

## Pre-Operations Report

**Operation Name:** Windy Gust

**County (%):** Douglas (100%)

**Elevation:** 2,349 - 3,187 ft

**Legal Description:** T31S R5W, Section(s) 31

**Tax Code(s):**

**BOF%:** 100    **CSL%:** 0

**Sale Quarter:** ALT

**Unit:** Southwest Oregon - SWFMP

### I. VOLUME AND VALUE SUMMARY

**Table 1. Types, Acres, and Value**

| Unit   | Harvest Type | Anticipated Product <sup>c</sup> | Gross Acres | Net Acres | MBF/ Acre <sup>a</sup> | MBF/ Unit <sup>a</sup> | \$/MBF <sup>b</sup> | \$/Unit   |
|--|--------------|----------------------------------|-------------|-----------|------------------------|------------------------|---------------------|-----------|
| 1  | CC           | DF-S, SP-L                       | 128         | 114       | 20                     | 2,280                  | \$400               | \$912,000 |
| Total  |              | Regeneration                     | 128         | 114       |                        | 2,280                  |                     |           |
|  |              | Partial Cut                      |             |           |                        |                        |                     |           |
|  |              |                                  |             |           |                        | Gross Value            |                     | \$912,000 |
| a. Estimated harvest volume per acre for Unit.   |              |                                  |             |           |                        | Project Costs          |                     | \$190,600 |
| b. Estimated ‘price’ (excluding Project Costs)   |              |                                  |             |           |                        | Net Value              |                     | \$721,400 |
| c. Anticipated Product (AA-B-C) – AA) SLI species code of the bid species, B) Size Class (S – small [average DBH < 15], M – medium [average DBH 15 to 23], L – large (average DBH > 23]), C) Special Product (P – Premium, H – Hardwood) |              |                                  |             |           |                        |                        |                     |           |

### II. CURRENT STAND CONDITION:

**Table 2. Stand Inventory Information**

| Unit | Stand ID | Measured/Imputed <sup>a</sup> | Species | Age <sup>1</sup> | TPA | DBH | BA  | SDI | Net Acres <sup>b</sup> |
|------|----------|-------------------------------|---------|------------------|-----|-----|-----|-----|------------------------|
| 1    | 5038     | M                             | DF,IC   | 43               | 431 | 10  | 248 | 75% | 64                     |
| 1    | 5043     | M                             | DF,SP   | 43               | 140 | 16  | 205 | 52% | 50                     |

a. Identify the source of stand inventory information. Use the following codes: M = Measured SLI data, I = Imputed SLI data, P = Pre-Cruise Plots, O = other (if other, describe below).

b. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.

<sup>1</sup>The age for these stands may be too low. Looking on photos and LiDAR, it seems the age should be more around 60 years. This information will be adjusted as field reconnaissance is completed.

This sale was thinned in 1981 for possible pole removal.

**Table 3. Additional Stand Information**

| Unit | Stand ID | Snags/Acre <sup>a</sup> | Down Wood/Acre <sup>b</sup> | Forest Health |           |                    |
|------|----------|-------------------------|-----------------------------|---------------|-----------|--------------------|
|      |          |                         |                             | SNC           | Phellinus | Other <sup>c</sup> |
| 1    | 5038     | 2                       | 111                         |               |           |                    |
| 1    | 5043     | 2                       | 131                         |               |           |                    |

a. Identify the number of hard snags per acre (decay classes 1 and 2)

b. Identify the cubic feet per acre of hard down wood (decay classes 1 and 2)

c. Describe "Other" forest health issue.

### III. WILDLIFE AND T&E SPECIES CONSIDERATIONS:

Foresters need to request the Biological Survey Tracking Form (BSTF) from the ODF Wildlife Biologist prior to sale layout in order to ensure all T&E related information is complete and understood.

1. A portion of the operation is within (Check all that apply):  
☐ TAS    ☒ NSO Circle or Home Range, or Baseline or Elevated Baseline Thiessen (BA required)  
☐ MMMA (BA required)    ☐ None  
  - Notes: Portions of the sale are located within the Bear Windy home range circle for which a biological assessment is required.
2. Are Surveys for NSO being conducted for any portion of this operation?  
☐ No    ☐ Density Surveys    ☒ Operational Surveys    ☐ Combination (Density/Operational)  
Notes:
3. Are Surveys for MM being conducted for any portion of this operation?  
☐ Yes (in progress/completed)    ☐ No (Not habitat)    ☒ N/A (outside of MM survey zone)  
Notes:
4. Are there any additional considerations (FPA Resource Sites, Species of Concern sites/Plant [from ORBIC!])?  
☒ No    ☐ Yes, please describe:

### IV. DESIRED FUTURE CONDITION AND PRESCRIPTION:

**Table 4. Stand Structure Information**

| Unit | Stand ID | Current | Desired Future <sup>b</sup> | Inside of HCA | Net Acres <sup>a</sup> |
|------|----------|---------|-----------------------------|---------------|------------------------|
| 1    | 5038     | CSC     | GEN                         | No            | 64                     |
| 1    | 5043     | UDS     | GEN                         | No            | 50                     |

- a. Net Acres have been rounded to the nearest whole acre in this table. Stand that comprise less than one acre of a harvest unit are not reported in this table, so the total "Net Acres" per unit in this table may not equal the total "Net Acres" per unit in table 1.
- b. While desired future condition complex (Layered -LYR and Older Forest Structure – OFS) is mapped, targets for Regeneration (REG), Closed Single Canopy (CSC) and Understory (UDS) stands are not. These stand types are typically referred to as General (GEN) when discussing desired future condition.

