Pushbutton Mount (H-Frame) .................................................... 44
Product Evaluation

This list contains the standards for all Blue Sheets products. It is intended to be used by:

- The manufacturer/supplier when submitting a product to ODOT for evaluation for use on future projects
- The contractor when submitting a write-in product on the Blue Sheets for evaluation for immediate use on a project under contract

Standards may be modified, added, or deleted at any time, so it is important to always download the most current copy from the website each time.

Product Evaluation for Immediate Use (Contractor Write-in Request)

The Contractor will submit the required documents as stated in the “To Request TRS Evaluation” listed for each product in this document. Typically only a Manufacturer’s product data sheet (cut sheet) showing compliance with the standards is required, but depending on the product, additional information may be required or requested, such as independent test results, installation instructions, samples, Material Safety Data Sheets, etc.

Note that write-in requests:

- may be added to the Blue Sheets for future use at the Traffic Standards Section (TRS) discretion
- may not be allowed for certain items and will be clearly marked as such

Product Evaluation for Future Use (Manufacturer/Supplier Request)

Product evaluation requests fall into two classes:

- **EQUAL**: products similar to products that are currently used by the Oregon Department of Transportation (ODOT) and have required standards listed in the Blue Sheets. The Manufacturer/Supplier will submit the required documents as stated in the “To Request TRS Evaluation”
- **NEW**: products not addressed by current specifications or standards. The Manufacturer/Supplier will submit the all relevant documentation on product.

Typically only a Manufacturer’s product data sheet (cut sheet) showing compliance with the standards is required, but depending on the product, additional information may be required or requested, such as independent test results, installation instructions, samples, Material Safety Data Sheets, etc.

Products will be evaluated by ODOT Traffic Engineers, Traffic Signal Technicians, and Electricians. The Manufacturer/Supplier will be notified of the final product status.
Product Status

1. **Qualified:** Product meets all applicable standards and is placed on the Blue Sheets

2. **Trial Use Only:** products will be allowed a trial installation on one project only, recommended for a demonstration project, or recommended as an experimental feature. They will be monitored during installation and for a limited performance period. The Traffic Standards Section (TRS) will locate an active or future ODOT project which will incorporate the product. This will typically be accomplished within one year of notice of “trial use only” status.

3. **Rejected:** product does not meet standards, has failed performance testing, or the requested product information is not provided within three (3) months of the request

Unsatisfactory Performance, at any time, will result in rejection of a product and removal from the Blue Sheets.
## Temporary Features

### Temporary Covers

<table>
<thead>
<tr>
<th>Standard (Three Categories):</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pushbutton</strong></td>
</tr>
<tr>
<td>• Yellow prefabricated bag</td>
</tr>
<tr>
<td>• Fits over entire pushbutton and pushbutton sign</td>
</tr>
<tr>
<td>• Is imprinted with “NOT IN SERVICE”</td>
</tr>
<tr>
<td><strong>Pedestrian Signal</strong></td>
</tr>
<tr>
<td>• Yellow prefabricated nylon bag</td>
</tr>
<tr>
<td>• Completely cover pedestrian signal</td>
</tr>
<tr>
<td>• Include a fine mesh insert for each signal indication for signal testing</td>
</tr>
<tr>
<td>• Have integral elastic bands and clips to secure the covers to the signal</td>
</tr>
<tr>
<td>• Text not allowed on the bag</td>
</tr>
<tr>
<td><strong>Vehicle Signal</strong></td>
</tr>
<tr>
<td>• Yellow prefabricated nylon bag</td>
</tr>
<tr>
<td>• Completely cover visors and cover the backboard</td>
</tr>
<tr>
<td>• Include a fine mesh insert for each signal indication for signal testing</td>
</tr>
<tr>

</tr>
<tr>
<td>• Text not allowed on the bag</td>
</tr>
</tbody>
</table>

### To Request TRS Evaluation:

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Temporary Meter Base Socket

<table>
<thead>
<tr>
<th>Standard:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Compliance with UL 414 “Standard for Meter Sockets”</td>
</tr>
<tr>
<td>• Compliance with ANSI C12.7 “American National Standard for Requirements for Watthour Meter Sockets”</td>
</tr>
<tr>
<td>• Stainless steel or powder coated base (coated according to Section 00593 of the Oregon Standard Specifications For Construction)</td>
</tr>
<tr>
<td>• Overhead surface mount application</td>
</tr>
<tr>
<td>• UL Listed</td>
</tr>
</tbody>
</table>

