Subject: Suggested Speaker for the next Forest Carbon Study Meeting

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Peter,

I hope you're doing well, though I am sure you are extremely busy with all of the fires. I wanted to check in on a question I raised in the last Forest Carbon Study work group meeting. Kristen suggested following up with you directly. It was helpful to have the FIA team in person at the meeting, but I am still working to understand the purpose and methods associated with CalFire's AB 1504 approach and the ARB approach. The differences in the goals, data, and outcomes of the two methodologies as well as the work that they are now doing in California to crosswalk and have them interact is important for all of us in Oregon to understand. I have since spoken with both CalFire and ARB technical staff for additional information. I think it would be useful (and complementary to the FIA presentation) to invite Scott Klaus, who was a technical lead on the ARB emissions inventory in California, to speak in person at our next meeting. Klaus' experience could help to save us time and money in the long run. He can also provide some updates on the written reports on the two approaches that should be forthcoming in December. Please let me know what you think and if I can help to coordinate a presentation.
