

Pre-Operations Report

Operation Name: Show Hawkins
County (%): Washington (98%), Tillamook (2%)
Elevation: 1,129 – 1,692 ft
Legal Description: T3N, R5W, Sections 18, 19; T3N, R6W, Section 13

Tax Code(s): n/a
BOF%: 100% **CSL%:** 0%
Sale Quarter: 4th

I. VOLUME AND VALUE SUMMARY

Table 1. Types, Acres, and Value

Unit	Harvest Type	Anticipated Product ^c	Gross Acres	Net Acres	MBF/Acre ^a	MBF/Unit ^a	\$/MBF ^b	\$/Unit
1	CC	DF-L, RA-M	76	64	68.0	4,352	\$575	\$2,502,400
2	R/W	DF-L, RA-M	2	2	50.0	100	\$575	\$57,500
Total		Regeneration	78	67		4,452		
		Partial Cut						
							Gross Value	\$2,559,900
a. Estimated harvest volume per acre for Unit.							Project Costs	\$287,100
b. Estimated 'price' (excluding Project Costs)							Net Value	\$2,272,800
c. Anticipated Product (AA-B-C) – AA) SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23]), C) Special Product (P – Premium, H – Hardwood)								

II. CURRENT STAND CONDITION:

Table 2. Stand Inventory Information

Unit	Stand ID	Measured/Imputed ^a	Species	Age	TPA	DBH	BA	SDI	Net Acres ^b
1	7368	M	DF, RA	99	67	27	266	55%	63
2	8835	I = 7361	DF, CH	99	83	26	313	65%	2

- a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).
- b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

- These stands were planted. Approximately 3 acres in the southwestern corner of Unit 1 were thinned in 1982, while the remainder of the sale has no record of pre-commercial or commercial thinning. The north portions of Unit 2 was thinned in 2015, while the southern portion was thinned in 2012.

Table 3. Additional Stand Information

Unit	Stand ID	Snags/Acre ^a	Down Wood/Acre ^b	Forest Health		
				SNC	Phellinus	Other ^c
1	7368	5	120		x	
2	8835	6	169			

- a. Identify the number of hard snags per acre (decay classes 1 and 2)
- b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)
- c. Describe "Other" forest health issue.

III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1. A portion of the operation is within (Check all that apply):
 TAS NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
 MMMA (BA required) None
2. Are Surveys for NSO being conducted for any portion of this operation?
 No Density Surveys Operational Surveys Combination (Density/Operational)
3. Are Surveys for MM being conducted for any portion of this operation?
 Yes (in progress/completed) No (Not habitat) N/A (outside of MM survey zone)

Notes: Surveys being conducted in 2025 and 2026.

4. Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant)?
 No Yes, please describe:

IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:

Table 4. Stand Structure Information

Unit	Stand ID	Current	Desired Future ^b	Net Acres ^a	Inside of HCA Acres
1	7368	UDS	GEN	63	0
2	8835	UDS	GEN	2	0

- a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total “Net Acres” per unit in this table may not equal the total “Net Acres” per unit in table 1.
- b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration, Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

Table 5. Harvest Prescriptions

Unit	Harvest Type	Harvest Species	Residual (Partial Cut & HCA only)			
			Species	TPA	BA	% SDI
1	CC					
2	R/W					

- **Leave Tree Considerations:** Foresters will work with Wildlife Biologist during sale layout. The following should be considered when determining final leave tree arrangements. Stand Characteristics: Prioritize larger diameter trees and minor species within each unit as part of the retention strategy.

Table 6. Reforestation

Unit	Planting Species Mix (%)*	TPA*	Considerations (ex. Elevation, SNC, Aspect, Animal Damage)
1	70% DF/20% WH/10% WRC	400	Elev. 1129-1646/NE Aspect, Soils/Minor Phellinus/Competing Vegetation i.e. vine maple, salal, red alder/Invasive Species/Gentle-Moderate Slopes/Moderate Slash
2	None		

*These are estimates for planning purposes and will be adjusted as needed based on site conditions during implementation.

