

Service Delivery Data Report

District 3, Yamhill Child Welfare

Presented by:

Jennifer Ricks, CQI Program Manager

Karly DeWitt, CQI Analyst

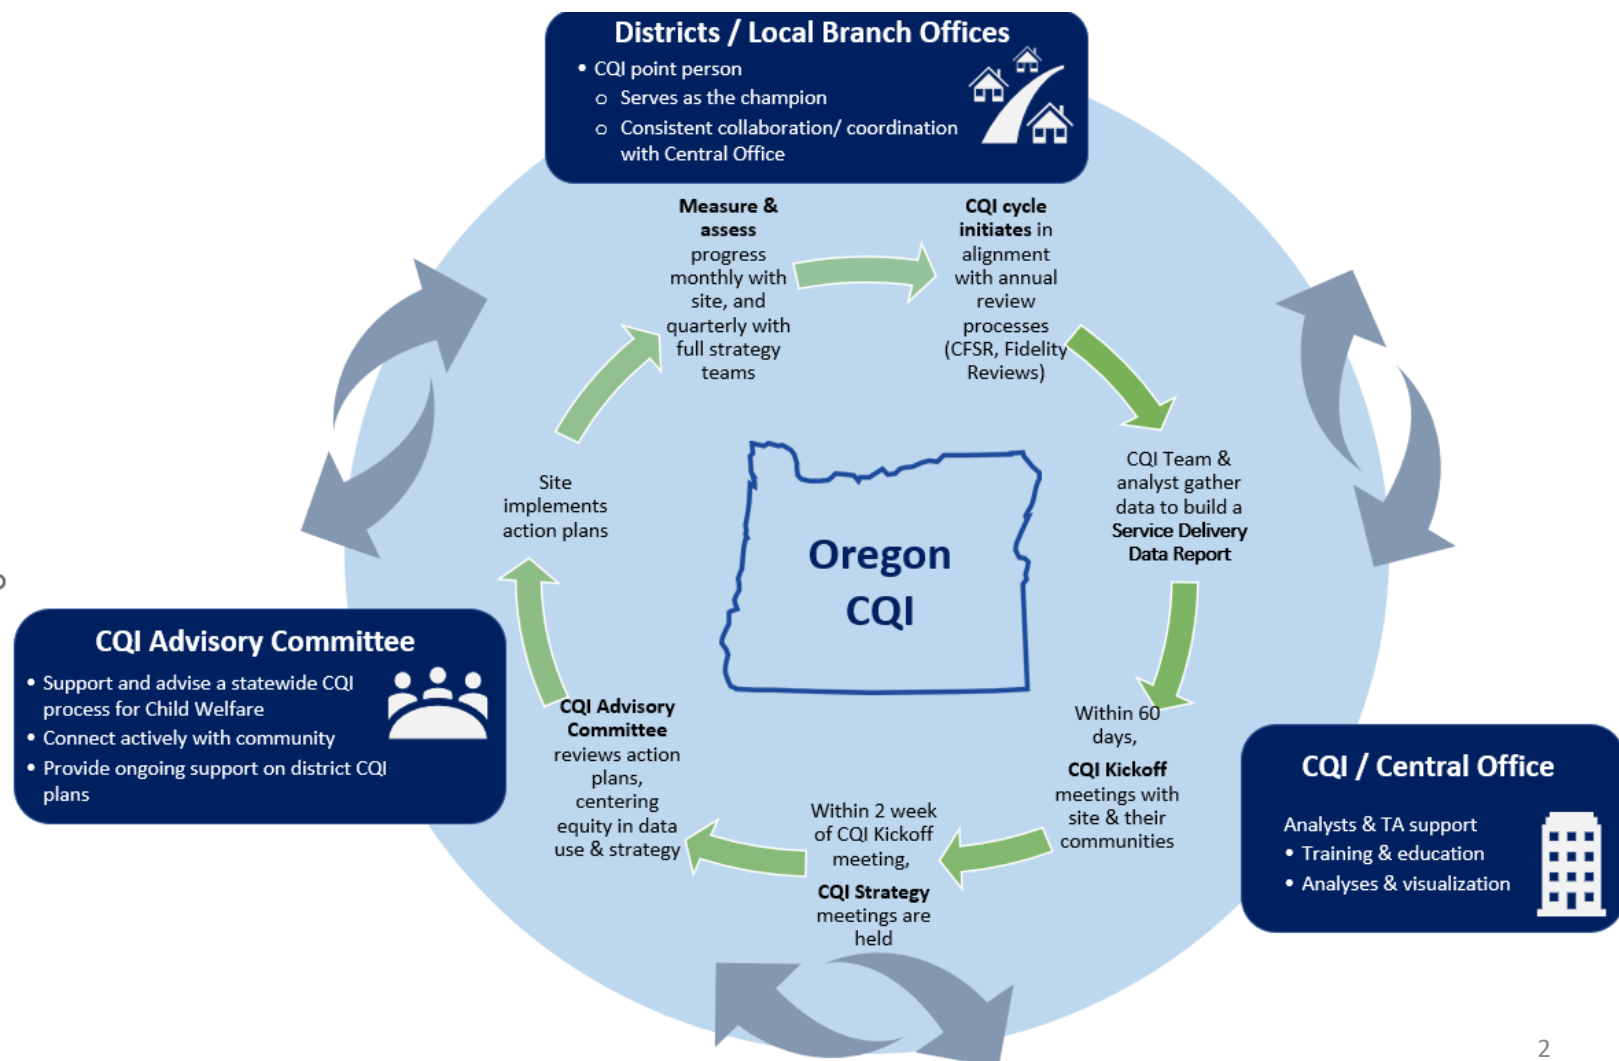

Child Welfare Service Delivery Data Report

The purpose of the Service Delivery Data Report is to understand how Oregon Department of Human Services (ODHS) Child Welfare Division and the child caring community are serving our children and families. This report is tailored for Yamhill County so that you can understand how your county is serving children and families. This report includes information about services to keep children together with their families. It also includes important information about how well children are served when they are separated from their families and how quickly they are reunified.

The Child Welfare Continuous Quality Improvement (CQI) program curates this report as part of the effort to improve the experience of children and families when they have to engage with the Child Welfare system. The CQI program uses research and data to track trends and areas for growth. ODHS Child Welfare cannot identify and solve problems in our service delivery alone and must include insight and involvement from Tribes in Oregon, community partners, and people with lived experience.

