Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D024
Waste Description:	M-Cresol
Waste Code:	D026
Waste Description:	Cresol
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	P001
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	P188
Waste Description:	Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

GOOD SAMARITAN HOSPI (Continued) **1004769981**

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059
Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U248
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and

CW CLARK, INC FRMR CONSUMER POWER FAC (Continued) **1004770799**

permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Description:	Cresol
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D030
Waste Description:	2,4-Dinitrotoluene

WALMART NEIGHBORHOOD MARKET # 3146 (Continued) **1016144638**

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U188

WALMART NEIGHBORHOOD MARKET # 3146 (Continued) **1016144638**

Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System

WALMART NEIGHBORHOOD MARKET # 3146 (Continued) **1016144638**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D008
Waste Description:	Lead
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazmat Evacuated Measurement:	Not reported
Hazmat Story of Release:	Not reported
Remark:	117 and 133 responded to the public works facility, building #7, for an unknown odor, [possibly smoke. Upon arrival found nothing showing. Spoke with PR who reported the odor inside the structure. PR said it was a new odor and did not know the source. 133 monitored the atmosphere with all readings from the 4-gas detector within normal limits. The odor smelled similar to lubricants and greases normally used in the auto repair process. 133 opened the doors and ventilated the structure. The odor returned once the doors were closed. The heater was turned off and ceiling ventilation louvers left open. There were no indications of electrical malfunction or other form of potential fire. The building was equipped with fire sprinklers and an alarm system that was not activating. 133 and 117 cleared the scene.

CIRCLE 9 DRY CLEANERS (FORMER) (Continued) **S105614570**

Decode for NarcdID: Contamination
NARR Comments: (11/27/01 BTM/SAS) Site suspected of being the source of PCE contamination detected in groundwater at a downgradient property. Concentrations exceed screening levels. (9/8/04 M2C/VCP) The following solvents were found in the groundwater and/or soil samples collected at the former dry cleaner: TCE, PCE, naphthalene, cis-1,2-DCE, trans-1,2-DCE, 1,1-DCE, vinyl chloride. (8/2/11 GCB) The same chlorinated solvents present beneath the Circle 9 site are are present in downgradient drinking water wells, approximately 1/2 mile east of the site.

NARR Comments: The former Circle 9 Dry Cleaners site is located in the Circle 9 Shopping Center in Corvallis, Oregon. The site is located at 960 NW Spruce Avenue in the middle of the block between NW 9th Street and NW Highland. The former dry cleaner building lies on the east side of the strip mall consisting of a single-story line of small commercial businesses. The site is mostly paved. In 2009, RC Wilson Properties demolished a portion of the Circle 9 building, conducted source removal and rebuilt the building with vapor abatement measures in place. Passive subslab venting is ongoing as of 2011

NARR Comments: Groundwater: According to well logs from the site vicinity filed with the Oregon Water Resources Dept., subsurface materials generally consist of clay and silty clay to approximately 30 feet below ground surface (bgs), and sands and gravels to about 50 feet bgs. Local depth to groundwater is approximately 15 feet bgs. Regional groundwater flow direction is likely to the southeast, toward the Willamette River. There are 19 domestic wells registered within Section 26 of Township 11 South, Range 5 West. Corvallis is served by public water lines, so some of the registered wells may no longer be used for domestic purposes. The city obtains water from surface water sources uninfluenced by the site (an upstream segment of the Willamette River, and from the Rock Creek watershed on the east side of Mary's Peak). Surface Water: Information on whether the building has any floor drains that may connect to storm sewers was not in files reviewed. The topography in the site vicinity slightly slopes toward the Willamette River, located approximately 1 mile southeast of the site. This stretch of the River is 303(d)-listed for toxics. Based on available information, there appears to be little potential for impacts to surface water. Direct Contact: Potential direct-contact exposures would be limited to subsurface work such as ditch digging in the area of subsurface contamination. Air: there are potential impacts from volatilization to indoor and/or outdoor air. 8/2011 GCB Downgradient wells were found in the area near the intersection of NE Circle and NE Bellvue, around 1/2 mile east of the property. Chlorinated solvents were identified in these wells and DEQ has identified the former Circle 9 Drycleaner as the potential source. Not reported

CIRCLE 9 DRY CLEANERS (FORMER) (Continued) **S105614570**

Updated By: BTHOMS
Updated Date: 06/12/2007
Decode for NarcdID: Remedial Action
NARR Comments: (9/8/04 M2C/VCP) ESA conducted site investigations in March and July 2002. The highest level of solvent contamination was located northeast of the building. PCE concentrations in water ranged from 11.7 to 2,100 ppb. TCE concentrations in water ranged from 2.07 to 494 ppb. PCE concentrations in soil ranged from 51.1 to 65.2 ppb. The TCE concentration in soil was 13.8 ppb. There is no information on how the release occurred. ESA conducted air sampling inside the building in October 2003. Sample results indicated that PCE and TCE were present in the building. Since cleaning supplies were present in the building during sampling, it is not clear if the solvent detections are related to the former dry cleaner or to the cleaning supplies. Additional work is needed to assess the extent of groundwater, soil, and soil-gas contamination. (1/28/05 M2C/VCP) ESA submitted a workplan for the groundwater investigation. DEQ reviewed the work plan and requested revisions in subsurface soil and groundwater sampling procedures, well installation procedures, and data objectives. The soil-gas investigation will be conducted during the next phase. (4/20/05 M2C/VCP) DEQ has not received the revised workplan. ESA said the property owner is checking his insurance policy coverage on paying for site investigation. (12/27/05 M2C/VCP) In September 13, 2005 three air samples were collected, two indoor and one outside. Samples were collected during a 12-hour period. The following solvents were detected TCE, PCE, cis-1,2-DCE, and trans-1,2-DCE. Indoor TCE concentrations ranged from 2.8 to 3.2 ug/cm3, and indoor PCE concentrations ranged from 12 to 14 ug/cm3. Because the TCE and PCE concentrations are above screening values, a consultant is being hired to address indoor contamination. Additional work is being proposed to evaluate shallow groundwater contamination near the groundwater/soil interface (which is at a depth of 11 to 15 feet). Three monitoring wells will be installed in the parking lot near the former dry cleaner in January or February 2006. (6/12/07, BET) - 2 subsurface investigations (3/20/06, and 2/16/07) were conducted in order to assess shallow (Silt) groundwater and deeper (Sands and gravels) groundwater contamination. HVAC upgrades have been conducted in three of the occupied buildings on and near the site. The HVAC upgrade is an interim measure.

NARR Comments: Mr. Wilson developed the site in 1960 and constructed the building that had the former Circle 9 Dry Cleaner, which operated from May 1961 until May 1990. Currently the site is occupied by Papa Murphy’s Pizza, a <quot>take and bake<quot> pizza operation. The property was transfered from RC Wilson Properties to Circle Spruce LLC in 2007, under a Prospective Purchaser Agreement under which the new owner agreed to conduct source removal and ongoing vapor monitoring and abatement measures as long as necessary.

Incident Id: 980419
Incident Narrative: RUBBER HOSE ON FILLER PIPE TO GAS TANK DISINTEGRATED WHEN THE TANK WAS FILLED. HOSE WAS NOT COMPATIBLE WITH FUEL. THE GAS STATION HAD A CATCH TANK TO SEPARATE OIL FROM WATER SO IT COULD NOT GET INTO THE STORM DRAIN. OPENED IT TO CHECK AND MAKE SURE IT WOULD HOLD THE SPILL. THEY DID THEIR OWN CLEAN UP OF THE SPILL.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

Chemical Name:	MOTOR OIL
Physical Description:	LIQUID
Case Number:	64742547
Facility Id:	037242
Physical State Of The Substance:	2
Average Amount Possessed During The Year Code:	10
Maximum Amount Possessed During The Year Code:	11
Applicable Unit Of Measure Code:	2

POWER OF CORVALLIS, LLC (Continued) **1000313332**

Description Of The Unit Of Measure:	GALLONS
Type Code:	A
Description:	ABOVEGROUND TANK
Type Code:	C
Temperature Description:	TANK INSIDE BUILDING
Pressure of Code:	1
Pressure Description:	NORMAL PRESSURE
Pressure of Code:	1
Pressure Description:	NORMAL PRESSURE
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Days Hazardous Substance On Site During Year:	365
Is The Substance Protected A Trade Secret:	False
Description Of The Max Qnty Code:	500-999
Description Of The Avg Qnty Code:	200-499
Most Hazardous Ingridient:	PETROLEUM HYDROCARBONS
United Nations/north America 4 Digit Class Number:	0000
Hazard Rank:	2
EHS Ingredient:	Not reported
Substance Pure:	False
Substance Mix:	True
First Hazardous Class Code For Chemical:	Combustible Material
Second Hazardous Class Code For Chemical:	Chronic Health Hazard
Third Hazardous Class Code For Chemical:	Not reported
Hazard Class 1 Of The Chemical:	4.5
Hazard Class 2 Of The Chemical:	6.4
Hazard Class 3 Of The Chemical:	Not reported

