

## Pre-Operations Report

**Operation Name:** Scout Walker  
**County (%):** Clatsop (100%)  
**Elevation:** 825 - 1,280 ft  
**Legal Description:** T5N R6W, Sections 3, 9, 10, 16, 17

**Tax Code(s):** 8-01  
**BOF%:** 100%    **CSL%:** 0%  
**Sale Quarter:** 4th

### I. VOLUME AND VALUE SUMMARY

**Table 1. Types, Acres, and Value**

Unit	Harvest Type	Anticipated Product <sup>c</sup>	Gross Acres	Net Acres	MBF/Acre <sup>a</sup>	MBF/Unit <sup>a</sup>	\$/MBF <sup>b</sup>	\$/Unit
1	CC	DF-M, WH-M	66	58	48	2,784	\$425	\$1,183,200
2	CC	DF-L, RA-S	66	54	50	2,700	\$450	\$1,215,000
3	CC	DF-M, RA-M	44	34	50	1,700	\$400	\$680,000
Total		Regeneration	176	146		7,184		
		Partial Cut						
							Gross Value	\$3,078,200
a. Estimated harvest volume per acre for Unit.							Project Costs	\$148,500
b. Estimated 'price' (excluding Project Costs)							Net Value	\$2,929,700
c. Anticipated Product (AA-B-C) – AA) SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23)), C) Special Product (P – Premium, H – Hardwood)								

### II. CURRENT STAND CONDITION:

**Table 2. Stand Inventory Information**

Unit	Stand ID	Measured/Imputed <sup>a</sup>	Species	Age	TPA	DBH	BA	SDI	Net Acres <sup>b</sup>
1	23934	M	DF, RA	41	184	13	167	46%	20
1	23941	I = 23404	DF, WH	88	142	18	261	63%	38
2	23948	M	DF, RA	88	91	21	228	51%	47
2	24896	M		11				0%	5
2	24898	M		11				0%	2
3	23987	M	DF, WI	90	118	18	201	49%	34

- a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).
- b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

- The stand boundaries for 24896 and 24898 are drawn incorrectly. Unit 2 does not include any 11-year-old trees. Stands 24896 and 24898 should be included with stand 23948 and is shown as such in the remainder of this document.
- These planted stands have no record of pre-commercial or commercial thinning.

**Table 3. Additional Stand Information**

Unit	Stand ID	Snags/Acre <sup>a</sup>	Down Wood/Acre <sup>b</sup>	Forest Health		
				SNC	Phellinus	Other <sup>c</sup>
1	23934	2	565			
1	23941	30	347			
2	23948	25	162			
3	23987	17	439			

- a. Identify the number of hard snags per acre (decay classes 1 and 2)
- b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)
- c. Describe “Other” forest health issue.

- Scotchbroom is present in some locations along haul route

**III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:**

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1. A portion of the operation is within (Check all that apply):
  - TAS     NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
  - MMMA (BA required)     None
2. Are Surveys for NSO being conducted for any portion of this operation?
  - No     Density Surveys     Operational Surveys     Combination (Density/Operational)

Notes:

3. Are Surveys for MM being conducted for any portion of this operation?
  - Yes (in progress/completed)     No (Not habitat)     N/A (outside of MM survey zone)

Notes: All sale units were surveyed in 2023 & 2024. These surveys will expire on 04/01/2030.

4. Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant)?
  - No     Yes, please describe:

**IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:**

**Table 4. Stand Structure Information**

Unit	Stand ID	Current	Desired Future <sup>b</sup>	Net Acres <sup>a</sup>	Inside of HCA Acres
1	23934	UDS	GEN	20	0
1	23941	UDS	GEN	38	0
2	23948	UDS	GEN	54	0
3	23987	LYR	GEN	34	0

- a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total “Net Acres” per unit in this table may not equal the total “Net Acres” per unit in table 1.
- b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration, Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

**Table 5. Harvest Prescriptions**

Unit	Harvest Type	Harvest Species	Residual (Partial Cut & HCA only)			
			Species	TPA	BA	% SDI
1	CC					
2	CC					
3	CC					

- **Leave Tree Considerations:** Foresters will work with Wildlife Biologist during sale layout. The following should be considered when determining final leave tree arrangements.
  - Stand Characteristics: Prioritize larger diameter trees within each unit as part of the retention strategy.
  - Wildlife: Prioritize leave trees with platforms where MAMU habitat exists.

