

Oregon Department of Forestry

State Forests Division
Forest Management Plan Project
July 2018

Today's Objectives

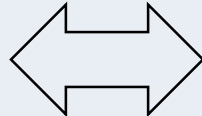

- Measurable Outcomes
- Impacts Analysis
- Guiding Principles Revisions
- Public Comment
- Board Decision

Measurable Outcomes

- Results of strategies with measureable units
- Complemented by *Quantifiable Targets*

Impacts Analysis

GPV (OAR 629-035-0020)	Goal [OAR 629-035-0030(2)(c)]	Strategy [OAR 629-035-0030(2)(d)]	Current Plan	Proposed Alternative	Predicted Impacts (GPV)	Impacts
(2)(b) Protects, maintains, and enhances native wildlife habitats;	Contribute to a range of wildlife habitat types.	Incorporate legacy structure at a landscape level.	Retain Green Trees in Clearcuts	Change Green Tree Retention for Economic Outcomes	<u>Economic</u> : Beneficial increase; low certainty	
					<u>Environmental</u> : Mixed changes; less certainty	
					<u>Social</u> : No significant change	

DRAFT Guiding Principles

1. Greatest Permanent Value
2. Conservation
- 3. Financial viability**
- 4. Social benefits**
5. Forest and watershed restoration
6. Pace and scale
7. Trade-offs
- 8. State and federal laws**
9. Stakeholder opportunities
- 10. Cooperative efforts**
- 11. Climate Change**

A lush green forest scene with a small stream flowing through the center. The water is clear and reflects the surrounding foliage. The trees are tall and thin, with moss growing on their trunks. The ground is covered in ferns and other forest plants.

Draft Guiding Principle 3: Financial Viability

The plan will provide revenue to ensure financial viability and sustain the values that support GPV.

Draft Guiding Principles 4: Social Benefits

The plan will provide for a range of social benefits for all Oregonians including direct and indirect financial contributions to local and state governments, ecosystem services, opportunities for public access and recreational use, support for **diverse** local employment, and a process for participating in the forest management planning and implementation process.

A background image of a lush forest with a small stream flowing through it. The trees are tall and thin, with moss growing on their trunks. The stream is surrounded by green ferns and other vegetation.

Draft Guiding Principle 8: Compliance with State and Federal Laws

The plan **will comply** with other state and federal laws and rules.

Draft Guiding Principle 10: Cooperative Efforts

The plan **will achieve** goals through cooperative efforts with other agencies and units of local government, user groups, or organizations.

A lush green forest scene with a small stream flowing through the center. The water is clear and reflects the surrounding greenery. The trees are tall and thin, with moss hanging from some branches. The overall atmosphere is serene and natural.

Draft Guiding Principle 11: Climate Change

The plan will be implemented to adapt to climate change and mitigate its impacts on the management of state forest lands. The plan will also contribute to climate change mitigation and sequester carbon.

Additional Stakeholder Input to Draft Guiding Principles

- Clarifying Edits:
 - Greatest Permanent Value
 - Conservation
 - Forest and Watershed Restoration
 - Trade-offs

Recommendations

- Approve the draft guiding principles
- Approve the definition of *Measurable Outcomes*
- Approve the *Impacts Analysis* Framework
- Direct the Division to proceed consistent with the FMP workplan

Public Comment

Recommendations

- Approve the draft guiding principles.
- Approve the definition of *Measurable Outcomes*
- Approve the *Impacts Analysis* Framework
- Direct the Division to proceed consistent with the FMP workplan

The background of the slide is a photograph of a forest with trees showing autumn foliage in shades of yellow, orange, and green. A dark blue curved banner at the top contains a white pine cone logo on the right side. A semi-transparent dark blue rounded rectangle is centered in the upper half of the slide, containing the title "Next Steps" in white text.

Next Steps

- Recommendation for information needs to inform Board decisions.
- Draft assessment of forest resource conditions.
- Recommendation on the geographic scope of the plan.
- Update on Draft forest management goals.
