Coos Forest Protective Association 114th Annual Report

District Manager's Message – Annual Report 2023

As we began 2023, the district experienced cold weather conditions. The Coast Range in the district had numerous snow events and most of the hilltops within the range had 3-4 feet of snow accumulated going into late March – early April. This was very good for our forest fuels, but would the snowpack bring lightning later in the summer?

As summer progressed, fuels began drying in June and July. Our first major fire of the season began on July 15th along Oak Flat Road near the Agness community. This fire originated on USFS jurisdiction and grew rapidly. CFPA and USFS fire resources worked together over the next three weeks to control the Oak Flat fire that eventually burned 30,000 acres. On August 25th, a widespread lightning storm worked through our entire district. All fire starts resided on USFS ownership, and all but one was extinguished at initial attack. A lightning fire named Anvil became a large incident in the Grassy Knob Wilderness. This fire burned most of the Grassy Knob Wilderness (20,000 acres) and 800 acres of CFPA jurisdiction lands before it could be contained.

Even though both fires were extremely complex and involved CFPA/USFS management for over 90 days, the effort was very successful. This success was due to the solid foundation that has been built locally between the Rogue River-Siskiyou NF and CFPA staff. Relationships and partnerships are key principles of success for our Association.

For the year, we experienced more than the average number of fires and acres burned. This continues a trend over the last 10 years where lack of winter rain equals longer fire seasons and more fires on the landscape. More details on the fire season can be found within the body of this report.

For the employees that work for CFPA, 2023 began a transition of change. The Board of Directors, working with myself, began a search for a new District Manager. As the interview process was completed, Tyler McCarty was selected to be the new District Manager to replace me as I retired at the end of 2023. Tyler has 23 years of experience with the Oregon Department of Forestry (ODF) and most recently was the District Forester for ODF's Southwest Oregon District headquartered in Medford.

Additional outcomes of the interview process included Kyle Gibbons being appointed District Operations Chief, overseeing the three units and coordinating all operations for the district. David Brown, Reedsport Assistant Unit Forester, was selected to replace Kyle as the Coos Bay Unit Forester.

The continued support we receive from the Board of Directors and landowners helps us maintain a strong workforce. The partnerships and relationships we have with ODF, USFS, BLM, BIA, local Tribes, Counties and Rural Fire Departments allow us to respond efficiently to suppress fires that will continue to be present across our landscapes.

Michael E. Robison
District Manager
Coos Forest Protective Association

FIRE PROTECTION

FIRE SEASON SUMMARY

The duration of fire seasons have been extending year to year, and fire season 2023 was no different. In April, the Association engaged with OMNA International, LLC and Responder Life to develop a leadership training and staff ride of the Klondike Fire and the Agness-Illahee community. While providing a recap of fire history in the area and discussion of future fire planning, it also provided an opportunity for managers to interact outside of the day-to-day fire and office environments.

April was the last month with above average rainfall prior to fire season, yet CFPA resources still responded to several fires that spread through grass and briars. The next four months received below average rainfall and by mid-May, conditions were approaching fire season ERCs. The District was able to hold off until June 9th before declaring the 2023 fire season.

July ERCs hit 10-year highs and provided ample dry available fuels for the Oak Flat Fire to aggressively spread from the valley floor upslope. The higher elevations were still being influenced from an above normal snowpack. Game Lake and other elevated locations, especially off-aspect, were lush and green with new growth and provided the needed opportunity to stop the spread of what the USFS called the Flat Fire.

Snowpacks and their effect on lightning tracks is a typical discussion of firefighters. September began with storms tracking across the district, causing lightning fires on the landscape. During September, the district suppressed 15 statistical fires and supported the Rogue River-Siskiyou National Forest with multiple starts in and around the Grassy Knob Wilderness. The CFPA helitack program provided initial attack personnel and air resources. By mid-September, CFPA, in partnership with local forest management and the Anvil Incident Management Team, incorporated the CFPA North and South Groups to support suppression actions on the Anvil Fire.

Fire Season was ended with an early October storm system on the 9th, with work on the Anvil Fire continuing through the rest of the month.

FIRE PROTECTION

INDUSTRIAL FIRE PROGRAM

For the second consecutive year, CS-1 and CS-4 did not reach IFPL III, both remaining in IFPL I for the majority of the season. The interior of the district faced more severe weather, particularly the south end, as CS-5 and SK-2 were in IFPL III for 55 days.