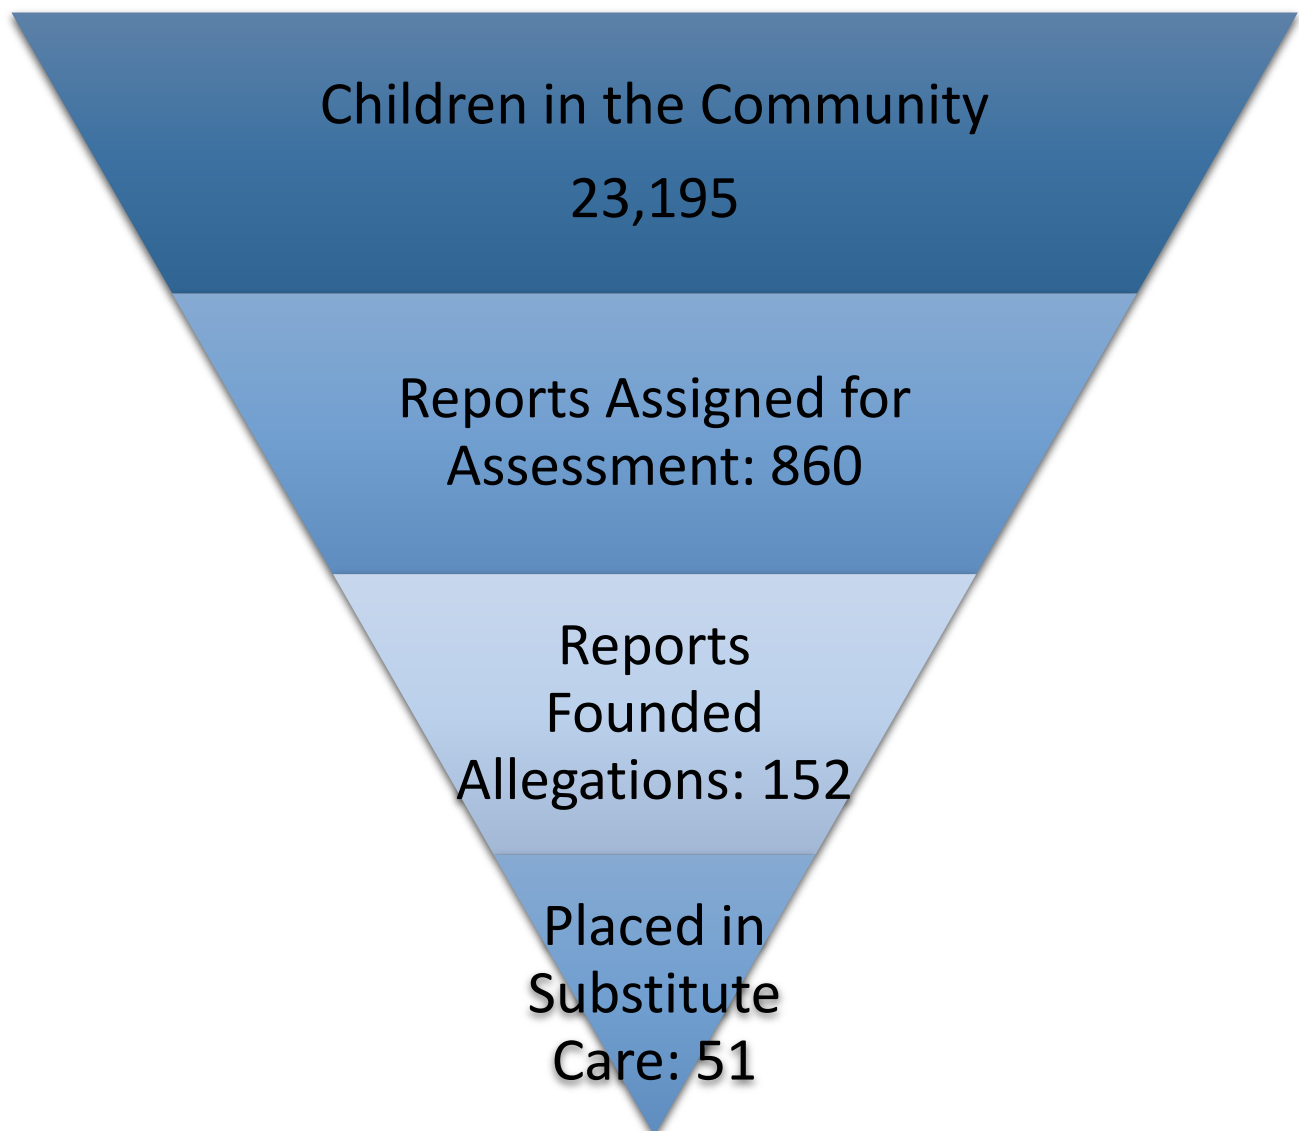

Our CQI work centers equity, not only in our service delivery but also in our use of data. The CQI process and system are rooted in the [Child Welfare Vision for Transformation](#). We are committed to the following Data Equity Vision Statement in our improvement approach.

In collaboration with our community, ODHS Child Welfare is committed to cultural respect, community representation, accountability, integrity, privacy, responsibility and transparency in the collection and utilization of data in child welfare. ODHS Child Welfare will advance and embed equity through the use of racial equity and social justice tools. ODHS Child Welfare is accountable to children and families and the communities that serve them to ensure consistent, accurate, inclusive, and transparent data reporting and analysis. We invite our communities to join in this commitment.

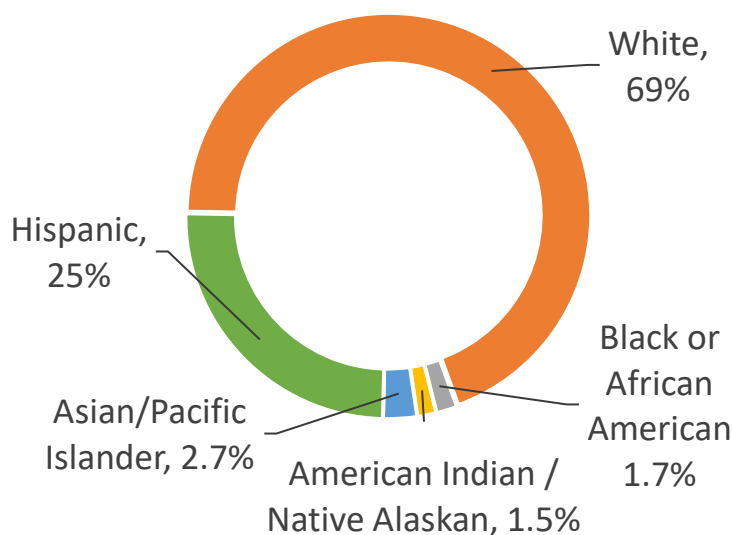

Site Information:

District, County:	District 3, Yamhill County
Branch:	McMinnville
Local Tribes in Oregon:	Confederated Tribes of Grand Ronde, Confederated Tribes of Siletz Indians
Leadership	Cydney Nestor, District Manager; Matthew Kintner, Program Manager
Management Team	2 Protective Services Supervisors 2 Permanency/Family Time Coordinator Supervisors, 1 Certification Supervisor (shared with Polk County), 1 Office Manager
Local Office Staff <i>positions allocated as of April 2023 vacancies may exist</i>	14 Protective Services Caseworkers, 9 Permanency Caseworkers, 4 Certifiers, 2 Meeting Facilitators/Resource Developers, 5 Family Time Coordinators, 3 Case Aides, 7.5 Office Staff, and 1 Coaching and Training Specialist

Community Child Population by Racial Group

Source: Easy Access to Juvenile Populations

Children who Entered Substitute Care April 2022-April 2023 by Racial Group

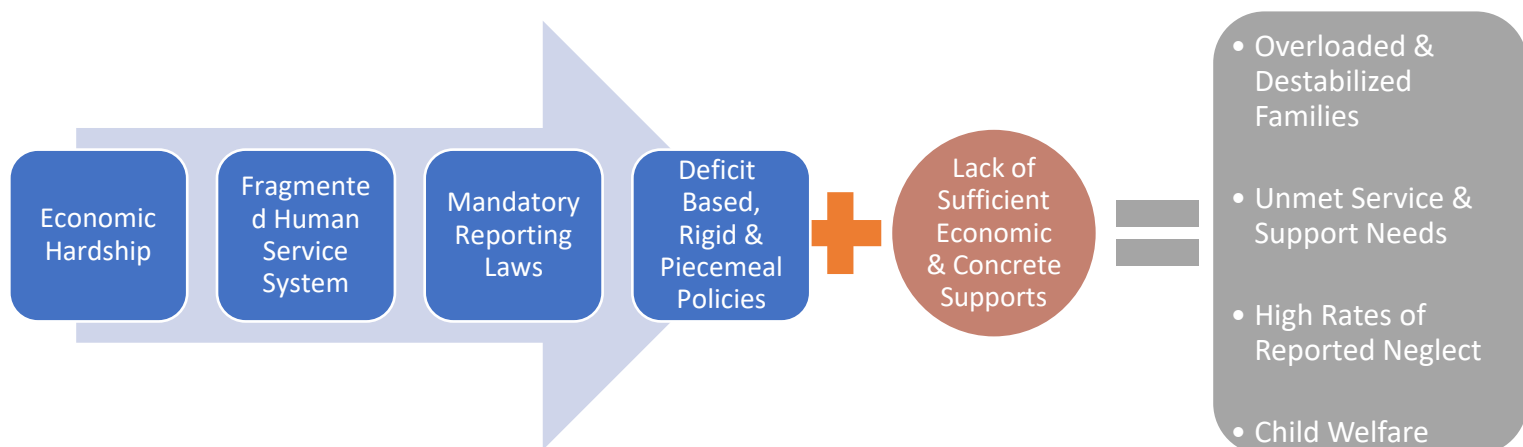

ROM CM .18 Drill Down

The community child population of Yamhill County, broken down by racial and ethnic demographics is displayed in the graph to the left above. In Yamhill County 69% of population is white. The graph above to the right displays the percent of children who entered substitute care during the period under review broken down racial and ethnic demographics.

Disproportionality can include both overrepresentation and underrepresentation of children in substitute care. There can be multiple factors that contribute to underrepresentation. Additionally in Yamhill County 33% of children who entered substitute care during the period under review were classified as “Unknown/Decline to Answer” in the Child Welfare computer database. This means critical information is missing from the picture that impacts Child Welfare’s ability to correct practice that impacts disproportionality.

Understanding the overrepresentation, or underrepresentation, of children of color, or disproportionality, is important because it is based on several other factors that make children and families more likely to be reported to Child Welfare Services. “Things like economic hardship, fragmented human service systems, mandatory reporting laws, and historically racist policies combined with the lack of sufficient economic and concrete supports leads to overloaded families, unmet service and support needs, high rates of perceived neglect – all placing families at risk for Child Welfare involvement.” -Chapin Hall, 2021

Poverty Rate:
12%

Poverty in the US is measured in terms of the federal poverty line. The poverty line is a threshold level. In other words, a level of income which you are either above (out of poverty) or below (in poverty). The poverty line varies for how many people are in a household. For example, the federal standard for a family of four is \$27,750/year.

of Hours
Worked/Week to
Afford a 2Bdrm Apt
at Minimum Wage

This means that a person in Yamhill County would need to work more than 2 full-time jobs at minimum wage to afford a 2-bedroom apartment or have two adults working full-time at minimum wage. This does not factor in the cost of childcare, utilities, food, and other necessities.

92.7 Hrs
% of families
accessing SNAP
benefits
17%

The Supplemental Nutrition Assistance Program (SNAP), is designed to support families, by supplementing their food budget so they can purchase healthy food and move towards self-sufficiency. It is a concrete support that research has shown can help stabilize families and reduces concerns of neglect. In Yamhill County, 17% of the residents are receiving SNAP benefits. As an entire state, Oregon's rate of people accessing SNAP benefits is 17%

Service Delivery Data Report Reader & Metric Context

Data and metrics outlined in this report are gathered from multiple sources that look at quality of case practice (Child and Family Service Review (CFSR), Child Protective Services Fidelity Reviews, Permanency Fidelity Reviews, and Certification Reviews) as well as quantitative data counts based on information entered into ODHS' Management Information System (reported by ORKIDS, ROM (Results Oriented Management), ORRAI (Office of Reporting, Research, Analytics and Implementation), and Oregon Circuit Courts Juvenile Dependency Statistics. All reports represent a time period of April 2022-April 2023, unless otherwise noted. Qualitative metric data visuals each include a specific *n* to indicated the number of cases reviews included in the evaluation of case practice. CFSR measure's sample sizes may include additional ICWA cases.

The metrics are broken into three categories, listed and defined below. Metric categories can be identified in the color of the header for the measurement, as well as by category name.

Federal (Lag) Measures

Lag measures are data points that have already happened. They are long-term and show the change that occurs over a long period of time. There are seven measures that are tracked and reported by Oregon Child Welfare to the federal government; they are available to view via a public dashboard, <https://www.oregon.gov/dhs/Data/Pages/CW-FPMs.aspx>. All states and Child Welfare jurisdictions work to meet the federal standards. Lag measures are impacted by lead measures. In this report, lag graphs contain colored boxes that indicate if the goal is to stay below a standard (green) or above the standard

Practice (Lead) Measures

Lead measures are metrics that impact lag measures over time and can be tracked in the short term. Based on research, we know that lead measure directly impacts lag measures; in order to make changes to the lag measures, lead measures, or practice measures, can be used as a lever – by focusing on supporting and enhancing practice, the adjustment to the lead measure moves the lag measure over time. Lead measures can be tracked with a shorter lens and plan to impact them can be adjusted as needed.