- **Reforestation Considerations:**
 - **Elevation:** Will be planted with a mix of high and low elevation trees.
 - **Brush:** Brush control will be determined after harvest, aerial application is planned.
 - **Insect/Disease:** WH and WRC will be planted where Phellinus is a concern.
 - **Slash:** Portion of the unit will be mechanically piled as part of the Timber Sale Contract.

V. HARVESTING AND ACCESS CONSIDERATIONS:

Table 7. Harvest System and Access Summary

Unit	Harvest System		Slope (%)	Unit Access	Seasonal Access
	% Cable	% Ground			
1	40	60	35-65	Simple	All Weather
2	0	100	<35	Established	All Weather

1. Haul Route:
 - South Lousignont Road to Wheeler Road to Cochran Road to Timber Road
2. Haul Route Condition:
 - The haul route is in good condition. Road maintenance or improvement needs will be assessed during sale layout.
3. Are easements required for the haul route? No Yes

Table 8. Transportation Management Summary (Miles)

Activity	Mainline	Collector	Rocked Spur	Dirt Spur
Construct	0	0	1.0	0
Improve, Rock, and/or Maintain	0	2.18	4.44	0
Vacate	0	0	0	0
Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC)				
Type F - SSBT ^a	0	0	0	0
Type F – Non-SSBT	0	0	0	0
Type N	0	4 R	0	0

- a. Salmon Steelhead and Bull Trout (SSBT)
 - Opportunities to vacate or block new or existing roads and/or spurs will be considered during sale layout.
 - This sale will pre-road two FY28 timber sales along the same haul route – 0.7 miles of new surfaced road construction and 3.06 miles of road improvement are needed. These miles are included in the table above and the Show Hawkins Project Costs reflect this work.

4. Rock Sources for this operation: Straight Arrow Quarry
5. Are property line surveys required for this operation? No Yes
6. Is there planned new road construction planned within RCAs/HCA's? No Yes

VI. AQUATIC RESOURCES:

1. Do any streams require additional review for the following?
 - Fish presence: No Yes
 - Perennial/Seasonal: No Yes
 - H.E.R.: No Yes
 - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.

2. Is a portion of the operation within an Aquatic Anchor? No Yes, name: Lousignont Creek/ Upper Nehalem River
 - Within the designated Aquatic Anchor, streams will be buffered in accordance with strategies in the draft Habitat Conservation Plan that prioritize salmonid recovery as outlined in the State Forest Division Species of Concern Policy. These additional buffers are already incorporated into the sale buffers and are shown on the map. If additional information on streams is found during sale layout the buffers will be adjusted as required.

3. Are any domestic points of diversion identified in the Oregon Water Resource Department’s water rights information search GIS database located downstream within 3,000 feet of the harvest operation?
 - No Yes, describe protection measures:

4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation? No Yes, please describe:

5. Is there a Stream Enhancement Project planned? No Yes, please describe:
 - There is potential for a stream enhancement Project in Lousignont Creek (Unit 1). Additional desktop and field reviews shall be conducted to determine the best candidates to focus stream enhancement efforts. The district shall consult with the ODF Aquatic and Riparian Specialist and the local ODFW Habitat Biologist to help determine the feasibility and logistics of the Project during sale layout.

VII. SLOPE STABILITY ISSUES:

Table 9. Summary of Slope Stability Assessment

Unit	Harvest Review Complete	Public Safety Review Complete
1	Y	Y
2	Y	Y

- **Geotech Review:** Initial geotechnical reviews have been completed and those findings have been incorporated into No Harvest buffers. Additional consultation with Geotechnical Specialists will be done during sale layout as needed.