### To Request TRS Evaluation:

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
Temporary Service Cabinet

**Standard:**

- Overhead surface mount application
- Construct cabinet from 14 gauge Type 304 stainless steel, or 10 gauge sheet steel
- Hot dip galvanize after fabrication according to 02530.70, or 8 gauge 5052 - H32 powder coated aluminum (coated according to Section 00593 of the Oregon Standard Specifications For Construction)
- Cabinets shall be weatherproof, NEMA type 3R rated
- The internal wiring of cabinets shall be done by a UL listed facility. Cabinets shall conform to one or more of the following standards where appropriate: UL 50 “Cabinets and Boxes”, UL 67 “Panel Boards” or UL 869A “Service Equipment”
- Live parts exposed shall have a dead-front panel installed with cutouts for operating handles
- Dead-front panels up to and including 120 square inches in size shall have a minimum of three holding studs
- Install panels larger than 120 square inches in size using an adequate number of studs to maintain rigidity of the panel
- Construct the dead-front panels of stainless steel or galvanized steel and treat all cut galvanized steel edges with zinc-rich paint
- Prime galvanized steel dead-front panels with vinyl wash primer and finish with exterior polyurethane enamel. The finish color of galvanized steel shall be grey.
- Mounting pans or false backs are required for circuit breakers, contactors, relays, switches, transformers or other types of electrical equipment. They shall be securely mounted inside the cabinet.
- Provide each cabinet with a latching device for a standard Agency padlock
- **Circuit Breakers** –
  - Compliance with UL 489 “Molded-Case Circuit Breakers, Molded-Case Switches, and Circuit-Breaker Enclosures”
  - UL Listed
  - Of the rating specified on Standard Drawing TM485
  - Unenclosed, molded case bolt-on type with end conductor terminals, suitable for surface mounting in the cabinet on a false back or bracket

**Drawing:**

![Drawing of Temporary Service Cabinet](image)

- Includes circuit breakers, contactors, test switches, neutral and ground bars as shown in Standard Dwg TM485

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
Temporary Precast 332S Foundation

**Standard:**
- Constructed of precast concrete, polymer concrete, polymer, or fiberglass
- Skid resistant surface
- 88 inches x 46 inches minimum
- Fit the base dimensions of a model 332, 332S, 334 or 340 controller cabinet
- Minimum 1.6 square foot opening for conduit entrance and ground rod

**Drawing:**

Note: Additional details for installing the controller cabinet on this foundation are shown in Standard Detail DET4415

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
## Poles and Pedestal

### Chase Nipple

**Standard:**
- Galvanized Steel
- 1 inch diameter (for wire entrances on mast arm or pole)
- 2 ½ inch diameter (for terminal cabinet)
- Note: Chase nipple used for pushbuttons is manufacturer supplied with the pushbutton
- UL Listed

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Pipe Plugs

**Standard:**
- Hexagon Head
- 304/316 Stainless Steel

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Pedestal (Pedestrian)

**Standard:**
- Frangible type
- Cast aluminum
- Includes a removable access plate
- Threaded connection to accept a 4 inch diameter nominal steel pipe
- Bolts, nuts and washers shall conform to 02560.20 and shall be galvanized according to 02560.40
- Compliance with NCHRP 350 or MASH and FHWA approved

**Drawing:**
- Meet requirements shown in standard drawing TM457

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
## Pedestal (Vehicle)

### Standard:
- Transformer base shall be constructed to bolt to shaft flanges
- Cast aluminum
- Bases shall be square with rounded corners, tapered from the base to the top and approximately 20 inches in height
- Includes a removable access plate
- Includes a 4 inch diameter galvanized steel pipe with welded base plate
- Bolts, nuts and washers shall conform to 02560.20 and shall be galvanized according to 02560.40
- Compliance with NCHRP 350 or MASH and FHWA approved