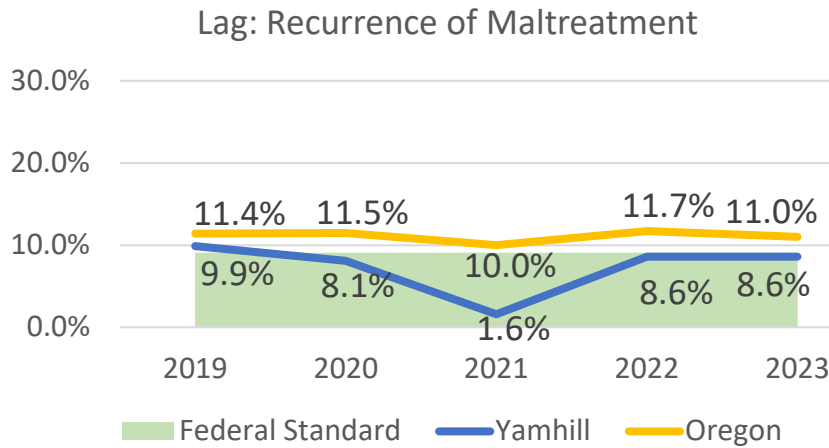

This report outlines many lead measures and identifies the lag measure(s) they impact. There is a row with the seven lag measures listed for each lag below the heading of the metric, highlighting which of the lags are impacted. As a lead measure may impact more than one lag measure, some lead measures have more than one lag measure highlighted to note the various impacts.

Service Delivery Points

Service delivery points are included in this report to provide supplemental information and metrics related to how families and children are experiencing Child Welfare. These metrics do not impact the lag measures, but instead, help tell the story of service delivery during the period under review.

Lag Measure: Recurrence of Maltreatment

Recurrence of Maltreatment measures the rate at which children who were victims of a founded investigations were then named as victims of a subsequent founded abuse report within a 12-month timeframe.

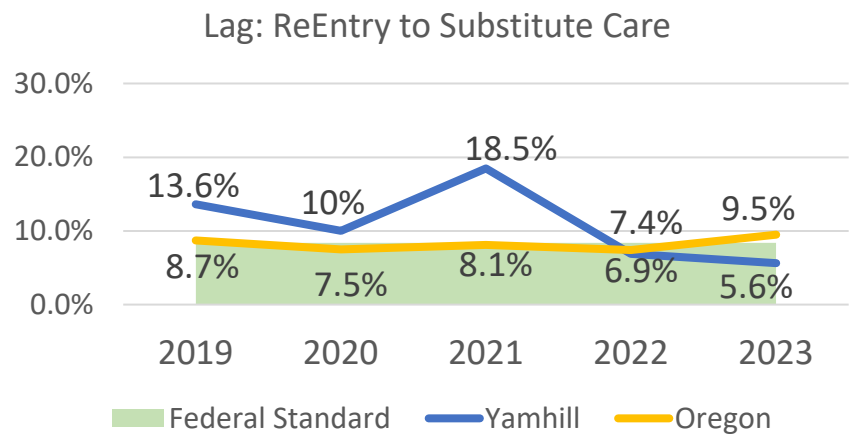

The expectation is to not exceed the Federal Standard of 9.1%, represented by the green box in the graph to the left.

Source: ROM SA.02

Lag Measure: Reentry into Foster Care (Substitute Care)

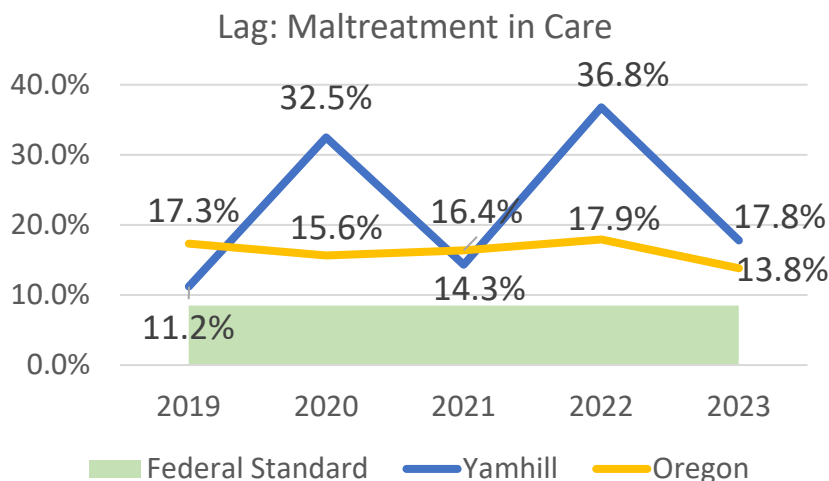

Re-entry to Substitute Care measures the percentage at which children who have already been placed in substitute care and were returned home within a 12mo timeframe are placed in substitute care again within a subsequent 12mo timeframe of that initial return.

The expectation is to not exceed the Federal Standard of 8.3%, represented by the green box in the graph to the right.

Source: ROM PA.04

Lag Measure: Maltreatment in Substitute Care

Maltreatment in Substitute Care measures the rate at which there are founded investigations of abuse once a child is in a substitute care placement. This includes safety concerns that occur in ODHS Resource Homes, other Child Caring Agencies or Residential Treatment facilities, as well as reports of historical familial abuse that are disclosed once a child is in substitute care.

