

The FTLAC (Forest Trust Land Advisory Committee) does NOT reflect the economic, social, and environmental values that I, most of my community , and visitors to our area hold dear. We have worked countless volunteer hours to mitigate the existing effects of logging and the poor practices allowed in this state. We need greater protections of our rivers and streams and soils.....not less.

It seems amazing that anyone, even Tim Josi, would propose further degradation of our environment and even less balanced use of our state lands between forestry, recreation, and environmental stewardship. It is true that Tillamook county has severe economic problems, but this is not the solution.

Please include my comments as testimony.

Regards,

Barry Marshall
