

## Pre-Operations Report

**Operation Name:** Lucki Lake  
**County (%):** Benton (100%)  
**Elevation:** 717 – 1,247 ft  
**Legal Description:** T10S R6W, Section(s) 19; T10S R7W, Section(s) 24

**Tax Code(s):**  
**BOF%:** 100%   **CSL%:** 0%  
**Sale Quarter:** ALT

### I. VOLUME AND VALUE SUMMARY

**Table 1. Types, Acres, and Value**

| Unit                                                                                                                                                                                                                                     | Harvest Type | Anticipated Product <sup>c</sup> | Gross Acres | Net Acres | MBF/Acre <sup>a</sup> | MBF/Unit <sup>a</sup> | \$/MBF <sup>b</sup> | \$/Unit     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------------------------------|-------------|-----------|-----------------------|-----------------------|---------------------|-------------|
| 1                                                                                                                                                                                                                                        | CC           | DF-M, RA-S                       | 10          | 8         | 36.0                  | 288                   | \$475               | \$136,800   |
| 2                                                                                                                                                                                                                                        | CC           | DF-M, RA-S                       | 57          | 51        | 36.0                  | 1,836                 | \$475               | \$872,100   |
| Total                                                                                                                                                                                                                                    |              | Regeneration                     | 67          | 59        |                       | 2,124                 |                     |             |
|                                                                                                                                                                                                                                          |              | Partial Cut                      |             |           |                       |                       |                     |             |
|                                                                                                                                                                                                                                          |              |                                  |             |           |                       |                       | Gross Value         | \$1,008,900 |
| a. Estimated harvest volume per acre for Unit.                                                                                                                                                                                           |              |                                  |             |           |                       |                       | Project Costs       | \$43,625    |
| b. Estimated 'price' (excluding Project Costs)                                                                                                                                                                                           |              |                                  |             |           |                       |                       | Net Value           | \$965,275   |
| c. Anticipated Product (AA-B-C) – AA) SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23]), C) Special Product (P – Premium, H – Hardwood) |              |                                  |             |           |                       |                       |                     |             |

### II. CURRENT STAND CONDITION:

**Table 2. Stand Inventory Information**

| Unit | Stand ID | Measured/Imputed <sup>a</sup> | Species | Age | TPA | DBH | BA  | SDI | Net Acres <sup>b</sup> |
|------|----------|-------------------------------|---------|-----|-----|-----|-----|-----|------------------------|
| 1    | 19193    | I = 18552                     | DF,RA   | 75  | 123 | 18  | 226 | 54% | 8                      |
| 2    | 19192    | I = 18601                     | DF,CH   | 63  | 198 | 14  | 209 | 56% | 29                     |
| 2    | 19194    | I = 18552                     | DF,RA   | 63  | 123 | 18  | 226 | 54% | 21                     |

- a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).
- b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

- Units 1 and 2 were thinned in 1999 and 2012.

**Table 3. Additional Stand Information**

| Unit | Stand ID | Snags/Acre <sup>a</sup> | Down Wood/Acre <sup>b</sup> | Forest Health |           |                    |
|------|----------|-------------------------|-----------------------------|---------------|-----------|--------------------|
|      |          |                         |                             | SNC           | Phellinus | Other <sup>c</sup> |
| 1    | 19193    | 15                      | 93                          |               | x         |                    |
| 2    | 19192    | 0                       | 58                          |               | x         |                    |
| 2    | 19194    | 15                      | 93                          |               | x         |                    |

- a. Identify the number of hard snags per acre (decay classes 1 and 2)
- b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)
- c. Describe "Other" forest health issue.

**III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:**

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1. A portion of the operation is within (Check all that apply):
  - TAS     NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
  - MMMA (BA required)     None
2. Are Surveys for NSO being conducted for any portion of this operation?
  - No     Density Surveys     Operational Surveys     Combination (Density/Operational)

Notes:

3. Are Surveys for MM being conducted for any portion of this operation?
  - Yes (in progress)     No (Not habitat)     N/A (outside of MM survey zone)

Notes: Surveys in progress (2025/2026)

4. Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant)?
  - No     Yes, please describe:

**IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:**

**Table 4. Stand Structure Information**

| Unit | Stand ID | Current | Desired Future <sup>b</sup> | Net Acres <sup>a</sup> | Inside of HCA Acres |
|------|----------|---------|-----------------------------|------------------------|---------------------|
| 1    | 19193    | UDS     | GEN                         | 8                      | 0                   |
| 2    | 19192    | UDS     | GEN                         | 29                     | 0                   |
| 2    | 19194    | UDS     | GEN                         | 21                     | 0                   |