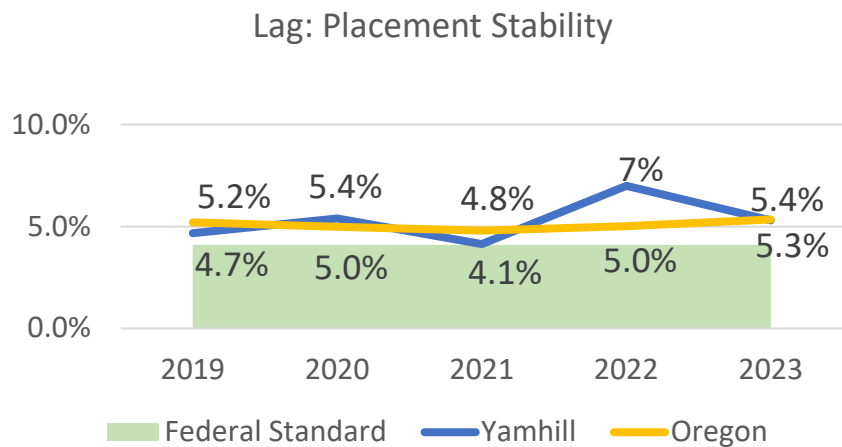

The expectation is to not exceed the Federal Standard of 8.5%, represented by the green box to the left

Source: ROM SA.01

Lag Measure: Placement Stability

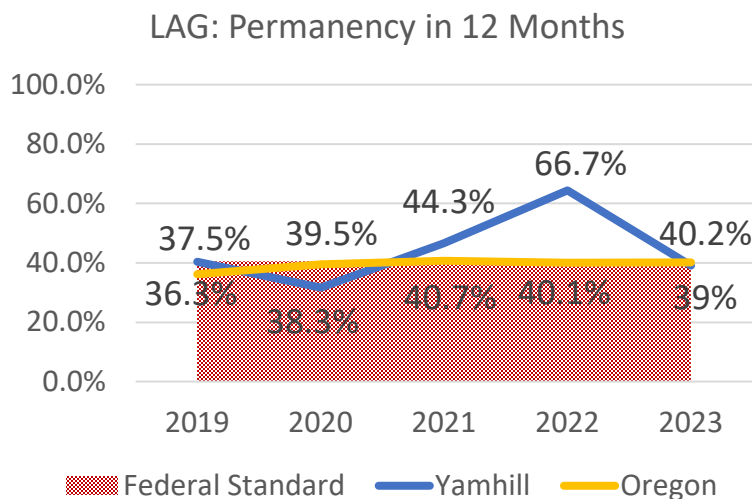

Placement Stability measures the rate children who are in substitute care in a 12mo timeframe experience placement changes or moves.

The expectation is to not exceed the Federal Standard of 4.1%, represented by the green box in the graph to the right.

Source: ROM PA.05

Lag Measure: Permanency in 12 Months

This measurement captures the percentage of children who leave substitute care to a lasting family setting in a 12-month period. This is most often reunification; a safe return home within 12 months of their entry to substitute care.

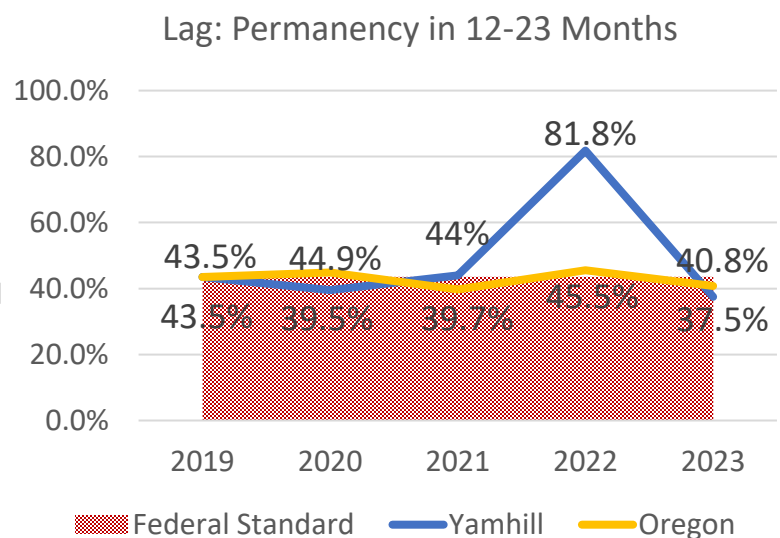

The expectation is to remain above the Federal Standard of 40.5%, represented by the red box in the graph to the left.

Source: ROM PA.01

Lag Measure: Permanency in 12-23 Months

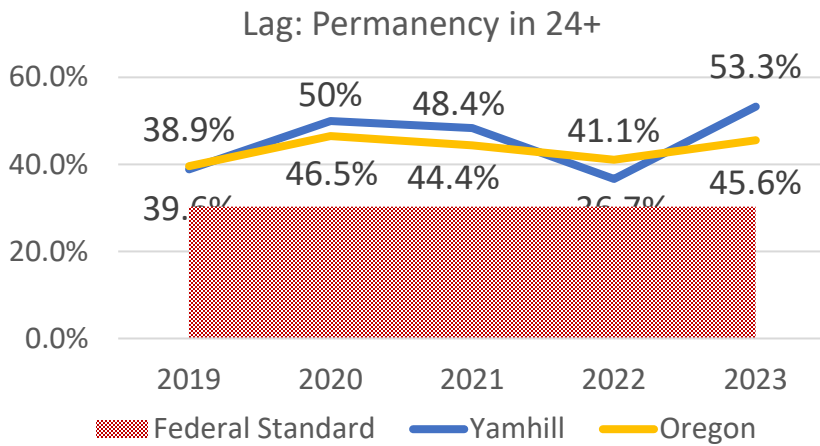

This measurement captures the percent of children who leave substitute care to permanency in a 12-23 month timeframe. Achieving permanency in this timeframe is often centered on decision points about case plans. This is usually the time when the need to change the case plan is identified, understanding the limits of parents' behavioral changes and whether they can meet their children's needs. It is within this timeframe that the plan may be changed, and the concurrent plan could be finalized.

The expectation is to remain above the Federal Standard of 43.6%, represented by the red box in the graph to the right.

Source: ROM PA.02

Lag Measure: Permanency in 24+ Months

This measurement captures the percent of children who leave substitute care to permanency in a 24-month timeframe or longer. This is most often a timeframe of a case in which the plan is no longer reunification, but instead has shifted to the concurrent plan, often known as guardianship, adoption, or another permanent planned living arrangement.

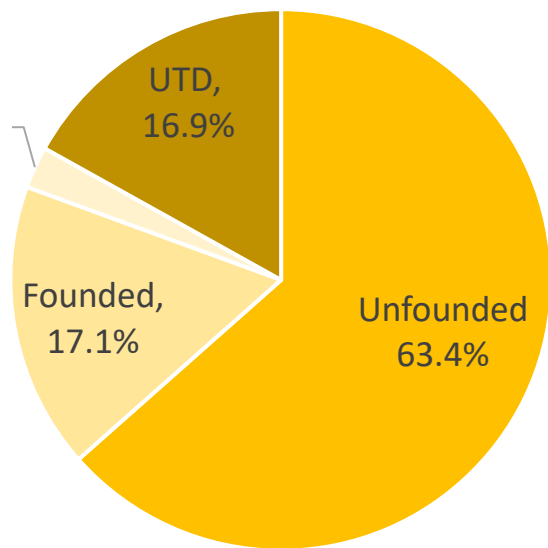

The expectation is to remain above the Federal Standard of 30.3%, represented by the red box in the graph to the left.