### Drawing:
- Meet requirements shown in standard drawing TM457

### To Request TRS Evaluation:
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
# Conduits and Appurtenances

## Conduit (Rigid Non-Metallic)

<table>
<thead>
<tr>
<th>Standard (Four Categories):</th>
<th></th>
</tr>
</thead>
</table>
| **PVC**                     | - Compliance with Article 352 of the NEC  
- Compliance with UL 651 “Standard for Schedule 40, 80 Type EB and A Rigid PVC Conduit and Fittings”  
- Heavy wall, extruded, rigid polyvinyl chloride (PVC) schedule 40  
- UL listed and labeled  
- Includes coupling designed for below ground, direct buried  |
| **Liquid-Tight Flexible**   | - Compliance with Article 356 of the NEC  
- Compliance with UL 1660 “Liquid-Tight Flexible Non-metallic Conduit”  
- UL listed and labeled  |
| **High Density Polyethylene (HDPE)** | - Compliance with Article 353 of the NEC  
- Compliance with UL 651A “Schedule 40 and 80 High Density Polyethylene (HDPE) Conduit”  
- UL listed and labeled  
- (Schedule 40) equivalent minimum  
- Conduit shall lay flat when unwound  
- Includes coupling designed for below ground, direct buried  |
| **Fiberglass**              | - Compliance with Article 355 of the NEC  
- Compliance with UL 2420 “Belowground Reinforced Thermosetting Resin Conduit (RTRC) and fittings”  
- UL listed and labeled  
- Schedule 40  
- Includes coupling designed for below ground, direct buried  |

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
## Conduit Bushings

**Standard:**
- Compliance with NEMA TC-3 “Polyvinyl Chloride (PVC) Fittings for Use with Rigid PVC Conduit and Tubing”
- UL listed
- PVC push on end bell style

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Conduit Plug

**Standard:**
- Compliance with ASTM D3575 “Standard Test Methods for Flexible Cellular Materials made from Olefin Polymers”
- Compliance with ASTM D4819 “Specification for Flexible Cellular Materials Made From Polyolefin Plastics”
- Designed to keep dust and debris out of conduit
- Closed cell polyethylene material
- Preformed sections (Spray foam not allowed)
- Plug length of 3 inch and a plug diameter 1/2 inch larger than the conduit diameter being plugged
- Shall be non-gassing

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Condulet (Conduit Body)

**Standard:**
- Compliance with UL 514B “Conduit, Tubing, and Cable Fittings”
- Compliance with NEMA Standard 250, Type 3R Enclosure Rating
- Hot-dip galvanized malleable iron
- Corrosion resistant cover
- Moisture proof gasket

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Expansion Fitting

**Standard:**
- Compliance with Article 355.44 of the NEC
- Fiberglass expansion joint compatible with schedule 40 fiberglass conduit meeting UL 2420 “Belowground Reinforced Thermosetting Resin Conduit (RTRC) and fittings” requirements
- UL listed
- The expansion fitting shall permit a 4 inch conduit movement minimum

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Weatherhead

**Standard:**
- Project specific as required by the power company. See electrical permit.

**To Request TRS Evaluation:**
- N/A

### Pull Line

**Standard:**
- Polyethylene or polypropylene pull rope
- 1,200 pound minimum break strength
- Resistant to mildew and rot

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Underground Warning Tape

**Standard:**
- Red polyethylene film
- 6 inches wide
- 4 mils thick minimum
- Imprinted with the following or similar legend: "CAUTION CAUTION CAUTION BURIED ELECTRIC LINE"

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
## Junction Boxes

### Junction Box/Handhole (Concrete and Hybrid)

<table>
<thead>
<tr>
<th><strong>Standard:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Rated Tier 22 for the box and Tier 15 for the lid according to ANSI/SCTE 77-2010</td>
</tr>
<tr>
<td>• Boxes and covers shall be constructed of precast concrete, polymer concrete, polymer, or fiberglass</td>
</tr>
<tr>
<td>• Open bottom, water meter type boxes</td>
</tr>
<tr>
<td>• Polymer material shall consist of aggregate bonded with a polyester resin and reinforced with fiberglass strands</td>
</tr>
<tr>
<td>• Materials shall be resistant to temperature extremes and ultraviolet light exposure</td>
</tr>
<tr>
<td>• The box and cover shall be gray in color</td>
</tr>
<tr>
<td>• Covers shall have a skid-resistant surface, and bolt to the junction box with stainless steel hex-head bolts</td>
</tr>
<tr>
<td>• Covers shall be recessed and fit the box so that when the cover is set in the box, the top of the cover shall be even with the top of the box</td>
</tr>
<tr>
<td>• Covers shall have the legend &quot;SIGNALS&quot;, &quot;STREET LIGHTING&quot;, etc. stamped or embossed on the cover as appropriate. Letter size shall be no smaller than 1/16 of the box width.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Drawing:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Meet the dimension requirements shown in Standard Drawing TM472</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>To Request TRS Evaluation:</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above</td>
</tr>
<tr>
<td>• Independent test results showing compliance with ANSI/SCTE 77-2010</td>
</tr>
</tbody>
</table>
## Miscellaneous Mountings

