

Seed Files

ODOT provides seed files for several different products in two locations: within the ODOT_CONNECT WorkSpace - accessible when you have a DGN open and wish to create a new DGN, and also in the ODOT ProjectWise datasource - for when you wish you use ProjectWise to create a new document. The table below describes the intended use for each different seed file.

File Name	Description
2022-06_Standard_Drawing_List_CONNECT.xlsx	Template for Linked Spreadsheet of Project Standard Drawings
2022-12_Standard_Drawing_List_CONNECT.xlsx	Template for Linked Spreadsheet of Project Standard Drawings
