Historic Oregon State Highway Commission Meeting Minutes, 1913 – 1994

Overview

History of Collection

The Oregon State Highway Commission was established by Oregon Law on February 28, 1913 (*OR 1913 c. 339*). The purpose of the commission was to oversee the construction of state roads. Within the same new law, the commission was required to appoint a State Highway Engineer who would be required to make regular reports to the commission. By June of 1913, the state engineer began meeting with and reporting to the commission. The minutes of those commission meetings have now been digitized.

While physical copies of the public meetings of the Oregon State Highway Commission, and later the Oregon Transportation Commission, can be found at the Oregon State Archives, the Oregon Department of Transportation (ODOT) also maintains an office copy of the minutes on microfilm. Over time, these minutes have been digitized but due to the varying natures of the digitization projects of these meetings, specific years can be complicated to expediently identify.

This research guide is a chronological listing of the digitized version of the Oregon State Highway Commission Meeting minutes spanning from June 19, 1913, until August 17, 1994. **The ODOT History Center does not have any Commission Meeting minutes after August 17, 1994.** Should later years be needed, a public records request is required. Fill out that request here: ODOT Public Records Request.

Digital Collection Locations

The minutes from the years 1913-1937, 1962-1974 and 1981-1982 were the first meeting minutes to be digitized and are accessible directly on the ODOT History Center page. Below the individual links is a link to the remaining minutes, through 1994, which were digitized through a pooled fund study by the Internet Archive.

Arrangement of Contents within Research Guide

This Oregon State Highway Commission Meeting Minutes Research Guide is chronologically arranged into digital links spanning from June 19, 1913, until August 17, 1994. Each link is a separate document. Below each link includes the dates within the file, pages numbers of the digitized file as well as the original page numbers of the documents that were digitized, and any additional information that may provide further insight into the contents of the digital file to enable more expedient access to the timeframe needed for research. Oregon State Highway Commission Meetings Indexes identify pages, dates, and subjects of the specified date range of meeting minutes. The page numbers referenced in the indexes are the original page numbers of the meeting minutes documents which span multiple files. PDF or Internet Archive (IA) page numbers indicate the page number of the linked file whereas the Microfilm page numbers indicate the original page numbers listed on the pages that were digitized.

Searching Contents

The text of the minutes are searchable, but the older typewritten pages combined with the microfilming process creates some problems with text recognition. Individual PDF files can be keyword searched by using CTL+F. The entire collection on Internet Archive can be searched across all PDFs within the collection by selecting “search text contents” option under the search box.
