

The following steps must be followed each time a user does a 'Person Search' from the Main Menu page in Oregon ACCESS. Searching in Oregon ACCESS utilizes the Client Index (CI) database. The CI database is the Department's official person registry and contains more client records than the Oregon ACCESS database. If the person is not found in CI, the user will then be able to search the full Oregon ACCESS database.

These steps are required in order to reduce the number of duplicate person records that are created. A new record should only be created after performing a complete search.

### When searching, use the following steps:

- When searching by SSN, if the SSN is found, check to be sure it is the correct person;

- When searching by name, use the first three letters of the first name and the first three letters of the last name (i.e. BEC, JOH). This will display a list of potential matches, even if the name is misspelled;

**PERSON SEARCH**

Person Search

Last Name	First Name	M.I.	SSN	Prime Nmbr	DOB
BEC	JOH		- -		00/00/0000

Sounds like: ☐ (CI Only) Search Status: CI Search in CI Clear

Person 1 of 200 Prev

Last Name	First Name	MI Typ	SSN	Prime Nmbr	DOB	BrCd
BECK	JOHN	E P	175-31-8641	AU500030	11/23/1935	1717

- If the person is not in the list, try using the date of birth (DOB) in addition to the name as described above;

**PERSON SEARCH**

Person Search

Last Name	First Name	M.I.	SSN	Prime Nmbr	DOB
BEC	JOH		- -		11/23/1935

Sounds like: ☐ (CI Only) Search Status: CI Search in CI Clear

Person 1 of 200 Prev

Last Name	First Name	MI Typ	SSN	Prime Nmbr	DOB	BrCd
BECK	JOHN	E P	175-31-8641	AU500030	11/23/1935	1717

- If the person is found, but has incorrect information, such as a misspelled name, incorrect SSN, or incorrect DOB, do not create a new record. The incorrect information can be corrected much easier and faster than merging duplicate records;
- If the person is not found, click 'No Match -> Search in OA' to search in Oregon ACCESS.

**PERSON SEARCH**

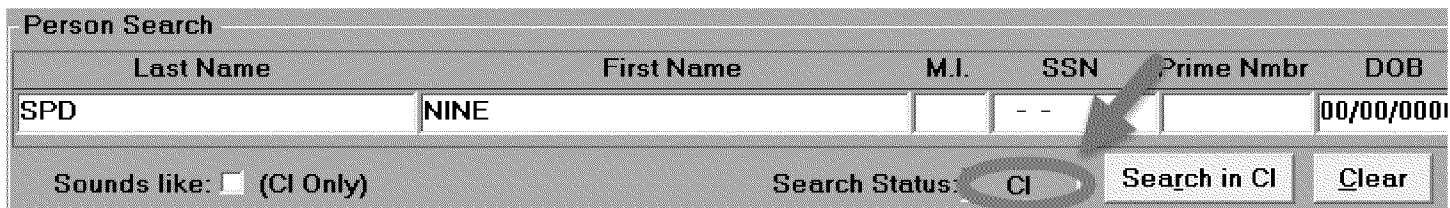

Person Search

Sounds like: ☐ (CI Only)      Search Status: **CI**      Search in CI      Clear

- If the person is still not found, create a new record.

## Person search scenarios with a description of how Oregon ACCESS will route users:

- Search scenario #1: Person is found in CI and there is a registered Oregon ACCESS record associated to the CI person.
- Search scenario #2: Person is found in CI, but there is no registered Oregon ACCESS record associated to the CI record.
- Search scenario #3: Person is not found in CI.

**Search Scenario #1:** Person is found in CI and there is a registered Oregon ACCESS record associated to the CI person. *(This means that there is an Oregon ACCESS record that has the same CI number as the CI record you selected. This connection is made during the Oregon ACCESS registration process).*

In this scenario, the **View Person** button will be enabled when users click on the person on the search return screen. The availability of this button indicates that there is a registered Oregon ACCESS record associated with the highlighted CI record.

**Person Search**

Last Name	First Name	M.I.	SSN	Prime Nbr	DOB
SPD	NINE		- -		00/00/0000

Sounds like: ☐ (CI Only) Search Status:

Person 1 of 200

Last Name	First Name	MI	Type	SSN	Prime Nbr	DOB
SPD	NINE	M	P	- -	TIA00L1K	05/01/1950

[REDACTED]	[REDACTED]	D	P	[REDACTED]	[REDACTED]	03/18/1923

When the user clicks on the **View Person** button, they will be taken to the Person Details window for this person. If the user would like to return to the search results window, they may click on the **Person Search** button in the Person Details window.