Additional Chemical:

Chemical Is A Toxic 313 Chemical:	Not reported
EPA Pesticide Registration Number:	Not reported
Contains 112R:	Not reported
Contains EHS:	Not reported
Fertilizer:	N
Pesticide:	N
Contains 313:	Not reported

Facility ID:	48418
Name:	PRECISION MEASUREMENTS & INSTR
Address:	3665 SW DESCHUTES ST
City,State,Zip:	CORVALLIS, OR 97333
Substance:	NITROGEN LIQUID
Reporting Quantities:	Not reported
Quantity Units:	Not reported
Physical State:	Not reported
Storage 1:	Above ground tank
Storage 2:	Not reported
Owner-Operator Name:	PENNY
Direct Site Phone:	5417530607
Report Class:	Annual
Report Year:	2022
Is Poisonous Gas:	No
Is Poisonous Material:	No
Is Biological Hazard:	No
Is Radioactive Material:	No
Is Explosive:	No
Status:	ACTIVE
Nature of Business:	THERMAL & MOISTURE TESTING
NAICS Code:	541690
Maximum Daily Amount Code:	20
Maximum Daily Amount Code Range:	1,000-4,999
Maximum Daily Amount Units:	gal
Is Solid State:	No
Is Liquid State:	Yes
Is Gaseous State:	No
Is Combustible Dust:	No
Is Fire Hazard:	No
Is Sudden Release of Pressure Hazard:	No
Is Reactive Hazard:	No
Is Immediate Hazard:	No
Is Delayed Hazard:	No
Is Corrosive to Metal:	No
Is Flammable:	No
Is Gas Under Pressure:	No
Is Physical HNOC:	No
Is Emission of Gas With Water:	No
Is Organic Peroxide:	No
Is Oxidizer:	No

NARR Comments: (1/4/13 WCW/ICP) VERTEX identified an approximately 3,000 square foot area of petroleum impacted soil on to three feet in thickness within the boundary of the circular concrete foundation of the former railroad roundhouse to a maximum depth of approximately eight feet below grade. Between 12/15/11 and 1/9/12, VERTEX performed soil removal and approximately 1,077 tons of petroleum impacted soil was removed and managed offsite. Additionally, approximately 287-tons of petroleum impacted soil/debris was removed from the Debris Area excavation. 701 SW 7th Street, LLC entered the DEQ Voluntary Cleanup Program's Independent Cleanup Pathway (ICP) on 6/27/12. Based on DEQ's review of existing site information and a final ICP report (VERTEX, 4/30/11), DEQ determined that the facility wss eligible for an unrestricted No Further Action (NFA). DEQ provided a public opportunity to review and comment during August 2012 and received no comments. DEQ issued its NFA 9/5/12.

NARR Comments: The site was developed with a grain warehouse in the late 1800s. By 1912, the SE portion of the site was developed with several buildings associated with a construction company and the NE portion was developed with a railroad spur. The SE portion of the site was utilized as a livestock corral and railroad loading area from 1927 through the late 1940s. The central portion of the site was developed with a lumber mill from 1949 through the late 1950s. The central portion of the site was then developed with a single story warehouse, which was used by a fertilizer company in the late 1960s before being occupied by a seed cleaning and pakaging compnay from 1982 to 2000. The warehouse was then used by a lumber grading scanner company from 2006 until current site redevelopment.

Decode for NarcdID: Contamination
NARR Comments: This site came to DEQ's attention in the summer of 2001 upon the discovery of TCE in groundwater in south Corvallis. This site is adjacent to residences that rely on domestic wells for drinking water; these wells were contaminated with TCE. Affected wells had activated carbon units installed to remove TCE. Also see ECSI #3521.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

Updated By: Not reported
Updated Date: 12/17/2002
Decode for NarcdID: Contamination
NARR Comments: This site was developed as an automotive service station in the 1960s. Three underground storage tanks (USTs) were installed at the site prior to 1965, taken out of service in the mid-1970s and removed in 1990. Approximately 900 cubic yards of petroleum contaminated soil were removed from the UST excavation. Subsequent environmental investigations found soil contamination below 15 feet. TPH-g (gasoline) in soil ranged from 370 - 690 mg/kg. A groundwater sample collected from an on-site well contained benzene (2,400 ug/L, toluene (270 ug/L), ethylbenzene (750 ug/L), and xylenes (1,300 ug/L).

Updated Date: 12/17/2002
Decode for NarcdID: Media Contamination
NARR Comments: No petroleum (gasoline/diesel) contamination in soil was encountered from the surface to 15 feet below ground surface (bgs). However, residual soil contamination was detected between 15' and 25' bgs. Petroleum contamination (BTEX) is also present in the groundwater 23 feet bgs. No petroleum contamination was found in the sediments along the west bank of the Willamette River.

Updated Date: 12/17/2002
Decode for NarcdID: Remedial Action
NARR Comments: (6/22/01 M2C/VCS) The selected remedial action consists of institutional and engineering controls, which include the following: 1) Installed a geomembrane cap over the residual soil contamination and covered the geomembrane with a 2-foot thick soil cap & asphalt; 2) Placed deed restriction on the property to restrict groundwater use and on-site excavations; 3) Decommissioned the on-site monitoring well to eliminate a conduit for subsurface contamination.

Updated Date: 12/17/2002
Decode for NarcdID: Health Threats
NARR Comments: (6/22/01 M2C/VCS) Petroleum contamination (BTEX) could migrate from groundwater or subsurface soil through soil and into crawl spaces and buildings. If drinking-water wells were installed on-site, people could be exposed to BTEX in groundwater that exceed state water-quality standards. Institutional and engineering controls specified for the property by DEQ are designed to prevent such exposures, and require DEQ to add this site to the Confirmed Release List and Inventory.

NARR Comments: (10/29/92 KPD/SAS) There are four areas where actual or potential releases have occurred. First is a wastewater treatment facility, located across the Willamette River from the main site. Treated wastewater, containing trace amounts of TCE, and phenol-formaldehyde resin, is discharged into the river. Sludge is sprayed onto two acres of adjacent fields. The discharges are regulated by a NPDES permit, and the facility itself is a registered hazardous-waste generator. Second, in 1978, 1,400 gallons of TCE spilled on-site. Soils in the

EVANITE FIBER CORP. (Continued) **S108834069**

spill area tested from 1,000 to 10,000 ppm TCE, while groundwater tested up to 254 ppm TCE. A hazardous waste permit to manage the spill as a landfill was issued under RCRA in 1985. Contaminated soil has since been removed and disposed of at Arlington, and the spill area paved over and used as a parking lot. Groundwater is still contaminated. Third, prior to 1972, pulp/paper wastes were discharged into a lagoon on-site under an NPDES permit. The lagoon was filled during construction of an administration building, and it is unknown whether any hazardous materials were left in place. Finally, mineral spirits were stored in a 10,000-gallon underground storage tank (UST). Mineral spirits were encountered in soils between the UST and the Willamette River during excavation for a city water line. It is not known if the contaminated soils were cleaned up. (10/01/07 SJS/SRS) Note - discharge of phenol-formaldehyde resin ceased in 2003 when the hardboard facility was shut down. (3/3/10 SJS/SRS) Cleanup activities concentrate on the significant quantity of TCE (and decay products) present near and underneath the former TCE process area. No other significant contamination is known at the site.

NARR Comments: The site is located at the confluence of the Willamette and Marys

EVANITE FIBER CORP. (Continued) **S108834069**

Rivers in Corvallis. Groundwater contaminated with TCE has reached the Willamette River, but concentrations do not pose a risk to human health or the environment. Indoor air quality could be impacted in the glass plant and submicro buildings due to residual soil and groundwater contamination. Groundwater contamination extends off-site to the South and Southeast but concentrations do not pose a risk to residents current use (all currently using city water from the municipal system).

