

Child foster home referrals and Placements

Child foster homes

What's Changing?

Your certifier will no longer be involved in making referrals to your child foster home.

Why the Change?

All referrals for foster care placements will be coordinated by the Designated Referral Contacts at your local CDDP.

Important!

You can reach out to your local CDDP with questions about placements.

Vacancies:

If you are interested in taking foster care placements, you can fill out a Vacancy Profile.

This information will be included in a report that helps CDDPs find placement options. The report won't include any personal information and will be posted on the ODDS's public website.

Variances:

The following types of placements require a variance:

- Placement of a child through Child Welfare (CW) when the child is in the custody of CW, and you are paid by CW to provide foster care services.
- You want to continue supporting a child in your CFH after the child turns 18.
