Pre-Operations Report

Operation Name: Last Rodeo Tax Code(s):

County (%): Polk (100%) BOF%: 100% CSL%: 0%

Elevation: 435 – 998 ft Sale Quarter: ALT

Legal Description: T10S R8W, Section(s) 2,3

I. VOLUME AND VALUE SUMMARY

Table 1. Types, Acres, and Value

	Harvest	Anticipated	Gross		MBF/	MBF/		
Unit	Type	Product ^c	Acres	Net Acres	Acrea	Unita	\$/MBF ^b	\$/Unit
1	CC	DF-M, RA-S	105	89	32	2,848	\$400	\$1,139,200
Total		Regeneration	105	89				
		Partial Cut	0	0				
							s Value	\$1,139,200
a. Estimated harvest volume per acre for Unit.						Projec	ct Costs	\$68,645
b. Estimated 'price' (excluding Project Costs)						Net	Value	\$1,070,555

c. Anticipated Product (AA-B-C) – AA) SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23]), C) Special Product (P – Premium, H – Hardwood)

II. CURRENT STAND CONDITION:

Table 2. Stand Inventory Information

T T •	Stand	Measured/			7770.4	DDII	D.4	0.51	Net
Unit	ID	Imputeda	Species	Age	TPA	DBH	BA	SDI	Acres
1	18660	I = 18531	DF,BM	53	84	20	184	43%	88

a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).

Unit 1 was thinned in 2005.

Table 3. Additional Stand Information

_								
		Stand	Snags/	Down Wood/		Forest Health		
	Unit	ID	Acrea	Acreb	SNC	Phellinus	Other ^c	
	1	18660	2	222				

a. Identify the number of hard snags per acre (decay classes 1 and 2)

b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)

c. Describe "Other" forest health issue.

III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1.	A portion of the operation is within (Check all that apply):
	☐ TAS ☐ NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
	☐ MMMA (BA required) None
2.	Are Surveys for NSO being conducted for any portion of this operation?
	☐ No ☐ Density Surveys ☐ Operational Surveys ☐ Combination (Density/Operational)
	Notes:
3.	Are Surveys for MM being conducted for any portion of this operation?
	\square Yes (in progress/completed) \boxtimes No (Not habitat) \square N/A (outside of MM survey zone)
	Notes: There are potential habitat trees in one of the stream buffers within the unit. Those trees will be evaluated for habitat before sale layout by an ODF staff biologist and a no-harvest buffer will be applied if necessary.
4.	Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant [from ORBIC¹])?
	No □ Yes, please describe:

IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:

Table 4. Stand Structure Information

Unit	Stand ID	Current	Desired Future ^b	Inside of HCA	Net Acresa	
1	18660	UDS	GEN	No	88	

a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

Table 5. Partial Cut & HCA Prescriptions (Complete only for Partial Cut and HCA Harvests)

	Harvest		Residual				
Unit	Harvest Type	Species	Species	TPA	BA	% SDI	
1	CC						

- Leave Tree Considerations: Foresters will work with wildlife biologist during sale layout. The following should be considered when determining final leave tree arrangements.
 - Prioritize minor species as part of the retention strategy.
- **Reforestation Considerations:** Following the completion of harvest, the unit will be planted with a mixture of species native to the geographic area.

b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration, Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

Oregon Biodiversity Information Center West Oregon District
 Approved - July 2025

V. HARVESTING AND ACCESS CONSIDERATIONS:

Table 6. Harvest System and Access Summary

	Harvest	System	-	Unit	Seasonal
Unit	% Cable	% Ground	Slope (%)	Access	Access
1	40	60	35-65	Established	All Weather

- 1. Haul Route: In-unit spurs to Steere Creek
- 2. Haul Route Condition: Haul route is in fair condition that will require maintenance and rock replacement for all haul roads.
- 3. Are easements required for the haul route? \square No \boxtimes Yes

Steere Creek road has existing permanent easement 311.27026.

Table 7. Transportation Management Summary (Miles)

Activity	Mainline	Collector	Rocked Spur	Dirt Spur		
Construct	0	0	0	0		
Improve, Rock, and/or Maintain	0	0 4.2		0.1		
Vacate	0	0	0	0		
Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC)						
Type F - SSBT ^a	0	0	0	0		
Type F – Non-SSBT	0	0	0	0		
Type N	0	0	0	0		

- a. Salmon Steelhead and Bull Trout (SSBT)
- 4. Rock Sources for this operation: Purchaser will buy rock from State approved commercial rock source.
- 5. Are property line surveys required for this operation? \square No \square Yes

Southwest property line has been cut up to and is easy to distinguish, with survey monuments along line that were last surveyed in 1996.