Source: ROM PA.03

Lag Measure Performance Table

	Yamhill Branch OR				
Recurrence of Maltreatment	8.6%	11.0%	9.1%	Under the federal standard by	0.50%
Re-Entry into Substitute Care	5.6%	9.5%	8.3%	Under the federal standard by	2.70%
Maltreatment in Care	17.8%	13.8%	8.5%	Over the federal standard by	9.30%
Placement Stability	5.3%	5.4%	4.1%	Over the federal standard by	1.20%
Permanency in 12 Months	39.1%	40.2%	40.5%	Under the federal standard by	1.40%
Permanency in 12-23 Months	37.5%	44.3%	43.6%	Under the federal standard by	6%
Permanency in 24+ Months	53.3%	41.0%	30.3%	Over the federal standard by	23%

Service Point: Disposition of Assessments

From April 2022-April 2023, Yamhill County was assigned 864 Child Protective Services Assessments. Each assessment is closed with a “disposition,” or finding regarding if abuse occurred or not. Of the allegations that were assigned for CPS investigation during the period under review, 548 assessments or 63.4% of them are unfounded, meaning no abuse occurred; 148 assessments or 17.1% of assessments result in a founded disposition, meaning that there was evidence of abuse; 146 or 16.9 % of assessments were coded as Unable to Determine, meaning there are some indications of abuse having occurred but not enough to reach a founded disposition. The final 22 assessments or 2.5% were closed with no assessment.

Source: ROM: CPS.01

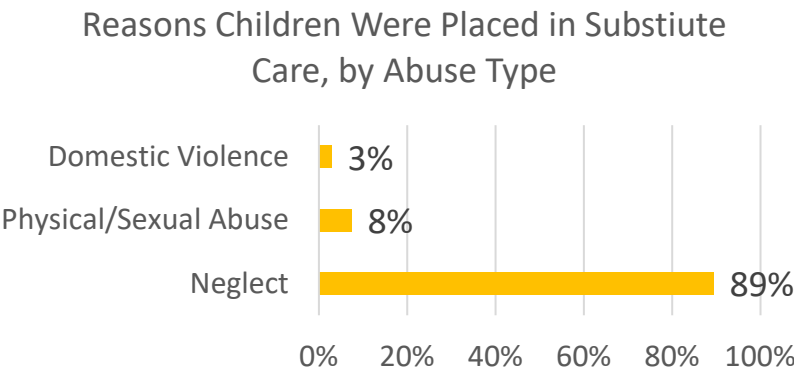

Yamhill Branch responded to 860 assessments between April 2022-April 2023 and worked with families to understand concerns for child safety. Caseworkers worked to support families with services and safety plans, placing children in substitute care only when there was no other option to ensure safety. **From April 2022 to April 2023, Yamhill Branch placed 51 children in substitute care. During the same time period, 54 children exited substitute care.**

Source: ROM CM.18

Service Point: Number of Removals

Caseworkers respond to concerns for abuse as outlined by the Oregon Revised Statute, which defines what is considered abuse. The graph to the right shows the types of abuse occurring in families in which children had to be removed and placed in substitute care.

While the majority of this report focuses on service delivery, this data helps illustrate the concerns in the community.

Perm in 12 months

Perm in 12 23 months

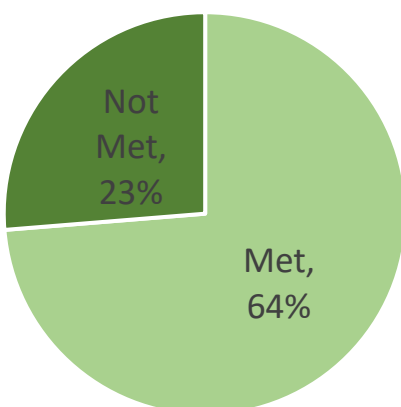

Perm in 24+ months

CPS workers are responding within assigned timelines to concerns of child safety, connecting with families quickly to set up supports and understand the factors that led to the call of concern. Timelines for contact are 24 hours (present danger), 72 hours (impending danger) and 10 days (no danger occurring)

The Big Picture data shows that caseworkers met the timelines for contact in 64% of the cases.

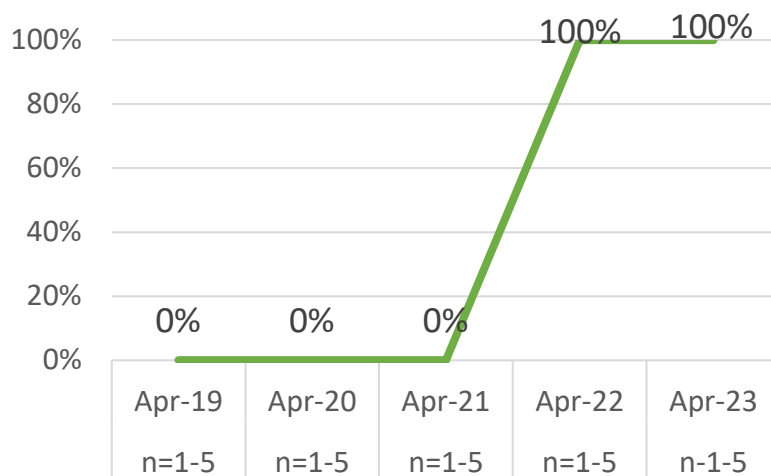

The Deep Dive data, below, shows performance over the last 5 years for the Yamhill branch, regarding timely initial contact with families in the cases reviewed for which the measure applied. Reminder, CFSR measure's sample sizes may include additional ICWA cases.

Perm in 24+ months

When working with families to understand more about the safety concerns, CPS workers are gathering information about routines, supervision, and parenting expectations; they are asking about attachment, bonding, and empathy. Workers are asking about each child's specific needs, developmental tracks, personalities, and relationships, as well as the extent (what happened, when did it happen, where did it happen, and who was involved) and circumstances (why did it happen, what contributed to it happening?) of abuse.

The case review data to the right shows information regarding how often Yamhill County has gathered sufficient information to make a safety decision in six areas of the assessment over the last 5 reviews.

Perm in 12 23 months

Perm in 24+ months

Deep Dive: Risk and Safety Assessment

When children can return home with a safety plan in place, and when CPS caseworkers are assessing concerns in-home, a clear and reliable safety plan is needed. These safety plans include frequent monitoring by the community and ODHS, and not relying on children or parents to maintain safety. The plan is updated whenever the family situation changes. To close cases, caseworkers are evaluating the risk and safety in the home environment, ensuring the behaviors in the home are predictable and stable.

