Test to stay – Enhanced Exposure Testing (BinaxNOW or iHealth)	Students or staff may continue to attend school regardless of participation. Schools may offer enhanced exposure testing to individuals in cohorts which include students at increased risk of severe disease or medically fragile individuals.	Staff & students in cohorts that include staff or students who are at increased risk of severe COVID-19, who were exposed to a known COVID-19 case.	Test kits sent directly to schools or school districts for distribution to public schools.	Trained school testing administrator(s); no healthcare training required.	In high-risk cohorts, schools should consider offering testing once to all individuals. In exceptional-risk cohorts, schools should consider offering testing to all individuals up to daily for the 10 days following exposure.
