# CONTACT INFORMATION INTERNET ACCESS

The 2011 through 2022 publication of the Transportation Volume Tables can be viewed and downloaded online at:

http://www.oregon.gov/ODOT/Data/Pages/Traffic-Counting.aspx

The individual pdf sections and maps are also available for download. Starting in 2016, an Excel version of the Traffic Tables for State Highways is available with additional data columns including Linear Reference Method (LRM), milepoint range and vehicle classification percentages. The sections, maps, and Excel version can be viewed and downloaded at:

http://www.oregon.gov/ODOT/Data/Pages/Traffic-Counting.aspx (Then click on desired document link)

Beginning with the 2017 publication, the Transportation Volume Tables will only be available for viewing and download.

To have your name or organization added to the email publication notification list, please email <u>TrafficCounts@odot.oregon.gov</u>.

## **INTRODUCTION**

## **About the Transportation Volume Tables**

This publication is updated annually by the Transportation Systems Monitoring (TSM) Unit and contains statewide volume and class data.

### **General Data Attributes Common to All Tables**

The Annual Average Daily Traffic (AADT) volumes provided in this publication are applicable for a given **range of milepoints** that are available in the Excel download.

The *Automatic Traffic Recorder (ATR)* locations provide volume traffic data all year round and include all days. Some ATR locations provide class data (*the Automatic Vehicle Classifier (AVC)*) or speed and length data.

Each *Vehicle Classification* breakdown was derived from a twenty-four hour manual count, forty-eight hour tube count, or permanent Automatic Vehicle Classifier.

The Vehicle Classification terminology in this publication is in accordance with those defined by the Federal Highway Administration (FHWA) and is as follows:

<u>Class 1: Motorcycles and Scooters</u> -- All two or three-wheeled motorized vehicles. Typical vehicles in this category have saddle type seats and are steered by handle bars rather than a wheel. This category includes motorcycles, motor scooters, mopeds, motor-powered bicycles, and three-wheel motorcycles.

<u>Class 2: Passenger Cars</u> -- All sedans, coupes, station wagons, and minivans manufactured primarily for the purpose of carrying passengers. This includes passenger cars pulling recreational or other light trailers.

<u>Class 3: Other Two-Axle, Four-Tire Single Unit Vehicles</u> -- All two-axle, four-tire vehicles, other than passenger cars. Included in this classification are pickups, panels, vans, and other vehicles such as campers, motor homes, ambulances, hearses, and carryalls. Other two-axle, four-tire single unit vehicles pulling recreational or other light trailers are included in this classification.

<u>Class 4: Buses</u> -- All vehicles manufactured and licensed as traditional passenger-carrying buses with two axles and six tires or three or more axles. This category includes only traditional buses (including school buses) functioning as passenger-carrying vehicles. All two-axle, four-tire minibuses should be classified as other two-axle, four-tire single unit vehicles. Modified buses should be considered to be a truck and be appropriately classified.

<u>Class 5: Two-Axle, Six-tire, Single Unit Trucks</u> -- All vehicles on a single frame, including trucks, camping and recreation vehicles, motor homes, etc., having two axles and dual rear wheels.

<u>Class 6: Three-Axle Single Unit Trucks</u> -- All vehicles on a single frame, including trucks, camping and recreational vehicles, motor homes, etc., having three axles.

<u>Class 7: Four or More Axle Single Unit Trucks</u> -- All trucks on a single frame with four or more axles.

<u>Class 8: Four or Less Axle Single Trailer Trucks</u> -- All vehicles with four or less axles consisting of two units, one of which is a tractor or straight truck power unit.

<u>Class 9: Five-Axle Single Trailer Trucks</u> -- All five-axle vehicles consisting of two units, one of which is a tractor or straight truck power unit.

<u>Class 10: Six or More Axle Single Trailer Trucks</u> -- All vehicles with six or more axles consisting of two units, one of which is a tractor or straight truck power unit.

<u>Class 11: Five or Less Axle Multi - Trailer Trucks</u> -- All vehicles with five or less axles consisting of at least three units, one of which is a tractor or straight truck power unit.

<u>Class 12: Six-Axle Multi - Trailer Trucks</u> -- All six-axle vehicles consisting of at least three units, one of which is a tractor or straight truck power unit.

<u>Class 13: Seven or More Axle Multi - Trailer Trucks</u> -- All vehicles with seven or more axles consisting of at least three units, one of which is a tractor or straight truck power unit.

In reporting information regarding trucks and their configuration, the following additional criteria are used:

- Truck tractor units traveling without a trailer are considered single unit trucks.
- Vehicles are defined by the number of axles in contact with the roadway. Therefore, "floating" axles are counted only when in the down position.
- The term "trailer" includes both semi- and full trailers.

#### **Section I**

### Introduction to the Traffic Volumes on the State Highway System

This section contains general information regarding the State Highway numbering systems. The highway numbers shown throughout this publication are the Oregon Department of Transportation (ODOT) internal highway numbers called the ODOT Highway Number. These numbers are not what you see on road signs when driving on our state highways.

The following are the Highway Cross Reference and other tables provided in Section I:

Table IIInterstate Route Number, Highway Name, and ODOT Highway Num	ber
Table III US Route Number, Highway Name, and ODOT Highway Num	ıber
Table IVOregon Route Number, Highway Name, and ODOT Highway Num	abei
Table V	dule

#### Section II

### **Traffic Volumes on State Highways**

This section contains a listing of <u>Annual Average Daily Traffic (AADT) volumes</u> at various milepoints along the highways, and includes all vehicle totals in both directions, unless identified as one-way traffic.

We typically collect traffic counts on one third of State Highways every year and adjust them to AADT. The AADTs for the rest of the State Highways were adjusted to reflect area traffic growth trends. We did not count in 2020. In 2021 and in 2022, we counted extra locations to get caught up on the three year schedule. AADTs were derived from permanent count station data, or forty-eight hour tube count data, or twenty-four hour manual count data.

When a new highway is completed and opens to traffic for only part of the year, the AADT as given in this tabulation is presented as if the facility was open to traffic for the entire year.

#### Section III

#### Traffic Trends at Automatic Traffic Recorder Stations

This section contains a <u>Summary of Traffic Data</u> collected at Automatic Traffic Recorder Stations during the past ten years. Stations with less than ten years of historical data are shown from the date of installation to the present date. The data includes yearly comparisons of AADT, seasonal variation by months, peak days, and peak hours. When a new highway is completed and opens to traffic for only part of the year, or an existing ATR is operational for only part of the year, only certain table information is provided. As of 2015, the vehicle classes no longer appear in this document. Vehicle class information for all the state traffic locations instead of only at the ATRs can be found at:

### https://highway.odot.state.or.us/cf/highwayreports/traffic\_parms.cfm

Each vehicle classification breakdown was derived from a twenty-four hour manual count, forty-eight hour tube count, or permanent Automatic Vehicle Classifier.

Asterisk clusters (\*\*\*) are used to indicate items that were out of the norm or unavailable. Some ATRs were under construction for too much of the year to have critical hour data or to be reasonably used for seasonal factoring. Others have data, but are inappropriate for use because of events such as fires or landslide closures.

### **2022 TREND DATA**

Gasoline distributed to retail dealers decreased 2.23 percent versus 2021.

Diesel Fuel distributed to retail dealers decreased 1.83 percent versus 2021.

The motor vehicle registrations increased 2.91 percent versus 2021. Historical motor vehicle registration data may also be found on the web at: http://www.oregon.gov/odot/dmv/pages/news/vehicle stats.aspx

The Vehicle Miles of Travel (VMT) decreased 0.45 percent on State Highways versus 2021. Historical VMT data may also be found on the web at:

http://www.oregon.gov/ODOT/Data/Pages/Traffic-Counting.aspx (Then click on link: Vehicle Miles Traveled)

Oregon State Highway Vehicle Miles Traveled			
Year	VMT	% Change	
2022	21,917,100,000	-0.45%	
2021	22,016,400,000	12.86%	
2020	19,506,900,000	-10.77%

(Rounded to the nearest 100,000)

#### **SECTION I**

### **INTRODUCTION TO**

### TRAFFIC VOLUMES ON THE STATE HIGHWAY SYSTEM

Section I contains a tabulation of vehicular traffic at various locations on the State Highway System. This tabulation is designed for use with the State Highway Numbering System.

This section includes:

- Cross Reference Table I: <u>ODOT State Highway Numbers</u>, Highway Names, and Highway Route Numbers, beginning on page 10.
- Cross Reference Table II: <u>Interstate Route Numbers</u>, Highway Names, and ODOT Highway Numbers, beginning on page 14.
- Cross Reference Table III: <u>US Route Numbers</u>, Highway Names, and ODOT Highway Numbers, beginning on page 14.
- Cross Reference Table IV: <u>Oregon Route Numbers</u>, Highway Names, and ODOT Highway Numbers, beginning on page 15.
- Table V: State Highway Count Schedule, beginning on page 20.

This publication lists each highway in the order of its State Highway Numbers. The following reference lists the State Highway Number, Highway Name, and Highway Route Numbers that traverse all or a portion of each State Highway. A route common with another for less than one mile is not shown.

### **TABLE V - HIGHWAY COUNT SCHEDULE**

The traffic counting program on the state highway system is conducted over a three year period. Due to COVID-19 restrictions, ODOT did not count in 2020. In 2021 and in 2022, ODOT counted extra locations to get caught up on the

three year. The tabulation below lists the year that each highway was last counted.

HWY	HIGHWAY NAME	YEAR

### **GLOSSARY**

#### **ACRONYMS**

- AADT Annual Average Daily Traffic the total traffic for the year divided by 365 (or 366 in a leap year). In most cases, the AADT is obtained by adjusting a 48-hour traffic count by applying four factors. The first two factors are seasonal and day of week factors, which account for temporal variations in traffic. They are developed from permanent traffic recording stations. The third factor is an axle factor, which is used to account for vehicles with more than two axles. This factor is obtained from vehicle classification counts. For counts not taken during the latest data year, the fourth factor is a growth factor.
- ATR Automatic Traffic Recorder a permanently installed, continuous counting device. Includes AVC and WIM sites.
- AVC Automatic Vehicle Classifier a permanently installed, continuous counting and classification device.
- CCS Continuous Count Station Volume Counts derived from permanent counters (ATRs), for a period of 24-hours each day over 365 days for the reporting year.
- FHWA Federal Highway Administration.
- VMT Vehicle Miles of Travel (or Vehicle Miles Traveled) the sum of distances traveled by all motor vehicles in a specified system of highways for a given period of time.

#### **SYMBOLOGY**

- \* In Section I, an asterisk (\*), appearing to the left of a count location description, indicates the location of an automatic traffic recorder station.
- \*\*\* In Section III, an asterisks cluster (\*\*\*), appearing under "Historical Traffic Data" indicates the recorder was inoperative or experienced atypical traffic during the respective time period.