The Deep Dive data to the left shows performance trends regarding the quality and sufficiency of assessment and safety planning in the cases reviewed for which the measure applied over the last 5 years.

Deep Dive: Impending Danger Safety Threat

In addition to investigating the incident reported to ODHS, caseworkers are also having discussions with families across all areas to understand how each family functions day to day. CPS workers are looking to understand if any safety threats are present in the family. When CPS workers accurately identify the safety threats which could occur within a family, they are then able to provide support or intervention to prevent further child safety concerns.

The Deep Dive data to the left shows performance trends regarding the accuracy of identification of Moderate to High Needs families for the cases reviewed for which the measure applied over the last 5 reviews.

Caseworkers are working to keep children connected to their Tribe, church, school, friends, and neighborhood prior to their placement in care. This support and connection reminds children of who they are, gives them a sense of familiarity, and offers networking and connection to others in their culture of origin. Preserving these connections adds a protective factor as children remain supported by their natural community.

Caseworkers are asking parents and relatives about American Indian and Alaska Native heritage, initiating searches and inquiry for ICWA eligibility. Children who are ICWA eligible are placed in Tribal resource homes whenever possible, as part of Placement Preference.

The Deep Dive data to the left show performance trends regarding Yamhill branch's efforts to preserve cultural connections for children in the cases reviewed for which the measure was applied over the last 5 years.

Placement Stability

Perm in 12 months

Perm in 12 23 months

Perm in 24+ months

Caseworkers work to ensure that a child's placement is stable and is consistent with achieving the child's permanency goal(s). Ideally, a child would only experience one placement setting. If a child requires a placement change, that change should be based on the needs of the child and/or to promote permanency achievement.

The pie chart below shows the number of placements experienced by children who were placed in substitute care during the period under review. The case review data, below and to the right, shows performance trends regarding the agency's ability to ensure stability of substitute care placements in the cases reviewed for which the measure applied over the last 5 years.

Perm in 12 months

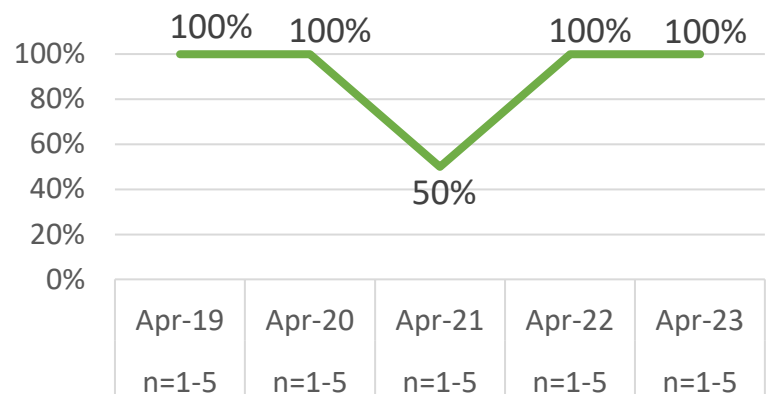

Perm in 12 23 months

Perm in 24+ months

At this point in the case plan, caseworkers are focusing on identifying the most appropriate placement and engaging in consistent communication and collaboration with the child's service providers.

Federal guidelines, Adoption and Safe Families Act (ASFA) dictate timeframes in which different permanency types should be achieved. ASFA timelines are a critical component of this CFSR measure. Caseworkers are considering multiple processes and protocols that each take considerable lengths of time and planning (e.g. out-of-state placements) while working to meet specific child welfare timelines.

During the 2022-2023 PUR Yamhill County received a 50% strength rating for the cases that applied.

Reunification

**8.5 Months**

Guardianship

**47.6 Months**

Adoption

**35.6 Months**

Median length of stay is the mid-point in the total length of stay for all children who exited substitute care during April 2022-April 2023. Median is the middle number in a data set, so half of the children discharged from substitute care in more months than noted above, and half in less.

The median length of stay for children who were reunified was 8.5 months. The median length of stay for children who were in a finalized guardianship was 47.6 months. The Median length of stay for children who were adopted was 35.6 months.

Perm in 12 23 months

Perm in 24+ months

Parents have the right and opportunity to engage the court as the proceedings relate to their families. Establishing timely jurisdiction ensures case plans can proceed; timelines designed to protect children from languishing in care are impacted by the length of time to establish jurisdiction. We rely on our legal partners and the Juvenile Court to help meet these timelines.

Courts aim to establish jurisdiction within 60 days of a child's placement in care. The data to the right tracks how frequently that occurs, broken into quarters by the Oregon Circuit Court.

Median days to jurisdiction on all parents on the case

% of cases in which jurisdiction was established on all parents within 60 days

Deep Dive: Educational Needs of the Child

When children are placed in substitute care, caseworkers work alongside Resource Parents and partners in the child's school systems to ensure all educational needs are met, both initially and ongoing. This includes attending and supporting the child's IEP meetings and goals.

The case review data to the left shows performance trends regarding efforts to meet children's educational needs in the cases reviewed for which the measure applied over the last 5 years.

Source: CFSR Item 16

Caseworkers and Resource Parents ensure the child's medical and dental needs are being met both upon the child's initial placement in substitute care and ongoing. Children are being seeing for well-child visits, having dental cleanings, and are up to date with immunizations. Resource Parents fill out medication logs for any prescribed non-psychotropic medications.

The case review data to the right shows performance trends regarding efforts to meet children's medical and dental needs in the cases reviewed for which the measure applied over the last 5 years.

Deep Dive: Mental Health Needs of the Child

Caseworkers and Resource Parents also partner to ensure children's mental health needs are met, as being placed in substitute care in and of itself is traumatic. Caseworkers and Resource Parents are ensuring children are getting regular and ongoing assessments and then being connected to the necessary services. If a child is prescribed psychotropic medications, the Resource Parent tracks these on a medication log and sends them to the agency. The year 2019 was left out of the chart due to no cases being applicable.

The case review data to the left shows performance trends regarding efforts to meet children's mental health needs in the cases reviewed for which the measure applied over the last 5 years.