The total number of inspections for 2023 was 107, with 59 in High fire danger, 25 in Medium fire danger and 23 in Low fire danger, which is down considerably from previous years. This was a direct result of the needed response of many key district personnel to the Anvil Fire in the Grassy Knob Wilderness. Several landowners and operators were engaged and key in this effort, limiting the impact of the Anvil Fire on industrial lands to the north and west.

A total of 29 waivers were issued, all tied to closedown orders; most requests came in late August and into September to get units complete before fall rains arrived. Many landowners chose not to request waivers when fire danger was at its peak, due to spikes in weather conditions

Tigercat Yarder

that only lasted a few days. Most of the waivers requested were to operate power saws in IFPL3 to stay ahead of the yarders, allowing cable yarding with an approved motorized carriage to operate in IFPL3 until $1 \, \text{p.m.}$ These waivers were tied to temperature, humidity and wind restrictions and felling was to be no more than 1 - 2 weeks ahead of the yarder.

Thanks to the diligence and safety of landowners and timber operators, the district saw a reduced percentage of deficiencies. More importantly, there were zero statistical fires resulting within active operations in 2023.

CLOSURE SUMMARY (DAYS/IFPL)						
Closure Level	CS-1	CS-2	CS-4	CS-5	SK-1	SK-2

Average	162	9	6%

TRANSIENT FIRES

CFPA received a grant to expand the camp stove program that was started the previous year, in an effort to decrease the number of fires from transient-related campfires. Approximately 100 stoves were purchased and handed out over the spring and summer.

In 2023, CFPA personnel responded to 23 statistical fires as well as 6 non-statistical fires from this demographic. This means that roughly 25% of both stat and non-stat fires within the district were caused by transient activity.

Merritt Lake #2

FIRE PREPAREDNESS

AVIATION PROGRAM

The Association's aviation programs saw another successful year, continuing to expand and evolve in 2023. This was the second year of a six-year contract with Apex Helicopters. This long-term relationship has been one of the cornerstones of the aviation program's success.

The theme for 2023 was relationship building, whether within the CFPA district or with neighboring districts in the Southern Oregon Area. CFPA continued to learn how versatile and effective the aviation program, including the Helitack Module, is to fire suppression. The best example of this was with the USFS; the Rogue River-Siskiyou had multiple lighting fire starts located in wilderness areas with limited to no road access, while at the same time dealing with a well-established project fire. These new starts had large fire growth potential and both agencies knew a robust aviation presence was going to be needed due to fire locations and limited resource availability. Both aviation programs started planning and quickly became a very effective team. Multiple fires were extinguished before they could get established on the landscape. This relationship and teamwork paid dividends when the focus turned to the Anvil fire. Integrating with the Anvil Incident Management Team would not have been possible without the support of the Rogue River-Siskiyou and the relationships built earlier in the season. This allowed CFPA aviation to participate in suppression efforts, but it also gave us a strong voice with aviation decision making. This benefited the Team's suppression efforts, while also keeping fire impact to Association-protected lands to a minimum.

In September the State Severity Program sent four members of the ODF John Day Helitack crew to assist the district. This was a welcome addition, as it allowed the district to give crew members days off, as well as added experience that benefited both programs. The John Day crew was assigned to the district for 19 days, working 120 regular hours and 60 hours of overtime.

CFPA founded a new helibase at Moore Mill & Lumber Co.'s Catching Creek Nursery in 2023. This facility is centrally located in the district for quick fire response, while also providing a great backbone of buildings and infrastructure for expansion and growth. This expansion includes development of a Starlink wireless network. Multiple RV hookups, used by the flight crew, allow aviation personnel to stay onsite, which shortens dispatch response time and lengthens coverage time up to a full-14 hour duty day when needed.

DISTRICT AVIATION STATS

4AS contract July 16 - October 8 (84 Days)

- 54 missions
 - 13 Recon
 - 37 Helitack
 - 4 Aerial Supervision
- 85.4 Flight Hours

Tanker 910 - Anvil Fire

FIRE PREPAREDNESS

HANDCREWS

CFPA's two district handcrews, C85 and C80 were busy during the season working on fuels reduction, maintaining waterholes, brushing access roads from the winter storm damage and clearing debris around communication sites. CFPA handcrews had a busy fire season as well, with 13 in-district fires and assisting in 6 out-of-district assignments, totaling 39 shifts working on fire.

