

Pre-Operations Report

Operation Name: One Rock
County (%): Tillamook (100%)
Elevation: 993 - 1,754 ft
Legal Description: T2S R7W, Section(s) 27, 34

Tax Code(s): 801
BOF%: 100% **CSL%:** 0%
Sale Quarter:

I. VOLUME AND VALUE SUMMARY

Table 1. Types, Acres, and Value

Unit	Harvest Type	Anticipated Product ^c	Gross Acres	Net Acres	MBF/Acre ^a	MBF/Unit ^a	\$/MBF ^b	\$/Unit
584	CC	DF-M, RA-M	111	99	34.0	3,366	\$385	\$1,295,910
Total		Regeneration	111	99		3,366		
		Partial Cut	0	0		0		
							Gross Value	\$1,295,910
a. Estimated harvest volume per acre for Unit.							Project Costs	\$215,400
b. Estimated 'price' (excluding Project Costs)							Net Value	\$1,080,510
c. Anticipated Product (AA-B-C) – AA SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23]), C) Special Product (P – Premium, H – Hardwood)								

II. CURRENT STAND CONDITION:

Table 2. Stand Inventory Information

Unit	Stand ID	Measured/Imputed ^a	Species	Age	TPA	DBH	BA	SDI	Net Acres ^b
584	31516	I = 35511	DF,RA	56	109	17	164	41%	8
584	31520	I = 30407	RA,DF	56	72	19	137	33%	3
584	31521	M	DF,CH	56	94	18	163	40%	88

- a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).
- b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

- These stands were planted but have no record of pre-commercial or commercial thinning.

Table 3. Additional Stand Information

Unit	Stand ID	Snags/Acre ^a	Down Wood/Acre ^b	Forest Health		
				SNC	Phellinus	Other ^c
584	31516	10	168	Yes	--	Scotch Broom
584	31520	5	38	Yes	--	Scotch Broom
584	31521	6	44	Yes	--	Scotch Broom

- a. Identify the number of hard snags per acre (decay classes 1 and 2)
- b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)
- c. Describe "Other" forest health issue.

III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1. A portion of the operation is within (Check all that apply):
 TAS NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
 MMMA (BA required) None
2. Are Surveys for NSO being conducted for any portion of this operation?
 No Density Surveys Operational Surveys Combination (Density/Operational)

Notes:

3. Are Surveys for MM being conducted for any portion of this operation?
 Yes (in progress/completed) No (Not habitat) N/A (outside of MM survey zone)

Notes:

4. Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant)?
 No Yes, please describe:

IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:

Table 4. Stand Structure Information

Unit	Stand ID	Current	Desired Future ^b	Net Acres ^a	Inside of HCA Acres
584	31516	UDS	GEN	8	0
584	31520	UDS	GEN	3	0
584	31521	UDS	GEN	88	0

- a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total “Net Acres” per unit in this table may not equal the total “Net Acres” per unit in table 1.
- b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration, Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

Table 5. Harvest Prescriptions

Unit	Harvest Type	Harvest Species	Residual (Partial Cut & HCA only)			
			Species	TPA	BA	% SDI
1	CC	DF, RA	--	--	--	--

- **Leave Tree Considerations:** Foresters will work with Wildlife Biologist during sale layout. The following should be considered when determining final leave tree arrangements.
 - Stand Characteristics: Prioritize larger diameter trees within each unit as part of the retention strategy.

Table 6. Reforestation

Unit	Planting Species Mix (%)*	TPA*	Considerations (ex. Elevation, SNC, Aspect, Animal Damage)
584	90 DF /10 GF	360	North Slope, Browse damage.

*These are estimates for planning purposes and will be adjusted as needed based on site conditions during implementation.

- **Reforestation Considerations:**
 - Aspect will be favorable to stand establishment.
 - There has been quite a lot of browse damage on plantations in this area in the past.
 - Site prep and vegetation management may be more expensive than average due to scotch broom pressure in the area.