Updated Date: 04/30/2015
Decode for NarcdID: Remedial Action
NARR Comments: (10/29/92 KPD/SAS) Spill site being managed as RCRA landfill. Some contaminated soil removed. Permit for post-closure corrective action and corrective action monitoring written by DEQ. The contaminant plume has been characterized and a pump-and-treat system has been installed for use on groundwater (the system was originally installed for use on the facility's wastewater). Site Assessment recommends no further Cleanup action unless the RCRA program refers the site back to the Cleanup Program. (9/19/00 WRM) RCRA program transfers the corrective action to the Cleanup program. DEQ, EPA, & Evanite agreed that the corrective action can be administered under a consent order attached to a Post-closure permit. (12/29/00 WRM) Consent Order and permit finalized and out for public comment from 1/16/01 - 3/3/01. (4/10/01 WRM) Consent Order signed by Evanite & DEQ. (12/26/01 CAW) Draft focused remedial investigation work plan has been submitted and approved by DEQ. (5/6/03 CAW) Remedial Investigation(RI) and Risk Assessment reports have been submitted and are pending DEQ review. (8/9/04 NHG) Focused RI approved by DEQ based on the following: risk assessment reviews and submittal of Focused Feasibility Study (FFS), which is to include air model and system evaluation for treatment system, pending. (9/15/04 NHG) Review of Human Health Risk Assessment initiated by DEQ. (10/15/04 NHG) DEQ reviewed and submitted comments on Ecological Risk Assessment (ERA) and Human Health Risk Assessment (HHRA). (11/4/04 NHG) DEQ PM and Toxicologist visit site for tour and meeting to discuss the ERA and HHRA. (11/23/04 NHG) DEQ received final ERA data from Evanite and approved Screening Level ERA. DEQ also recommends moving forward on the HHRA and FFS. (8/1/05 NHG) HHRA proposed strategy scheduled for submittal to DEQ in September 2005. The HHRA is a key component for assessing the current remedy and evaluating the effectiveness of the remedy, including the post-closure permit for the cement/soil cap. (1/6/06 AMO/SRS) DEQ received the HHRA on October 28, 2005. This report is currently under review by DEQ staff. (3/7/06 AMO/SRS) DEQ and Evanite are negotiating an addendum to the existing RI Order that will require a Focused FS to be completed. (3/25/08 SJS/SRS) After DEQ comments to the Draft FFS and several meetings ijn the Fall of 2007, Evanite has prepared a conceptual workplan of several pilot studies including soil vapor extraction, annitional well installation, pulsed pumping, and anaerobic dechlorination that are expected to removed significant TCE mass from the site. (1/5/09 SJS/SRS) Draft Focused Feasibility Study received by DEQ on May 31, 2007, currently under review. Second Addendum added to Consent Order, refining language related to

EVANITE FIBER CORP. (Continued) **S108834069**

Financial Assurance. (3/3/10 SJS/SRS) After DEQ review of draft feasibility study Evanite embarked on several pilot studies to more effectively treat TCE from the DNAPL source zone. This included installation of several new wells in the source zone, additional off-gas treatment measures, pulsed pumping in the source zone, soil vapor extraction in the source zone, and sub-slab depressurization beneath the submicro building. (4/30/15 SJS/SRS) Pilot studies and expansion of the well network have been very successful. In December, H&V (formerly Evanite) provided DEQ with an addendum to the FFS outlining a proposed remedy, this document was revised with DEQ comments, and DEQ has prepared a staff report outlining the remedy selection. The recommended remedial action consists of the following elements: Hydraulic containment Contaminant removal using soil vapor extraction and groundwater extraction, including treatment of both the water and vapor Contaminant removal using in-situ treatment through enhanced reductive dechlorination Engineering controls to control vapor intrusion risk in areas with shallow contamination and to prevent exposure to shallow soils Institutional controls to prohibit residential use in areas with shallow soil contamination and to address groundwater use in areas for which controls are needed Monitoring This staff report is open for public comment in May of 2015.

Decode for NarcdID: Current Site Summary Statement
NARR Comments: (5/9/2018 CJB) Project management shift pending. Status of site provided in April 11 2018 Progress Report and call from Paul McBeth today. Draft CJ is with H&V attorneys for review. Off-gas treatment now with carbon filter is effective at removing TCE, no longer use CatOx unit. SVE and GWE still removing TCE under continuous operation less power outages. (2/22/2017 CJB) Following approval of the feasibility study and staff report, DEQ signed the Record of Decision for the site in Sept. 2015. The ROD established remedial action plans to cleanup TCE-contaminated groundwater at the site. DEQ is preparing to engage in a Consent Judgment with H&V to ensure implementation of the remedy. (9/10/07 SJS) In 1978 1,400 gallons of TCE spilled on site. Some soil was removed and in 1991 a pump-and-treat system was installed to remove TCE from the subsurface and to provide hydraulic containment so that contaminated groundwater does not migrate off-site. Work in the 1990s was under the supervision of the EPA RCRA program, and in 2000 was referred to DEQ's cleanup program. Since that time a focused remedial investigation (RI), a human health risk

EVANITE FIBER CORP. (Continued) **S108834069**

assessment, and a ecological risk assessment have been completed. A draft focused feasibility study has been completed and is currently under review by DEQ for selection of a final remedy. After review of the draft FFS, DEQ requested several areas of improvement. On January 31, 2008 Evanite agreed to several additional pilot studies and interim remedial actions.

Incident Id: 860111
Incident Narrative: PRODUCT (MINERAL SPIRITS) IS USED IN MANUFACTURING PROCESS. UNSPECIFIED QUANTITY ENTERED SEWAGE TRAPS AND THEN WAS FLUSHED BY RUNOFF INTO THE MILLRACE, WHERE IT WAS DISCOVERED. UPON OUR ARRIVAL A VISIBLE SHEEN WAS OBSERVED FROM CULVERT AT PLANT TO THE MARY'S RIVER, WITH STRONG ODOR OF PRODUCT PRESENT. WE CONFINED SPILLAGE AT CULVERT WITH INFLATED HOSE AND ABSORBANT BOOM, PLACED A SECONDARY BOOM APPROX 1/2 DISTANCE TO MARY'S RIVER, AND THEN PLACED INFLATED HOSELINE ACROSS MARY'S RIVER AT CONFLUENCE WITH WILLAMETTE. OARS NOTIFIED. PRODUCT BEING PUMPED OUT OF TRAPS AND DIKED AREAS BY RESPONSIBLE PARTY PRIOR TO OUR DEPARTURE. SOME PRODUCT WAS CAPTURED BY HOSELINE ACROSS MARY'S RIVER, AWAITING ON SITE VISIT BY DEQ PERSONNEL.

Decode for NarcdID: Contamination
NARR Comments: (8/12/10 SJS/SAS) The Color Tile/Corvallis Power Equipment site is one of several possible sources for contamination at the Lawndale Areawide groundwater site (ECSI #5273). The site likely handled adhesives and possibly solvents in the past for carpet work and also possibly handled solvents for the power equipment side.

Decode for NarcdID: General Site Description
NARR Comments: Color Tile is located in Township: 11 south, Range 5 west, Section: 25 in northeast Corvallis, Oregon. The site s street address includes 705, 713, and 725 Northeast Circle Blvd Corvallis, Oregon 97330 in Benton County, map and tax lot number: 11525BB00301. The site consists of one 0.5-acre tax lot that contains the 7,136 sq-ft commercial structure and the 900 sq-ft structure. Carpets Plus/Color Tile operates out of 705 NE Circle Blvd, Corvallis Power Equipment operates out of 713 NE Circle Blvd, and 725 NE Circle Blvd is used for the 900 sq-ft light utility storage located directly behind Carpets Plus/Color Tile. The site and surrounding areas are zoned for general industrial use and areas beyond the site are characterized by mixed use commercial and residential developments.

NARR Comments: Color Tile is a floor covering store. The Corvallis facility sells residential and commercial floor coverings such as carpet, hardwood, laminate, ceramic and porcelain tile. Corvallis Power Equipment is an outdoor lawn and garden power equipment store. The facility also performs repairs, maintence, and sharpening of power equipment. The amount and type of chemicals used or stored on site is not known. However, it is common for businesses of this kind to handle products

COLOR TILE (Continued) **S111429245**

contain perchloroethylene.

NARR Comments: On 4/28/89, the Benton Co. Environmental Health Division was notified that a property in Corvallis might be contaminated from a former mercury-extraction operation. On 5/8/89, EPA mailed a certified letter to one of the site owners, Laurence Lyon, requesting security at the site to prevent public access, sampling to confirm presence or absence of hazardous substances at the site, a preliminary assessment (PA) if hazardous materials were found, and an RI/FS if the PA determined that remedial action was needed. On 3/19/90, Ecology & Environment's Technical Assistance Team sampled the site for EPA. Soil samples indicated the presence of mercury as high as 1,700 mg/kg. Benton Co. obtained the property through tax foreclosure in 1990 and conducted a remedial investigation/feasibility study.

NARR Comments: (5/22/96 RMD/VCS) Benton County signed a Letter Agreement with DEQ in January 1993. The County characterized the nature and extent of contamination; mercury-speciation analyses showed no organic mercury present at the site. A risk assessment was completed to evaluate toxicity and exposure risk from forms of mercury other than those specified in DEQ's Soil Cleanup Table, leading to the determination of site-specific cleanup limits. Benton County then completed a feasibility study and soil removal, and DEQ has determined that no further action is necessary at this site.

Updated Date: 06/17/2005
Decode for NarcdID: Contamination
NARR Comments: In 1987, a complainant informed DEQ of an abandoned shake mill that was in operation in the 1960s & ’70s. The mill may have treated wood shakes with PCP (pentachlorophenol). In 1986, a contract lab sampled the complainant’s well, and found 17 ppb PCP in the water. However, this sample result could not be confirmed or backtracked to the source.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

NARR Comments: (8/13/10 SJS/SAS) The Site has been an automobile service station since the mid-1970s. Various hazardous materials and petroleum producs associated with vehicle maintenence are or have been stored and used on site. The site is very close to the Lawndale area, where PCE, TCE and decay products have been detected in several domestic wells.

