Fast Facts for FFY 2025

Child Protective Services

- The Oregon Child Abuse Hotline (ORCAH)'s total contacts (calls and cross-reported police reports) answered during Federal Fiscal Year (FFY) 2025 (October 2024-September 2025) was 178,056.
    - Of those contacts, a total of 97,170 screening reports were documented.[1]
- A total of 47,197 reports received during FFY 2025 were assigned for CPS assessment.[2] A total of 40,324 CPS assessments were completed, which includes reports that were assigned in the previous year.[3]
- Of all completed CPS assessments, 8,418 were founded for abuse and involved 11,844 victims. Of those victims, 2,008 (17.0%) were removed from their homes.
    - Of all victims, 36.5 percent were 5 years old and younger.
    - Of all types of founded abuse incidences, the threat of harm was the most frequently identified type of abuse (51.2 percent), followed by neglect (25.1 percent).
- At 40.7 percent, parent/caregiver substance use represented the most common family stress factor when child abuse was present, followed by domestic violence (31.3 percent) and parent history of abuse (14.1 percent).

[1]This number reflects all potential reports of child abuse that are screened by ODHS (Child Welfare and the Office of Training, Investigation and Safety) and includes a variety of notifications.

[2] All references to assigned CPS assessments also include child abuse reports assigned by Office of Training, Investigation and Safety (OTIS) for investigation.

[3] Reports assigned for CPS assessment can be combined or "linked" with a currently open CPS assessment, changing the count of CPS assessments. When this combination happens, it can also alter the period in which the now-linked report shows up.

In-Home Family Services

- During FFY 2025, a total of 5,132 children received case management and safety services while being served in their homes.
- Of the total served in-home, 56.7 percent received additional services.

Foster Care

Total Served

- A total of 6,814 children in the custody of Child Welfare spent at least one day in foster care such as family foster care, professional treatment programs, psychiatric residential treatment, placements in pre-adoptive homes, placements through developmental disability services, or independent living.
- Of the total children served in foster care, 62.1% were White, 18.1% were Hispanic, 7.4% were Black or African American, 5.8% were American Indian or Alaska Native, 4.7% did not have race/ethnicity recorded, and 1.9% were Asian or Pacific Islander.[4]
- A total of 1,456 youth received contracted independent living program skill building services.
- Of all children leaving foster care, 54.1% were reunited with their families.

Average Daily Population

- An average of 4,497 children were in foster care daily. Of these:
    - An average of 3,203 children were in family foster care. Of those, 55.3 percent (about 1,772 children) were placed with relatives.

[4] Race categories are defined in compliance with REAL-D (OAR 943-070-0010) and U.S. Census Bureau standards and are gathered through self-identification. Children may have multiple races. The primary race is the first one identified. If a child self-identifies as Hispanic in addition to other races, their race category will be Hispanic (any race).

- An average of 462 children were on trial home visit.
- An average of 186 children and young adults were served in specialized care or treatment placements in Proctor Care (certified family) or Residential Care settings licensed as Child Caring Agencies. Behavior Rehabilitation Services (BRS) programs, for example.
- An average of 646 children were in other types of foster care placements such as placements through developmental disability services, placements in pre-adoptive homes, and independent living.

Point in Time

- Of the 4,619 children in care on September 30, 2025, 62.1 percent (2,868) had two or fewer placements.

Adoption & Guardianship Program

- A total of 361 children had adoptions finalized. Of these, 66.5% were White, 13.9% were Hispanic, 10.5% were Black or African American, 4.2% were American Indian or Alaska Native, 2.7% were Asian or Pacific Islander and 2.2% had no race/ethnicity recorded.
- Of those adopted, 130 had siblings and of those, 117 (90.0%) were adopted by the same family as one or more of their siblings.
- A total of 407 children exited foster care to guardianship. Of these children, 65.1% were White, 19.2% were Hispanic, 6.9% were American Indian or Alaska Native, 6.1 % were Black or African American, 1.5% were Asian or Pacific Islander, and 1.2% had no race/ethnicity recorded.

Data Suppression

To safeguard personal privacy and comply with data protection standards, data cells representing between 1 and 5 individuals have been suppressed and designated by an asterisk (*) throughout this report. This masking prevents the inadvertent disclosure of identities within highly specific demographic or geographic subgroups. When a zero is present, that means a true zero value. A not applicable (n/a) indicates the value is either not available or it cannot be calculated as a percentage or rate due to a zero value.

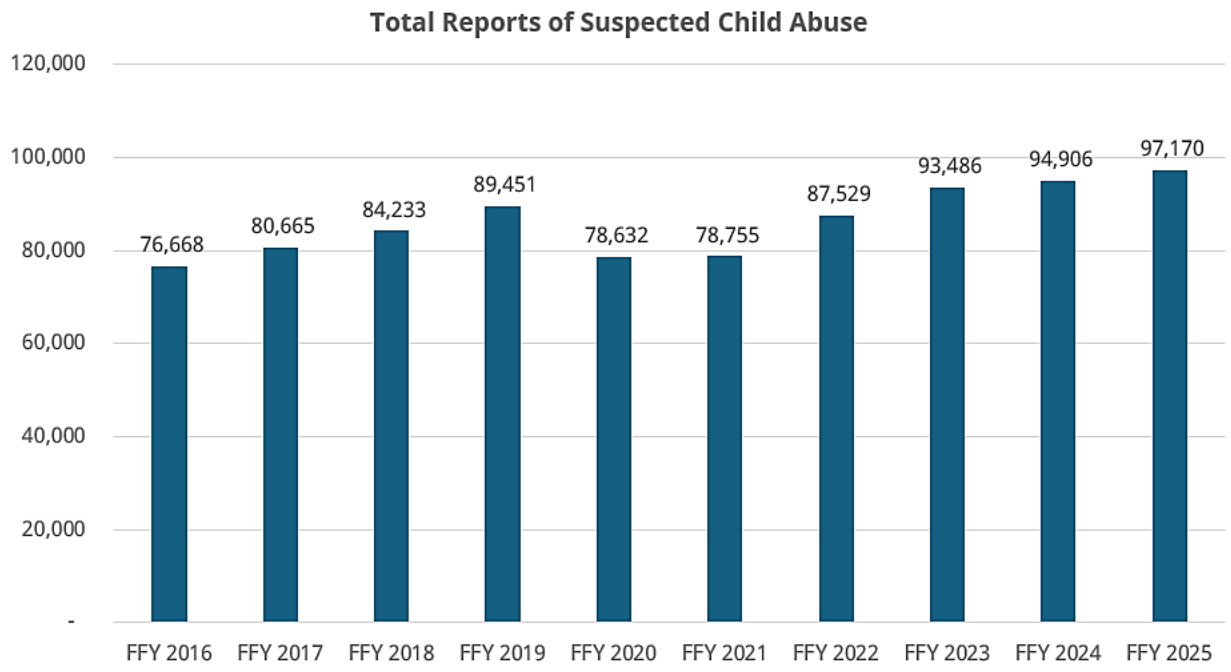

Additionally, when totals or percentages would allow the reader to back-calculate to uncover suppressed data, those totals or percentages have also been either masked or modified (denoted throughout) to prevent back-calculation. For example, in totals disaggregated by race where only one demographic subcategory was suppressed, the total will not include the one suppressed value between 1 and 5 to prevent back-calculation.

