 - The stand boundaries for Stands #24599 and #24527 are incorrect. The Wild Gander Sale does not harvest any of these younger stand types. The acre of Stand #24599 should be included in Stand #24598 and is shown as such in the remainder of this document. The 4 acres of Stand #24527 should be included in Stand #24532 and is shown as such in the remainder of this document.
 - All Units were planted. Units 2 and 3 were thinned in 2007. Unit 4 was thinned in 1999. Unit 5 was thinned in 2006. Unit 6 was thinned in 2004 and salvaged in 2008.

- **Leave Tree Considerations:** Foresters will work with wildlife biologist during sale layout. The following should be considered when determining final leave tree arrangements.
 - **Stand Characteristics:** Prioritize larger diameter trees within each unit as part of the retention strategy.
 - **Geotechnical:** Additional wind firm leave trees will be concentrated around the No Harvest Areas within the sale shown on the Exhibit A map. Foresters will evaluate stand and topographic conditions to determine sites appropriate for these buffer areas.
- **Reforestation Considerations:** Following the completion of harvest, the unit will be planted with a mixture of species native to the geographic area.

- Unit 6: Music Road and Beneke Creek Road.

2. Haul Route Condition:

- A project is planned for replacement rock and maintenance needs. Interior working spurs will be assessed during sale layout to determine if more extensive road maintenance is needed.
- Portions of Beneke Creek and Trailover Ridge Road were improved/maintained with the Music Trail Sale (FY23) and further projects are anticipated to be minimal.
- Wild Goose and Wild Goose Tie-through road will be maintained with a lift of surfacing rock.

3. Are easements required for the haul route? ☒ Yes ☐ No

6	No	Yes	

- **Geotech Review:** Initial geotechnical reviews have been completed and slope protections have been incorporated into No Harvest buffers shown on the map. Some slope protections are dependent on

stream surveys that have not yet been completed. Consultation with the Geotechnical Specialist is required during sale layout as streams surveys are completed in order to determine if additional protections are required.