**Table 5. Partial Cut & HCA Prescriptions (Complete only for Partial Cut and HCA Harvests)**

| Unit | Harvest Type | Harvest Species | Residual |     |    |       |
|------|--------------|-----------------|----------|-----|----|-------|
|      |              |                 | Species  | TPA | BA | % SDI |
| 1    | CC           |                 |          |     |    |       |

- **Leave Tree Considerations:** Foresters will work with wildlife biologist during sale layout. The following should be considered when determining final leave tree arrangements.
- **Reforestation Considerations:** Following the completion of harvest, the unit will be planted with a mixture of species native to the geographic area.

## V. HARVESTING AND ACCESS CONSIDERATIONS:

**Table 6. Harvest System and Access Summary**

| Unit | Harvest System |          | Slope (%) | Unit Access | Seasonal Access |
|------|----------------|----------|-----------|-------------|-----------------|
|      | % Cable        | % Ground |           |             |                 |
| 1    | 100            | 0        | 35-65     | Established | All Weather     |

1. Haul Route: Windy Creek Road
2. Haul Route Condition: Maintained gravel road
3. Are easements required for the haul route? ☒ No ☐ Yes

**Table 7. Transportation Management Summary (Miles)**

| Activity   | Mainline | Collector | Rocked Spur | Dirt Spur |
|--|----------|-----------|-------------|-----------|
| Construct  | 0        | 0         | 0.20        | 0         |
| Improve, Rock, and/or Maintain   | 1.86     | 4.10      | 1.14        | 0         |
| Vacate   | 0        | 0         | 0           | 0         |
| Stream Crossings: install on existing road (IE)/replace on existing road (R)/install on new construction road (NC) |          |           |             |           |
| Type F - SSBT <sup>a</sup>   | 0        | 0         | 0           | 0         |
| Type F – Non-SSBT  | 0        | 0         | 0           | 0         |
| Type N   | 0        | 2 (R)     | 0           | 0         |

a. Salmon Steelhead and Bull Trout (SSBT)

4. Rock Sources for this operation: Commercial Rock Source
5. Are property line surveys required for this operation? ☒ No ☐ Yes
6. Is there planned new road construction planned within RCAs/HCA's? ☒ No ☐ Yes

## VI. AQUATIC RESOURCES:

1. Do any streams require additional review for the following?
  - Fish presence: ☒ No ☐ Yes
  - Perennial/Seasonal: ☐ No ☒ Yes
  - H.E.R.: ☐ No ☒ Yes
  - There are streams within the sale that require additional review. Buffers shown on the map indicate where it is believed streams are located. These streams will be located, verified for permanence, and/or type of seasonal stream during sale layout and Geotech review and buffered as required.
2. Is a portion of the operation within an Aquatic Anchor? ☒ No ☐ Yes, name:
3. Are any domestic points of diversion identified in the Oregon Water Resource Department's water rights information search GIS database located downstream within 3,000 feet of the harvest operation?  
☒ No ☐ Yes, describe protection measures:

4. Are there any unregistered or unknown status domestic points of diversion that have been identified within the harvest operation? ☒ No ☐ Yes, please describe:
5. Is there a Stream Enhancement Project planned? ☒ No ☐ Yes, please describe:

## VII. SLOPE STABILITY ISSUES:

Table 8. Summary of Slope Stability Assessment

| Unit | Harvest Review Complete | Public Safety Review Complete | Additional Comment |
|------|-------------------------|-------------------------------|--------------------|
| 1    | Yes                     | Yes                           |                    |

- **Geotech Review:** Geotechnical reviews have been completed, and it was determined that no slope protections are needed. Additional consultation with Geotechnical Specialists will be done during sale layout as needed.

## VIII. RECREATION RESOURCES:

1. Recreation issues/coordination: ☒ No ☐ Yes, please describe:

## IX. HISTORIC AND CULTURAL RESOURCES:

1. Has the sale been reviewed by a qualified archaeologist for potential historic or cultural resource presence? ☐ No ☒ Yes

## X. SCENIC RESOURCES:

1. Are there scenic resources in the vicinity of this operation that need additional consideration? ☒ No ☐ Yes, please describe:

## XI. OTHER RESOURCE CONSIDERATIONS:

1. Has a review of the FLMCS layer determined that any resources not mentioned in the report above need additional planning? ☒ No ☐ Yes, please describe:
2. Are there any other resources present that need additional consideration? ☐ No ☒ Yes, please describe:
  - **Adjacent Landowner:**
    - **Federal**
  - **Adjacent sale:** Windy Gust is an alternate sale located immediately adjacent to the primary Wind Chime sale. Their combined acreage is over 120 acres. Windy Gust will only be made a primary sale in fiscal year 2026 if Wind Chime is dropped from the sale plan. If Windy Gust is not needed for the fiscal year 2026 sale, it will not be used as a primary sale until the Wind Chime sale has achieved green up as per the Forest Practices Act.

# **Legend**

- Sale Boundary
- Surfaced Road
- Unsurfaced Road
- - - New Road Construction
- Fish Stream
- Non-Fish, Perennial Stream
- - - Non-Fish Stream, Unverified Permanence
- No Harvest Area
- Transmission Lines
- Ownership Boundary

## **FY 2026 - Western Lane District Windy Gust Portions of Section(s) 31, T31S, R5W, WM. Douglas County**

State Forest Division  
12/02/2024

This product is for informational use and may not be  
suitable for legal, engineering, or surveying purposes.

Unit 1 114 Acres (CC)

1:12,000

1,000 500 0 1,000 Feet
