a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).

• These stands were planted and portions of the stands within Units 1 & 3 were commercially thinned in 1998 while portions of the stands within Unit 2 were commercially thinned in 2007.

b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1	, i
1.	A portion of the operation is within (Check all that apply):
	☐ TAS ☐ NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)
	☐ MMMA (BA required)
2.	Are Surveys for NSO being conducted for any portion of this operation?
	□ No ☑ Density Surveys □ Operational Surveys □ Combination (Density/Operational)
	Notes:
3.	Are Surveys for MM being conducted for any portion of this operation?
	\square Yes (in progress/completed) \square No (Not habitat) \square N/A (outside of MM survey zone)
	Notes:
4.	Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant [from ORBIC ¹])?
	⊠ No ☐ Yes, please describe:

Identify the number of hard snags per acre (decay classes 1 and 2)
Identify the cubic feet per acre of hard down wood (decay classes 1 and 2) b.

Describe "Other" forest health issue.

- Leave Tree Considerations: Foresters will work with Wildlife Biologist during sale layout. The following should be considered when determining final leave tree arrangements.
 - O Stand Characteristics: No clear green tree strategy has been determined. Minor species in Unit 3 could be hand marked, since the unit is small enough
- **Reforestation Considerations:** Following the completion of harvest, the unit will be planted with a mixture of species native to the geographic area.

V. HARVESTING AND ACCESS CONSIDERATIONS:

1. Haul Route:

- Reimer Road to North Fork Trask River Road to Turner Creek Road to Pike Road to Highway 47.
- This sale is behind three locked gates.

2. Haul Route Condition:

• The haul route is a maintained gravel road. Road maintenance or improvement needs will be further assessed during sale layout.

b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration. Closed Single Canopy and Understory stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

- 3. Are easements required for the haul route? \boxtimes Yes \square No
 - A License Agreement from Weyerhaeuser is needed; will include road maintenance fee.

- a. Salmon Steelhead and Bull Trout (SSBT)
- b. On Reimer Road over the Type F crossing, the existing culvert will be replaced with a temporary portable bridge. The bridge will be left in place through the length of the timber sale contract and the planting of the timber sale.
- Opportunities to vacate or block new or existing roads and/or spurs will be considered during sale layout.
- 4. Rock Sources for this operation:
 - Barney Quarry and Stockpile. A 25,000CY stockpile will be crushed with Rap Reimer.
- 5. Are property line surveys required for this operation? \square Yes \square No
- 6. Is there planned new road construction planned within RCAs/HCAs? ☐ Yes ☐ No

VI. AQUATIC RESOURCES:

- 1. Do any streams require additional review for the following?
 - Fish presence ⊠ No ☐ Yes
 - Perennial/Seasonal: ☐ No ☐ Yes
 - H.E.R.: □ No ⊠ Yes
 - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.
- 2. Is a portion of the operation within an Aquatic Anchor? ☐ No ☐ Yes, name: A portion of Unit 1 is within Elkhorn Creek Aquatic Anchor
 - Within the designated Aquatic Anchor streams will be buffered in accordance with strategies in the
 draft Habitat Conservation Plan that prioritize salmonid recovery as outlined in the State Forest
 Division Species of Concern Policy. These additional buffers are already incorporated into the sale
 buffers and are shown on the map. If additional information on streams is found during sale layout
 the buffers will be adjusted as required.

3. Are any domestic points of diversion identified in the Oregon Water Resource Department's water rig information search GIS database located downstream within 3,000 feet of the harvest operation? No						
4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation? ⋈ No	3.	•			C	1
