

# Pre-Operations Report

**Operation Name:** East Scotch  
**County (%):** Tillamook (100%)  
**Elevation:** 437 - 1,367 ft  
**Legal Description:** T2S R7W, Section(s) 7, 18

**Tax Code(s):** 901  
**BOF%:** 100%    **CSL%:**  
**Sale Quarter:**

## I. VOLUME AND VALUE SUMMARY

**Table 1. Types, Acres, and Value**

Unit	Harvest Type	Anticipated Product <sup>c</sup>	Gross Acres	Net Acres	MBF/Acre <sup>a</sup>	MBF/Unit <sup>a</sup>	\$/MBF <sup>b</sup>	\$/Unit
631	CC	DF-M, RA-M	144	84	24.4	2,050	\$358	\$733,900
Total		Regeneration	144	84		2,050		
		Partial Cut						
							Gross Value	\$733,900
a. Estimated harvest volume per acre for Unit.							Project Costs	\$75,000
b. Estimated 'price' (excluding Project Costs)							Net Value	\$658,900
c. Anticipated Product (AA-B-C) – AA) SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23)), C) Special Product (P – Premium, H – Hardwood)								

## II. CURRENT STAND CONDITION:

**Table 2. Stand Inventory Information**

Unit	Stand ID	Measured/Imputed <sup>a</sup>	Species	Age	TPA	DBH	BA	SDI	Net Acres <sup>b</sup>
631	31660	I = 31678	DF,RA	63	128	17	204	50%	22
631	31676	M	RA,DF	63	148	15	189	49%	1
631	31731	I = 32720	RA,BM	59	136	16	191	48%	2
631	31732	M	RA,DF	63	136	17	209	52%	59

- a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).
- b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

- Unit 631 has no record of pre-commercial or commercial thinning.

**Table 3. Additional Stand Information**

Unit	Stand ID	Snags/Acre <sup>a</sup>	Down Wood/Acre <sup>b</sup>	Forest Health		
				SNC	Phellinus	Other <sup>c</sup>
631	31660	16	764	Yes	--	Stunted Alder
631	31676	39	81	Yes	--	Stunted Alder
631	31731	20	45	Yes	--	Stunted Alder
631	31732	20	198	Yes	--	Stunted Alder

- a. Identify the number of hard snags per acre (decay classes 1 and 2)
- b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)
- c. Describe "Other" forest health issue.

**III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:**

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1. A portion of the operation is within (Check all that apply):
  - TAS     NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
  - MMMA (BA required)     None
2. Are Surveys for NSO being conducted for any portion of this operation?
  - No     Density Surveys     Operational Surveys     Combination (Density/Operational)

Notes:

3. Are Surveys for MM being conducted for any portion of this operation?
  - Yes (in progress/completed)     No (Not habitat)     N/A (outside of MM survey zone)

Notes:

4. Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant)?
  - No     Yes, please describe:

**IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:**

**Table 4. Stand Structure Information**

Unit	Stand ID	Current	Desired Future <sup>b</sup>	Net Acres <sup>a</sup>	Inside of HCA Acres
631	31660	UDS	GEN	Yes	22
631	31676	UDS	GEN	Yes	1
631	31731	UDS	GEN	Yes	2
631	31732	UDS	GEN	Yes	59

- a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total “Net Acres” per unit in this table may not equal the total “Net Acres” per unit in table 1.
- b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration, Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

**Table 5. Harvest Prescriptions**

Unit	Harvest Type	Harvest Species	Residual (Partial Cut & HCA only)			
			Species	TPA	BA	% SDI
631	CC	DF, RA	--	--	--	--

- **Prescription Considerations:**
  - Unit 631 is located in a Habitat Conservation area and is predominately a Douglas-fir stand that is infected with Swiss Needle Cast. This stand will be regeneration harvested to remove the majority of the Swiss Needle Cast infested Douglas fir while retaining the largest trees available, those individual Douglas-fir that are growing well, and tree species that are resistant to Swiss needle cast. Red alder will be evaluated during layout and if any sprayed alder is identified it will likely be removed. This area will be replanted with a mix of SNC resistant species and will highlight planting at lower densities to promote complex patches of early seral stage forest resulting in a stand that is positioned for future habitat treatments to grow into habitat for covered species in an accelerated timeframe. Treatments are intended to improve spatial heterogeneity, compositional diversity, understory development, canopy layering, and structural complexity of dominant and subdominant cohorts relative to untreated stands with similar conditions. Field staff and ODF Wildlife biologists will work

closely during sale layout to determine legacy components (species, size, location, etc.) when finalizing prescriptions in these areas.