V. HARVESTING AND ACCESS CONSIDERATIONS:

Table 7. Harvest System and Access Summary

Unit	Harvest System		Slope (%)	Unit Access	Seasonal Access
	% Cable	% Ground			
584	100	0	39	Simple	All Weather

1. Haul Route: Rock Creek, East Fork Trask, South Fork Trask
 - This sale is behind locked gates.
2. Haul Route Condition: South Fork Trask Road to the East Fork Trask junction is in excellent shape and will be maintained by the South Fork Trask, Trask Joy, Edwards BSM, and Kong Returns timber sales. East Fork Trask Road up to Rock Creek Road will need grading and some spot patching done, as well as some culverts to install above the Miller Road junction. Rock Creek Road will need grading and some spot patching.
3. Are easements required for the haul route? No Yes

Table 8. Transportation Management Summary (Miles)

Activity	Mainline	Collector	Rocked Spur	Dirt Spur
Construct	0	0	0.37	0
Improve, Rock, and/or Maintain	9.2	1.8	0	0
Vacate	0	0	0	0
Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC)				
Type F - SSBT ^a	0	0	0	0
Type F – Non-SSBT	0	0	0	0
Type N	7(R)	0	0	0

a. Salmon Steelhead and Bull Trout (SSBT)

- Opportunities to vacate or block new or existing roads and/or spurs will be considered during sale layout.
4. Rock Sources for this operation: Property Line Pit (Pitrun), Boundary & East Fork stockpiles (Crushed Rock).
 5. Are property line surveys required for this operation? No Yes
 6. Is there planned new road construction planned within RCAs/HCA's? No Yes

VI. AQUATIC RESOURCES:

1. Do any streams require additional review for the following?
 - Fish presence: No Yes
 - Perennial/Seasonal: No Yes
 - H.E.R.: No Yes
 - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.
2. Is a portion of the operation within an Aquatic Anchor? No Yes, name: E. Fk. Of the S. Fk. Trask River
 - Within the designated Aquatic Anchor streams will be buffered in accordance with strategies in the draft Habitat Conservation Plan that prioritize salmonid recovery as outlined in the State Forest Division Species of Concern Policy. These additional buffers are already incorporated into the sale buffers and are shown on the map. If additional information on streams is found during sale layout the buffers will be adjusted as required.
3. Are any domestic points of diversion identified in the Oregon Water Resource Department’s water rights information search GIS database located downstream within 3,000 feet of the harvest operation?
 - No Yes, describe protection measures:
4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation? No Yes, please describe:
5. Is there a Stream Enhancement Project planned? No Yes, please describe: There is potential for a stream enhancement Project in the East Fork South Fork Trask River (Sale Area 584). Additional desktop and field reviews shall be conducted to determine the best candidates to focus stream enhancement efforts. The District shall consult with the ODF Aquatic and Riparian Specialist and the local ODFW Habitat Biologist to help determine the feasibility and logistics of the Project during sale layout.

VII. SLOPE STABILITY ISSUES:

Table 9. Summary of Slope Stability Assessment

Unit	Harvest Review Complete	Public Safety Review Complete
584	Y	Y

- **Geotech Review:** Initial geotechnical reviews have been completed and those findings have been incorporated into No Harvest buffers. Additional consultation with Geotechnical Specialists will be done during sale layout as needed.

VIII. RECREATION RESOURCES:

1. Recreation issues/coordination: No Yes, please describe:
 - Segments of Kristie’s Shuttle Trail, and Poewade Trail exist within the sale boundaries. The Marketing Unit and Roads Unit will work closely with the Recreation Program during sale layout, contract writing,

and sale administration to minimize impact to the recreational trails and mitigate public use safety concerns.

- The recreation trails will be temporarily closed when safety hazards are present during timber sale activity and re-opened once sale activity is completed or when safe to do so. Trail segments impacted by road construction will be evaluated for re-route construction post timber harvest.
- The Recreation Program may perform maintenance upgrades to improve sustainability and improve hydrological disconnection during closure to minimize impact to the public.