**Table 6. Reforestation**

Unit	Planting Species Mix (%)*	TPA*	Considerations (ex. Elevation, SNC, Aspect, Animal Damage)
1	80% DF, 15% GF, 5% WRC	400	Elev. < 1,500'. SNC Zone= No. Anticipated seedling animal damage= mountain beaver, elk, deer.
2	80% DF, 15% GF, 5% WRC	400	Elev. < 1,500'. SNC Zone= No. Anticipated seedling animal damage= mountain beaver, elk, deer.
3	80% DF, 15% GF, 5% WRC	400	Elev. < 1,500'. SNC Zone= No. Anticipated seedling animal damage= mountain beaver, elk, deer.

\*These are estimates for planning purposes and will be adjusted as needed based on site conditions during implementation.

- **Reforestation Considerations:**
  - **Aspect:** North, east, south, west.
  - **Elevation:** Plant with low elevation stock types.
  - **Animal Damage:** Post-harvest operations review for mountain beaver management needs. Scatter highly desirable elk and deer browse tree species across units. Plant at a TPA density anticipating some elk and deer browse mortality.
  - **Insect/Disease:** Where laminated root rot presence is known plant that area with tolerant stock types.
  - **Brush:** Post-harvest operations review for vegetation management needs.
  - **Slash:** Assure slash management plan is followed during harvest operations.
  - **Planting:** Scatter WRC throughout units, focusing on wetter areas.

**V. HARVESTING AND ACCESS CONSIDERATIONS:**

**Table 7. Harvest System and Access Summary**

Unit	Harvest System		Slope (%)	Unit Access	Seasonal Access
	% Cable	% Ground			
1	20	80	35-65	Verified	All Weather
2	100	0	>65	Verified	All Weather
3	0	100	<35	Simple	All Weather

1. Haul Route:
  - Unit 1 and 2: West Sager Road.
  - Unit 3: Grasslands, Wageland, and Wage Road.

2. Haul Route Condition:

- A project is planned for replacement rock and maintenance needs. Interior working spurs will be assessed during sale layout to determine if more extensive road maintenance is needed.
- West Sager is being improved/maintained with the Sager timber sale (FY26). Further projects are anticipated to be minimal.
- Portions of Walker Ridge Road and the spur into Unit 2 will be improved/maintained with a lift of surfacing rock.
- Portions of Wageland and Grasslands Roads were improved/maintained with previous sales and improvements will be minimized.

3. Are easements required for the haul route?  No  Yes

- Wage Road. Easement (#311.04642) dated December 17, 2003, between State of Oregon, Board of Forestry and W.T. Timber LLC. Current landowner: Back Acres Tree Company LLC.
- West Sager Road. Easement (#311.04267) dated September 22, 1964, between the State of Oregon, Board of Forestry and Conrad & Eva Nystrom and Raymond & Ariel Johnson. Current landowner: Teevin Brothers Land and Timber.

**Table 8. Transportation Management Summary (Miles)**

Activity	Mainline	Collector	Rocked Spur	Dirt Spur
Construct	0	0	0.7	0.1
Improve, Rock, and/or Maintain	0	3.2	2.5	0.1
Vacate	0	0	0	0
Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC)				
Type F - SSBT <sup>a</sup>	0	0	0	0
Type F – Non-SSBT	0	0	0	0
Type N	0	0	0	0

a. Salmon Steelhead and Bull Trout (SSBT)

- Opportunities to vacate or block new or existing roads and/or spurs will be considered during sale layout.
- A longer spur into Unit 2 may not be constructed if decided to cable log from the ridgetop near the existing road. This will be determined during sale layout and finalizing of the logging plan.
- Roads into Unit 3 will be seasonal dirt spurs and blocked upon completion of use. Improvements to existing roads accessing Unit 3 will be minimal to support seasonal use only.

4. Rock Sources for this operation:

- Cow Creek and Slaughters Creek Stockpiles.
- Pit-run and Jaw Run are available at the Northrup Ridge Quarry.

5. Are property line surveys required for this operation?  No  Yes

6. Is there planned new road construction planned within RCAs/HCAs?  No  Yes

**VI. AQUATIC RESOURCES:**

1. Do any streams require additional review for the following?

- Fish presence:  No  Yes

- Perennial/Seasonal:  No  Yes
  - H.E.R.:  No  Yes
    - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.
2. Is a portion of the operation within an Aquatic Anchor?  No  Yes, name: Buster Creek
    - Within the designated Aquatic Anchor streams will be buffered in accordance with strategies in the draft Habitat Conservation Plan that prioritize salmonid recovery as outlined in the State Forest Division Species of Concern Policy. These additional buffers are already incorporated into the sale buffers and are shown on the map. If additional information on streams is found during sale layout the buffers will be adjusted as required.
  3. Are any domestic points of diversion identified in the Oregon Water Resource Department's water rights information search GIS database located downstream within 3,000 feet of the harvest operation?
    - No  Yes, describe protection measures:
  4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation?  No  Yes, please describe:
  5. Is there a Stream Enhancement Project planned?  No  Yes, please describe:

**VII. SLOPE STABILITY ISSUES:**

**Table 9. Summary of Slope Stability Assessment**

Unit	Harvest Review Complete	Public Safety Review Complete
1	Y	Y
2	N	Y
3	Y	Y

- **Geotech Review:** Initial geotechnical reviews have been completed and those findings have been incorporated into No Harvest buffers. Some slope protections for Unit 2 are dependent on stream surveys that have not yet been completed. Consultation with the Geotechnical Specialist is required during sale layout as streams surveys are completed in order to determine if additional protections are required.

**VIII. RECREATION RESOURCES:**

1. Recreation issues/coordination:  No  Yes, please describe:

**IX. HISTORIC AND CULTURAL RESOURCES:**

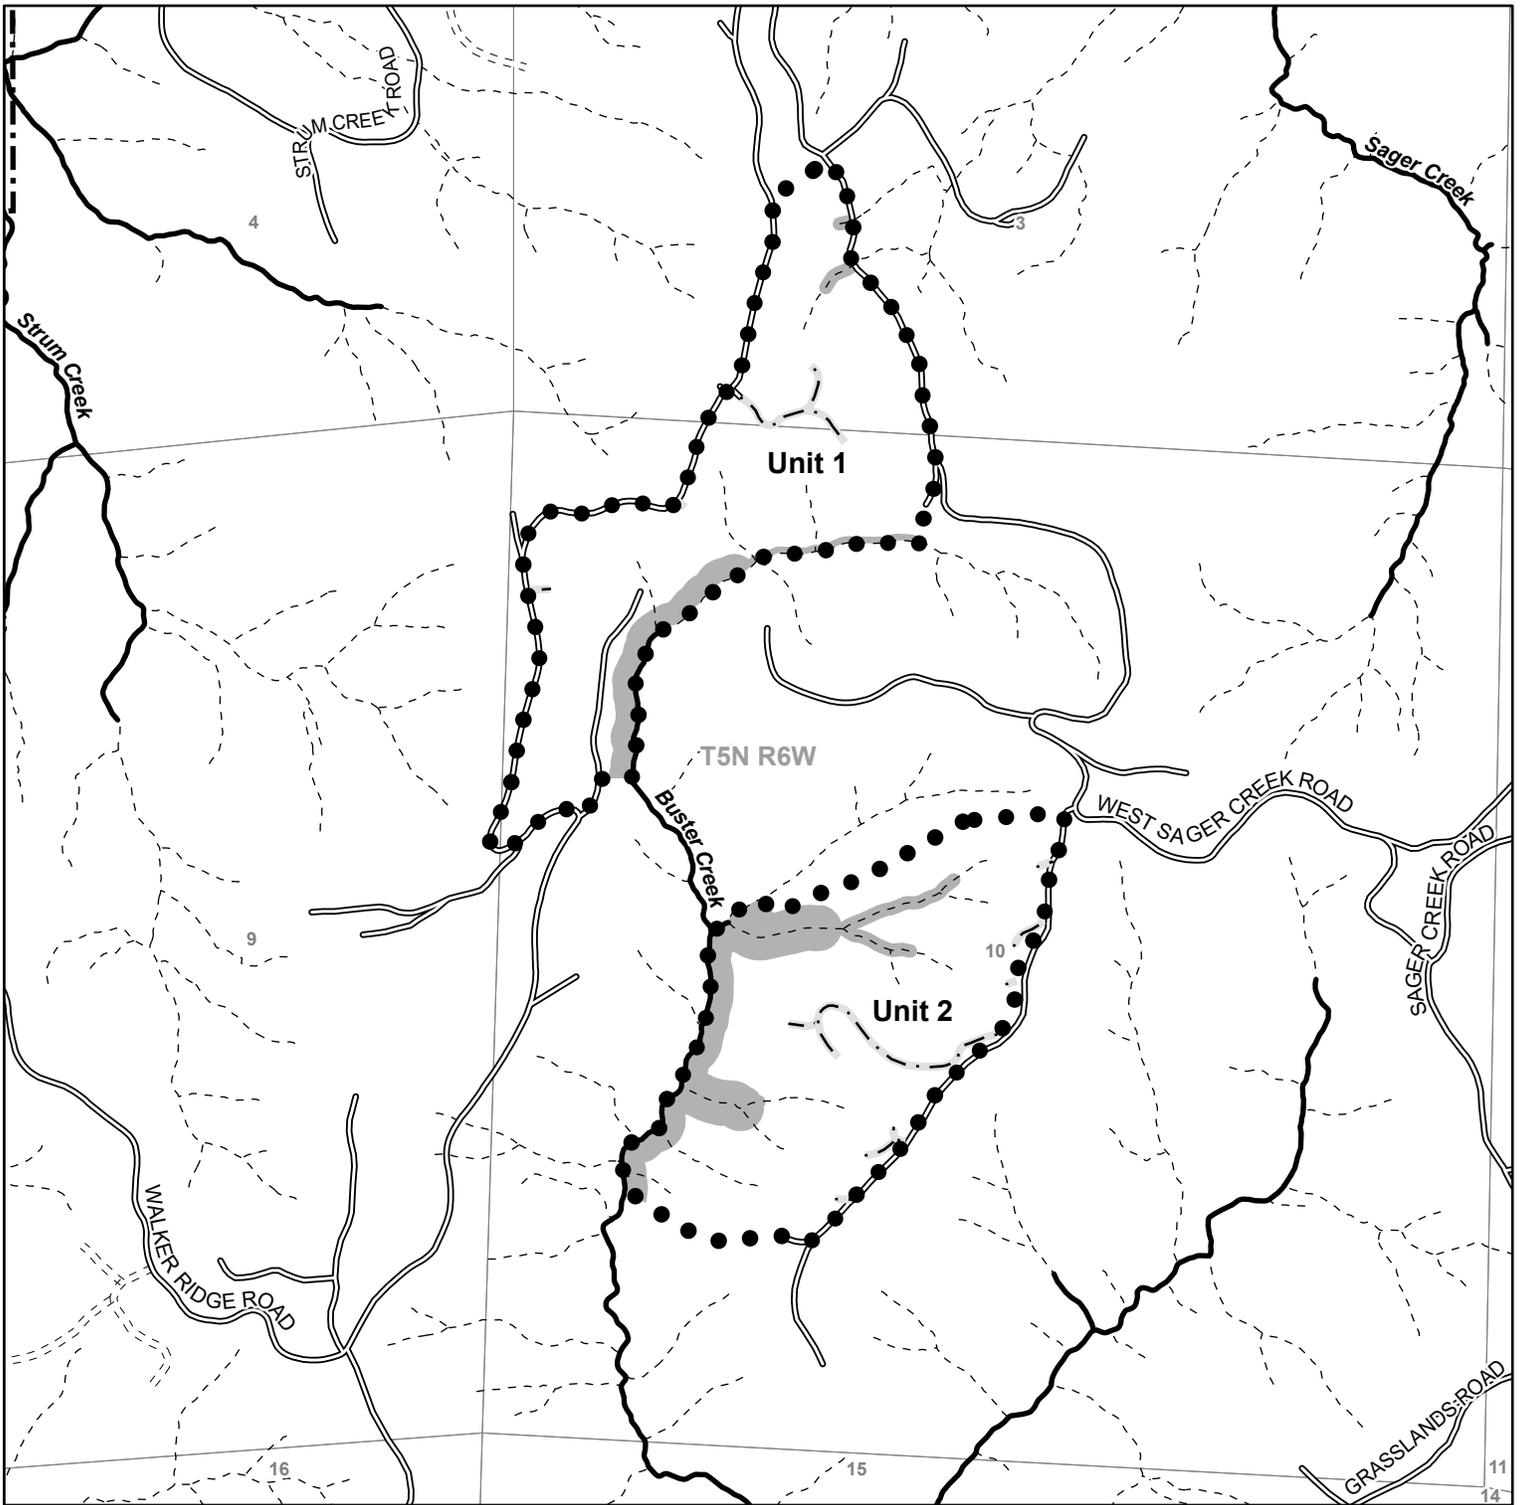

1. Has the sale been reviewed by a qualified archaeologist for potential historic or cultural resource presence?  No  Yes

**X. SCENIC RESOURCES:**

1. Are there scenic resources in the vicinity of this operation that need additional consideration?  No  Yes, please describe:

**XI. OTHER RESOURCE CONSIDERATIONS:**

1. Has a review of the FLMCS layer determined that any resources not mentioned in the report above need additional planning?  No  Yes, please describe:
2. Are there any other resources present that need additional consideration?  No  Yes, please describe:
