2021 OREGON TRAFFIC CRASH SUMMARY

Oregon Department of Transportation

Policy, Data, and Analysis Division Crash Analysis and Reporting Unit 555 13th Street NE, Suite 2 Salem, OR 97301-4178

> John Bonnett Manager

June 2023

The Crash Analysis and Reporting Unit collects data and publishes statistics for reported motor vehicle traffic crashes per ORS 802.050(2) and 802.220(6). The data supports various local, county, and state traffic safety programs; engineering and planning projects; legislative concepts; and law enforcement services.

Legally reportable motor vehicle traffic crashes are those involving death, bodily injury, or damage to personal property in excess of \$500 (for crashes that occurred prior to 9/01/1997) or \$1,000 (for crashes that occurred between 9/01/1997 and 12/31/2003). As of January 1, 2004, drivers are required to file an Accident and Insurance Report Form with DMV within 72 hours when: injury or death resulted from the accident; damage to the driver's vehicle is over \$1,500; damage to any vehicle is over \$1,500 and any vehicle is towed from the scene as a result of said damage; or damage to any one person's property, other than a vehicle involved in the accident, is over \$1,500. As of 01/01/2018, the damage threshold was raised to \$2,500. For more information on filing requirements, please contact DMV at https://www.oregon.gov/ODOT/DMV/Pages/index.aspx.

Disclaimers: The Crash Analysis and Reporting Unit is committed to providing the highest quality crash data to customers. However, because submittal of crash report forms is the responsibility of the individual driver, the Crash Analysis and Reporting Unit cannot guarantee that all qualifying crashes are represented; nor can assurances be made that all details pertaining to a single crash are accurate.

Effective for 2015 data, "property damage only" (PDO) was discontinued as a "crash severity" option for Pedestrian and Pedalcycle-Involved motor vehicle crashes. There is no legal requirement, nor option, for bicyclists and pedestrians to report when they're involved in a motor vehicle crash. In the absence of formal reporting from these participants, a decision had to be made regarding their injury severity. It was determined that, as vulnerable road users, bicyclists and pedestrians must receive at least a "possible injury" in collisions with motor vehicles. Expect data for this Injury category to increase.

Effective for 2016 data, "property damage only" (PDO) crash data collection was reduced for vehicles and participants. This decision was made to meet customer demands to expedite completion of annual data files. PDO crash level data is coded in its entirety. PDO vehicle data is limited to two vehicles, and to these data elements: Vehicle Type, Movement, Action and Safety Equipment counts. PDO Participant records are limited to the first two drivers, and to BAC, Alcohol, Drug, and Marijuana Use. The remaining vehicle and participant fields are populated with default or "unknown" codes. Please keep this change in mind when comparing pre-2016 PDO vehicle and participant data.

STATEWIDE CRASHES BY CATEGORY

SUMMARY OF TRAFFIC CRASHES, PERSONAL INJURIES AND DEATHS* 2017 to 2021

This table presents total crashes by category, along with total injuries and deaths, for **all** crash participants. For example, in 2021, there were **915** crashes involving Motorcycles, in which **932** persons were injured and **79** persons were killed. *Not all of the persons injured or killed were motorcyclists*.

		Cl	RASHE	S			١N	IJURIE	S		DEATHS

SUMMARY OF PERSONAL INJURIES AND DEATHS BY SELECTED PARTICIPANT TYPE* 2017 to 2021

This table presents Participant Types corresponding to several categories shown above, with injuries and deaths <u>limited to these Participant Types</u>. For example, of the **932** persons injured in Motorcycle crashes during 2021 (above), **799** were motorcyclists. Of the **84** persons killed, **83** were motorcyclists.

Driver Error Tables

MOTOR VEHICLE TRAFFIC CRASHES 2021 DRIVER ERROR TABLES All Drivers

NOTES: As of 2016, Participant Error and Age are no longer collected for PDO crashes. PDO drivers are grouped in the "Not Stated" column, "With No Error" row. Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

MOTOR VEHICLE TRAFFIC CRASHES 2021 DRIVER ERROR TABLES Drivers in Fatal Crashes

NOTES: As of 2016, Participant Error and Age are no longer collected for PDO crashes. PDO drivers are grouped in the "Not Stated" column, "With No Error" row. Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

MOTOR VEHICLE TRAFFIC CRASHES 2021 DRIVER ERROR TABLES All Drivers in Motor Home Crashes

NOTES: As of 2016, Participant Error and Age are no longer collected for PDO crashes. PDO drivers are grouped in the "Not Stated" column, "With No Error" row. Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

MOTOR VEHICLE TRAFFIC CRASHES 2021 DRIVER ERROR TABLES All Drivers in State Highway Crashes

NOTES: As of 2016, Participant Error and Age are no longer collected for PDO crashes. PDO drivers are grouped in the "Not Stated" column, "With No Error" row. Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

MOTOR VEHICLE TRAFFIC CRASHES 2021 DRIVER ERROR TABLES Drivers in Fatal Truck Crashes

NOTES: As of 2016, Participant Error and Age are no longer collected for PDO crashes. PDO drivers are grouped in the "Not Stated" column, "With No Error" row. Up to three errors per driver are coded for a given crash. However, only the first, most relevant error per driver is represented on this report, to avoid counting the same driver multiple times. This results in under-reporting of total errors. For total errors by age group, please request a CDS300 report.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.

NOTES: "This Year To Date" represents crashes entered into the database as of the publication date shown next to Table 1A. "Same Period Last Year" represents all crash reports received for the previous year, including reports received after the publication date. "Major Injuries" are serious (incapacitating) injuries. "Minor Injuries" are non-incapacitating, evident injuries.