Active Efforts	Means affirmative, active, proactive, thorough, and timely efforts intended primarily to maintain or reunite an Indian child with his or her family. Active efforts must involve assisting the parent or parents or Indian custodian through the steps of a case plan and with accessing or developing the resources necessary to satisfy the case plan. There is not standardized measurement tool; as each family's needs are unique and active efforts are expected to meet those needs.
APPLA	Means "Another Planned Permanent Living Arrangement", which is a permanency option for foster youth, only when other options such as reunification, relative placement, adoption, or legal guardianship have been ruled out
ASFA	Means "Adoption and Safe Families Act" and refers to federal guidelines and timelines that child welfare agencies are required to meet
Assignment	Means that a call to the hotline is determined to be suspicious for child abuse and will require further investigation. The Oregon Child Abuse Hotline (ORCAH) screeners will assign the case to the geographically appropriate site or branch for assessment by a Child Protective Services caseworker
CFSR	Means "Child and Family Services Review" and refers to reviews that are conducted annually to help states improve safety, permanency and well-being outcomes for children and families who receive services through the child welfare system
Concurrent Plan	is an approach that seeks to eliminate delays in attaining permanency for children and youth in foster care. Effective implementation requires comprehensive and early assessment. It involves identifying and working toward a child's primary permanency goal (such as reunification with the birth family) while simultaneously identifying and working on a secondary goal (such as guardianship with a relative). (source: childwelfare.gov)
CPS	Means "Child Protective Services" and refers to a specialized social service program that Child Welfare provides on behalf of children or, when applicable, young adults who may be unsafe after a report of abuse is received
CPS Disposition	Means a determination that completes a CPS assessment. Dispositions are discussed in OAR 413- 015-1000 and include founded, unfounded/unsubstantiated, and unable to determine
CQI	Continuous Quality Improvement
Cultural Heritage	Means the language, customary beliefs, social norms, and material traits including, but not limited to, the dress, food, music, and dance of a racial, religious, or social group that are transmitted from one generation to another
Disproportionality	Children of Black or African American and American Indian or Native Alaskan families are brought to the attention of Child Welfare agencies and placed in substitute care at a rate that is higher than to their representation in the population of a community
DM	Means "District Manager" and refers to the staff member who manages Child Welfare & Self Sufficiency Programs for the district
Family First/FFPSA	Mean "Family First Prevention Services Act" and refers to a federal act which aims to preventatively preserve families
Family Time	Means time during which children/youth who are place in foster care spend with their parents, siblings, and other important members of their families
Fidelity Reviews	Means the review process that CW completes to audit the quality of casework in order to assure case practice is true to the Oregon Safety Model (OSM)

Founded	Means the determination, or disposition, following an investigation by Child Protective Services, which means there is “believable evidence” that child abuse or neglect
ICWA	Means “Indian Child Welfare Act” and refers to the United States federal law that governs jurisdiction over the removal of Native American children from their families in custody, foster care and adoption cases
IEP	Means “Individualized Education Plan” and lays out the special education instructions, supports, and services a student needs to thrive in school
In Home	Cases in which child welfare caseworkers offer support and services to address safety concerns while the children remain in the family home.
JCIP	Means “Juvenile Court Improvement Program” and refers to a federally funded project to improve court practice in child abuse and neglect cases.
Lag Measure	Means a historical measure of performance; for our purposes, the lag measures are the performance measures that are federally tracked.
LEA	Means Law Enforcement Agency
Lead measure	Means the highest leverage actions or activities that can accomplish goals and contribute to the performance of the lag measures.
M2HN	Means “Moderate to High Needs” and refers to families where family behaviors, conditions, or circumstances are occurring now and over the next year without intervention, are likely to have a negative impact on a child’s physical, sexual, psychological, cognitive, or behavioral development or functioning.
Maltreatment in Substitute Care	Measures the rate at which there are founded investigations of abuse once a child is in a substitute care placement.
ORCAH	Means Oregon Child Abuse Hotline and refers to the division of Child Welfare responsible for receiving and assigning for investigation community reports of child abuse
ORICWA	Means “Oregon Indian Child Welfare Act” and refers to Oregon’s Law which upholds the Child Welfare Vision for Transformation principles and values where children thrive by growing up in a family, community relationships are valuable, self determination is fostered, and prevention efforts are critical to maintaining the family unit
Permanency in 12 Months	This measurement captures the percent of children who leave substitute care to a lasting family setting in a 12mo period. This is most often reunification; a safe return home within 12 months of their entry to substitute care.
Permanency in 13-23 Months	This measurement captures the percent of children who leave substitute care to permanency in a 13-23mo timeframe.
Permanency in 24+ Months	This measurement captures the percent of children who leave substitute care to permanency in 24mo timeframe or longer.
Placement stability	Is a Federal Measure which shows the rate of placement moves 1,000 per day of foster for all children who <i>entered care</i> in a 12-month target period. Unit of analysis is the placement move and days in removal episode during the 12-month target period
PM	Means “Program Manager” and refers to a Child Welfare staff who manages a particular child welfare program and/or a child welfare program in a certain district

Qualitative	measuring, or measured by the quality of something rather than its quantity.
Quantitative	measuring, or measured by the quantity of something rather than its quality
Recurrence of Maltreatment	Recurrence of Maltreatment measures the rate at which children who were victims of a founded investigations were then named as victims of a subsequent founded abuse report within a 12mo timeframe.
Re-Entry to Substitute Care	Re-entry to Substitute Care measures the rate at which children who have already been placed in in substitute care and were returned home within a 12mo timeframe are placed in substitute care again within a subsequent 12mo timeframe of that initial return.
Resource Parent	Means a person who operates a home that has been approved by the Department to provide care for an unrelated child or young adult placed in the home by the Department
Root Cause Analysis	Means a factor that caused a nonconformance and should be permanently eliminated through process improvement. The root cause is the core issue—the highest-level cause—that sets in motion the entire cause-and-effect reaction that ultimately leads to the problem(s).
SNAP	Means Supplemental Nutrition Assistance Program and refers to the federally funded program that offers nutrition assistance to eligible individuals and families
SSP (Self-Sufficiency Program)	Means Oregon’s Self-Sufficiency program, which is meant to provide a safety net, family stability and a connection to careers that guide Oregonians out of poverty. It consists of: Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), Employment Related Day Care (ERDC), Temporary Assistance for Domestic Violence Survivors (TA-DVS), Refugee Program, and Runaway and Homeless Youth.
TANF (Temporary Assistance for Needy Families)	Means Oregon’s program that provides cash benefits to low-income families with children. These benefits help meet a family's basic needs like food, clothing, rent and utilities while they work toward self-sufficiency
TPR	Means “Termination of Parental Rights” and refers to any action which results in the termination of the parent-child relationship
Unable to Determine	Means there is some indication abuse occurred, but there is insufficient information to conclude there is a reasonable cause to believe abuse occurred
Unfounded	Means there is no evidence abuse occurred, also known as unsubstantiated
Vision for Transformation	Means Oregon’s plan for change that is based on a belief that children do best growing up in a family and on values related to honoring and supporting cultural wisdom, building community resilience and voice, and ensuring the self-determination of our communities. of color