NARR Comments: (2/8/11 SJS/SAS) Clayton s Auto Repair operates as a full service automotive repair and maintenance facility and generates approximately 650 gallons of used fluids, including transmission fluid, used oil, and coolant, per year. The site stores aerosol brake

CLAYTON'S AUTO REPAIR (Continued) **S110638445**

cleaner, Bioremedial brand parts solution, used oil, transmission fluid, and coolant. Oil is stored during summer months and burned in a furnace on-site for heating. Used oil storage includes ten, 55 gallon drums for stored at the west end of the building on-site and a 200 gallon inside storage tank. The site owner notes that metal waste is removed by local recycler, oil waste is removed by refining company; there is no mention of a licensed transporter that picks up and recycles solvents or other hazardous waste. Aside from the past disposal of oil in the ditch mentioned above, there have been no other known releases of hazardous substances at this site. However, this site is part of the Lawndale Groundwater study area, where chlorinated solvents have been detected in several domestic wells. (12/12/11 SJS/SAS) Investigation of this site during the Lawndale area wide PA showed no contaminants above detection limits.

Updated Date: 03/22/2016
Decode for NarcdID: Contamination
NARR Comments: Site contamination consists of chlorinated solvents, mainly TCE and PCE at ppb concentrations typically in the low teens in some residential drinking water wells, decreasing to the east and south from the Lawndale neighborhood. The likely source of contamination is historical operations at Circle 9 Dry Cleaners, about 3,000 ft. west-southwest of the Site. The shape and extent of the Circle 9 plume between the eastern edge of Circle 9 and the westernmost well at the Site are undefined, but this plume appears to have affected wells in Lawndale.

NARR ID: 5756023

Decode for NarcdID: General Site Description
NARR Comments: The Lawndale Groundwater site is centered about 1,000 feet east of the intersection of Hwy. 99 and NE Circle Blvd. in northern Corvallis. The Lawndale neighborhood is a small island of unincorporated properties surrounded by the City of Corvallis. Municipal water and sewer services are not available in Lawndale. In 2009, the chlorinated solvents trichloroethylene (TCE) and perchloroethylene (PCE) were found in groundwater at a Lawndale rental home, prompting a phased DEQ investigation of discovery and soil/groundwater sampling, followed by installation of carbon filtration systems on nine residential wells.

Decode for NarcdID: Remedial Action
NARR Comments: In late 2009, drinking water service was set up to deliver water to affected Lawndale residents. In 2010, DEQ provided wellhead filtration systems for willing residents. In 2012, DEQ reached a settlement with owners of the Circle 9 Plaza property, which provided funding for DEQ to continue to monitor groundwater conditions and maintain the water filtration systems.

Decode for NarcdID: Current Site Summary Statement
NARR Comments: [March 2016] DEQ has identified all affected wells with PCE/TCE contamination, and is providing and maintaining water filtration systems to all residents desiring treatment for water exceeding drinking-water standards. Future DEQ actions include ongoing annual well sampling and maintenance of treatment systems. DEQ will also coordinate with the City of Corvallis and Oregon Health Authority regarding potential extension of city water to Lawndale residents, via annexation or another process, should such an engineering approach be viable.

AST:
Facility ID: 4769
Name: FOSTER POULTRY FARMS
Address: 855 NW 8TH ST
City,State,Zip: CORVALLIS, OR 97330
Substance: AMMONIA ANHYDROUS
Reporting Quantities: Not reported
Quantity Units: Not reported
Physical State: Not reported
Storage 1: Above ground tank
Storage 2: Not reported
Owner-Operator Name: Denise
Direct Site Phone: 5417546211
Report Class: Annual
Report Year: 2022
Is Poisonous Gas: No
Is Poisonous Material: No
Is Biological Hazard: No
Is Radioactive Material: No
Is Explosive: No
Status: ACTIVE
Nature of Business: FURTHER PROCESSING OF POULTRY
NAICS Code: 311615
Maximum Daily Amount Code: 20
Maximum Daily Amount Code Range: 1,000-4,999
Maximum Daily Amount Units: lbs
Is Solid State: Yes

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

NARR Comments: (7/16/02 M2C/SAS) A plume of chlorinated solvents has been found in groundwater in an area of south Corvallis where residents have depended on domestic wells for their drinking water supply. DEQ first ensured that these residents had access to a safe water supply, and then began searching for potential sources of the contamination.

NARR Comments: Groundwater: According to the City of Corvallis, no public water lines currently serve the residents along Allen Street. Residents and excavation workers could be exposed to contaminated groundwater through ingestion or dermal contact . Surface Water: The nearest surface water to the site is the Mary's River, about 0.25 mile to the northeast. It is unknown if TCE contamination in groundwater has migrated to the river. Recreational users of the river and ecological receptors could be exposed. Soil Exposure: Shallow soil is likely contaminated at the source(s). Depending where the source of contamination is located, there is a potential for residents, commercial workers, and excavation workers to be exposed to contaminated soil through dermal contact or inhalation. Air: There is a potential for residents, commercial workers, and excavation workers to be exposed to vapors from groundwater and/or soil contamination.

NARR Comments: (1/29/03 M2C/SAS) In July 2001, DEQ sampled 13 residential wells along Allen, Hopkins, Edging, and Cummings Streets. Five of the wells were contaminated with TCE. DEQ installed carbon-treatment units to protect people's health. DEQ, under a cooperative agreement with EPA, is conducting a field investigation to evaluate the extent of contamination and to locate its source(s). DEQ will be collecting soil and groundwater samples from borings along Hopkins, Allen, and Avery Streets. (7/27/03 M2C/SAS) DEQ conducted a Preliminary Assessment in April 2003. Thirteen groundwater samples and 2 soil samples were collected. TCE concentrations in groundwater ranged from 1.3 ug/l to 491 ug/l. TCE was not detected in the soil samples. The highest concentrations of TCE were found in the right-of-ways near the southwest corner of the Benton County Shops and across from the railroad line. The Preliminary Report was submitted to EPA June 2003. The report was finalized in July 2003. DEQ will be requesting additional work on the Benton County Shops property. DEQ has requested from the railroad a inventory of chemicals shipped on that Monroe Branch line. DEQ has determined that further action at this site is a high priority because of the impact to the drinking water wells. (9/8/04 M2C/VCP) DEQ is using orphan account to investigate the possible sources of contamination. DEQ is planning on installing 7 wells on the Benton County Shop's property and in the neighborhood. Well installation is planned for June 2005. DEQ continues to maintain the carbon treatment units on the domestic wells. (1/28/05 M2C/VCP) DEQ installed two piezometers on Hopkins Street near the Benton

ALLEN STREET STUDY AREA (Continued) **S106115323**

County Shops. One piezometer was installed in the Willamette Silts and the other one was installed in the Linn Gravels. Water level indicate that the vertical gradient is consistently downward. (4/20/05 M2C/VCP) DEQ and Benton County Shops have agreed to use a sonic rig to complete the wells on the Benton County's property and in the neighborhood. (7/19/05 M2C/VCP) In August 2005, DEQ will be installing 7 monitoring wells in the area along Allen Street, Hopkins Avenue, Benton County Public Works facility and in residential properties. DEQ will be assessing the origin and extent of TCE and associated compounds (halogenated volatile organic compounds) in soil and groundwater, determining groundwater flow direction, conducting preliminary risk screening, and determining if additional work is necessary (2/5/08 DEH SRS) DEQ installed monitoring wells around the site, including on Benton County, city and County right of ways, and on private residences in summer 2005. Quarterly groundwater monitoring was conducted by DEQ's contractor for a year. The results of these site investigation activities were reported in the SI report (July 2006). The SI activities identified the highest levels of contamination in groundwater near the southwest corner of the Benton County Shops property. Suspect sources of the contamination remain the Benton County Shops property, the Union Pacific Railroad right-of-way, and the Hopkins Avenue right-of-way south of the Benton County shops. Additional investigations are needed to determine where the source of the contamination is. DEQ conducted a soil gas risk evaluation in the winter of 2007 to determine if TCE in groundwater could pose a threat to indoor air quality for residents living above the TCE plume. The results of the 2007 sampling do not indicate a current threat to residents from TCE vapors, but DEQ may conduct follow-up sampling during the dry season (summer 2008) to confirm that TCE vapors are not threatening these residents.

NARR Comments: [Dec. 2010] Groundwater at the Allen Street Study Area is contaminated with the solvent trichloroethylene (TCE). Eight residential water wells have been contaminated by the TCE. DEQ has used Orphan Site Account funds to fit the contaminated wells with filters to protect the residents. DEQ is also trying to locate the source of the contamination, so it can be cleaned up if possible. In 2008 a DEQ funded investigation found that TCE vapors from the groundwater should not pose a significant threat to residents living above the plume, but additional assessment may be necessary.

NARR Comments: There are no known hazardous substances releases from this site, however, based on the types of businesses that have occupied this site in the past it is likely that one or more occupants have handled Tetrachloroethene and may have released it to the environment. Imtech currently handles many acids and chemicals used in various ink products, none of which are known to contain chlorinated solvents. A neighborhood adjacent to theis site is served by wells which have low level contamination with PCE and TCE.

NARR Comments: (8/13/10 SJS/SAS) The site is located very close to the Lawndale neighborhood, where perchloroethene (PCE) and trichloroethene (TCE) have been detected in several domestic wells above drinking water standards. (6/30/11 SJS/SAS) The site is believed to be down-gradient of the Lawndale neighborhood, but groundwater gradients may vary with pumping and the site has had processes which may include the use of PCE.Therefore, it is retained as a potential source of contamination of the Lawndale neighborhood. (9/21/16 MOTT) Six soil and groundwater samples were collected at the site in November 2015. PCE/TCE were not detected in any of the samples.

NARR Comments: The ATS Systems site is currently an OEM engineering, fabrication, and integration factory. The site was used for agricultural purposes until the 1980s, and first listeded as Accu-Fab systems in 1997. Hazardous substances (current or past) known to be used on site include various compressed gases and fuels, a paint shop, and a former machine shop.

Updated By: MOTT
Updated Date: 03/30/2017
Decode for NarcdID: Current Site Summary Statement
NARR Comments: (9/21/16 MOTT) The ATS Systems site was added to ECSI based on a search for potential sources for the Lawndale Site (ECSI 5273), where tetrachloroethene (PCE) and trichloroethene (TCE) were detected in residential drinking water wells. DEQ prepared a strategy recommendation for the ATS Systems property in June 2011. Based on the properties past operations and proximity to the Lawndale site, the strategy recommendation listed the site as a medium priority and recommended a groundwater investigation be completed to rule out the site as a potential source of the Lawndale plume. In November 2015 a Phase II was completed at the site. A total of six soil samples and six groundwater samples were collected at the site. PCE and TCE were not detected in any of the samples. (03/30/2017 MOTT) A NFA was issued for the site on 3/30/2017.

Environmental Interest/Information System:

The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

SERRY'S DRY CLEANING (Continued) **1004365020**

Updated Date: 12/17/2002
Decode for NarcdID: Contamination
NARR Comments: (7/30/2001 KPD/CPD) Dry cleaning has been conducted at the site since at least 1976. In April 2001, Serry retained Aspen Environmental to collect soil and groundwater samples at the site on behalf of a potential purchaser. Aspen collected push probe samples from the four corners of the property. Soil and groundwater in all four samples were contaminated with perchloroethylene (PCE) and associated degradation products. Serry applied to DEQ's Dry Cleaner Environmental Response program in June 2001 and was accepted in July 2001.

NARR Comments: The area surrounding the site is largely residential. Two parks, a school, and Oregon State University are less than a third of a mile from the site. Dixon Creek is 0.4 miles NE of the site, and the Willamette River is 0.6 miles east of the site. Soil at the site is mostly sandy silt, down to a depth of at least 20 feet. Groundwater was encountered about 13.5 feet below the surface.

Decode for NarcdID: Remedial Action
NARR Comments: (12/04 NS) A limited subsurface investigation by the former Serry's Dry Cleaner owner in April 2001 found PCE and TCE in the soil and groundwater at the four corners of the property boundary. PCE in soil ranged from 0.02 mg/kg to 0.338 mg/kg and from 50 ug/L to 22,500 ug/L in groundwater. The highest concentrations were found on the southern and eastern property line. A site Scoping Report was prepared by DEQ's contractor in March 2002 to summarize the history of the site and adjacent properties, evaluate previous site investigations, and conduct a beneficial water use survey (BWUS) within a mile of the facility. The historical review identified a potential dry cleaner (from 1931 to 1963) previously located at the adjacent property just south/southeast of the site at 1041 to 1045 Van Buren. This property is currently a rental duplex. The report identified this former dry cleaner and the Serry's Dry Cleaners as potential contaminant sources. The BWUS identified several private water wells within a mile radius of the site. One well was located in a potentially downgradient direction of the site approximately 1/4 mile to the south, used by homeowners for irrigation purposes in the spring and summer. The report recommended additional investigation to characterize the extent of the soil and groundwater contamination at and around the site. The report also reccomended indoor air sampling of the site building (now Rice 'n' Spice Grocery) and adjacent properties on the eastern site boundary (the current rental duplex at 1045 Van Buren) where PCE exceeded the DEQ's residential indoor air vapor intrusion RBC. DEQ conducted indoor air sampling from March to April 2003 of the Rice 'n' Spice Grocery (the former Serry's building) the duplex to the east (1045 NW Van Buren) and the house to the north (313 NW 11th St.). PCE and TCE were detected in the air of the Rice 'n' Spice at levels ranging from 7.8 to 11 ug/m3 and 0.38 to 0.94 ug/m3, respectively. TCE was not detected in the duplex, but PCE was found at 13 ug/m3. It should be noted that the duplex sample provides very conservative results. The sample was taken over a large crack in the bedroom floor and did not represent air from the typical breathing space. Chlorinated solvents were not detected in the house on 11th St. Follow-up sampling was conducted at the Rice 'n' Spice and adjacent duplex in May 2003. The sampling found concentrations of PCE and TCE at the Rice 'n' Spice at consistent levels with the previous sampling. Concentrations of PCE at the duplex decreased by an order of magnitude ranging from 0.88 ug/m3 to 1.7 ug/m3 from samples taken in the breathing space. In September 2003 the indoor air sampling was expanded to an adjacent house just east of the duplex on 306 NW 10th St. PCE was detected in the home at 1.3 to 2.3 ug/m3. TCE was not detected. In October 2003 DEQ's contractor conducted a supplemental soil and groundwater site investigation to confirm the source of the contamination and better define the extent of soil and groundwater contamination for evaluating potential IRAM actions. The investigation confirmed the presence of PCE and TCE in the soil and groundwater at and around the site. The highest concentrations were found to the east and downgradient of the former Serry's dry cleaners. The plume was found to cover most of the property to the north and east. The extent of the plume offsite to the west and southwest was not fully defined. The soil source was not

SERRY'S DRY CLEANING (Continued) **1004365020**

found, but the results of the investigation suggest that source soils could exist to the east and/or west ends of the building and/or along the utility conduits. Additional exploration of the soils in these areas was recommended. Based on the results of this investigation and the previous indoor air data, DEQ implemented indoor air IRAMs at the Rice 'n' Spice and the duplex to mitigate the indoor air contamination. In July 2004 the HVAC system of the Rice 'n' Spice was upgraded to increase the indoor to outdoor air circulation. At the same time, the cracks in the floor of the duplex were repaired and the entire floor was sealed to prevent migration of vapors. Follow-up indoor air sampling indicates that the IRAM actions are working to decrease or stabilize the migration of indoor air contaminants into these buildings. DEQ is currently working on implementing an additional site investigation to address the data gaps remaining from the October 2003 investigation. (DEH/SRS, 9/20/05) DEQ is planning pilot tests to test the effectiveness of in-situ placement of Adventus America's EHC products, as well as the emulsified oil product <quot>Newmans Zone<quot>. Initial implementability testing to determine if these materials can be injected effectively in the relatively fine grained soils is planned for the fall 2005. (3/3/06 DEH/SRS) Pilot tests involving the injection of emulsified soybean oil and Adventus Americas' EHC products were conducted at the site in December 2005. Based on the success of this work, additional emulsified oil was injected by DEQ in February 2006. Additional injections may be carried out in 2006, which should further reduce the threat to human health from PCE vapors. (9/30/08 DEH/SRS) In August 2006 10,250 lbs of Adventus EHC was injected into the ground at the site, south and east of the building. Monitoring wells were installed to monitor the effectiveness of the injections. As of September 2008 the injections appear to have been largely successful in reducing PCE and daughter product contamination in the treatment zone. PCE concentrations in shallow groundwater have been reduced from above 10,000 ug/L to non detect, with relatively low levels of DCE and VC generation. Monitoring of the groundwater continues on a routine basis. Soil vapor sampling was conducted in June 2008 to evaluate the current threat to vapor intrusion to indoor air of PCE and related chemicals. The results of the soil gas sampling, which was conducted adjacent to the on site building and an adjacent apartment/duplex showed that vapor intrusion into occupational buildings (on site) and residential buildings (adjacent apartments) should not currently be a concern at this time. This is likely due to the effects of remediation activities imiplemented in 2006, which have greatly reduced the levels of PCE and daughter products at the site. (6/9/16 KJR/SRS) Additional investigation and sampling was performed in July 2012 and August 2013. Groundwater monitoring has been performed 18 times since the August 2006 EHC injections. Groundwater elevation measurements collected since 2008 have shown a consistent northwest groundwater migration direction with occasional seasonal reversals to the southeast. A no further action determination has been recommended for the site following notification of the property owner and adjacent property owners. (10/10/16, KJR/DCP) A NFA determination was issued on Oct. 5, 2016. The monitoring well network has been abandoned in accordance with OWRD regulations. Select site reports and documents may be viewed on-line from the Site Document section of this database.