VIII. RECREATION RESOURCES:

1. Recreation issues/coordination: No Yes, please describe:

IX. HISTORIC AND CULTURAL RESOURCES:

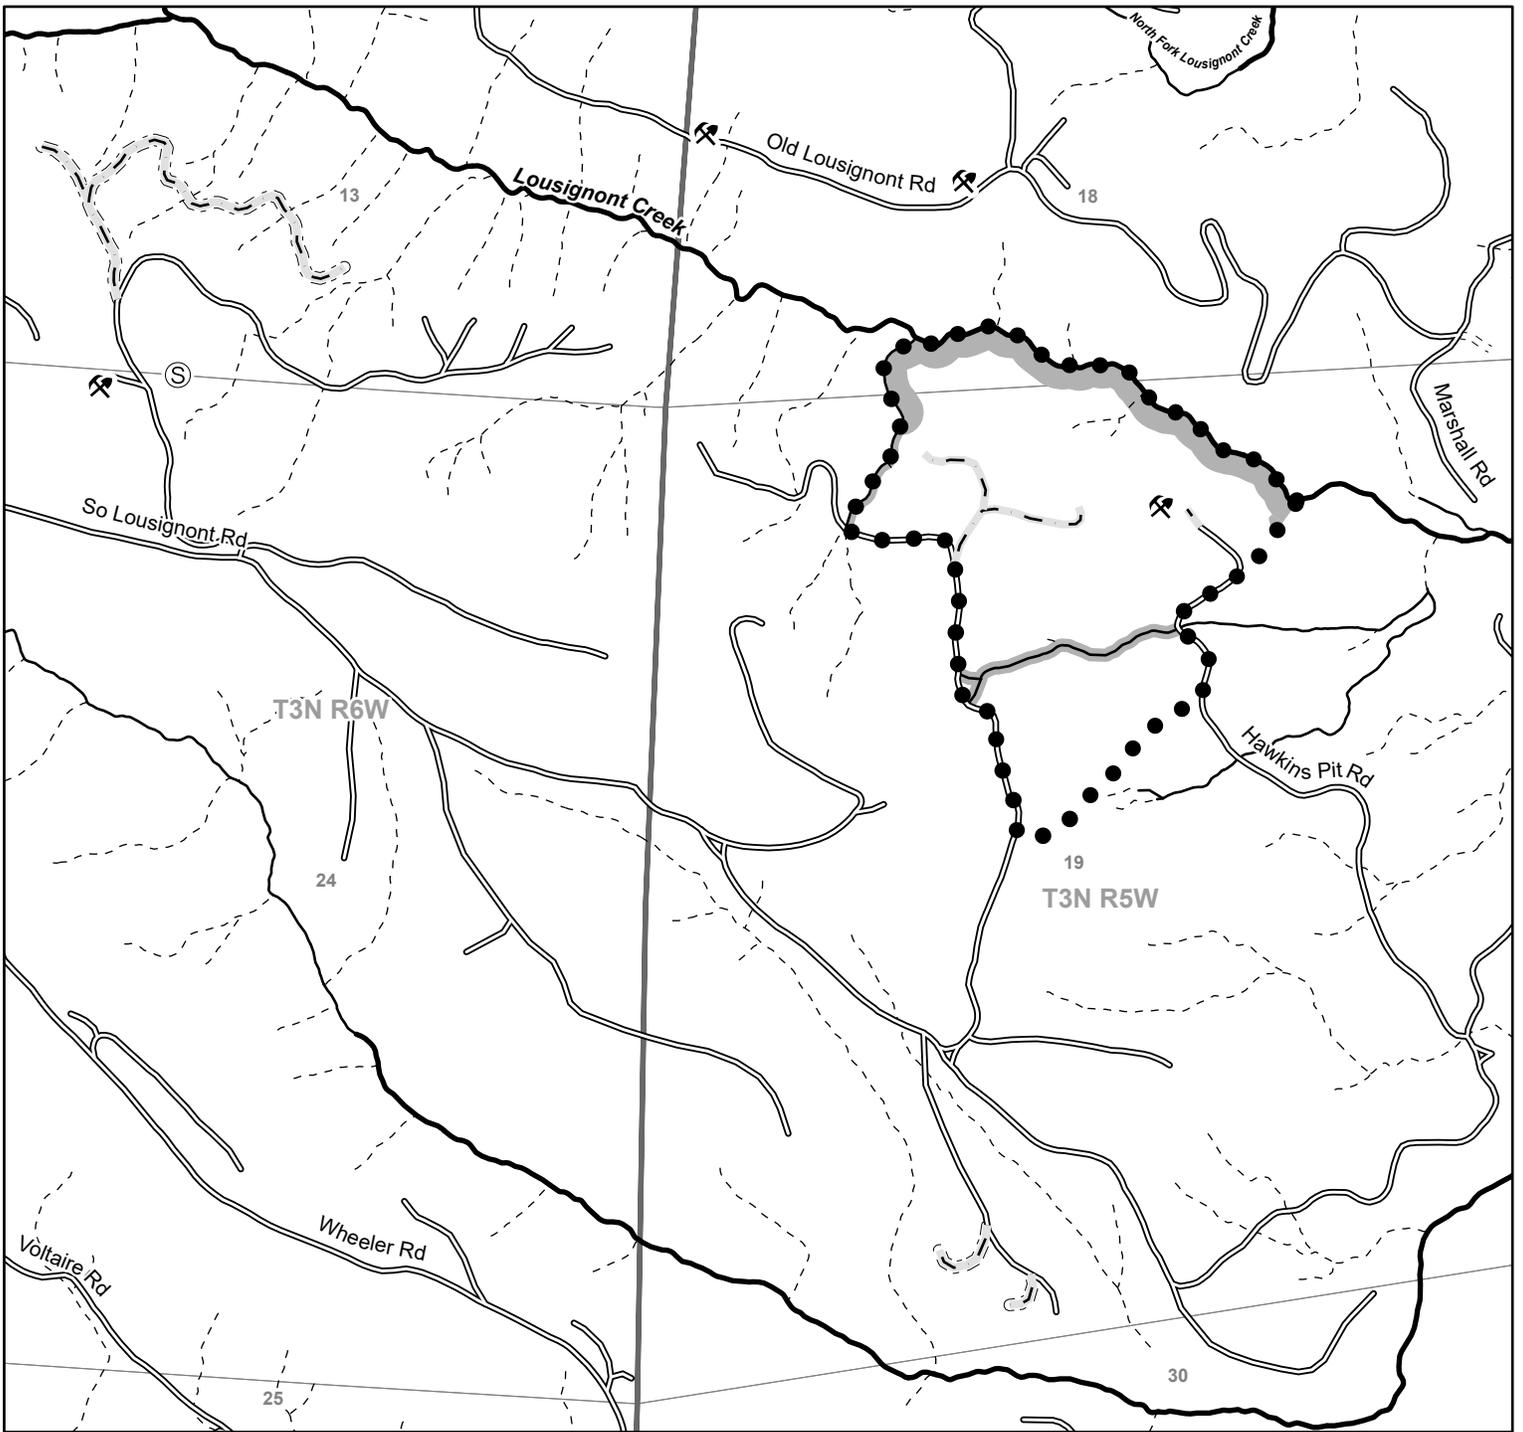

1. Has the sale been reviewed by a qualified archaeologist for potential historic or cultural resource presence? No Yes

X. SCENIC RESOURCES:

1. Are there scenic resources in the vicinity of this operation that need additional consideration? No Yes, please describe:

XI. OTHER RESOURCE CONSIDERATIONS:

1. Has a review of the FLMCS layer determined that any resources not mentioned in the report above need additional planning? No Yes, please describe:
2. Are there any other resources present that need additional consideration? No Yes, please describe:
