Amtrak Cascades Ridership in the Eugene – Portland Corridor Trains Operated Under Contract for the Oregon Department of Transportation

July-Sep - July 2019 showed a 4.4% decrease in ridership in contrast to July 2018, whereas August 2019 ridership increased 6.1% and September 2019 ridership showed an increase of 2.3%. The decrease in ridership in July 2019 has no outwardly known cause other than the natural progression of waxing and waning in ridership. Overall, 2019 ridership continues to track closely with ridership in 2018.

Apr-Jun 2019 - April ridership was up 0.6%, and May ridership increased 4.6% when compared to the same months in 2018. June ridership shows a 7.0% decrease compared to the same months in 2018.

Jan-Mar 2019 - January ridership was down 1.8% and down 2.5% in February when compared to the same months in 2018. Scheduled host railroad maintenance required the cancellation of 32 trains in January and 14 in February.

Weather conditions caused the host railroad to shut down all operations on a portion of the rail line that Amtrak Cascades operates over causing the cancellation of an additional 12 trains in February. March ridership shows a 6.5% increase compared to 2018.

Oct 2018 - Ridership is down due to the use of buses and Amtrak Horizon equipment while Amtrak Cascades equipment was out of service for the installation of positive train control.

Sep 2018 - Ridership is down due to the need to operate buses for 10 days while Amtrak located substitute equipment to replace trainsets taken out of service due to unforeseen equipment issues.

Aug 2018 - Decrease is due to the spike in 2017 from the Eclipse and annulments