Decode for NarcdID: Water Use (Current/Reasonably Likely)
NARR Comments: Eleven water wells were identified by DEQ's contractor from a water use survey conducted in February 2002. The survey was completed by searching the Oregon Water Resources Department database. A door to door survey was not completed. Of the 11 wells found, four were identified as irrigation, one was industrial, and five were domestic. It was determined that only one of the wells was located in the downgradient location of the site. The well, identified as well #6, was confirmed to be an irrigation well used in the summer months for home lawn watering. DEQ followed up with the City of Corvallis Public Works Department in April 2002 and found all residents in the area to be on public water supply. There were no parks or schools near the site using domestic or irrigation wells.

United Nations/north America 4 Digit Class Number:	9188
Hazard Rank:	2
EHS Ingredient:	Not reported
Substance Pure:	True
Substance Mix:	False
First Hazardous Class Code For Chemical:	Miscellaneous Hazardous Material
Second Hazardous Class Code For Chemical:	Not reported
Third Hazardous Class Code For Chemical:	Not reported
Hazard Class 1 Of The Chemical:	9.0
Hazard Class 2 Of The Chemical:	Not reported
Hazard Class 3 Of The Chemical:	Not reported

Additional Chemical:

Chemical Is A Toxic 313 Chemical:	N
EPA Pesticide Registration Number:	Not reported
Contains 112R:	N
Contains EHS:	N
Fertilizer:	N
Pesticide:	N
Contains 313:	N

Chemical Name:	COMPRESSED GAS MIXTURE
Physical Description:	GAS
Case Number:	7782447
Facility Id:	005720
Physical State Of The Substance:	3
Average Amount Possessed During The Year Code:	10
Maximum Amount Possessed During The Year Code:	11
Applicable Unit Of Measure Code:	3
Description Of The Unit Of Measure:	CUBIC FEET
Type Code:	L
Description:	CYLINDER
Type Code:	Not reported
Temperature Description:	Not reported
Pressure of Code:	2
Pressure Description:	GREATER THAN NORMAL PRESSURE
Pressure of Code:	Not reported
Pressure Description:	Not reported
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Temperature Description:	Not reported
Temperature of The Hazardous Substance Code:	Not reported
Days Hazardous Substance On Site During Year:	365
Is The Substance Protected A Trade Secret:	False
Description Of The Max Qnty Code:	500-999
Description Of The Avg Qnty Code:	200-499
Most Hazardous Ingridient:	OXYGEN
United Nations/north America 4 Digit Class Number:	Not reported
Hazard Rank:	2
EHS Ingredient:	Not reported
Substance Pure:	False
Substance Mix:	True
First Hazardous Class Code For Chemical:	Non-flammable Gas
Second Hazardous Class Code For Chemical:	Not reported
Third Hazardous Class Code For Chemical:	Not reported

HOLLINGSWORTH & VOSE FIBER COMPANY (Continued) **S108659725**

Hazard Class 1 Of The Chemical:	2.2
Hazard Class 2 Of The Chemical:	Not reported
Hazard Class 3 Of The Chemical:	Not reported

Additional Chemical:

Chemical Is A Toxic 313 Chemical:	Not reported
EPA Pesticide Registration Number:	Not reported
Contains 112R:	Not reported
Contains EHS:	Not reported
Fertilizer:	Not reported
Pesticide:	Not reported
Contains 313:	Not reported

Chemical Name:	DIESEL FUEL
Physical Description:	LIQUID
Case Number:	0068334305
Facility Id:	005720
Physical State Of The Substance:	2
Average Amount Possessed During The Year Code:	10
Maximum Amount Possessed During The Year Code:	11
Applicable Unit Of Measure Code:	2
Description Of The Unit Of Measure:	GALLONS
Type Code:	A
Description:	ABOVEGROUND TANK
Type Code:	C
Temperature Description:	TANK INSIDE BUILDING
Pressure of Code:	1
Pressure Description:	NORMAL PRESSURE
Pressure of Code:	1
Pressure Description:	NORMAL PRESSURE
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Days Hazardous Substance On Site During Year:	365
Is The Substance Protected A Trade Secret:	False
Description Of The Max Qnty Code:	500-999
Description Of The Avg Qnty Code:	200-499
Most Hazardous Ingridient:	petroleum products, diesel oil
United Nations/north America 4 Digit Class Number:	1993
Hazard Rank:	2
EHS Ingredient:	Not reported
Substance Pure:	False
Substance Mix:	True
First Hazardous Class Code For Chemical:	Flammable and Combustible Liquid
Second Hazardous Class Code For Chemical:	Acute Health Hazard
Third Hazardous Class Code For Chemical:	Not reported
Hazard Class 1 Of The Chemical:	3.0
Hazard Class 2 Of The Chemical:	6.3
Hazard Class 3 Of The Chemical:	Not reported

Additional Chemical:

Chemical Is A Toxic 313 Chemical:	N
EPA Pesticide Registration Number:	Not reported
Contains 112R:	N
Contains EHS:	N
Fertilizer:	N

HOLLINGSWORTH & VOSE FIBER COMPANY (Continued) **S108659725**

Pesticide:	N
Contains 313:	N

Chemical Name:	ACETYLENE

Narrative:

NARR ID: 5729137
NARR Code: Contamination
Created By: Not reported
Created Date: 12/17/2002
Updated By: Not reported
Updated Date: 12/17/2002
Decode for NarcdID: Contamination
NARR Comments: This site is approx 10 acres in size, and wastes are 30 ft deep. The site principally received clearing debris (stumps, brush, etc.), building demolition materials, and industrial wastes. Until 1973, the site was unregulated (1968-73) by DEQ. It is estimated that for about 2 months in 1975 the landfill received wastes from Teledyne Wah Chang Albany, likely including: metal production by-products such as pyrophorics and zirconium; low-level radioactive material; and other common industrial contaminants. An estimated 10,000 cubic yards of industrial materials were deposited at the site. Ecology and Environment performed a site investigation and hydrogeological characterization that included sampling of existing wells and the installation and sampling of new wells. Radiological water analyses showed contamination at less than three times the detection limit, and <quot>well below<quot> applicable drinking water standards. Most of the organic compounds detected in groundwater (benzene, toluene, and chloroform) were at levels below the contract required detection limit. Inorganic analysis revealed chromium at 0.057 ppm and arsenic at 0.050 ppm. The EPA primary drinking water standards for both are 0.050 mg/L. Iron and manganese were detected at levels above the secondary drinking water standards.

Decode for NarcdID: Pathways & Other Hazards
NARR Comments: Groundwater is known to be contaminated w/metals; therefore there is also the potential for soil and surface water contamination. The site is now being used (leased) by a local farmer for growing seed, grass, and grain. There is surface water and shallow groundwater in the immediate site area, neither of which are usually consumed or used for irrigation or recreation. However, people were observed swimming in the Willamette River (the surface water) and two (unused) irrigation wells exist on-site. Groundwater in deeper strata is used for irrigation and drinking. In addition, 0.5 mi north of the site a city of Corvallis well is used for drinking and process water for a manufacturing facility. It is known that 100' by 100' by 3' of TWCA waste is on-site. In 1975 a fire broke out and was associated with this waste. Therefore, the information in the referenced DEQ memo should be carefully considered. NOTE!! In 1977 a bulldozer moving refuse at Coffin Butte Landfill exploded and caught fire. The bulldozer was working in an area where wastes from Teledyne Wah Chang, Albany, had been dumped.

Updated Date: 12/17/2002

ROCHE RD DEMOLITION SITE (Continued) **1006858616**

Decode for NarcdID: Remedial Action
NARR Comments: EPA conducted a PA/SI, incl. installation of monitoring wells, and recommended NFA through Superfund. They have suggested that the monitoring wells be turned over to DEQ for future use (possibly biannual sampling). Either the City of Corvallis or DEQ should consider continuing the monitoring. However, a Linn County Hwy ramp is planned, which will cross the property along the E border of the site. The SI indicates this is an area where disposal of wastes may have occurred. Therefore, care should be taken during the excavation because of pyrophoric materials buried at site. (12/24/97 SAN/SAS) Further monitoring of groundwater recommended at the site.

US BROWNFIELDS:
Name: 19TH STREET PHILOMATH
Address: 19TH STREET
Recipient name: City of Corvallis
Grant type: Assessment
Property Number: 1.261200025e+011
Parcel size: 9.3200000000000003
Latitude: 44.547244877239301

19TH STREET PHILOMATH (Continued) **1027025727**

Longitude:	-123.35643826014601
Highlights:	The 9.32-acre Property is located outside of and adjacent to the northern city limits of Philomath, within the city's urban growth boundary. The Property is located between a Southern Pacific Railroad (SPRR) line to the northwest and N 19th Street to the southeast. The Property is comprised of undeveloped and former agricultural land. A small derelict wooden livestock loading feature is located on the southwest portion of the Property, indicating potential past use of the Property as range land. Historical aerial photographs dating back to 1936 indicate that portions of the Property were in agricultural use by that date. No indications of other historical land uses or development at the Property were identified. Two wood products mills are adjacent to the northern/northwestern Property boundary, beyond the SPRR rail line. Single family residential development is adjacent to the northeast and south-southwest, and a commercial site, multi-family residential development, and undeveloped or agricultural land are adjacent to the east-southeast beyond N 19th Street. The site of a former lumber mill is located beyond N 19th Street northeast of the Property. The Property is zoned Urban Industrial. It is owned by Northernwood LLC. A Phase I ESA completed December 15, 2020 identified the following RECs: 1. Historical aerial photographs and topographic maps show that the SPRR rail line has been present along the northwestern Property boundary since at least 1913. Soil near railroad lines may contain elevated concentrations of petroleum hydrocarbons, polycyclic aromatic hydrocarbons (PAHs), and heavy metals from exhaust and friction; therefore, the presence of an adjoining rail line is a REC for the Property. 2. Environmental database listings, historical aerial photographs, topographic maps, and Stantec's site reconnaissance identify two timber mills adjacent to the north and northwest of the Property in an inferred upgradient direction from the Property. Environmental database listings for the mills show the use and storage of reportable quantities of materials including diesel, dielectric fluid, saw guide oil, gasoline, Nuto H 46 (hydraulic oil), and used oil. While there is no record of a documented release at these facilities, the up-gradient location of the mills relative to the Property, scale of chemical storage, and longevity of the mill operations represent the material threat of a release that could impact the Property. The potential for releases from these facilities to occur and migrate to the Property represents a REC for the Property. A Phase II ESA Sampling and Analysis Plan has been submitted to EPA for review.

The Property is located between a Southern Pacific Railroad (SPRR) line to the northwest and N 19th Street to the southeast. The Property is comprised of undeveloped and former agricultural land. A small derelict wooden livestock loading feature is located on the southwest portion of the Property, indicating potential past use of the Property as range land. Historical aerial photographs dating back to 1936 indicate that portions of the Property were in agricultural use by that date. No indications of other historical land uses or development at the Property were identified. Two wood products mills are adjacent to the northern/northwestern Property boundary, beyond the SPRR rail line. Single family residential development is adjacent to the northeast and south-southwest, and a commercial site, multi-family residential development, and undeveloped or agricultural land are adjacent to the east-southeast beyond N 19th Street. The site of a former lumber mill is located beyond N 19th Street northeast of the Property. The Property is zoned Urban Industrial. It is owned by Northernwood LLC. A Phase I ESA completed December 15, 2020 identified the following RECs: 1. Historical aerial photographs

19TH STREET PHILOMATH (Continued) **1027025727**

and topographic maps show that the SPRR rail line has been present along the northwestern Property boundary since at least 1913. Soil near railroad lines may contain elevated concentrations of petroleum hydrocarbons, polycyclic aromatic hydrocarbons (PAHs), and heavy metals from exhaust and friction; therefore, the presence of an adjoining rail line is a REC for the Property. 2. Environmental database listings, historical aerial photographs, topographic maps, and Stantec's site reconnaissance identify two timber mills adjacent to the north and northwest of the Property in an inferred upgradient direction from the Property. Environmental database listings for the mills show the use and storage of reportable quantities of materials including diesel, dielectric fluid, saw guide oil, gasoline, Nuto H 46 (hydraulic oil), and used oil. While there is no record of a documented release at these facilities, the up-gradient location of the mills relative to the Property, scale of chemical storage, and longevity of the mill operations represent the material threat of a release that could impact the Property. The potential for releases from these facilities to occur and migrate to the Property represents a REC for the Property. A Phase II ESA Sampling and Analysis Plan has been submitted to EPA for review.

Decode for NarcdID: Current Site Summary Statement
NARR Comments: Former sawmill facility, including two large log ponds and a refueling area that occupied approx. 30 acres. The mill operated under various names (Hobin Mill, Quad Mill, etc.) between 1955 and 1998. The two log ponds were reportedly filled with wood waste and rock during the 1980s. In 1989 a notice of non-compliance was filed by DEQ due to an off-white gelatinous discharge coming from the site log ponds and filling both drainage ditches along Chapel Drive. In 2018, petroleum hydrocarbons were found in subsurface soils above DEQ s allowable risk-based concentrations (RBCs) for the proposed use of the property as a residential development. In 2020, methane gas was identified in a few locations across the property above its lower explosive limit (LEL) of 5%. Also in 2020, residential development and occupancy for the Millpond Crossing subdivision began along the western edge of the site. Due to unknown environmental conditions and residential use of the site, further investigation is required.

NARR Comments: (6/27/94 KPD/SRS) In August 1982, approximately 900-1000 gallons of 2-5% waste hydrofluoric acid solution leaked from an underground storage tank at the facility. H-P installed a groundwater recovery well adjacent to the release site, and sampled the groundwater for fluoride (as F). Fluoride was first detected in February 1983, when groundwater rose into the release area. The maximum concentration was 0.5 ppm. By comparison, the Oregon Willamette Basin Standard for surface water fluoride is 1.0 ppm. Groundwater recovery was halted in May 1984, after fluoride levels had dropped to non-detect. H-P removed the storage tank in July 1987 as part of RCRA closure activities. (4/29/11 SJS/SAS) Over several weeks or months in early 2011, 220 gallons of Nalco 8338 in 200,000 gallons of water was released from underground lines. Nalco 8338 contains sodium nitrite, sodium hydroxide, and sodium tolytriazole.

NARR Comments: (6/27/94 KPD/SRS) After an initial review, DEQ's Site Assessment Program recommended that the site be placed on the Confirmed Release List. Site Assessment was concerned because soils had never been sampled for fluorides. The Site Response Section has determined, however, that the primary threat from the release would have been the low pH of the acid, not the fluoride. Since the acid has likely long since neutralized, and since no other releases of hazardous substances are known to have occurred at the site, SRS recommends that no further action be taken at the site at this time.

Decode for NarcdID: General Site Description
NARR Comments: (11/25/03 M2C/SAS) Former dry cleaner located at 1603 Monroe in Corvallis, Oregon. The site had two stoddard solvent underground storage tanks (USTs) and a heating oil UST. The USTs have reportedly been removed, but no confirmation samples were collected. Five capped vent and fill pipes from the former USTs are still present in the alley at the northwest corner of the building.

Updated By: EKELLEY
Updated Date: 06/26/2013
Decode for NarcdID: Project Activity Status
NARR Comments: Based on the assessment by BB&A in 2002, it appears that groundwater and soil have been impacted by contamination from releases of chlorinated (PCE) and petroleum-based (Stoddard) dry cleaning solvents from the former dry cleaning operation at the site. Gasoline range hydrocarbons in one soil sample exceed DEQ s vapor intrusion RBC for occupational receptors. Concentrations of other chemicals in soil and groundwater were below applicable RBCs for on-site occupational receptors/workers. However, this contamination is not well defined and there may be areas of the site with higher concentrations of contaminants. DEQ recommends an expanded preliminary assessment including a complete beneficial groundwater use survey and further sampling (including a vapor intrusion assessment) to determine the extent of the soil and groundwater contamination and further evaluate the risks to human health and the environment. DEQ considers this site a Medium priority for further investigation.

Decode for NarcdID: Site History
NARR Comments: (11/25/03 M2C/SAS) According to operational history filled out by the owner, the site has been a dry cleaner since 1986. Prior to 1987, the dry cleaning facility had two stoddard solvent underground storage tanks. These tanks have reportedly been removed, but five capped vent and fill pipes from the former tanks are still present in the alley at the northeast corner of the building. In 1987, perchloroethene

COLLEGE CLEANERS (Continued) **1000473546**

(PCE) began to be used at the site. Excess water from the cleaning machine reportedly discharges to the sewer line near the northwest corner of the building.

NARR Comments: The (former) College Cleaners site is located in Corvallis. There have been documented releases of dry cleaning chemicals, including chlorinated solvents, to the environment. College Cleaners site is participating in the Oregon DEQ Dry Cleaner Program. The site is currently a low to medium priority for further action under the Dry Cleaner Program.

Feature Description:	Mary's Peak Radio Relay Annex was used by the Dept. of Defense, U.S. Air Force for a radio relay station from 1953 to 1958. The Air force constructed a small concrete block building, one wooden tower, one metal tower, an underground fuel storage tank, and a chain link fence. The site was leased from the City of Corvallis by the Air Force who constructed and operated structures on the site. The site was under DOD control and operation only during the time it was leased to the DOD. The access road was obtained under a joint use license from the Pacific Telephone and Telegraph Company.

NARR Comments: (6/3/04 KS/SAS) DEQ has determined that no further action is required to address the 1988 atrazine detection at the Morse Bros. Pond, based on the following circumstances: 1) the age (1988) of the sample from the pond; 2) the concentration detected in the pond was below the drinking water standard of 3 ppb; 3) more recent studies (1993-1995 & 2002) have documented that atrazine is present in groundwater at low levels throughout much of the Willamette Valley; and 4) according to a telephone conversation with Morse Bros., this facility did not use, store, spill or improperly dispose of bulk atrazine.