Three members of the 2022 Helitack Module (Crew 82) returned this year. The retention of experienced fire aviation personnel is paramount to the success of the district's aviation

program, in both fire suppression and safety. All three did an exceptional job assisting with the planning of training and project work, along with other administrative duties. The six members of the Helitack crew had a long, grinding 84 days, working six to seven days a week to maintain adequate staffing for the helicopter.

Fuels Reduction—Lobster Creek Camp

CFPA HELITACK HOURS ON FIRES

Agency	Total Regular Hours Worked	Total Overtime Worked
CFPA Fires	190 hrs.	179 hrs.
ODF Fires	222 hrs.	212 hrs.
USFS Fires	565 hrs.	626 hrs.

TRAINING

CFPA sponsored several training courses throughout the spring and summer for partner agencies and landowners in 2023. District staff facilitated several OR-OSHA Basic Fire Training courses for landowners and operators, as well as RT-130 (Annual Fireline Safety Refresher Course) for landowners with employees qualified as Local Resource Boss.

CFPA was able to take advantage of multiple training opportunities to get employees into state, regional and S-330 national level training courses. Kyle Gibbons, Jordan Osborne, Russell Simmons, Sean Hunt and Corey Bryant S-390 were able to attend the ODF Line Safety Officer training held in Salem. Dave Brown completed the S-420 Command & General Staff course held in Beaverton, OR. Jef Chase and Brett Weidemiller went through Critical Incident Stress Management Training to become part of the Southwest Oregon Peer Support Team. Allen Miller was able to attend a Train-the-Trainer course through Oregon Office of Emergency Management (OEM) to be able to facilitate ICS-300 & 400 courses. Jef Chase successfully completed the Complex Incident Management Course (CIMC) held in Vancouver, WA.

DETECTION

2023 saw the installation of two new detection cameras within the district. A new detection camera was installed at the West Beaver Hill communications site and will help keep an eye on the county forest south of Coos Bay, which is a heavily traveled area for both residents and transients alike. A new detection camera was also installed at the Menasha 36 site near Elk River. The latter of the sites proved very useful during its first season for the Anvil fire.

Menasha 36

FIRE PREVENTION

Public Fire Prevention & Education

Fire prevention programs in 2023 were back to pre-Covid levels across the district. District personnel were able to put on Smokey Bear programs in schools throughout the district. Personnel held prevention programs at the National Night Out events around the district, holiday light parades, Shop with Heroes events, open houses, the Cranberry Festival and Coos & Curry County Fairs.

The district's social media platforms continued to grow and get fire prevention messaging out to the public. Social media messaging for 2023 centered on public use restrictions as well as getting out timely

fire information. CFPA received multiple grants from Keep Oregon Green for prevention. The district received a \$12k grant to replace the LED panels on the district's VMS trailers, so that CFPA can continue to utilize these messaging systems for putting out clear and proper messaging again.

RETENTION & RECRUITMENT

CFPA staff continues efforts in the Winter Fire School program. Entering its third year, this program continues to adjust and grow. The goal is to partner with high schools throughout the district and expose the next generation to CFPA's mission; fire in the community and Wildland Firefighting as a career. This year district employees taught the Wildland Fire curriculum at three high schools, with agreements in place to teach at additional schools.

CFPA has begun offering housing to seasonal employees coming from out-of-area locations. CFPA has partnered with Coos Bay Fire for access to five dorm rooms at the Eastside fire station, as well as Charleston RFD for access to four dorm rooms at the Crown Point fire station. Having access to these dorm rooms has helped bring in employees from across the country. During the 2023 fire season, CFPA had seasonal employees from Florida, Wisconsin, California and Washington that would not have been able to work here without access to housing. Housing options allow the advertising of seasonal employment opportunities across the nation.

ADMINISTRATION

ADMINISTRATION

The company's FY21 Audit was received and distributed to the Board of Directors at the beginning of April. The Annual Membership and Board Meetings were held on April 19th at The Mill Casino and were well attended.

In May, CFPA staff met with the Protection Business Manager and the SOA Area Accountant via TEAMS regarding outstanding revenues from Oregon Department of Forestry. These revenues are from pass-through billings that, due to agreements in place, prevent the association from invoicing directly. An Emergency Fire Cost Committee audit for four fires that occurred in 2022 was held at the Coos Bay office on May 16th.

An amendment to the Coos Forest Protective Association 401k Retirement Plan was approved by the Retirement Committee. The amendment makes prior service with ODF eligible for vesting years if it meets the plan's criteria. Previously, only service with another operating association would have been considered.

