

Once again Mr Josi has made a decision affecting all the people of Tillamook County without public knowledge input.

For the record, I am against:

Logging old growth trees on public land for any reason;

Logging for profit above all other concerns on public land;

and transferring state forests over to the counties.

The counties have proven over and over again that the bottom line for them is money and Mr Josi is the best at this.

The current Forest Plan is not perfect in my opinion but at least it takes into consideration the environment, the animals that live in the environment and families who like to hang out in a wild area and experience all it has to offer.

I truly believe the DOF is doing a difficult job the best they know how but if you let Josi rule I will immediately change my mind.

Sincerely

Louise Christianson