OR SPILLS:

Name:	Not reported
Address:	28602 HWY 34
City,State,Zip:	CORVALLIS, OR 97339
Facility ID:	1997-2649
Incident Status:	Archive
Material:	Diesel fuel
Quantity:	50
Unit of Measure:	Gallons
Release Date:	10/29/1997
Description:	Gauging tank line strap broke and dropped the tank and resulted in tank siphening of 6,600 gallons of diesel which was captured in containment area. 40-50 gallons leaked out of containment. 1-2 gallons went to settling pond.

Applicable Unit Of Measure Code:	3
Description Of The Unit Of Measure:	CUBIC FEET
Type Code:	A
Description:	ABOVEGROUND TANK
Type Code:	Not reported
Temperature Description:	Not reported
Pressure of Code:	2
Pressure Description:	GREATER THAN NORMAL PRESSURE
Pressure of Code:	Not reported
Pressure Description:	Not reported
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Temperature Description:	Not reported
Temperature of The Hazardous Substance Code:	Not reported
Days Hazardous Substance On Site During Year:	365
Is The Substance Protected A Trade Secret:	False
Description Of The Max Qnty Code:	1,000-4,999
Description Of The Avg Qnty Code:	1,000-4,999
Most Hazardous Ingridient:	PROPANE
United Nations/north America 4 Digit Class Number:	1075
Hazard Rank:	2
EHS Ingredient:	NONE LISTED ON SDS
Substance Pure:	True
Substance Mix:	False
First Hazardous Class Code For Chemical:	Flammable Gas
Second Hazardous Class Code For Chemical:	Acute Health Hazard
Third Hazardous Class Code For Chemical:	Not reported
Hazard Class 1 Of The Chemical:	2.1
Hazard Class 2 Of The Chemical:	6.3
Hazard Class 3 Of The Chemical:	Not reported

Additional Chemical:

Chemical Is A Toxic 313 Chemical:	N
EPA Pesticide Registration Number:	Not reported
Contains 112R:	N
Contains EHS:	N
Fertilizer:	N
Pesticide:	N
Contains 313:	N

Chemical Name:	RECOVER
Physical Description:	LIQUID
Case Number:	828002
Facility Id:	004039
Physical State Of The Substance:	2
Average Amount Possessed During The Year Code:	11
Maximum Amount Possessed During The Year Code:	11
Applicable Unit Of Measure Code:	2
Description Of The Unit Of Measure:	GALLONS
Type Code:	A

KNIFE RIVER CORVALLIS S&G (Continued) **S103067774**

Description:	ABOVEGROUND TANK

Decode for NarcdID: Current Site Summary Statement
NARR Comments: The building was constructed in the 1950s and has been used by the Oregon Military Department for various military preparedness activities. An indoor firing range was located in the western portion of the building. Contamination is the result of lead dusts from firearm use migrating out of the building through ventilation systems and depositing on the roof and in nearby soils. Lead dusts deposited on the roof were then carried by storm water down to soil near the building. The focus of DEQ s review and of this closure is limited to the lead that migrated outside of the building. Only soils are believed to have been impacted by lead. Documentation was presented that shows lead in soils is non-mobile and unlikely to contaminate shallow groundwater. Lead remains present in shallow soil at levels below DEQ s risk based concentrations and does not pose a health risk under any property use scenario. No soil cleanup was conducted. Lead dusts inside the building were reportedly remediated under the oversight of the National Guard Bureau Regional Industrial Hygienist. The National Guard Bureau s self-imposed cleanup standard was the Federal Housing and Urban Development child occupied building screening level. DEQ was not involved in this work and did not review any related documentation. The property is expected to remain for occupational use and is expected to remain connected to municipal water. DEQ has only evaluated lead dusts from the former indoor firing range. No other identification or assessment of potential sources of contamination has been evaluated by DEQ.

Remark:	133 dispatched non emergent to a reported fluid spill. There were no fluids spilled as this was a memorial flame that uses natural gas to to fuel the flame. The weather caused the flame to extinguish and natural gas was still feeding the memorial or prop. 133 shut the natural gas off to the memorial at the memorial. See Basic Report

Remark:	133 responded to a reported odor of ''gas''. 133 arrived to the national guard armory on NW King Blvd. 133 noted that the memorial flame was not burning as it normally is and there was an odor of natural gas down wind. 133 provided gas monitoring throughout their time on scene with no hazardous conditions noted. There was no on site PR. 117 was able to obtain contact information for a responsible party with no contact made via phone. 133 turned the gas supply off to the memorial. 133 and 117 returned to service.

Decode for NarcdID: Contamination
NARR Comments: (3/14/2003 NS/SRS) Dry cleaners have operated at the site since the mid-1960s. In December 1999, an Environmental Site Assessment was conducted at the Kings Shopping Center, of which the dry cleaners is a part. The dry cleaners was identified as a potential source of contamination. Five shallow groundwater samples were collected from five boreholes around the site in January 2000 as part of a Phase II ESA. Perchloroethene (PCE) was detected in all five samples. Trichloroethene (TCE) and cis-1,2-dichloroethene were detected in four of the five samples. Soil was not sampled. The dry cleaner applied to DEQ's Dry Cleaner Environmental Response program in April 2000 and was accepted into the program in June 2000.

Decode for NarcdID: Pathways & Other Hazards
NARR Comments: The dry cleaners shares a building with a coin-operated laundry in the Kings Shopping Center in Corvallis. The immediate area around the intersection of Kings Blvd. and Fillmore Ave. is commercial, with apartments and residences in the surrounding area. Two schools are within 0.25 mile of the site. Dixon Creek is about 2,000 ft east of the site: the Willamette River is 5,700 ft east. Soil is a clayey silt, and shallow groundwater is encountered 8-12 feet below the surface. Groundwater flow is to the southeast. Six domestic wells are recorded within 0.5 miles of the site, but most or all of them are probably abandoned.

NARR Comments: (3/14/2003 NS/SRS) DEQ retained HartCrowser to conduct a focused Site Investigation at the cleaners. HartCrowser collected soil and groundwater samples from nine additional boreholes installed in and around the cleaners in February 2001. Four of the boreholes were upgraded into monitoring wells, and these wells were sampled in April 2001. High levels of PCE were found in the soil beneath the cleaners. PCE and TCE were detected in all of the groundwater samples, and at very high concentrations beneath the cleaners and to the south of the cleaners along Fillmore Avenue. The focused Site Investigation report was completed in June 2001. DEQ conducted additional sampling and studies to determine the extent of the contamination in groundwater in August 2001. DEQ is currently conducting a human health screening risk assessment to determine whether the contamination poses a threat to people in the area. If so, then DEQ will conduct a focused Feasibility Study to select an appropriate remedy. (2-09-05/NS/DC) There are no immediate threats currently from this site. The site is currently on a monitoring only/risk management program to keep track of the data and migration trends. (7/27/05/NS/DC)Things remain the same. The site is still on a monitoring only/risk management program to keep track of data and trends. The site will be evaluated for closure or what is needed for closure in the near future. (6/22/06/NS/DC) No changes since 7/27/05. Monitoring continues on an annual basis by DEQ.

NARR Comments: [Dec. 2010] Kings is an operating dry cleaners in a small strip shopping center in Corvallis. The project is in the DEQ Dry Cleaner Program. DEQ has conducted several assessments to determine the nature and extent of contamination. Dry cleaning solvent (PCE) has contaminated soil and groundwater beneath the shopping center and it extends off-site to the south. The plume appears relatively stable and does not appear to threaten human receptors. Groundwater monitoring is conducted annually.

NARR Comments: Large leak occurred from recirculation pump during 1986 DEQ inspection. It may have been leaking for a longer period. Approx. 2-3 gallons per hour onto a dirt floor. Leaking onto wood floor observed in some areas in 1988. This site was also listed as a medium priority for further investigation in DEQ's Anti Sapstain inventory. (5/23/07 SJS/ICP) Past anti sap stain operations involved significant quantities of PCP, used in an area with dirt or wood floors. PCP and Dioxin have been detected in soils. After soil excavation for PCP and TPH issues, dioxins remail at levels up to 2000 ppt in soils beneath former staining operations.

Decode for NarcdID: Remedial Action
NARR Comments: (5/30/91 LSK) Recommend expanded PA with soil sampling; medium priority. (12/20/06 CPJ) 3/05 14 test pits . Low levels PCP identified outside spay booth area. TPH adjacent to former ASTs. April 2005 37 tons contamianted soil excavated and transported to Coffin Butte Landfill. December 2005: Concrete floor of former spray booth removed and soils excavated to approx 5 feet to remove PCP contaminated soil. Confirmation samples below residential PRG for PCP. (5/23/07 SJS/ICP) Februry 2007: Dioxin detected in soils from 3 parts of the site, Total toxicity equivalents 9 - 2,327 ppt. (1/7/11 NR/ICP) DEQ has issued a conditional NFA for the site, which requires an Easement & Equitable Servitudes (EES) to remain on the deed. The EES requires the property to remain in commercial/industrial use, and prohibits use of groundwater on site.

Environmental Interest/Information System:

The Oregon Department of Environmental Quality (DEQ) is a regulatory agency tasked with protecting the quality of Oregon's environment. DEQ uses a combination of technical assistance, inspections, and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.
