing Care

2012-13 School Year			
School Year	# of Medically Complex Students	# of Medically Fragile Students	# of Nursing Dependent Students
2010-11	8,073	1,997	280
2011-12	12,705	3,178	89
Data submitted by school districts during the annual collection	14,717	2,124	100
Data solicited from districts by phone	2,772	373	24
<b>2012-13 Total</b>	<b>17,489</b>	<b>2,497</b>	<b>124</b>

# **School Nurses in Oregon and Students with Certain Medical Impairments**

(House Bill 2693, 2009)

## **Background**

Many Oregon students arrive at school with existing health conditions that influence the student's ability to access and benefit from the education provided. In order to best assist these students to complete and excel in their educational efforts, it is vital that health care needs within the school program be addressed and met.

The data presented in this report<sup>1</sup> is an effort to reflect more accurately the actual health needs of Oregon students and the overall numbers of students who have health care needs in Oregon schools. It also presents data on the number of school nurses who provide this care in the Oregon public school setting.

## **Who is Providing Health Care in Schools?**

Health care in schools is provided by nurses licensed to practice in the state by the Oregon State Board of Nursing. Under Oregon law, Licensed Practical Nurses must be supervised by Registered Nurses. The number LPNs who work in schools is considerably fewer than the number of registered nurses. According to the Oregon State Board of Nursing, Oregon has 50,466 Registered Nurses and only 4,679 Licensed Practical Nurses, statewide.<sup>2</sup>

As defined by ORS 342.455, a "school nurse" means a registered nurse who is certified by the Teacher Standards and Practices Commission as qualified to conduct and coordinate the health services programs of a school. The TSPC issues a certificate to those who meet the requirements promulgated by the commission for school nurses, though there is no state requirement that schools/school districts employ TSPC certified school nurses (ORS 342.495).

To be eligible for a school nurse certification, the individual must hold a current registered nurse license issued by the Oregon State Board of Nursing and must successfully complete 30 clock hours, three quarter hours, or two semester hours of specified coursework that includes school health policies, issues, and funding; school law and legal responsibilities of school nurses; the nursing process in the school setting; schools and society; mental health and counseling concepts; the exceptional child characteristics (disabled, gifted, learning disabled); physical and developmental assessment of the school-age child; the role and responsibilities of the school nurse; human growth, development, and learning; diversity; and school emergencies.<sup>3</sup> There are 161.64 certified school nurses in Oregon.<sup>4</sup>

---

<sup>1</sup> Some, but not all, of these conditions may also be reflected in state data on Special Education.

<sup>2</sup> <http://www.oregon.gov/OSBN/Pages/index.aspx>; Retrieved 9/30/2013

<sup>3</sup> OAR 584-021-0130

<sup>4</sup> NOTE: Oregon universities do not offer this coursework; nurses must attend schools in other states, generally Washington or California.

Oregon law<sup>5</sup> allows school districts to train non-health professionals to meet the needs of medically complex students and students without identified medical needs. The vast majority of this training is provided by licensed nurses; thus, one nurse, working for a district, may delegate and training non-licensed school staff in tasks of nursing. Nurses have the authority to perform this delegation and training under Division 47 of the Oregon Nurse Practice Act. These personnel *are not* reported to the Oregon Department of Education and therefore, ODE staff does not know how many non-medically licensed school district staff are used to meet this standard. As a result, the reported ratios may be misleading.

## **Oregon Law**

In addition to laws setting forth the requirements for nurses, Oregon law sets forth a nurse to student staffing ratio (ORS 336.201).<sup>6</sup>

*(2) Each school district shall ensure that the district has access to a sufficient level of nursing services to provide:*

*(a) One registered nurse or school nurse for every 225 medically complex students.*

*(b) One registered nurse or school nurse for every 125 medically fragile students.*

*(c) One registered nurse or school nurse, or one licensed practical nurse under the supervision of a registered nurse or school nurse, for each nursing-dependent student.*

*(3) In addition to the requirements of subsection (2) of this section, each school district is encouraged to have one registered nurse or school nurse for every 750 students in the school district.*

*(4) (a) A school district may satisfy the requirements of subsection (2) of this section by using the most cost-effective means available.*

*(b) A school district may satisfy the requirements described in subsection (2)(a) of this section and the recommendations described in subsection (3) of this section by:*

*(A) Providing personnel trained and supervised by a registered nurse or school nurse; and*

*(B) Complying with the requirements of ORS 678.010 to 678.445.*

*(5) (a) A registered nurse or school nurse is responsible for coordinating the school nursing services provided to an individual student. The registered nurse or school nurse shall work in partnership with the student's parent or guardian, health care provider and appropriate school staff to the extent allowed by law.*