- a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total “Net Acres” per unit in this table may not equal the total “Net Acres” per unit in table 1.
- b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration, Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

**Table 5. Harvest Prescriptions**

| Unit | Harvest Type | Harvest Species | Residual (Partial Cut & HCA only) |     |    |       |
|------|--------------|-----------------|-----------------------------------|-----|----|-------|
|      |              |                 | Species                           | TPA | BA | % SDI |
| 1    | CC           | DF              |                                   |     |    |       |

- **Leave Tree Considerations:** Foresters will work with Wildlife Biologist during sale layout. The following should be considered when determining final leave tree arrangements.
  - Stand Characteristics: Prioritize larger diameter trees within each unit as part of the retention strategy.

**Table 6. Reforestation**

| Unit | Planting Species Mix (%)* | TPA* | Considerations (ex. Elevation, SNC, Aspect, Animal Damage) |
|------|---------------------------|------|------------------------------------------------------------|
| 1    | 85 DF /15 Other           | 360  | Phellinus Weirii                                           |
| 2    | 85 DF /15 Other           | 360  | Phellinus Weirii                                           |

\*These are estimates for planning purposes and will be adjusted as needed based on site conditions during implementation.

**V. HARVESTING AND ACCESS CONSIDERATIONS:**

**Table 7. Harvest System and Access Summary**

| Unit | Harvest System |          | Slope (%) | Unit Access | Seasonal Access |
|------|----------------|----------|-----------|-------------|-----------------|
|      | % Cable        | % Ground |           |             |                 |
| 1    | 10             | 90       | 35-65     | Simple      | Combo           |
| 2    | 40             | 60       | 35-65     | Established | All Weather     |

- Haul Route: Fathead Lake Road to Hoskins County Road. There is a locked gate on Fathead Lake Road just north of Hoskins County Road.
- Haul Route Condition: The haul route is a maintained gravel road that will require brushing and minor maintenance. The in-unit spurs will need to be re-opened and improved prior to use. There is a locked gate at the start of Fathead Lake Road.
- Are easements required for the haul route?  No  Yes  
There is an existing permanent easement (311.02018) that covers the private road in Section 24 of T10S, R7W, W.M.

**Table 8. Transportation Management Summary (Miles)**

| Activity                                                                                                           | Mainline | Collector | Rocked Spur | Dirt Spur |
|--------------------------------------------------------------------------------------------------------------------|----------|-----------|-------------|-----------|
| Construct                                                                                                          | 0        | 0         | 0           | 0         |
| Improve, Rock, and/or Maintain                                                                                     | 0        | 2.1       | 1.9         | 0.1       |
| Vacate                                                                                                             | 0        | 0         | 0           | 0         |
| Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC) |          |           |             |           |
| Type F - SSBT <sup>a</sup>                                                                                         | 0        | 0         | 0           | 0         |
| Type F – Non-SSBT                                                                                                  | 0        | 0         | 0           | 0         |
| Type N                                                                                                             | 0        | 1R        | 0           | 0         |

a. Salmon Steelhead and Bull Trout (SSBT)

- Opportunities to vacate or block new or existing roads and/or spurs will be considered during sale layout.

- Rock Sources for this operation: Purchaser will buy rock from a State approved commercial rock source.
- Are property line surveys required for this operation?  No  Yes  
All property lines were blazed and posted in 1997, and evidence of this survey was identified in 2025. There are also distinct timber type changes on approximately 80% of the property lines.
- Is there planned new road construction planned within RCAs/HCAs?  No  Yes

**VI. AQUATIC RESOURCES:**

- Do any streams require additional review for the following?
  - Fish presence:  No  Yes
  - Perennial/Seasonal:  No  Yes
  - H.E.R.:  No  Yes
    - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for

permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.

2. Is a portion of the operation within an Aquatic Anchor?  No  Yes, name:
3. Are any domestic points of diversion identified in the Oregon Water Resource Department's water rights information search GIS database located downstream within 3,000 feet of the harvest operation?  
 No  Yes, describe protection measures:
4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation?  No  Yes, please describe:
5. Is there a Stream Enhancement Project planned?  No  Yes, please describe:

**VII. SLOPE STABILITY ISSUES:**

**Table 9. Summary of Slope Stability Assessment**

| Unit | Harvest Review Complete | Public Safety Review Complete |
|------|-------------------------|-------------------------------|
| 1    | Y                       | Y                             |
| 2    | Y                       | Y                             |

- **Geotech Review:** Initial geotechnical reviews have been completed and those findings have been incorporated into No Harvest buffers. Additional consultation with Geotechnical Specialists will be done during sale layout as needed.