Requests for advances on the EFC Claims on Oak Flat, O'Brien and Anvil were made and approved for a total of 7.7 million dollars. Cost shares were signed for the Oak Flat and Anvil incidents, giving full cost responsibility to the USFS.

The cost share for the Twelvemile Road incident was reconciled in March. Payment was received from the BLM for \$37,360.02 in December to close the cost share.

Jeff Insley	20 Years
Russel Simmons	10 Years
Robert Franson	20 Years

Tyler McCarty & Mike Robison

Interviews and meetings were held in June as part of the selection process for hiring a new District Manager. In July, Tyler McCarty, with 23 years of service and District Forester in Southwest Oregon District, was selected. Tyler was scheduled to begin shadowing in August. With the start of the Oak Flat Fire, Tyler was utilized several weeks early as an Agency Administrator to help represent the district and provide a continuous point of contact and support for the USFS with incoming fire teams.

Kim Robison, Dispatch Supervisor, retired at the end of October following 28 years of recognized service. Through a competitive interview process, Robert Hancock was selected as the new Dispatch Supervisor.

The Fall Board Meeting was held December 15th, 2023 at The Mill Casino. The meeting was combined with a retirement celebration for Mike Robison, which began after the meeting ended.

Throughout December, several Coos Bay Unit employees worked to renovate the Reedsport residence. This work included replacing all of the flooring, repainting the house and installing a new pellet stove.

The year started with ensuring vehicle orders were in place to make up for all 2022 vehicle orders that were cancelled by the manufacturer and the 2023 vehicle orders. These orders included three F350 cab chassis and two F250 pickups. Additional vehicle orders and vehicle purchases were made and, as the year came to an end, the shop was in the process of building up four F250 pickups and one Type 6 engine. The fleet is caught up on scheduled vehicle replacement through FY23 and on track to have all FY24 replacement vehicles in service for the 2024 fire season.

Reedsport Residence

ADMINISTRATION

COOPERATIVE WORK PROGRAM

The Association continues to work with several cooperators to facilitate year-round employment for several employees. This program benefits all involved, keeping the employees on the payroll and giving them a chance to build relationships with local partners while becoming familiar with the landscape. The Oregon Department of Transportation in the Port Orford, Davis Slough and Reedsport areas of the district employ a total of five employees working the winter in the Fire and Ice program. The city of Coos Bay joined the co-op program in 2021 and employs two Association employees. Manulife Investment and Weyerhaeuser Company each employ one CFPA employee, working mostly as tree planting inspections.

GRANT FUNDING

CFPA focused heavily on grant-funded fuels reduction work in the spring and fall to increase the duration of

2023 COOPERATIVE AGREEMENTS

Weyerhaeuser Company

Manulife Investment Management

Oregon Department of Transportation

City of Coos Bay

ODOT Co-op clearing the road of a slide

employment for select seasonal staff. This extended duration of employment has helped ensure the return of seasonal crew members who otherwise would have needed to seek longer duration employment elsewhere. The Small Forestland Grant that was used to begin the Allegany fuels reduction project was depleted during the spring of 2023. This grant funding promoted a landscape-wide fuels reduction that allowed fuels crews to focus on the landscape as a whole and performing work to reduce fire intensity in the future. Crews worked to remove brush, treat noxious weeds, thin trees and remove fuels from the landscape using prescribed fire.

The Coos Bay office received two additional grants from OSFM during 2023 to perform fuels reduction work within the unit. These grants total \$225,000 and will be used during the spring of 2024 to work on fuels reduction, primarily developing defensible space, throughout Coos County.

SAFETY

The district experienced 19 work-related injuries for 2023, which is well above the 10-year average of 13. Poison oak continued to be the number one injury cause for the fifth year in a row and accounts for 41% of CFPA's workplace injuries for the last 21 years. The district also experienced 12 vehicle accidents for the year, which is significantly above the 10-year average of 7. Half of the vehicle accidents were backing incidents with minor to no vehicle damage. One vehicle was totaled on an out-of-district fire assignment when it rolled off the road and hit a tree. Fortunately there were no injuries as the vehicle was unoccupied.

The safety and welfare of its employees continues to be the top priority for CFPA. The district strives to continue staying ahead of OSHA rule changes and maintaining a safe work environment for employees. The wildland firefighting community has found over the last few years that its firefighters can experience undue stress in the performance of their duties, so in a proactive decision, the district became part of the Southwest Oregon Peer Support Team (SOPST). SOPST's mission is to provide support to the emergency responders of southwest Oregon with the use of trained peer members from emergency response agencies across southwest Oregon.
