Oregon Department of Forestry,

It's heartbreaking to see photos of the blackened landscape within Oregon's Santiam State Forest. I urge the Department of Forestry to do everything it can to remove dead trees, restore roads and trails and recover this state forest for future generations of Oregonians. Don't delay.

Replanting after severe fires protects water quality in rivers and streams by reducing soil erosion. This helps to ensure clean water for fish and wildlife and for drinking.

No action will only increase future fire risk and remove these lands from recreation and/or productive use for decades. Please don't let that happen.

Thank You,
James Pardee