*(b) Decisions related to when or where a student receives school nursing services must jointly be made by the registered nurse or school nurse, the parent or guardian of the student and any appropriate school staff. This paragraph does not apply to students who have an individualized education program and for whom special education and related services are determined by an individualized education program team.*

---

<sup>5</sup> ORS 336.201(4)(b)(A)

<sup>6</sup> HB 2693 (2009)

(6) *The Department of Education shall submit to the State Board of Education and the interim legislative committees related to education an annual report no later than October 1 of each year that is based on the previous school year and that provides information on:*

*(a) The availability of licensed practical nurses, registered nurses and school nurses in each school district; and*

*(b) The number of medically complex students, medically fragile students and nursing-dependent students in each school district.*

**Sec. 5.** *For the purpose of fulfilling the recommendations for registered nurses and school nurses in a school district, as described in section 2 (3) and (4)(b) of this 2009 Act [336.201 (3) and (4)(b)], as amended by section 4 of this 2009 Act, school districts are encouraged to provide:*

*(1) One registered nurse or school nurse for every 3,500 students by July 1, 2014.*

*(2) One registered nurse or school nurse for every 2,500 students by July 1, 2016.*

*(3) One registered nurse or school nurse for every 1,500 students by July 1, 2018.*

*(4) One registered nurse or school nurse for every 750 students by July 1, 2020. [2009 c.843*

*§5]*

The annual School Nurse Report consists of two sections:

- Section One: School Nurse availability in Oregon
- Section Two: The number of students with medical impairments (medically complex, medically fragile and nursing dependent)

### **Data Collection 2012-13**

School districts were asked to submit data May-July 2013 for the previous school year. ODE staff communicated the data request to all districts in a variety of formats. Additionally, training via video conferencing was offered to all districts and posted on the ODE website for later access.

By the deadline, ODE had received data from 121 out of 197 school districts in the state. ODE staff followed up with personal phone calls to districts that hadn't submitted by the deadline. Following phone calls, ODE had data on 195 of 197 school districts.

### **Section 1: School Nurses in Oregon**

In the 195 districts that reported, there are 264.70 full-time equivalent (FTE) nurses employed who serve students. *See district-by-district data in Appendix A.*

Total enrollment in Oregon schools, according to the Fall Enrollment report for 2012-2013 was 563,714 students.

[http://www.ode.state.or.us/wma/data/schoolanddistrict/students/docs/fallmembershipreport\\_2012\\_2013.xls](http://www.ode.state.or.us/wma/data/schoolanddistrict/students/docs/fallmembershipreport_2012_2013.xls)

The ratio of nurses to students, in districts reporting data for the 2012-2013 school year, is **1:2,128**.

School Year	# of Enrolled Students in Reporting Districts	Nurses Reported (total combined FTE)	Nurse: Student Ratio
2010-11	472,388	230	1:2,053
2011-12	428,421	235	1:1,823
Data submitted by school districts during the annual collection	414,058	177.74	1:2,128
Data solicited from districts by phone	149,461	86.96	
<b>2012-13 Total</b>	563,519	264.70	

Understanding that districts may need time to increase the number of school nurses in district schools, House Bill 2693 (2009) provided phased-in targets. Schools were encouraged to provide the following nurse-to-student ratios:

- One registered nurse or school nurse for every 3,500 students by July 1, 2014
- One registered nurse or school nurse for every 2,500 students by July 1, 2016
- One registered nurse or school nurse for every 1,500 students by July 1, 2018
- One registered nurse or school nurse for every 750 students by July 1, 2020

Number of Nurses Reported in Oregon Schools Combined Total FTE				
Category	2011-12	Data submitted by school districts during the annual collection	Data solicited from school districts by phone	2012-13 Total
Licensed Practical Nurses	31.80	31.51	3.80	35.31
Registered Nurses	202.69	146.23	83.16	229.39
<i>School Nurses (Registered Nurses who meet the further requirements set in place by the Teacher Standards and Practices Commission and may be designated by that Commission as 'school nurses')</i>	<i>53.00</i>	<i>138.50</i>	<i>23.14</i>	<i>161.64</i>

## Section Two: Students with Medical Impairments

For purposes of this report, students with medical impairments fall into three categories:

- *medically complex*
- *medically fragile*
- *nursing dependent*

NOTE: Some of the data for this report is reflected in the Special Education Child Count and the Special Education Child Find education health impairments data collection including: Intellectual Disability, Hearing Impairment, Visual Impairment, Deaf-Blindness, Speech or Language Impairment, Emotional Disturbance, Orthopedic Impairment, Traumatic Brain Injury, Autism Spectrum Disorder, Specific Learning Disability, Developmental Delay, and Other Health Impairments. However, IDEA and 504 Health-Eligible students are not the totality of students in Oregon schools who have health impairments which impact their educational access. (e.g. children with asthma)

### Medically Complex Students

Oregon law defines “medically complex students” as those students who may have an unstable health condition and who may require daily professional nursing services.”<sup>7</sup>

Students in this category have health conditions which require a licensed nurse to do an assessment, write a health care plan, and teach tasks of care to non-nurse school staff who are working directly with the student. The nurse has intermittent direct contact with the student, for instance to write a health care plan, address emergent problems, monitor school staff performance of tasks, access new medical orders, and similar tasks.