Child Protective Services

Screening Reports and Reporters of Suspected Child Abuse

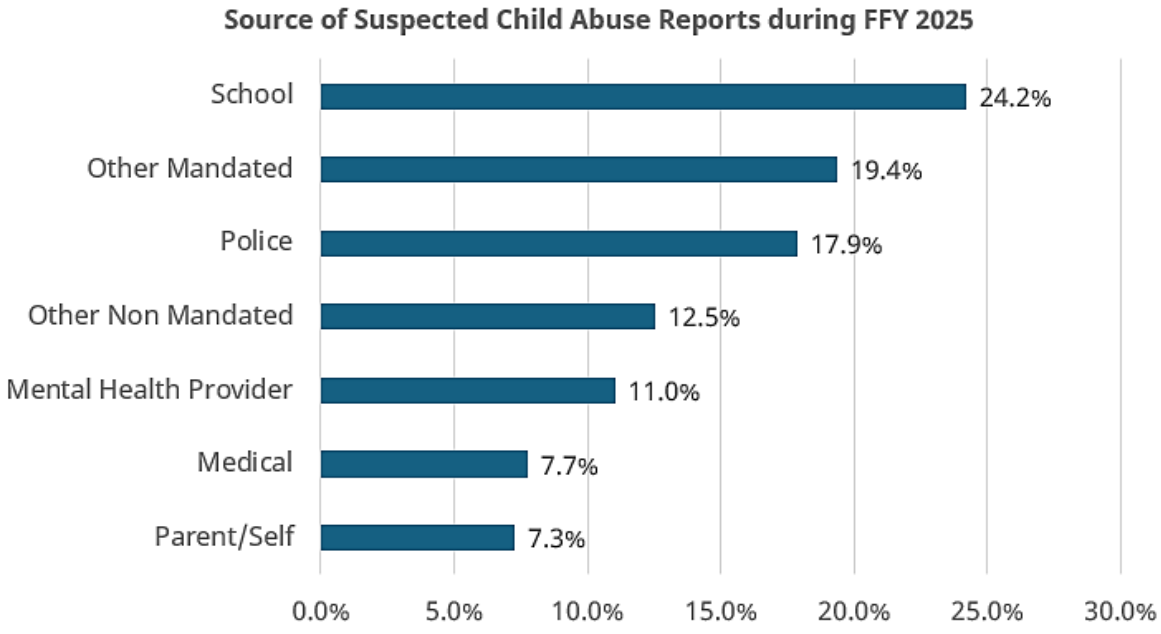

Oregon Child Abuse Hotline (ORCAH) serves as one of the primary points of contact for children in Oregon at risk for or experiencing abuse. The 24-hour hotline receives, and screens reports of child abuse statewide and provides guidance and subject matter expertise to callers and partners to ensure child safety. The hotline also assigns reports for Child Protective Services (CPS) assessments when allegations of abuse meet the criteria for assignment and to ensure child safety. Additionally, the hotline serves Oregonians through cross-reporting to local law enforcement, completes required notifications with multiple community partners and refers to services when appropriate.

ORCAH receives calls, cross-reported police reports, and electronic reports from Child Welfare caseworkers and the Office of Training, Investigations and Safety (OTIS) staff when a new allegation on an open case or assessment needs to be screened. These are collectively referred to as “contacts.” A portion of these contacts resulted in a documented screening report (either assigned or closed at screening), or a case note on an open case. The remaining contacts are generally callers seeking information or providing information that is not related to concerns for alleged abuse or open cases. ORCAH’s total contacts answered during FFY 2025 was 178,056. Of those contacts received, 97,170 resulted in a screening report being documented, an increase of 1.2 percent from the prior year.

During FFY 2025:

- Public and private officials required by law to report suspected child abuse made up 80.2 percent of the screening reports received by Child Welfare.
- Of all reports, 42.1 percent came from schools and law enforcement agencies.

Response Time for CPS Assessments

Oregon Child Welfare has three response times: within 24 hours, within 72 hours, and within 10 business days. Response time refers to the time required for CPS staff to make direct face-to-face contact with the child who is the alleged victim of a report of abuse. Once the screening decision is made, determining the urgency of a CPS Assessment response is the second fundamental safety decision of the screening assessment. The criteria for determining when CPS must respond to an assigned CPS Assessment is based on the application of criteria in the Structured Decision Making© tool to the information in the abuse report. Of the total assigned reports, 44.5 percent were assigned a response time of within 24 hours.

Reports Assigned for CPS Assessments

Of the 97,170 screening reports received, 47,197 were assigned for CPS assessment. During the FFY, 40,324 CPS assessments were completed. Of this total, 8,418 (20.9 percent) resulted in a founded disposition. The 8,418 CPS assessments with founded dispositions represent 8.7 percent of the total abuse reports. Once there is a founded disposition, the children for whom there is reasonable cause to believe they were abused are considered victims of child abuse.

Victims of Child Abuse

During FFY 2025, there were 11,844 unduplicated child abuse victims. Most child victims remained in their own homes (83.0 percent), while 17.0 percent of child victims were removed from their homes. The percent of child victims remaining in-home increased by 0.6% from FFY 2024.

Of the total victims, 11.8 percent remained home with an in-home safety plan and 71.3 percent remained in their homes, but Child Welfare determined that it was not necessary to open a case to keep the child(ren) safe.

The following data shows the key demographics of children who were victims of child abuse during FFY 2025.

FFY 2025 Victims by Age and Gender[5]					
Age	**Boys**	**Girls**	**Unknown/ Unreported**	**Total**	**Percent of Total**
<1	556	521	*	**1,077***	**9.1%**
1	317	280	6	**603**	**5.1%**

15	245	391	*	**636***	**5.4%**
16	216	420	*	**636***	**5.4%**
17	168	370	*	**538***	**4.6%**
Total	**5,537**	**6,257**	**50**	**11,844**	**100.0%**

During FFY 2025, a total of 5.5 percent of victims were of more than one race/ethnicity. However, the following data for Oregon displays the child's first recorded race/ethnicity. The Disproportionality Index (DI) is also shown.

[5] An asterisk (*) in a single column denotes that the data has been suppressed to protect confidentiality, due to a value of between 1 and 5. An asterisk (*) next to the total for that row indicates that the total only includes those non-suppressed subcategories to avoid back-calculating when only one subcategory was suppressed due to a value between 1 and 5. When multiple subcategories are suppressed, the total is the true total.