6. Is there planned new road construction planned within RCAs/HCAs? ⊠ No ☐ Yes

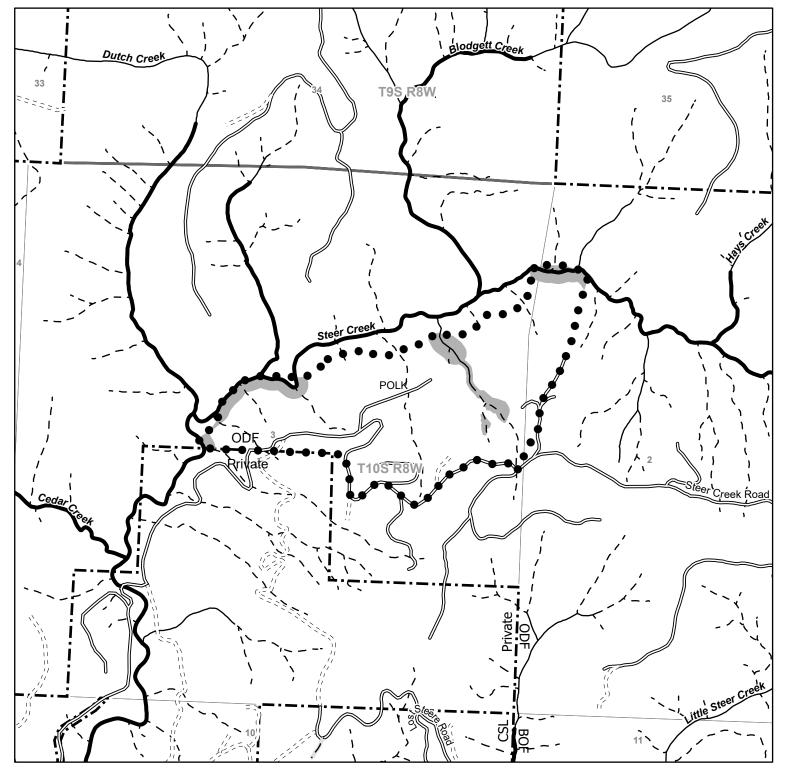

VI. AQUATIC RESOURCES:

- 1. Do any streams require additional review for the following?
 - Fish presence: ⊠ No ☐ Yes
 - Perennial/Seasonal: ☐ No ☐ Yes
 - H.E.R.: □ No ⊠ Yes
 - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.

2.	Is a portion of	f the operation wit	hin an Aquatic An	chor? 🗆 No	⊠ Yes,	name: Siletz-Yaquina
	draft Hab Division S buffers ar	itat Conservation l Species of Concern	Plan that prioritize a Policy. These add the map. If addition	salmonid recover litional buffers ar	ry as outli e already	lance with strategies in the ined in the State Forest incorporated into the sale is is found during sale layout
3.	Are any domestic points of diversion identified in the Oregon Water Resource Department's water rights information search GIS database located downstream within 3,000 feet of the harvest operation?					
	⊠ No □	Yes, describe pro	otection measures:			
4.		unregistered or unvest operation?		nestic points of di please describe:	version th	nat have been identified
rev Sta	ere is potential iews shall be co te Forest staff s	onducted to detern	ncement project in nine the best candi he ODF Aquatic a	Steer Creek (Unidates to focus strand Riparian Spec	eam enha ialist and	tional desktop and field ncement efforts. District the local ODFW Habitat

VI	I.RECREAT	TION RESOUR	RCES:			
1.	Recreation iss	ues/coordination:	⊠ No □ Y	es, please describ	e:	
	• No recrea	ation resources exis	st within the sale b	oundaries or are	within pro	oximity to the sale areas.
IX.	HISTORIC	AND CULTU	RAL RESOUR	CES:		
1.	Has the sale b presence?	een reviewed by a ⊠ No □Yes	qualified archaeolo	ogist for potential	historic	or cultural resource
	• Cultural F	Resource Review w	ill be completed p	rior to sale layout		
X	SCENIC RI	ESOURCES:				
1.		nic resources in the Yes, please describ	-	peration that need	additiona	al consideration?
ΧI	OTUED DI	ESOURCE CO	NSIDERATIO	NIS:		

1.	Has a review of the FLMCS layer determined that any resources not mentioned in the report above need
	additional planning? ⊠ No □ Yes, please describe:
2.	Are there any other resources present that need additional consideration? \square No \boxtimes Yes, please describe:

- Adjacent Landowners (shared property lines):
 - Private Industrial Landowner
 - District staff will work with adjacent private landowners to determine what additional outreach is needed during the sale process and if any additional restrictions are needed.