An example of a student in this category would be one who has medically stable epilepsy. The school nurse will access medical orders, assess the student, write a care plan for the student, and teach non-nurse school staff how to recognize and assist the student during student seizure activity. The nurse will also periodically monitor the student during the school year, and intervene if a change is needed in health services provided by the school.

In 2012-13, districts reported 17,489 medically complex students. This is an increase of 4784 students reported as medically complex in 2011-2012.

### Medically Fragile Students

Medically fragile students are those students “who may have a life-threatening health condition and who may require immediate professional nursing services.”<sup>8</sup>

---

<sup>7</sup> ORS 336.201(1)

<sup>8</sup> Ibid.

Students in this category have a health condition which requires frequent (often daily) one-on-one intervention by a licensed school nurse. An example of this would be a six-year-old student who is newly diagnosed with diabetes. Nurse intervention is required on a daily basis to check blood status, configure correct insulin doses, and administer insulin. As this student’s medical condition becomes more stable, and the student matures, the student’s category may change to one which requires less intense school health services.

In 2012-13, districts reported 2497 medically fragile students. This is a decrease of 681 students reported as medically fragile in 2011-2012.

### **Nursing-Dependent Students**

“Nursing-dependent students” are those students who may have an unstable or life-threatening health condition and who may require daily, direct, and continuous professional nursing services.”<sup>9</sup>

Students in this category have health conditions which require the constant, one-on-one attention of a licensed nurse, in order to access their educational program. An example of such a student would be one with an impaired respiratory system, who has a tracheostomy tube and must be frequently suctioned by the attendant nurse. Students with this medical condition commonly need suctioning several times during the school day. A licensed nurse usually works one-to-one with these students during the school day, because medical assessment by a licensed nurse is needed each time a student is suctioned.

In 2012-13, districts reported 124 nursing-dependent students. This is an increase of 35 students reported as nursing dependent in 2011-2012.

<b>School Year</b>	<b># of Medically Complex Students</b>	<b># of Medically Fragile Students</b>	<b># of Nursing Dependent Students</b>
<b>2010-11</b>	8,073	1,997	280
<b>2011-12</b>	12,705	3,178	89
<b>Data submitted by school districts during the annual collection</b>	14,717	2,124	100
<b>Data collected from district by phone</b>	2,772	373	24
<b>2012-13 Total</b>	17,489	2,497	124

### **Conclusion**

This data collection remains a relatively new one for schools. The terms, “medically complex,” “medically fragile,” and “nursing dependent” are not used in other laws. During the first year of the collection, there was confusion over which students were encompassed by the terms, and there was

<sup>9</sup> Ibid.

some miscommunication between local district IT data staff and local district school nurses. ODE increased its efforts to clarify the law with districts, and data from the second and third years are more reliable.

Anecdotally, ODE believes that many more students are arriving at school with insulin-dependent diabetes and severe allergy reactions than in prior years. Federal IDEA does not include these two health impairments under special education law. However, the US Office of Civil Rights has created guidance for schools on which students qualify for 504 plans<sup>10</sup>. Students with diabetes and severe allergy reactions are eligible for 504 plans.

According to a study last year funded by the Centers for Disease Control and Prevention and the National Institute of Health, the number of children with Type 1 diabetes increased 23 percent nationwide in the past decade. The increase in children with Type 2 diabetes was 21 percent. The Eugene-Register Guard reported that the Bethel School District and Springfield School District have seen the number of students with Type 1 diabetes double in the past five years.<sup>11</sup>

In conclusion, the data reflected in this 2012-2013 report is the most comprehensive of the three collection years. As with all such data collections, results depend on response from local district partners. Response for this year comprises over 95% of Oregon's school districts, and reflects a growing understanding of the collection parameters by district staff.

---

<sup>10</sup> The Section 504 regulations require a school district to provide a "free appropriate public education" (FAPE) to each qualified student with a disability who is in the school district's jurisdiction, regardless of the nature or severity of the disability. Under Section 504, FAPE consists of the provision of regular or special education and related aids and services designed to meet the student's individual educational needs as adequately as the needs of nondisabled students are met.
