## 2014 OREGON TRAFFIC CRASH SUMMARY

## **Oregon Department of Transportation**

Transportation Development Division
Crash Analysis and Reporting Unit
555 13<sup>th</sup> Street NE, Suite 2
Salem, OR 97301-4178

Robin Ness Manager

February 2016

The Crash Analysis and Reporting Unit collects data and publishes statistics for reported motor vehicle traffic crashes per ORS 802.050(2) and 802.220(6). The data supports various local, county, and state traffic safety programs; engineering and planning projects; legislative concepts; and law enforcement services.

Legally reportable motor vehicle traffic crashes are those involving death, bodily injury, or damage to personal property in excess of \$500 (for crashes that occurred prior to 9/01/1997) or \$1,000 (for crashes that occurred between 9/01/1997 and 12/31/2003). As of January 1, 2004, drivers are required to file an Accident and Insurance Report Form with DMV within 72 hours when: if injury or death resulted from the accident; damage to the driver's vehicle is over \$1,500; damage to any vehicle is over \$1,500 and any vehicle is towed from the scene as a result of said damage; or damage to any one person's property, other than a vehicle involved in the accident, is over \$1,500. For more information on filing requirements, please contact DMV.

**Disclaimers**: The Crash Analysis and Reporting Unit is committed to providing the highest quality crash data to customers. However, because submittal of crash report forms is the responsibility of the individual driver, the Crash Analysis and Reporting Unit cannot guarantee that all qualifying crashes are represented; nor can assurances be made that all details pertaining to a single crash are accurate.

Higher numbers of crashes may be reported as of 2011, compared to earlier years. This does not necessarily reflect an increase in annual crashes. Higher numbers may result from a change to an internal process that allows the Crash Analysis and Reporting Unit to add previously unavailable, nonfatal crash reports to the annual file. Please be aware of this change when comparing pre-2011 crash statistics.

Database expansion and refinement implemented in 2002 may result in slight differences between data reported in this publication and similar information reported in year prior to 2002.

#### STATEWIDE CRASHES BY CATEGORY

## COMPARATIVE SUMMARY OF TRAFFIC CRASHES, PERSONAL INJURIES AND DEATHS 2010 TO 2014

This table lists major crash categories, total crashes for each category, and total injuries and deaths for all persons involved regardless of Participant Type. For example, in 2014, there were 981 crashes involving motorcycles, in which 940 persons were injured and 44 persons were killed. Not all casualties in those crashes were motorcyclists.

# Driver Error Tables

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS IN MOTORCYCLE CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL MOTORCYCLE CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS IN MOTOR HOME CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL MOTOR HOME CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS IN PEDALCYCLE CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL PEDALCYCLE CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS IN PEDESTRIAN CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL PEDESTRIAN CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS IN STATE HIGHWAY CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL STATE HIGHWAY CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES ALL DRIVERS IN TRUCK CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

#### MOTOR VEHICLE TRAFFIC CRASHES 2014 DRIVER ERROR TABLES DRIVERS IN FATAL TRUCK CRASHES

NOTE: Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.