- **Leave Tree Considerations:** Foresters will work with Wildlife Biologist during sale layout. The following should be considered when determining final leave tree arrangements.
  - Stand Characteristics: Prioritize larger diameter trees and minor species within the unit as part of the retention strategy.

**Table 6. Reforestation**

Unit	Planting Species Mix (%)*	TPA*	Considerations (ex. Elevation, SNC, Aspect, Animal Damage)
631	80 DF / 20 WH	400	Aspect, soil.

\*These are estimates for planning purposes and will be adjusted as needed based on site conditions during implementation.

- Reforestation Considerations:
  - The aspect of the unit will be favorable to stand establishment.
  - Soil on this unit should be favorable to stand establishment.

## V. HARVESTING AND ACCESS CONSIDERATIONS:

**Table 7. Harvest System and Access Summary**

Unit	Harvest System		Slope (%)	Unit Access	Seasonal Access
	% Cable	% Ground			
631	100	0	53	Simple	All Weather

1. Haul Route: Toll Road, Blue Bus Road, and Hopscotch Spur.
  - There are no locked gates on the haul route.
2. Haul Route Condition: Toll Road is being maintained by the Schmeagle Hill Timber Sale. Toll Loop, Mesabi Road, and existing spurs will require moderate grading.
3. Are easements required for the haul route?  No  Yes

**Table 8. Transportation Management Summary (Miles)**

Activity	Mainline	Collector	Rocked Spur	Dirt Spur
Construct	0	0	0.2	0
Improve, Rock, and/or Maintain	0	1.6	0.9	0
Vacate	0	0	0	0
Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC)				
Type F - SSBT <sup>a</sup>	0	0	0	0
Type F – Non-SSBT	0	0	0	0
Type N	0	0	0	0

a. Salmon Steelhead and Bull Trout (SSBT)

- Opportunities to vacate or block new or existing roads and/or spurs will be considered during sale layout.
4. Rock Sources for this operation: Toll Road Pit, 4-mile spur pit.
  5. Are property line surveys required for this operation?  No  Yes
  6. Is there planned new road construction planned within RCAs/HCAs?  No  Yes
    - New road construction within RCA and HCAs will only occur when other alternatives are not operationally or economically feasible. Planned new road construction will be evaluated as it is further refined during sale layout.

**VI. AQUATIC RESOURCES:**

1. Do any streams require additional review for the following?
  - Fish presence:  No  Yes
  - Perennial/Seasonal:  No  Yes
  - H.E.R.:  No  Yes
    - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.
2. Is a portion of the operation within an Aquatic Anchor?  No  Yes, name: E. Fk. of the S. Fk. Trask River.
  - Within the designated Aquatic Anchor streams will be buffered in accordance with strategies in the draft Habitat Conservation Plan that prioritize salmonid recovery as outlined in the State Forest Division Species of Concern Policy. These additional buffers are already incorporated into the sale buffers and are shown on the map. If additional information on streams is found during sale layout the buffers will be adjusted as required.
3. Are any domestic points of diversion identified in the Oregon Water Resource Department’s water rights information search GIS database located downstream within 3,000 feet of the harvest operation?
 

No  Yes, describe protection measures:
4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation?  No  Yes, please describe:
5. Is there a Stream Enhancement Project planned?  No  Yes, please describe:

**VII. SLOPE STABILITY ISSUES:**

**Table 9. Summary of Slope Stability Assessment**

Unit	Harvest Review Complete	Public Safety Review Complete
631	Yes	Yes

- **Geotech Review:** Geotechnical reviews have been completed, and slope protections have been incorporated into No Harvest buffers shown on the map. Additional consultation with Geotechnical Specialists will be done during sale layout as needed.

**VIII. RECREATION RESOURCES:**

1. Recreation issues/coordination:  No  Yes, please describe:

**IX. HISTORIC AND CULTURAL RESOURCES:**

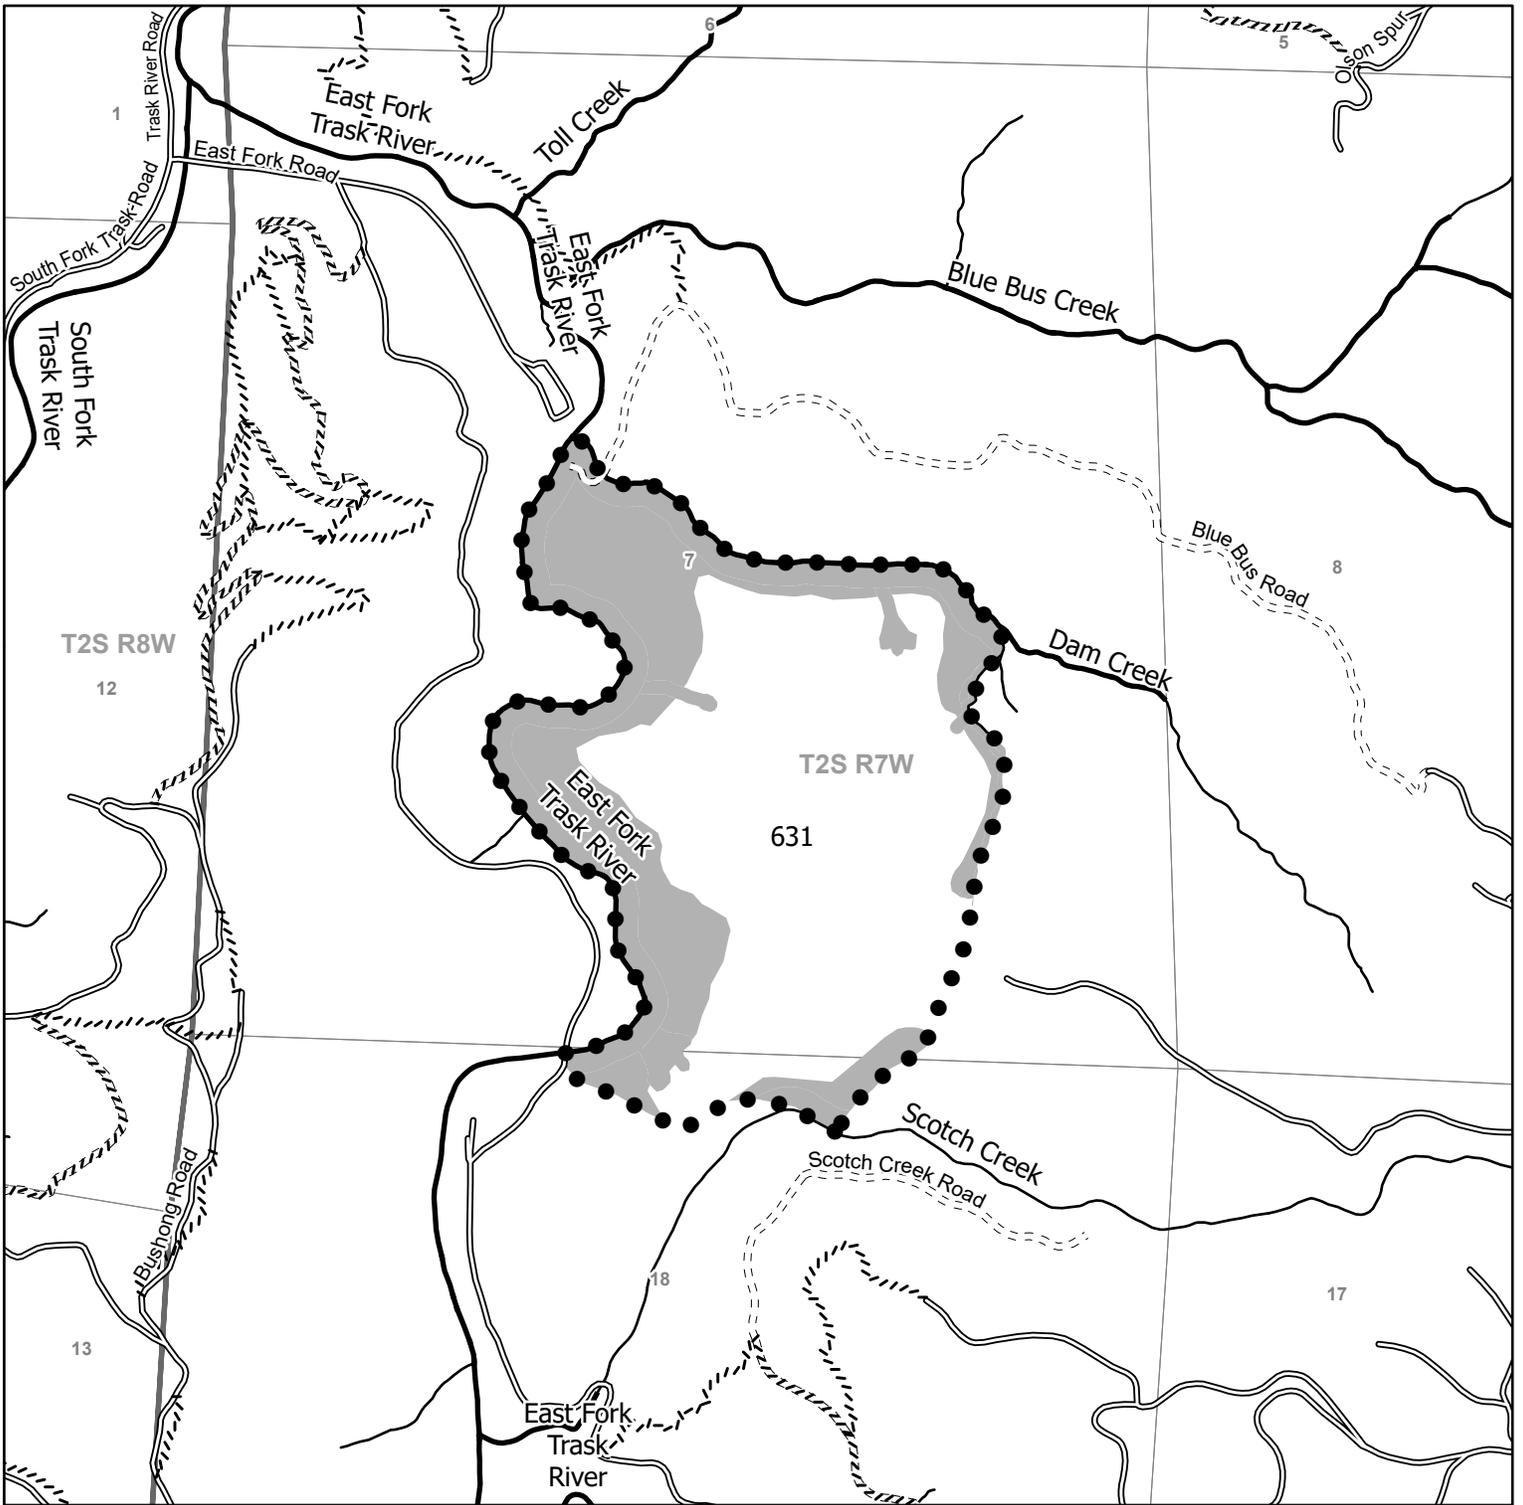

1. Has the sale been reviewed by a qualified archaeologist for potential historic or cultural resource presence?  No  Yes

**X. SCENIC RESOURCES:**

1. Are there scenic resources in the vicinity of this operation that need additional consideration?  No  Yes, please describe:

**XI. OTHER RESOURCE CONSIDERATIONS:**

1. Has a review of the FLMCS layer determined that any resources not mentioned in the report above need additional planning?  No  Yes, please describe: the layer indicates the presence of a 1-hectare permanent plot. This will not affect harvest operations, and the district will follow their standard protocol.
2. Are there any other resources present that need additional consideration?  No  Yes, please describe:

- Legend**
- ● Sale Boundary
  - Surfaced
  - - - - Unsurfaced
  - ▬ Ownership Boundary
  - ▬ Perennial Fish
  - ▬ Perennial Non-Fish
  - - - - New Road Construction
  - ▬ Recreation Trails
  - ▬ No Harvest - Green Tree Retention
  - ▬ No Harvest Area
  - ▬ No Harvest - Existing Road; New Construction
