Oppose Implementation of the IPM Failure to Protect Native Flora & Fauna Species Forestry & Agriculture policies of Chemical use of Pesticides & Herbicides are allowed that support the Industries to Exterminate Native Plants Species in favor of Mono-Species Crops in Forestry & Agriculture Heavy use of chemicals is Polluting Oregon Waterways & Ocean. Oregon Native Species are Threatened & Endangered of becoming Extinct State of Oregon is mandated by the Oregon Constitution to Protect Oregon Native Species for Future Generations. Implementation of Ecosystem Best Management Principals & Practices for Protection of All Native Species. Stop the System of Allowed Chemical Use to Kill Oregon Native Species & Causes Pollution of Oregon Waterways & Ocean, Food, Soil & Drinking Water for all Species. ODOT Implemented 25 Mile of Hwy 101 from Newport to South of Yachats. No Spray Zone was implemented in 2005. All Invasive Species Control done by Hands of Volunteers in conjunction with ODOT mowing & side road maintenance. There's amazing Recovery of Native Species on 25 mile of State Highway 101. ODOT predicted certain Native species would take over. This proved to be False Many Native Plant species are flourishing & recovering Native Pollinators are using Native Plants all summer that are drought tolerant. Native species for Native Pollinators are making a remarkable self-started Recovery for Pollinators. Stop Chemical Spraying for Successful Pollinator's Corridors could be done Statewide to help support the Restoration of Native Pollinators & Native Pollinator Plants. Forestry must protect Native Species Now.
