

October 2022 Board of Forestry retreat values with Oregon Values and Belief Center Comparison

This document represents a collection of initial brainstormed values from the Board of Forestry (board) and executive team (ET) members. The following is an initial compilation and categorization of what was presented and discussed at the board retreat. While some may look to prioritize some values over others, it is important to recognize that this is a mix of values across the forest sector and no prioritization or ranking should be placed on individual values, what is important to one constituency may not be as important to another. There were 118 individual values written.

Initial categorization was done in several ways. First, was what was written a value, strategy/goal, or principle? The breakdown was:

Principle	27
Strategy/Goal	30
Value	60

The second breakdown was in alignment with climate-smart forestry aspects of adaptation, mitigation, economic, and community. The four ended up as follows:

Adaptation	40
Communities	33
Economy	23
Mitigation	21

A third method was looking to see if the value posted was a human-centric or forest-centric value (i.e. was it related to benefiting people or the forest more?):

Forest	45
Human	73

The last categorization approach built categories out of what was provided. The result was a two-tiered consideration with broader and more specific groupings. In total there were seven broad and 15 more specific groupings:

Broad

Air	4
Climate Change	19
Communities	25
Economic	28
Ecosystem Services	12
Ecosystems	18
Water	10

October 2022 Board of Forestry retreat values with Oregon Values and Belief Center Comparison

Specific

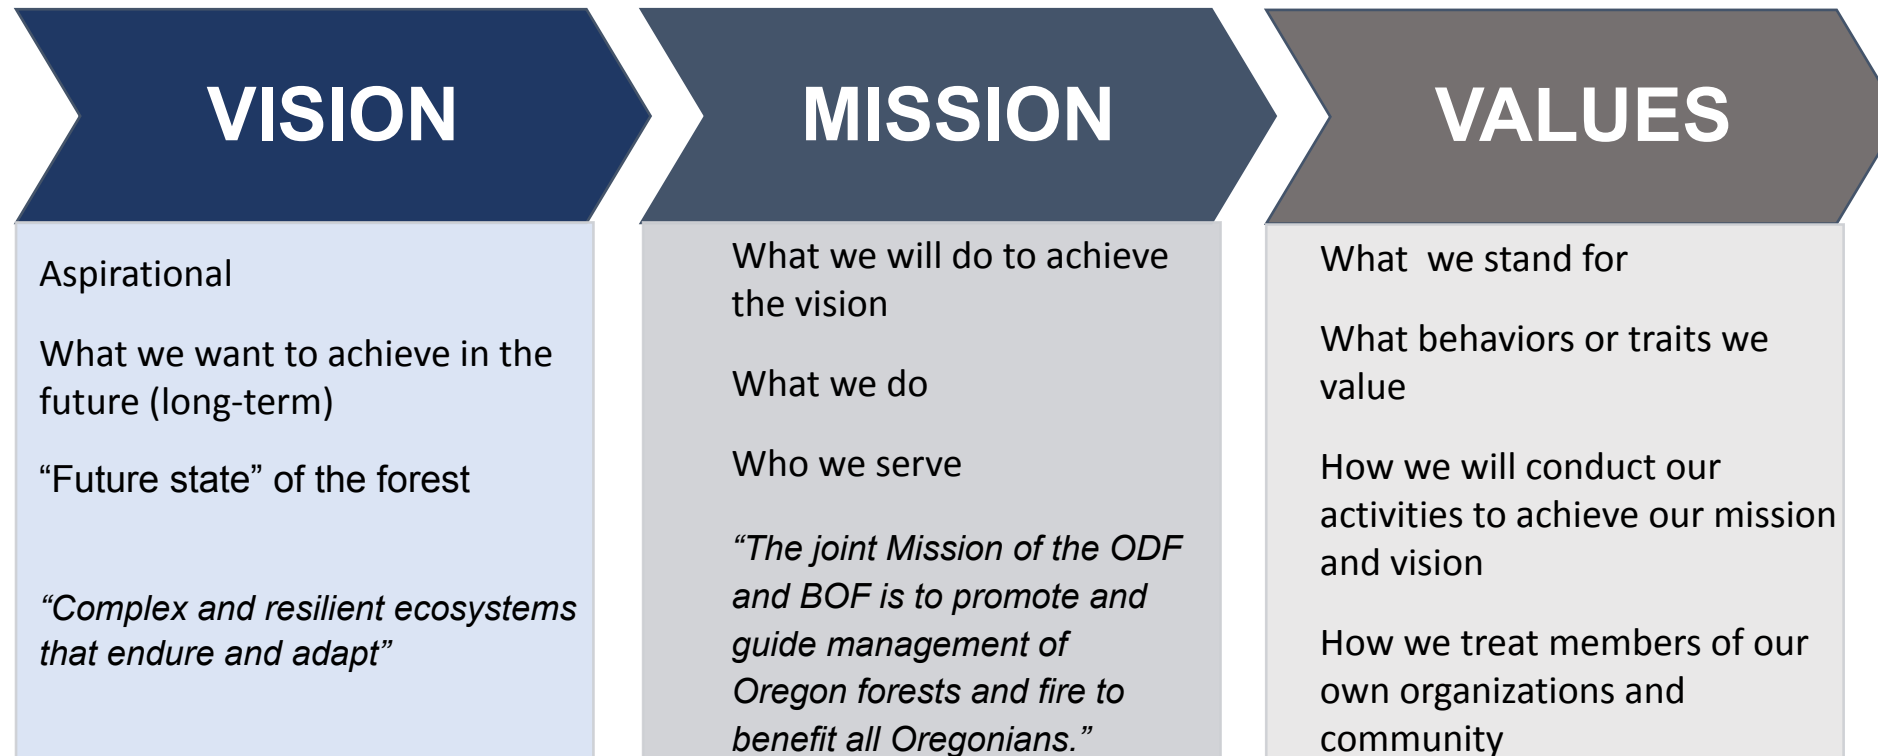

Adaptation	2
Carbon Sequestration/CC Mitigation	17
Clean Air	4
Climate Adaptation	2
Cultural Values	4
Ecological Focus	7
Ecosystem Services	4
Habitat	7
Jobs	6
People Focus	1
Recreation	5
Renewable/Sustainable Economic Inputs	5
Social and environmental Justice/equity	24
Traditional Economic Factors	18
Water Quality	11

At a following Board meeting, a presentation of a survey conducted by the Oregon Values and Beliefs Center (OVBC) provided a glimpse of some of the values of the general public. ODF staff have worked to create a mechanism to view a bridge between this survey and the various values that were developed at the October 12-13, 2022, retreat. The nine different responses from the OVBC were ordered by percentage (acknowledge that there are groupings though) and this was cross walked to the “specific” groupings listed previously. The number of times the board and executive team listed the item is the basis of the ordering. The alignment is shown in the figure below, numbers are only a representation of the color coding. The greener colors are where there were more comments or values listed (board meeting) or where there was a higher percentage of agreement (OVBC survey). If the colors are similar, there was agreement, if not there was disagreement. One of the main takeaways from looking at this and where there is a greater need for future consideration is that there were 45 incidences of the board values that could not be incorporated into the OVBC survey topics. This was especially true for the more cultural and DEI concepts but also included others.

October 2022 Board of Forestry retreat values with Oregon Values and Belief Center Comparison

	BOF & ET	OVBC
Habitat	4	1
Water Quality	3	2
Ecosystem Services	7	3
Recreation	6	4
Cultural Values	8	5
Carbon Sequestration/CC Mitigation	2	6
Jobs	5	7
Traditional Economic Factors	1	8
		9
Other	45	10

Vision Mission Values Basics: ODF/ BOF Forestry Program for Oregon

Broad Overview of Planning Hierarchy at ODF

2023 Forestry Program for Oregon Work Plan
(process planning doc, subject to updates)

Principles (per April 27, 2022 Staff Report):

- The Board of Forestry will revise/develop a strong vision for forestry in Oregon that is consistent with its statutory authorities and highlights areas the Board and the department should coordinate with other policy making and operational entities.
- Climate-smart forestry will be the guiding lens and the FPFO will contain elements that address climate adaptation, mitigation, and social-climate interactions.
- The process will be open and transparent, including voices that have not previously been included in the process and utilize tools available to be more inclusive.