**Search Scenario #2:** Person is found in CI, but there is no registered Oregon ACCESS record associated to the CI record.

In this scenario, after users click on the person in the search return list, the user may download the CI record to Oregon ACCESS by clicking on the

**Download/Reg from CI**

button.

Last Name	First Name	M.I.	SSN	Prime Nbr	DOB

View Person No Match -> Search in OA Not Found in OA -> Create Person

Download/Reg from CI Add to Existing Case/ RA

If the record is found in the OA search results, the user may click **View Person** to go to the Person Details Window. At that point, the user may register/re-register, as necessary.

If the person is not found in the Oregon ACCESS search results, the user may click the **Not Found in OA -> Create Person** button and create an Oregon ACCESS record.

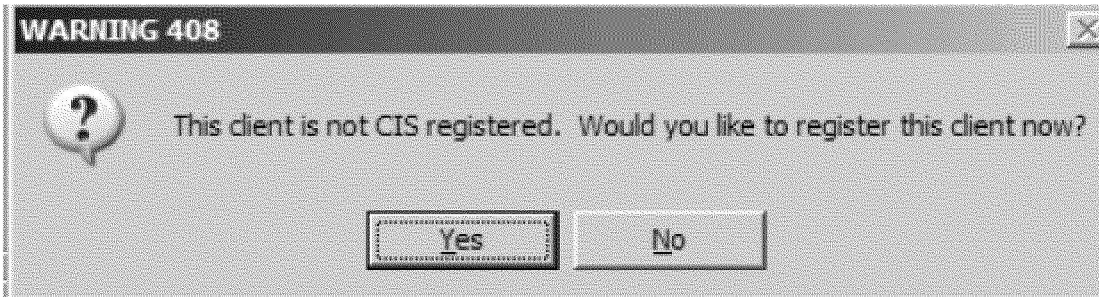

## CIS Registration Triggers

Oregon ACCESS 'forces' a CI Search when particular actions are taken. Users are navigated to a CI search in the following instances:

- When a user add a SSN to a person record.
- When the user attempts to enter the CA/PS system and the consumer is unregistered.
- When a user attempts to perform CMS integration and the consumer is unregistered.
- When a user changes the 'Applying For' status for the MED benefit to PA or Applying, and the consumer is unregistered.

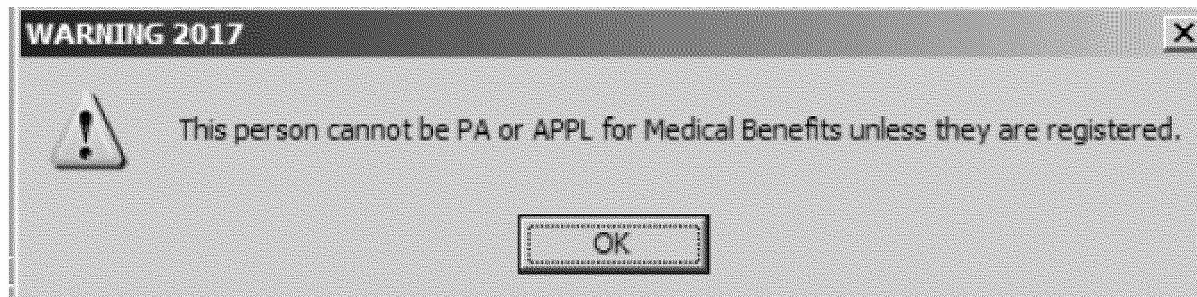

When the above actions are taken, Oregon ACCESS will return a message asking the user if they would like to register the consumer.

If the user selects  they will be navigated to the Registration screen.

If the user selects  they will receive a second message informing them that the action cannot be completed.

## Synchronization Screens

Since ONE and Oregon ACCESS are two different databases they must be updated individually. In order to ensure the person data in Oregon ACCESS is synchronized with the person data in ONE, the synchronization screen will be launched within the Oregon ACCESS. This screen will display automatically if a mismatch of information is found between ONE and the Oregon ACCESS record for the same person.