Disproportionality Index (DI) and Representation by Race for Victims of Child Abuse for FFY 2025 Compared to Oregon's Child Population[6,7,8]					
Race	**# of Oregon's Children**	**% of Oregon's Children**	**# of Victims of Child Abuse**	**% of Victims of Child Abuse**	**DI Value of 1 = Proportionate**
American Indian or Alaskan Native	11,158	1.4%	414	3.5%	**2.6**
Asian/Pacific Islander	55,059	6.7%	193	1.6%	**0.2**
Black or African American	33,749	4.1%	631	5.3%	**1.3**
Hispanic (any race)	208,541	25.2%	1,569	13.2%	**0.5**
Unable to Determine	n/a	0.0%	3,446	29.1%	**n/a**
White	517,708	62.7%	5,591	47.2%	**0.8**
Statewide Total	**826,215**	**100.0%**	**11,844**	**100.0%**	

The following table displays the Disproportionality Index (DI) three-year trend. The DI outcomes remain stable for each race/ethnicity category over the three-year period with the most fluctuation for victims in the American Indian or Alaska Native category.

Victims of Child Abuse FFY 2023-FFY 2025 by Race/Ethnicity and Disproportionality Index (DI)[6,7,8]						
Race	**FFY 2023**		**FFY 2024**		**FFY 2025**	
	%	**DI**	**%**	**DI**	**%**	**DI**
American Indian or Alaskan Native	2.8%	2.0	3.5%	2.5	3.5%	2.6
Asian/Pacific Islander	1.6%	0.3	1.5%	0.3	1.6%	0.2
Black or African American	4.6%	1.2	4.9%	1.2	5.3%	1.3
Hispanic (any race)	12.6%	0.5	13.5%	0.6	13.2%	0.5
Unable to Determine	24.9%	n/a	26.7%	n/a	29.1%	n/a
White	53.4%	0.8	49.8%	0.8	47.2%	0.8

[6] Population data is always a year behind. Population data is from Puzzanchera, C., Sladky, A. and Kang, W. (2026). "Easy Access to Juvenile Populations: 1990-2024." Online. Available: https://ojjdp.ojp.gov/statistical-briefing-book/data-analysis-tools/ezapop/

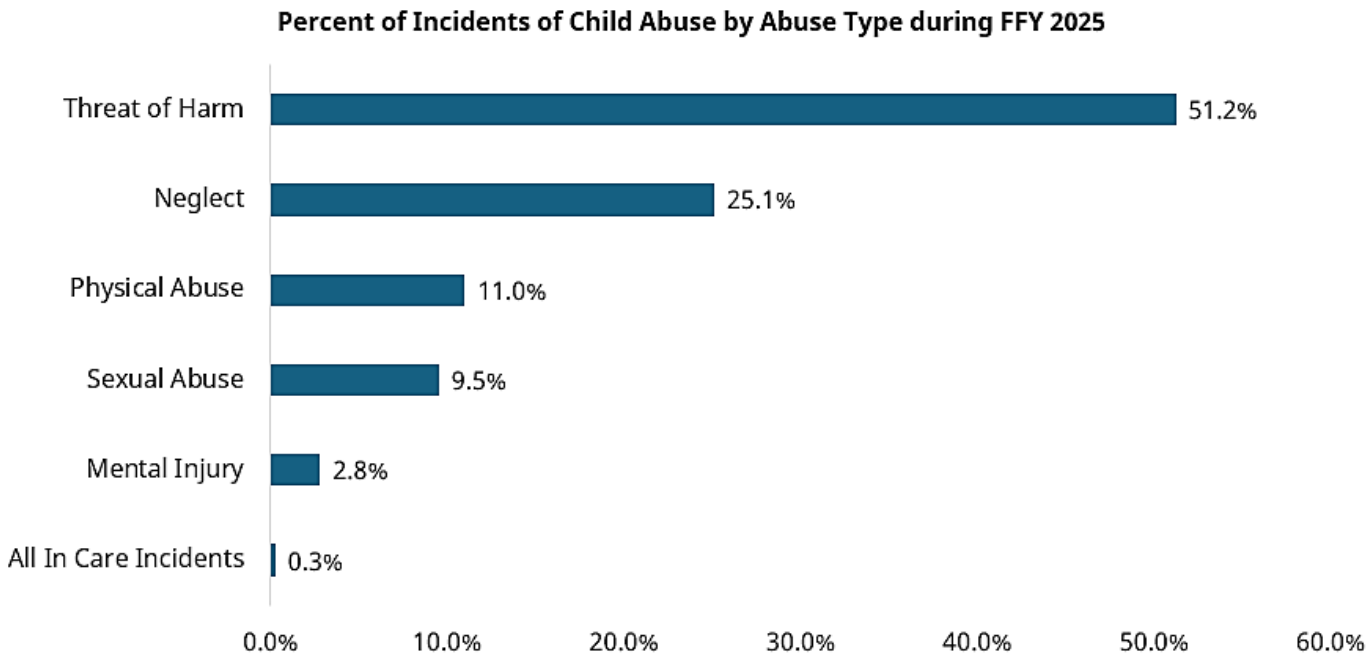

[7] Disproportionality Index (DI) is calculated by taking the percent by race of victims of child abuse and neglect and dividing it by the percent by race in Oregon's child population. Values less than 1 mean underrepresentation.

[8] A not applicable (n/a) indicates the value is unavailable or unable to be calculated.

Types of Abuse Incidents

Each type of abuse experienced by a victim in a founded CPS assessment counts as an incident of child abuse. The number of incidents is larger than the number of victims because victims may have suffered more than one type of abuse or may have been involved in more than one founded CPS assessment. Between FFY 2024 and FFY 2025, the total number of incidents of child abuse increased by 2.5 percent.

Threat of Harm is the largest category of child abuse at 51.2 percent, followed by neglect, at 25.1 percent of all incidents of abuse.

In 2016 (SB 1515), the following abuse types were added to ORS 418.257: Abandonment in Care, Financial Exploitation in Care, Involuntary Seclusion in Care, Neglect in Care, Physical Abuse in Care, Sexual Abuse in Care, Verbal Abuse in Care, and Wrongful Restraint in Care. These incidents are combined and included in the All in Care Abuse Incidents category on the above chart at 0.3 percent of all incidents of abuse.

FFY 2025 Incidents of Child Abuse[9]			
Abuse	**FFY 2024**	**FFY 2025**	**Percent Change from Prior Year**
Mental Injury	421	426	1.2%
Physical Abuse	1,648	1,660	0.7%
Neglect	3,648	3,787	3.8%
Sexual Abuse	1,473	1,437	-2.4%
Threat of Harm	7,489	7,725	3.2%
Abandonment in Care	0	*	n/a
Financial Exploitation in Care	0	*	n/a
Involuntary Seclusion in Care	0	2	n/a
Neglect in Care	14	27	92.9%
Physical Abuse in Care	11	9	-18.2%
Sexual Abuse in Care	0	0	n/a
Verbal Abuse in care	4	0	-100.0%
Wrongful Restraint in care	2	2	0.0%
Total Incidents	**14,710**	**15,077**	**2.5%**

People Identified as Responsible for Abuse

People identified as responsible for child abuse are most often family members, making up 89.6 percent. Of family members, mothers and fathers represent 69.0 percent.

FFY 2025 Number of Founded Child Abuse Victims by Responsible Person's Relationship to Victim		
Familial	**Number**	**Percent**
Father	5,713	36.0%
Mother	5,223	33.0%
Unmarried partner of parent	1,966	12.4%
Other Relative (non-foster parent)	1,105	7.0%
Nonrelative foster parent	85	0.5%
Legal guardian	58	0.4%
Relative foster parent	27	0.2%

[9] An asterisk (*) in a cell denotes that the data has been suppressed to protect confidentiality, due to a value of between 1 and 5. A zero (0) indicates a true zero value. A not applicable (n/a) indicates the value cannot be calculated as a percentage.

FFY 2025 Number of Founded Child Abuse Victims by Responsible Person's Relationship to Victim		
Foster Parent, relationship unknown or unspecified	10	0.1%
Total Familial	**14,187**	**89.6%**
Nonfamilial		
Other	1,035	6.5%
Unknown or missing	476	3.0%
Other professionals	55	0.3%
Child daycare provider	44	0.3%
Group home or residential facility staff	24	0.2%
Friends or neighbors	19	0.1%
Total Nonfamilial	**1,653**	**10.4%**
Grand Total	**15,840**	**100.0%**

Family Stress Factors

Leading family stress factors of abused children are substance use, domestic violence, and parent history of abuse. Many families also have significant financial stress or unemployment issues. Some parents may have a diagnosis of mental illness or parental involvement with law enforcement. There could be more than one stress factor recorded in families of child abuse victims.

Family Stress Factors as a Percent of Founded Abuse		
Stress Factor	**FFY 2024**	**FFY 2025**
Parent Alcohol or Drug Abuse	39.6%	41.8%
Domestic Violence	30.3%	33.0%
Parent History of Abuse	16.7%	20.7%
Parent Involvement with Law Enforcement	15.7%	18.3%
Other	20.1%	18.1%
Parent Mental Illness	13.2%	15.0%
Family Financial Stress	11.2%	13.9%
Child's Challenging Behaviors	11.7%	12.4%
Custodial Conflict	7.4%	8.1%
Child Developmental Disability	5.9%	7.3%
Head Of House Unemployed	5.7%	7.2%
New Baby or Pregnancy	6.1%	6.6%
Inadequate Housing	6.4%	6.5%
Heavy Child Care Responsibility	4.0%	5.8%

Family Stress Factors as a Percent of Founded Abuse		
Stress Factor	**FFY 2024**	**FFY 2025**
Child Mental Illness	4.5%	5.1%
Social Isolation	3.2%	3.5%
Parent Developmental Disability	2.6%	2.9%
Disparity, inequity or oppression	2.1%	1.8%
Human trafficking	0.8%	1.0%

Fatalities Related to Child Abuse

There were 30 children who died from causes related to familial abuse during FFY 2025.[10]

- There were 29 fatalities with at least one parent as the identified person responsible. The relationships of the person responsible to the child in all 30 fatalities were:
  - The mother alone in 12 fatalities.
  - The father alone in nine fatalities.
  - The mother and father in three fatalities.
  - The mother and the mother's live-in significant other in one fatality.
  - The mother's significant other in one fatality.
  - The mother, father, and relative in one fatality.
  - The mother, stepfather, and relative in one fatality.
  - The father and relatives in two fatalities.
- There were 19 victims (63.3 percent) that were age 5 and younger, demonstrating the vulnerability of this age group. Eight victims were younger than one year old.

[10] The number of child fatalities does not correlate to the number of CIRTS assigned within the same time frame. A CIRT can occur at any time during the CPS assessment when determined likely due to abuse and not necessarily at the time of the fatality. Not all abuse related fatalities are CIRTS. For example, when a child dies from abuse and the family has no Child Welfare history within the prior 12 months.

- Two children had an open Child Welfare case at the time of the fatality.[11]
- Six children had an open CPS assessment at the time of the fatality. In three of the six, the circumstances resulting in death occurred prior to the CPS assessment opening.
- No children were in ODHS custody at the time of death.
- Eight children's families received family preservation services in the five years preceding the fatality.
- Ten fatalities were caused by physical abuse. Seventeen fatalities were the result of neglect. Three were caused by both physical abuse and neglect.

Child Fatalities Due to Child Abuse				
Period	**Abuse**	**Neglect**	**Abuse & Neglect**	**Total**
FFY 2025	10	17	3	**30**
FFY 2024	2	14	0	**16**
FFY 2023	2	14	3	**19**
FFY 2022	4	14	1	**19**
FFY 2021	4	13	1	**18**
FFY 2020	1	14	1	**16**
FFY 2019	6	17	0	**23**
FFY 2018	4	20	20	**26**
FFY 2017	10	20	0	**30**
FFY 2016	3	15	1	**19**
FFY 2015	7	17	3	**27**
FFY 2014	5	7	1	**13**
FFY 2013	4	5	1	**10**
FFY 2012	8	6	3	**17**

[11] An open case refers to a family's case assigned to a caseworker after completion of a CPS assessment to manage child safety and provide services.

In-Home Family Services

Preserving Families

In situations where a child is determined to be unsafe and the parent/caregiver is not able to manage the child's safety without the assistance of Child Welfare, then safety plans are developed. When it is possible to manage the child's safety in the home, an in-home safety plan is developed with the child's family. This is referred to as an in-home case.

A total of 920 children were being served in their homes on September 30, 2025. The following data show the key demographics of children being served at home on September 30, 2025, as well as the Disproportionality Index.

Disproportionality Index and Representation by Race for Children with an In-Home Case Compared to Oregon's Child Population (Excluding when on Trial Home Visits) on 9/30/2025[12,13]

Race/Ethnicity	# of Oregon's Children	% of Oregon's children	# of Children Served In Home	% of Children Served in Home	DI Value of 1= Proportionate
American Indian or Alaska Native	11,158	1.4%	51	5.5%	**4.10**
Asian/Pacific Islander	55,059	6.7%	12	1.3%	**0.20**
Black or African American	33,749	4.1%	81	8.8%	**2.16**
Hispanic (any race)	208,541	25.2%	145	15.8%	**0.62**
Unable to Determine	n/a	0.0%	90	9.8%	**n/a**
White	517,708	62.7%	541	58.8%	**0.94**
Statewide Total	**826,215**	**100.0%**	**920**	**100.0%**	

[12] Population data is always a year behind. Population data is from Puzzanchera, C., Sladky, A. and Kang, W. (2026). "Easy Access to Juvenile Populations: 1990-2024." Online. Available: https://ojjdp.ojp.gov/statistical-briefing-book/data-analysis-tools/ezapop/

[13] Disproportionality Index (DI) is calculated by taking the percent by race of victims of child abuse and neglect and dividing it by the percent by race in Oregon's child population. Values less than 1 mean underrepresentation. A not applicable (n/a) indicates the value is unavailable or unable to be calculated.

9/30/2025 Point in Time Children with an In-Home Case (Excluding when on Trial Home Visits), by Age		
Age Group	**Number**	**Percent**
Age 0-5	409	44.5%
Age 6-12	348	37.8%
Age 13-17	137	14.9%
Age 18+	26	2.8%
Total	**920**	**100.0%**

9/30/2025 Point in Time Children with an In-Home Case (Excluding when on Trial Home Visits), by ICWA Status		
ICWA	**Number**	**Percent**
ICWA Eligible	29	3.2%
ICWA Enrolled	28	3.0%
ICWA Not Eligible	863	93.8%
Total	**920**	**100.0%**

For the year (FFY 2025), a total of 5,132 children were served in their homes. All children served in-home received case management and safety services. 2,912 children (56.7 percent) also received additional services provided through community-based contracted providers.

Services offered primarily fall within two categories: In-Home Safety and Reunification Services (ISRS) and Strengthening, Preserving and Reunifying Families (SPRF) Program Services.

In-Home Safety and Reunification Services (ISRS) are services designed to provide for the immediate safety of children at risk of abuse by managing the safety threats in the family home to prevent separation; or when children have been placed in protective custody, to help them return home with in-home safety services.

ISRS provides a combination of concrete safety and service programs that lead to improved parent protective capacity. Services are designed to manage safety, stabilize the family, and support parents in strengthening or establishing connections to formal, informal, and natural

supports and resources so that a child can remain safely with their family without the more intrusive intervention of separation and foster care placement.

SPRF services were created by the Oregon legislature in June 2011 (ORS 418.575-418.598). This was to specifically address the needs of children and families who come to the attention of Child Welfare through a report of abuse. These services are designed to support a comprehensive service array specific to the needs of local communities.

The overall goals of the SPRF Program are to maintain children safely at home with their parents or caregivers, safely and equitably reduce the number of children in the foster care system, reduce child trauma, reduce the length of stay in foster care, and reduce reentry rates of children into the Child Welfare system. Services provided are culturally responsive, trauma-informed, strength-based, and family-focused.

Each county in the state has implemented the SPRF program and has developed its individualized service array through a process that identifies the services gaps and needs in their community. Some of the themes in the gaps and needs identified across the state are Service Navigation, Parent Training and Support, Peer Parent Mentoring, Relief Nursery services, Substance Use Disorder Treatment, Economic Supports, Housing, Reconnecting Families, Trauma and Therapeutic Services, Family Time (visitation), Transportation Services and Employment Related Services.

If a child's safety cannot be managed at home, they are placed in foster care and the family receives support and services (including ISRS, SPRF, and other services) to assist them in reestablishing an in-home safety plan so their child can safely return home as soon as possible.

Foster Care

Children in foster care range in age range from birth to 21 years old. They come from various types of racial/ethnic backgrounds, different cultures, and family types.

Children are placed in foster care for different reasons. Sometimes their families cannot provide them with the basic safety and protection they need, even with additional services and supports to serve them in-home. Many have also faced difficult experiences including parental substance abuse, witnessing domestic violence, or sexual or physical abuse.

Entering Foster Care

Children most often enter foster care because of their parents' actions or in actions that result in the parents' inability to keep the child safe. Of all children who entered foster care during FFY 2025, 12.5 percent had four or more reasons for removal from their homes.

Nineteen new removal reasons were added to the data collection during FFY 2022, and several existing removal reasons had label changes. Both labels are provided in the table below for identification purposes.

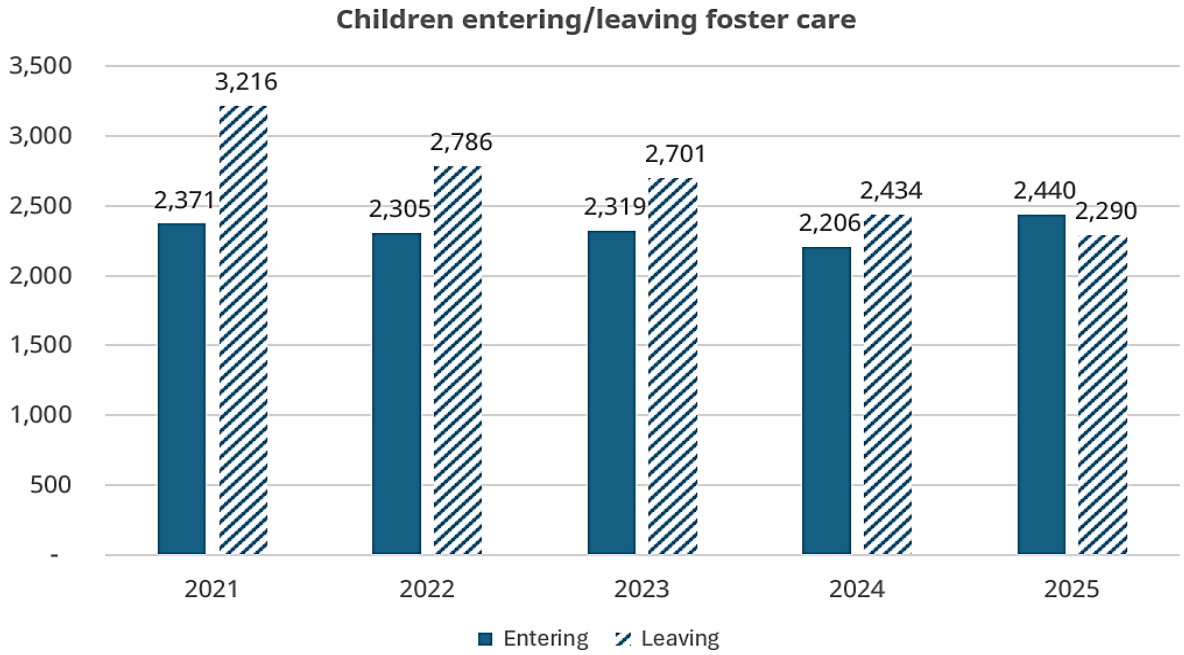

Reasons Children Enter Foster Care by Federal Fiscal Year (includes all types of foster care)

	FFY 2023		FFY 2024		FFY 2025

Total Number of Foster Care Entrants		**2,319**		**2,206**		**2,440**

The number of children entering foster care during FFY 2025 increased by 10.6 percent from the FFY 2024 level. The number of children leaving foster care decreased by 5.9 percent in the

same time frame. The number of children in foster care on September 30, 2025 (4,619) increased by 3.6 percent from the number of children in foster care on September 30, 2024.

A total of 227 children (or 9.9 percent of all exits) left foster care and custody within three months of entry. The median length of time in care for a child exiting foster care is 19.2 months, which is a decrease in the median of 23.4 months in FFY 2024. For children who reunify with parents, the length of time in care includes up to six months on a trial home visit.

Children Served in Foster Care – Total Served

During FFY 2025, a total of 6,814 children spent at least one day in some kind of foster care. Of those, 89.1 percent (6,070 children) were served in a family foster care setting. The following data show the key demographics of children served in foster care during FFY 2025.

FFY 2025 Age of Children Served in Foster Care		
Age Group	**Number**	**Percent**
Age 0-5	2,569	37.7%
Age 6-12	2,190	32.2%
Age 13-17	1,432	21.0%
Age 18+	623	9.1%
Total	**6,814**	**100.0%**

FFY 2025 Gender of Children Served in Foster Care		
Gender	**Number**	**Percent**
Boys	3,471	50.9%
Girls	3,343	49.1%
Total	**6,814**	**100.0%**

During FFY 2025, a total of 801 children (11.8 percent) served in foster care were of more than one race/ethnicity. However, the following data for Oregon displays the child's first recorded race/ethnicity. Disproportionality Index (DI) is also shown.

Disproportionality Index and Representation by Race for Children in Foster Care in FFY 2025 Compared to Oregon's Child Population[14,15]					
Race	**# of Oregon's Children**	**% of Oregon's Children**	**# of Children Served in Foster Care**	**% of Children Served in Foster Care**	**DI Value of 1= Proportionate**
American Indian or Alaska Native	11,158	1.4%	392	5.8%	**4.3**
Asian/Pacific Islander	55,059	6.7%	136	2.0%	**0.3**
Black or African American	33,749	4.1%	502	7.4%	**1.8**
Hispanic (any race)	208,541	25.2%	1,230	18.1%	**0.7**
Unable to Determine	n/a	n/a	321	4.7%	**n/a**
White	517,708	62.7%	4,233	62.1%	**1.0**
Statewide Total	**826,215**	**100.0%**	**6,814**	**100.0%**	

The following table displays the Disproportionality Index (DI) three-year trend. The DI outcomes remain stable for most race/ethnicity categories over the three-year period, with an increase in the American Indian or Alaska Native DI category for FFY 2025.

[14] Population data is always a year behind. Population data is from Puzzanchera, C., Sladky, A. and Kang, W. (2026). "Easy Access to Juvenile Populations: 1990-2024." Online. Available: https://ojjdp.ojp.gov/statistical-briefing-book/data-analysis-tools/ezapop/

[15] Disproportionality Index (DI) is calculated by taking the percent by race of victims of child abuse and neglect and dividing it by the percent by race in Oregon's child population. Values less than 1 mean underrepresentation. A not applicable (n/a) indicates the value is unavailable or unable to be calculated.

Percent of Total Children Served in Foster Care by Race, Disproportionality Index and Federal Fiscal Year[16]						
	FFY 2023		FFY 2024		FFY 2025	
Race	%	DI	%	DI	%	DI
American Indian or Alaska Native	4.6%	3.2	5.1%	3.5	5.8%	4.3
Asian/Pacific Islander	1.7%	0.3	1.7%	0.3	2.0%	0.3
Black or African American	7.6%	2.0	7.6%	2.0	7.4%	1.8
Hispanic (any race)	18.0%	0.8	18.4%	0.8	18.1%	0.7
Unable to Determine	4.0%	n/a	3.4%	n/a	4.7%	n/a
White	64.1%	1.0	63.7%	1.0	62.1%	1.0

In 1978, Congress enacted the Indian Child Welfare Act (ICWA) in response to a national crisis in which an alarmingly high percentage of Native American children were being removed from their families and tribal communities. ICWA requires that states make Active Efforts to prevent removal of tribal children from their families. Oregon works closely with the federally recognized tribes to ensure ICWA compliance and tribes are actively involved in the decision-making process for their children. A total of 256 children served in foster care were ICWA eligible (enrolled/not enrolled) in FFY 2025.

FFY 2025 Total Children Served in Foster Care, by Indian Child Welfare Act (ICWA) Status		
ICWA Status	Number	Percent
ICWA Eligible	256	3.7%
ICWA Enrolled	135	2.0%
ICWA Not Eligible	6,423	94.3%
Total	**6,814**	**100.0%**

Children in Foster Care – Point-In-Time

Family and Sibling Connections

ODHS helps maintain connections for children placed in foster care by working to place them in their local communities, with relatives, and by placing siblings together in foster care.

[16] A not applicable (n/a) indicates the value is unavailable or unable to be calculated.

There were 4,619 children in foster care as of September 30, 2025. At that time, 3,555 were in family foster care (a family-home setting). Of those in family foster care, 52.2% (1,856 children) were with relatives. The other settings for children in foster care include those in residential treatment, trial home visits, and pre-adoptive settings.

As of the last day of FFY 2025, there were 2,384 children in foster care who were part of a sibling group. Of these children, 1,946 (81.6 percent) were placed with the same family as one or more of their siblings. The percent of children with siblings being placed with siblings decreased from those in care a year earlier when 83.4 percent of children with siblings were placed with the same family as one or more of their siblings.

Stability While in Foster Care

For children in care as of September 30, 2025, a total of 62.1 percent had two or fewer placements. This is an increase from September 30, 2024, when 61.3 percent of children had two or fewer placements.

Number of Placements for Children in Foster Care on Last Day of Federal Fiscal Year

	9/30/2023		9/30/2024		9/30/2025	
Number of Placements	**Number**	**Percent**	**Number**	**Percent**	**Number**	**Percent**
1	1,515	32.4%	1,659	37.2%	1,771	38.3%

3	655	14.0%	540	12.1%	574	12.4%
4	350	7.5%	326	7.3%	359	7.8%
5	244	5.2%	209	4.7%	203	4.4%
6 or more	706	15.1%	649	14.6%	615	13.3%
Total	**4,676**	**100.0%**	**4,458**	**100.0%**	**4,619**	**100.0%**

Behavior Rehabilitation Services

Behavior Rehabilitation Services (BRS) is a Medicaid service aimed at remediating medically eligible children and adolescents' debilitating psychosocial, emotional, and behavioral disorders by providing services such as behavioral intervention, counseling, and skills-training.

Approximately 130 children in care per day receive these services in proctor care (certified family) or residential care settings. These service programs are administered through contracts with licensed child-caring agencies.

On any given day during FFY 2025, BRS served the following:

- Approximately 99 children in professional treatment foster homes
- Approximately 31 children in residential treatment facilities.

Psychiatric Residential Treatment

Psychiatric Residential Treatment includes 24-hour in-patient treatment for medically eligible children and adolescents who have serious psychiatric, emotional, or acute mental health conditions that require intensive therapeutic counseling and activity and intensive staff supervision, support, and assistance. The Oregon Health Authority and Coordinated Care Organizations are responsible for psychiatric residential treatment.

On any given day, approximately 56 children in care are served in psychiatric residential treatment settings.

Youth in Foster Care

Oregon Revised Statutes allow for children to remain in foster care placement beyond the age of 18, and with a court order up to age 21.

During FFY 2025:

- Teens (13 years and older) comprised 30.2 percent of the foster care population.
- A total of 2,055 teens spent at least one day in foster care.
- Teens exiting foster care were reunited with their families 37.6 percent of the time.
- A total of 294 unique eligible students who are currently in or experienced foster care received scholarships for higher education through federal grants awarded to ODHS

and implemented with the assistance of the Office of Student Access and Completion for the 2024-2025 academic year (July 2024-June 2025).

Youth Transition Programs

Oregon foster youth and eligible young people ages 14 through 23 who have experienced foster care are eligible for Independent Living Program (ILP) skill-building services. Youth Transitions contracts with 15 community-based partners to provide ILP services throughout the state. The unique number of young people receiving paid contracted ILP services increased from 1,346 in FFY 2024 to 1,456 in FFY 2025. The number of unique young people receiving an "independent living type" service decreased from 1,616 in FFY 2024 to 1,613 in FFY 2025 (as reported for the National Youth in Transition Database). Youth Transitions Program services help youth in foster care and eligible young people who have experienced foster care:

- Make the transition from foster care to adulthood;
- Access financial assistance in support of a young person's transition goals;
- Receive the education, training, and services necessary to obtain employment;
- Attain academic and/or vocational education and prepare for post-secondary training and education; and
- Obtain personal and emotional support and promote healthy interactions with dedicated adults.

Exiting Foster Care

Most children leaving foster care are reunified with their parents. But for other children, a plan to reunify them with their parents does not occur for many reasons. These children who exit foster care move on to various other living arrangements and permanent plans, such as adoption or guardianship.

During FFY 2025, a total of 54.1 percent of children who left foster care were reunified with their families. If a child cannot safely return home, the law requires that an alternative permanency plan be put into place according to federal timelines.

The following data show the child's first recorded race/ethnicity as well as the Disproportionality Index for children exiting foster care during FFY 2025.

Disproportionality Index and Representation by Race for Children Exiting Foster Care in FFY 2025 Compared to Oregon's Child Population[17,18,19]

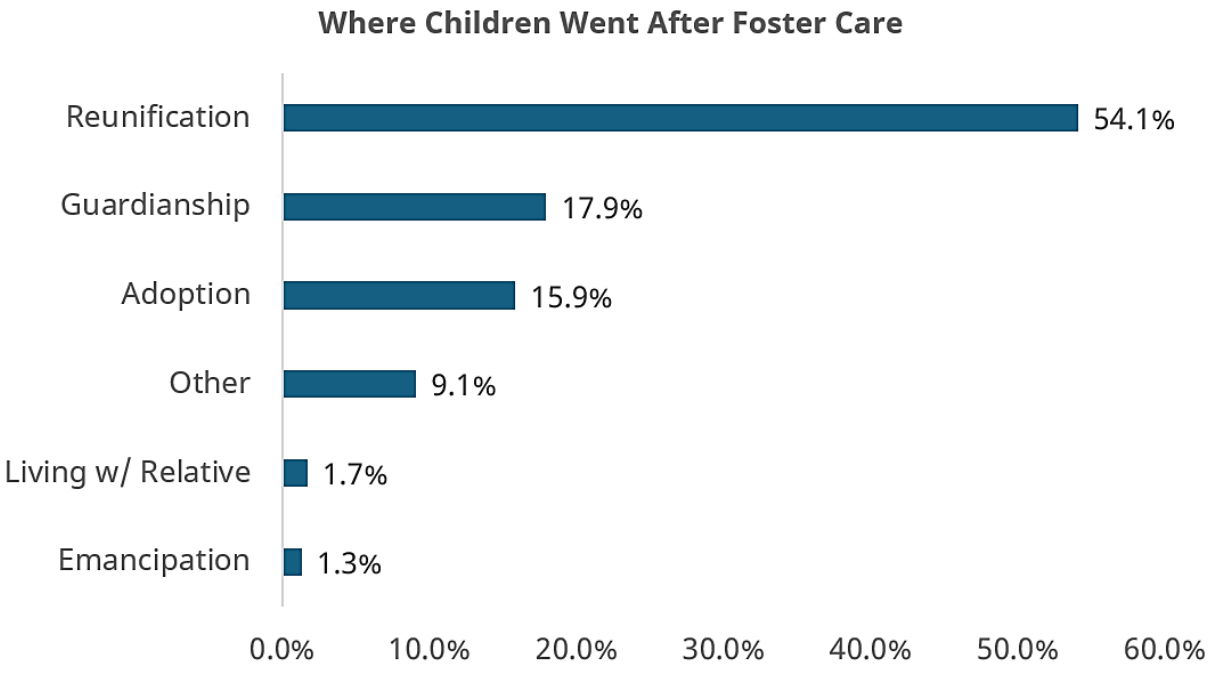

Race	# of Oregon's Children	% of Oregon's Children	# of Children Exiting Foster Care	% of Children Exiting Foster Care	DI Value of 1= Proportionate
American Indian or Alaska Native	11,158	1.4%	124	5.4%	3.87
Asian/Pac Islander	55,059	6.7%	38	1.7%	0.25
Black or African American	33,749	4.0%	160	7.0%	1.75
Hispanic (any race)	208,541	25.2%	437	19.1%	0.76
Unable to Determine	n/a	n/a	112	4.9%	n/a
White	517,708	62.7%	1,419	62.0%	0.99
Statewide Total	**826,215**	**100.0%**	**2,290**	**100.0%**	

[17] Population data is always a year behind. Population data is from Puzzanchera, C., Sladky, A. and Kang, W. (2026). "Easy Access to Juvenile Populations: 1990-2024." Online. Available: https://ojjdp.ojp.gov/statistical-briefing-book/data-analysis-tools/ezapop/.

[18] Disproportionality Index (DI) is calculated by taking the percent by race of victims of child abuse and neglect and dividing it by the percent by race in Oregon's child population. Values less than 1 mean underrepresentation.

[19] A not applicable (n/a) indicates the value is unavailable or unable to be calculated.

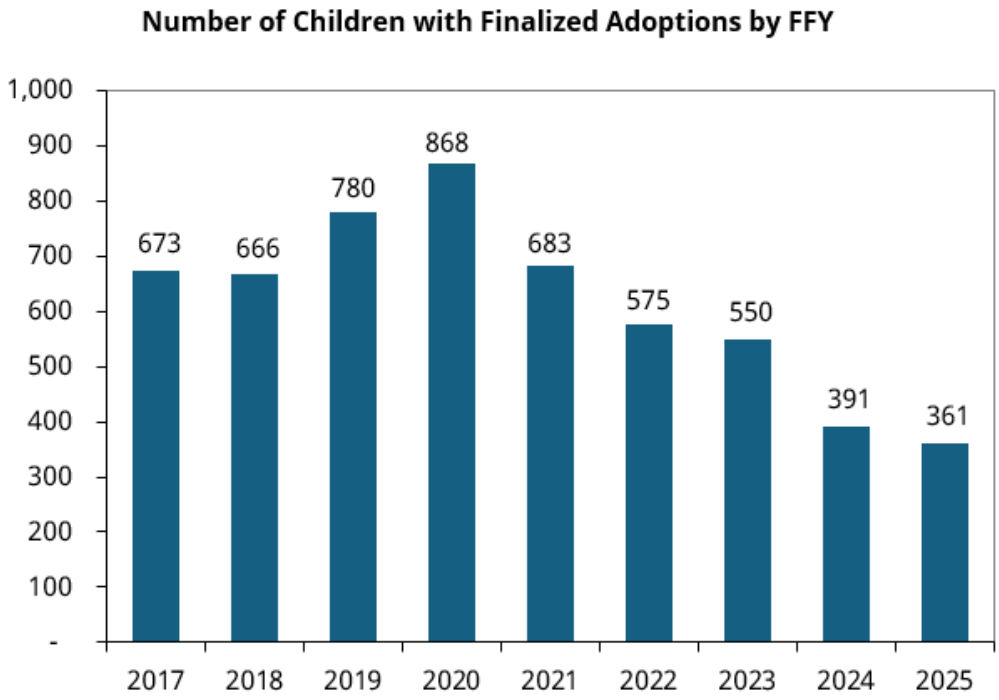

The following chart shows where children went after exiting foster care during FFY 2025.

Adoption & Guardianship Program

The Permanency Program works closely with local branch staff to facilitate adoptions and guardianships for children (0-12 years) and youth (13 years or more) in foster care when it is no longer in their best interest to return to the care of their parents. ODHS also provides regulatory oversight and processing of all adoptions filed in the State of Oregon for children who are not in ODHS custody. The following graph shows those adoptions for the children who were in ODHS custody.

Adoptions

FFY 2025 Children with Finalized Adoptions, by District[20]		
ODHS DISTRICT	**Children came from**	**Children went to**
District 1: Clatsop, Columbia, Tillamook	7	7
District 2: Multnomah	105	55

Children Placed by Agencies Other Than DHS		**49**

Demographics

Of the 361 children adopted, 142 were younger than age 3 when their adoption became final. Finalized adoptions by key demographics shown below:

FFY 2025 Children with Finalized Adoptions, by Age		
Age	**Number**	**Percent**
0-3 years	142	39.3%
3-4 years	64	17.7%
5-8 years	86	23.8%
9-10 years	27	7.5%
11-13 years	22	6.1%
14 and older	20	5.5%
Total	**361**	**100%**

[20] An asterisk (*) in a cell denotes that the data has been suppressed to protect confidentiality, due to a value of between 1 and 5.

FFY 2025 Children with Finalized Adoptions, by Gender		
Gender	**Number**	**Percent**
Female	184	51.0%
Male	177	49.0%
Total	**361**	**100%**

Of the children adopted during the year, 31.3 percent represent racial/ethnic groups other than White, down from 27.6 percent in the previous year.

FFY 2025 Children with Finalized Adoptions, by Race		
Race/Ethnicity	**Number**	**Percent**
American Indian or Alaska Native	15	4.2%
Asian/Pacific Islander	10	2.7%
Black or African American	38	10.5%
Hispanic (any race)	50	13.9%
Unable to Determine	8	2.2%
White	240	66.5%
Total	**361**	**100.0%**

Adoption Assistance

The Title IV-E Adoption Assistance Program is a mandatory federal program authorized under the Social Security Act to help facilitate timely placement of children whose needs or circumstances would otherwise make it difficult for a family to meet those needs without medical and/or financial support. The Adoption Assistance Program provides medical and/or financial support to eligible children to assist the adoptive parents in meeting their child's needs. Oregon also has a state-funded Adoption Assistance Program for those children who do not meet the eligibility requirements for the Title IV-E Adoption Assistance Program. Adoption assistance can include a subsidy and medical agreement, a subsidy-only agreement, a medical-only agreement, or an agreement only that keeps the child's eligibility for assistance intact if needed in the future.

Preserving Connections

ODHS places a high value on preserving and promoting relationships between siblings and placing them together in the same adoptive family whenever it is safe and possible to do so. In FFY 2025, a total of 130 children who were adopted had siblings also adopted during the year. Of these children, 117 (90.0 percent) were adopted by the same family as one or more of their siblings.

Timeliness of Finalization

A primary goal of federal and state governments is to establish permanency for a child as soon as possible. The federal government has established parameters that guide states in this effort, which include establishing a national standard for the median length of time to achieve adoption. While the length of time to achieve adoption varies, the median time to adoption was 31.1 months for children whose adoptions were finalized in FFY 2025. This is a decrease over the median months to adoption from FFY 2024 of 32.9 months.

Data show 99.7 percent of Oregon's adoptive placements continued to finalization without disruption in FFY 2025.

Guardianship

When a child cannot be returned home guardianship may be determined to be the most appropriate permanent plan. During FFY 2025, a total of 407 children exited to guardianship, a decrease of 17.4 percent from 493 children in FFY 2024. Most children go to guardianship with relatives.

Exits to Guardianship by Year		
Period	**Number**	**% Change**
2013	313	14.7%
2014	293	-6.4%
2015	328	11.9%
2016	282	-14.0%
2017	447	58.5%
2018	454	1.6%
2019	421	-7.3%
2020	375	-10.9%

Exits to Guardianship by Year		
Period	**Number**	**% Change**
2021	356	-5.1%
2022	395	11.0%
2023	403	2.0%
2024	493	22.3%
2025	407	-17.4%

Demographics

The following data shows the key demographics of children who exited to guardianship during FFY 2025. Most guardianships (75.2 percent) are for children ages 6 and older. Key demographics for finalized guardianships are found below:

FFY 2025 Children Exiting to Guardianship, by Age		
Age Group	**Number**	**Percent**
Age 0-5	101	24.8%
Age 6-12	182	44.7%
Age 13-17	124	30.5%
Age 18+	0	0.0%
Total	**407**	**100.0%**

Children of all different racial and ethnic backgrounds exit foster care to guardianship; the following data for Oregon displays the child's first recorded race/ethnicity.

FFY 2025 Race of Children Exiting to Guardianship[21]		
Race/Ethnicity	**Number**	**Percent**
American Indian or Alaskan Native	28	6.9%
Asian/Pacific Islander	6	1.5%
Black or African American	25	6.1%
Hispanic (any race)	78	19.2%
Unable to Determine	*	*
White	265	65.1%
Total	**407**	**100.0%**

Guardianship Assistance

Children exiting care to guardianship have the same assistance available to them as children who were adopted to help the legal guardian meet the child's needs.

[21] An asterisk (*) denotes that the data has been suppressed to protect confidentiality, due to a value of between 1 and 5.

Conclusion

We encourage you to use the information in this report to deepen your understanding of child abuse in Oregon and help promote the safety and well-being of children and families in your community.

[43] In the counties where "0" is reported in the Total Homes column, certified homes may be captured in the data for another county within that same District, as Certified Resource Homes are counted by primary assigned certifier.

[44] An asterisk (*) in a cell denotes that the data has been suppressed to protect confidentiality, due to a value of between 1 and 5.

[45] Unique Count: Only the initial certification is counted.

[46] Unique Count: Only counts closed and expired providers that did not begin care again.
