

DRAFT

Dear IRST Members,

AMPC requests your help in developing the Effectiveness Monitoring Strategy for the Adaptive Management Program. As a first step, AMPC would like IRST to develop the processes for:

1. How to prioritize the Biological Goals and Objectives (BGOs) within each of Groups 2-4 from Chapter 6 of the draft HCP; and,
2. How to refine the metrics and trend targets for status and trend monitoring (i.e., Group 2 BGOs) that is described in that same chapter.

We acknowledge this request lacks specificity, which is because we entrust IRST to develop the best processes for this endeavor. AMPC members are available as needed to help IRST with these tasks.

Sincerely,

Members of the AMPC