**VIII. RECREATION RESOURCES:**

1. Recreation issues/coordination:  No  Yes, please describe:

**IX. HISTORIC AND CULTURAL RESOURCES:**

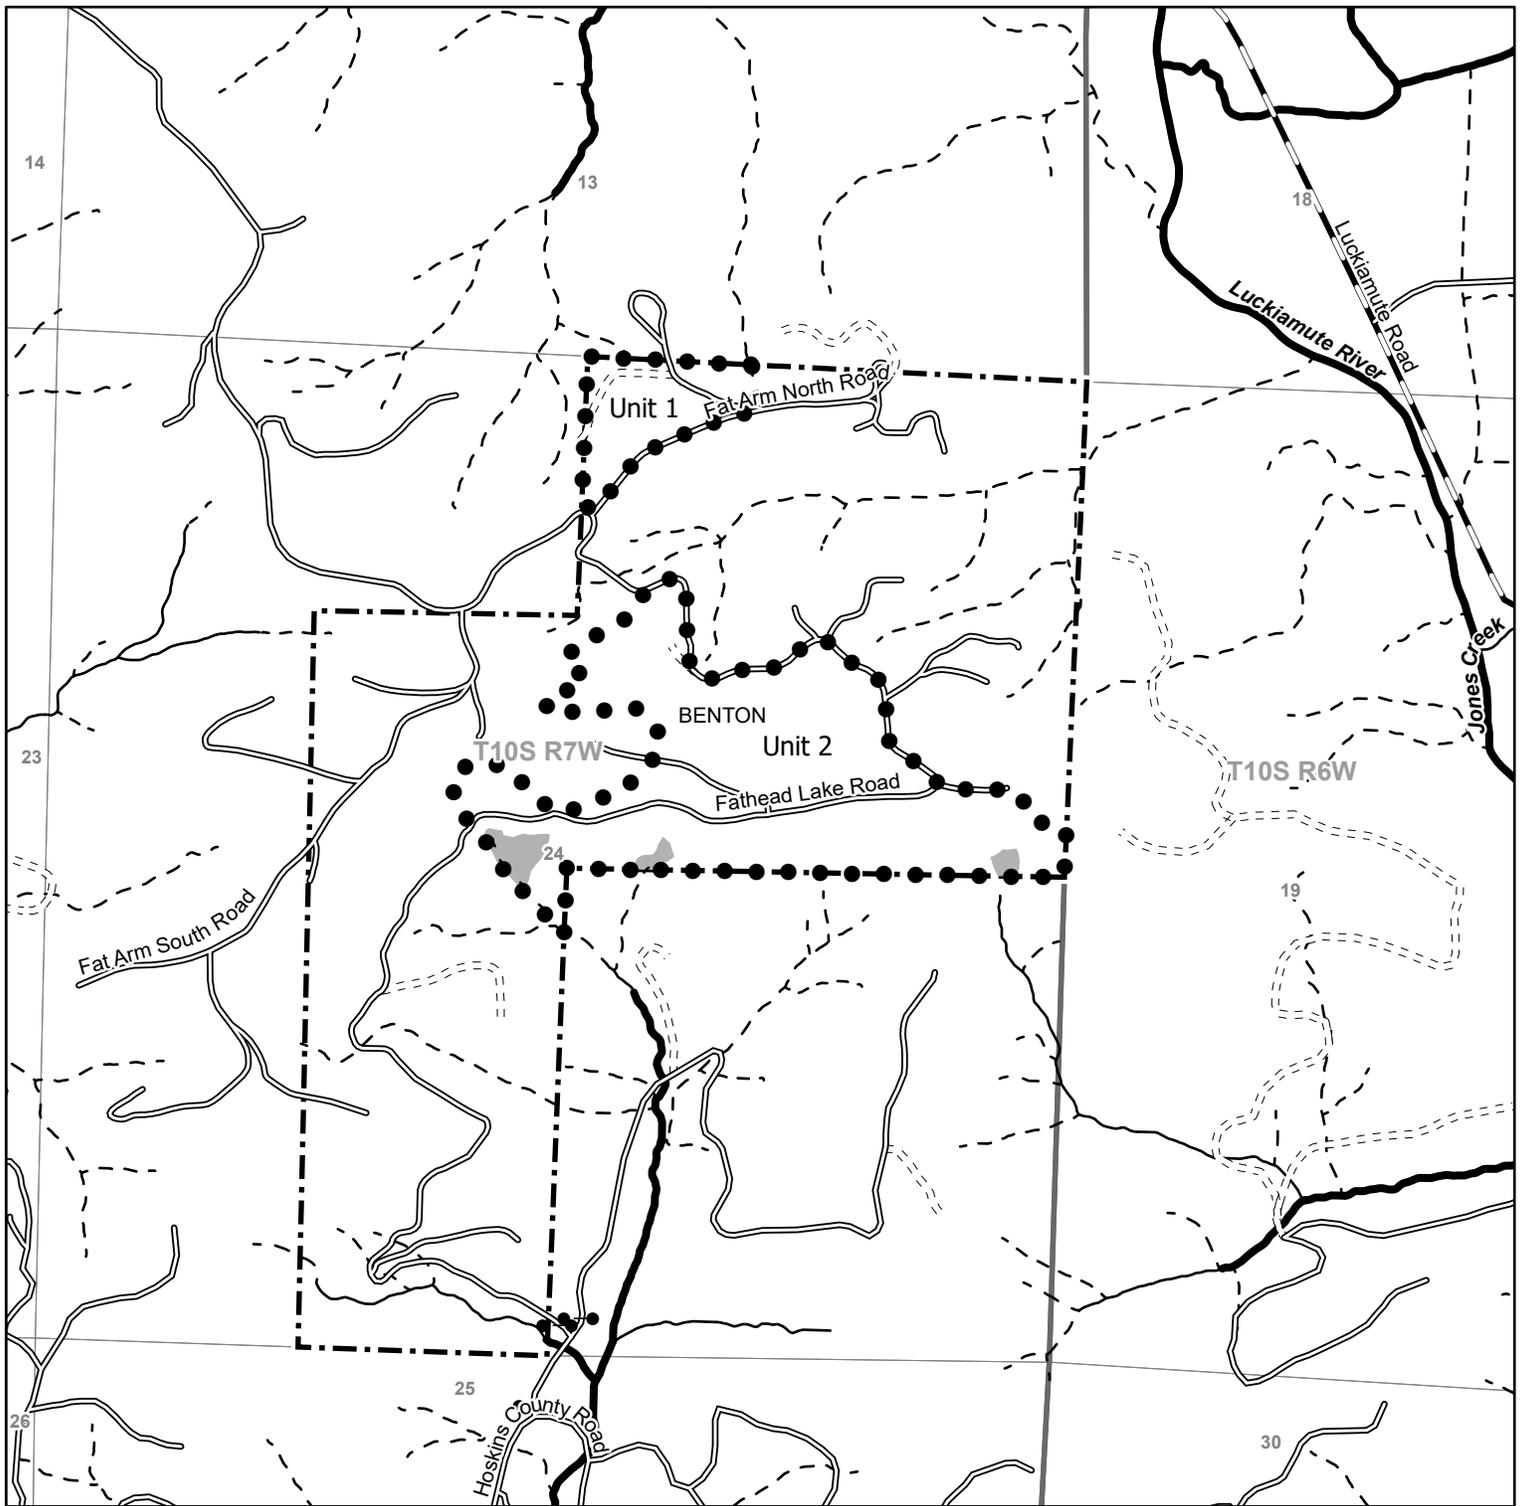

1. Has the sale been reviewed by a qualified archaeologist for potential historic or cultural resource presence?  No  Yes
  - Cultural Resource Review will be completed prior to sale layout

**X. SCENIC RESOURCES:**

1. Are there scenic resources in the vicinity of this operation that need additional consideration?  
 No  Yes, please describe:

**XI. OTHER RESOURCE CONSIDERATIONS:**

1. Has a review of the FLMCS layer determined that any resources not mentioned in the report above need additional planning?  No  Yes, please describe:
2. Are there any other resources present that need additional consideration?  No  Yes, please describe:
  - Adjacent Landowners (shared property lines):
    - Private Industrial Landowner
      - District staff will work with adjacent private landowners to determine what additional outreach is needed during the sale process and if any additional restrictions are needed

**Legend**

- Gates
- Sale Boundary
- Paved
- Surfaced
- - - Unsurfaced
- Perennial Fish Streams
- Perennial Non-Fish Streams
- - - Seasonal Streams
- No Harvest Area

**FY 2027 - West Oregon District  
Lucki Lake  
Portions of Section(s) 19 T10S, R7W, &  
Section(s) 24 T10S R7W WM.  
Benton County**
