

CLASSIFICATIONS DEFINITIONS

N/A	BABA does not apply to temporary items. The BABA preference only applies to articles, materials, and supplies that are consumed in, incorporated into, or affixed to an infrastructure project.
Exempt	BABA excludes asphalt products, cement and cementitious products, aggregates, or concrete additives.
Iron or Steel Products (I/S)	Articles, materials, or supplies that wholly or predominantly of iron or steel or a combination of both. Buy America requirements apply to any steel or iron component of a manufactured product regardless of the overall composition of the manufactured product (e.g., Buy America applies to the steel wire mesh or steel reinforcing components of a precast reinforced concrete pipe). Requires ODOT form No. 734-2126.
Construction Material (CM)	Construction materials means articles, materials, or supplies that consist of only one of the items listed in paragraph (1) of this definition, except as provided in paragraph (2) of this definition. To the extent one of the items listed in paragraph (1) contains as inputs other items listed in paragraph (1), it is nonetheless a construction material. Requires ODOT Form No. 734-5378. (1) Non-ferrous metals, plastic and polymer-based products, glass, fiber optic cable, lumber, engineered wood, drywall (2) Minor additions of articles, materials, supplies, or binding agents to a construction material do not change the categorization of the construction material.
Manufactured Product (MP)	Articles, materials, or supplies that have been processed into a specific form or shape or combined with other articles, materials, or supplies to create a product with different properties than the individual articles, materials, or supplies. Currently, manufactured products fall under the 1983 FHWA waiver and do not need a Certificate of Materials Origin.

QUALIFIED PRODUCTS LIST

QPL	If the material is listed on the QPL, the classification of the material can be found on the QPL listing for the specific product submitted.
-----	--

MATERIAL CLASSIFICATION

Material codes and descriptions are referenced from AASHTOWare Reference Data. For some materials, there are multiple listings, as each subtype has a different material classification. Refer to notes, Material Classification descriptions, and QPL if applicable, to identify classification of the specific proposed product.

BABA Material Classification Guide
Oregon Department of Transportation

Disclaimer: This spreadsheet is to be used as a guide to help determine the BABA classification of installed materials. The classification of the specific product installed may differ from the classification listed on this guide. Refer to the manufacturer's information to determine the proper classification of the specific product. This Guide will be updated and amended as needed. Refer to SP00160.20 Preferences for Materials for additional information.

<u>MATERIAL CODE</u>	<u>MATERIAL DESCRIPTION</u>	<u>CLASSIFICATION</u>	<u>QPL</u>	<u>NOTES</u>
02926.41.f.00	Circuit Control Devices - Electrical Splice Materials	MP		
02926.50.00.00	Illumination Lamps	MP		
02926.52.00.00	Ballasts	MP		
02926.53.a.00	High-Intensity Discharge Luminaires - General	MP		
02926.53.b.01	High-Intensity Discharge Luminaires - Classification of Luminaire Light Distribution - Vertical Light Distributions	MP		
02926.53.b.02	High-Intensity Discharge Luminaires - Classification of Luminaire Light Distribution - Candle Power	MP		
02926.53.b.03	High-Intensity Discharge Luminaires - Classification of Luminaire Light Distribution - Lateral Light Distributions	MP		
02926.54.a.01	LED Luminaires - General Performance Requirements - General	MP		
02926.54.a.02	LED Luminaires - General Performance Requirements - Finished Surface	MP		
02926.54.a.03	LED Luminaires - General Performance Requirements - Thermal Management	MP		
02926.54.a.04	LED Luminaires - General Performance Requirements - LED Driver Requirements	MP		
02926.54.a.05	LED Luminaires - General Performance Requirements - Electrical Parts and Safety Testing	MP		
02926.54.a.06	LED Luminaires - General Performance Requirements - Identification and Labeling	MP		
02926.54.a.07	LED Luminaires - General Performance Requirements - Surge Protection	MP		
02926.54.a.08	LED Luminaires - General Performance Requirements - Maximum Power Consumption	MP		
02926.54.b.00	LED Luminaires - LED Luminaire Types	MP		

BABA Material Classification Guide
Oregon Department of Transportation

<u>MATERIAL CODE</u>	<u>MATERIAL DESCRIPTION</u>	<u>CLASSIFICATION</u>	<u>QPL</u>	<u>NOTES</u>
02926.54.b.01	LED Luminaires - LED Luminaire Types - LED Luminaire on Traffic Signal Supports	MP		
02926.54.b.02	LED Luminaires - LED Luminaire Types - LED Luminaire on Freeway Interchange Lighting Systems	MP		
03010.10.00.00	Barbed Wire	I/S		
03010.20.00.00	Woven Wire Fabric	I/S		
03010.21.00.00	Wildlife Wire Fabric	I/S		
03010.30.00.00	Chain Link Fabric, Ties, and Tension Wire	I/S		
03010.31.00.00	Pickets	CM		
03010.40.00.00	Vinyl Clad Fabric	MP		
03010.50.00.00	Metal Fence Posts, Braces, and Appurtenances	I/S		
03010.60.00.00	Fence Gates and Hardware	I/S		
03020.10.00.00	Commercially Manufactured Compost	Exempt		
03020.10.00.00	Commercially Manufactured Compost	Exempt