IX. HISTORIC AND CULTURAL RESOURCES:

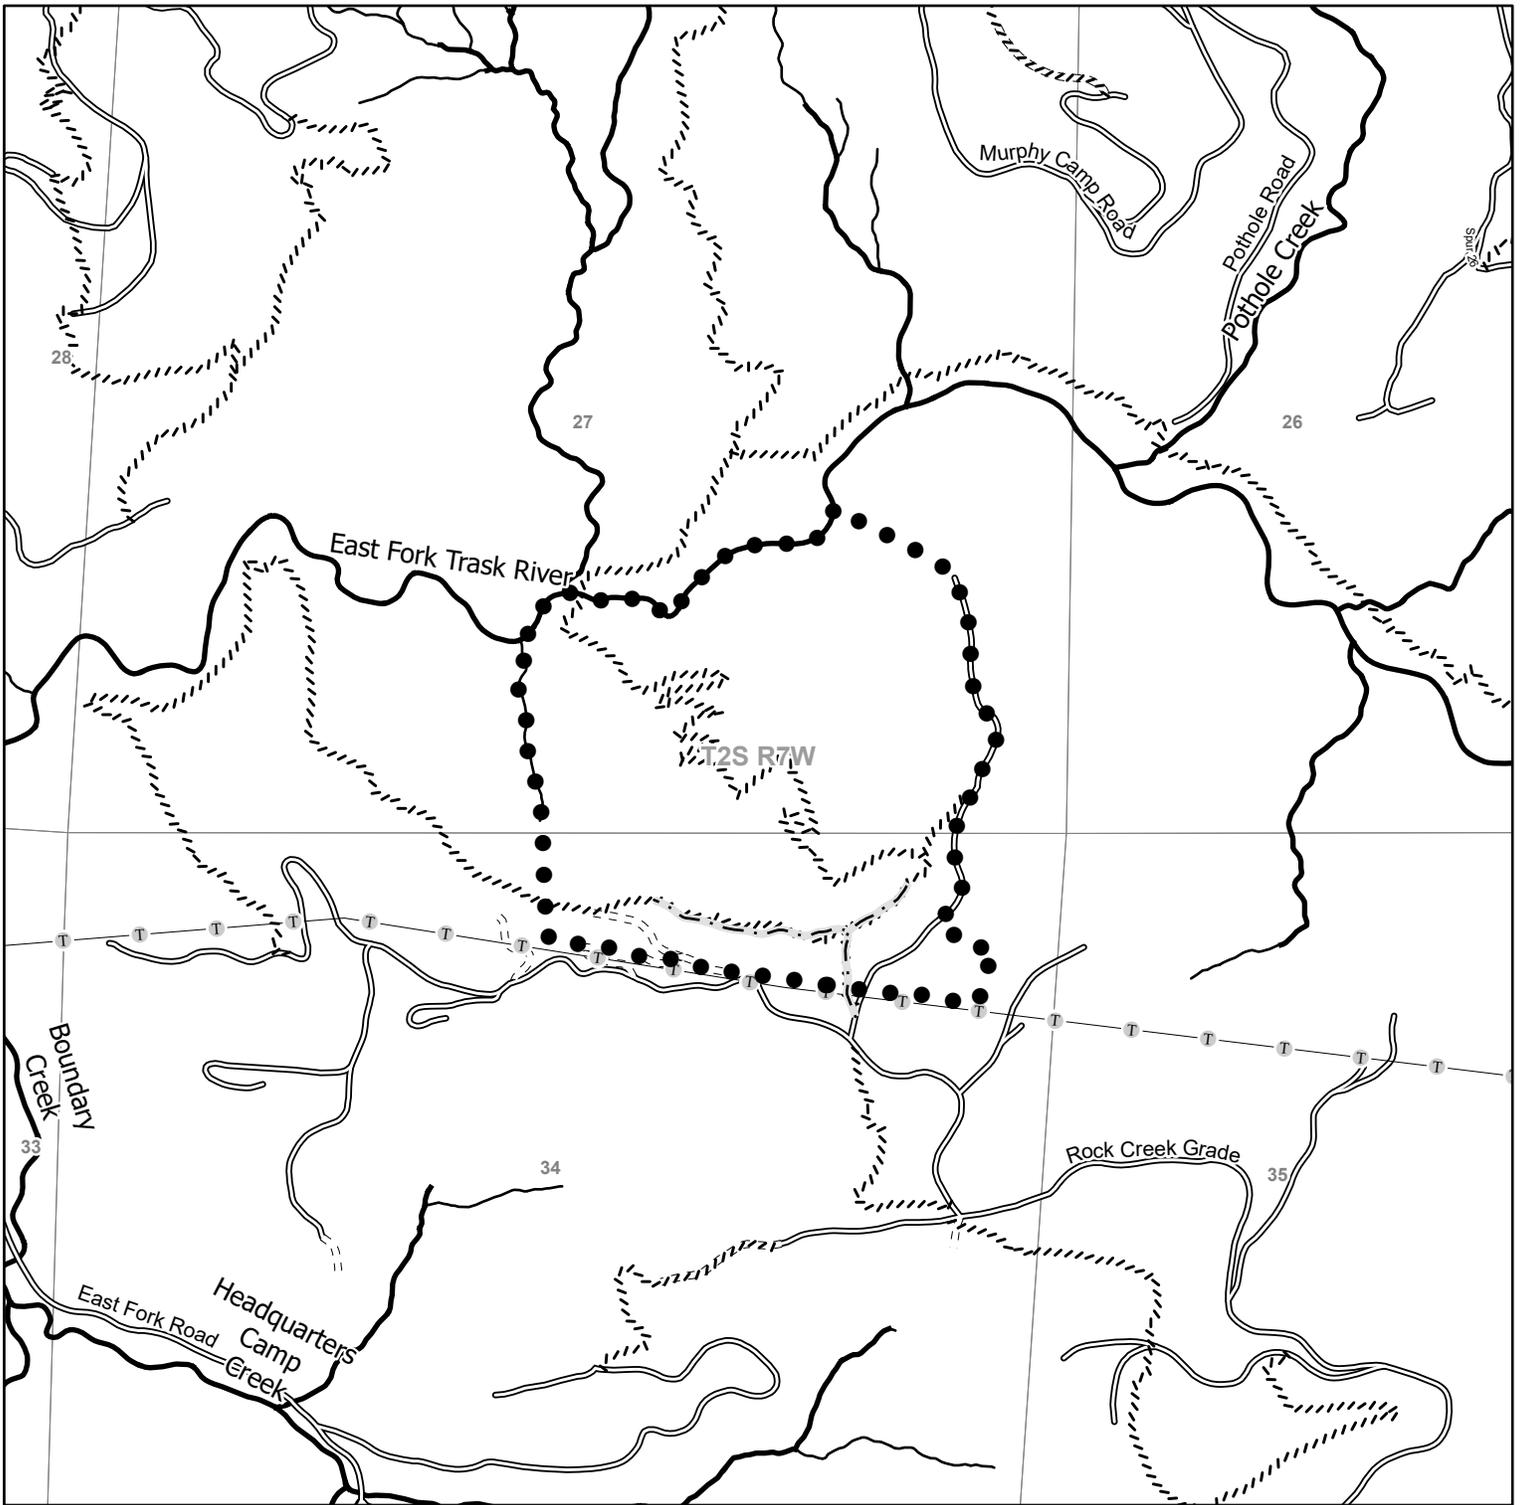

1. Has the sale been reviewed by a qualified archaeologist for potential historic or cultural resource presence? No Yes

X. SCENIC RESOURCES:

1. Are there scenic resources in the vicinity of this operation that need additional consideration? No Yes, please describe:

XI. OTHER RESOURCE CONSIDERATIONS:

1. Has a review of the FLMCS layer determined that any resources not mentioned in the report above need additional planning? No Yes, please describe:
 - There are transmission lines along the southern border of the harvest unit.
2. Are there any other resources present that need additional consideration? No Yes, please describe:

- Legend**
- ● Sale Boundary
 - Transmission Lines
 - Surfaced
 - - - - Unsurfaced
 - ▭ Ownership Boundary
 - Perennial Fish
 - Perennial Non-Fish
 - · - · New Road Construction
 - ▨ Recreation Trails

**FY 2027 - Tillamook District
One Rock
Portions of Section 27, 34, T2S, R7W, , W.M.
Tillamook County**

State Forest Division
03/02/2026

This product is for informational use and may not have been prepared for or be suitable for legal, engineering or survey purposes. Variations may exist between and among data sets in use by the Department of Forestry. This map was developed using the Statewide Flow Line layer layer.