### Radio Mount

**Standard:**
- Attaches to a pole and accepts one 1½ inch tube to mount a radio
- See vehicle signal bracket, but without the tube and arms

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Video Detection Mount

**Standard:**
- One piece with 23 inch tube
- Capable of mounting on vertical pole, mast arm or luminaire arm

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
## Span Wire Equipment

### Cable Ties

**Standard:**
- Compliance with UL 62275 “Cable Management Systems – Cable Ties for Electrical Installations”
- UL recognized
- Heavy-duty UV resistant black plastic or nylon
- Self-locking straps approximately 5/16 inch in width
- Serrated gripping surfaces through a binding buckle
- Minimum tensile strength shall be 45 pounds

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Messenger Cable

**Standard:**
- Galvanized steel seven-strand
- Compliance with ASTM A 475 “Standard Specification for Zinc-Coated Steel Wire Strand”
- Utility grade
- Class A coating
- 3/8 inch diameter
- 11,500 lb break strength

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Tether Cable

**Standard:**
- Galvanized steel seven-strand
- ¼ inch diameter
- Compliance with ASTM A 475 “Standard Specification for Zinc-Coated Steel Wire Strand”
- Common grade
- Class A coating
- 1900 lb break strength

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
**Stabilizer Cable**

**Standard:**
- Galvanized steel seven-strand
- ¼ inch diameter
- Compliance with ASTM A 475 “Standard Specification for Zinc-Coated Steel Wire Strand”
- Common grade
- Class A coating
- 1900 lb break strength

<table>
<thead>
<tr>
<th>To Request TRS Evaluation:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above</td>
</tr>
</tbody>
</table>

**Eyebolt**

**Standard:**
- Hot dip galvanized steel
- Compliance with ASTM A307 “Standard Specification for Carbon Steel Bolts, Studs , and Threaded Rod 60000 PSI Tensile Strength”
- Oval eyebolts
- ½ inch (for tether cable attachment) or ¾ inch diameter (for messenger or tether cable attachment)
- Minimum tensile strength of 20,050 lbs

<table>
<thead>
<tr>
<th>To Request TRS Evaluation:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above</td>
</tr>
</tbody>
</table>

**S-Hook**

**Standard:**
- This is a state-furnished item only. Contact TSSU to obtain S-hook on project.

<table>
<thead>
<tr>
<th>To Request TRS Evaluation:</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
</tr>
</tbody>
</table>

### Turn Buckle

**Standard:**
- Hot dip galvanized steel
- Compliance with Federal Specifications FF-T-791b, Type 1, Form 1, class 4
- Minimum working load of 2200 lbs
- 6 inch take-up minimum
- ½ inch diameter

**Drawing:**
- Requirements as shown in Standard Drawing TM452

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Strandvise

**Standard:**
- Hot dip galvanized steel
- ¾ inch strand (for messenger cable) or ¼ inch strand (for tether cable)
- Universal Grade (for messenger cable) or All Grades (for tether cable)
- Rated to hold minimum 90% of the rated break strength of the strand used

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Span Wire Hanger

**Standard:**
- Cast bronze
- Attaches to the messenger cable with two “U” bolts
- A wire outlet body with a clevis pin through adjustable slot
- All fasteners shall be type 304/316 stainless steel
- All fasteners shall have either square or hex heads
- Paint the mounting hardware with two coats of zinc-rich aluminum paint
- Includes 1 ½” galvanized Rigid Metallic Conduit (length as required to achieve proper mounting height)
  - Compliance with UL 6 “Electrical Rigid Metal Conduit-Steel”
  - UL listed and labeled
  - Galvanized rigid metal manufactured of mild steel

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Tether Clamps

**Standard:**
- Fitting on bottom of span mounted signal or sign
- 1½ inch galvanized steel pipe or galvanized metal conduit with plate welded on bottom
- Tether wire keeper bolted to plate
- Hot dip galvanized after fabrication
- All fasteners type 304/316 stainless steel

**Drawing:**
- Meet requirements shown on Standard Drawing TM463

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Tri-Stud Adaptor

**Standard:**
- Cast aluminum with steel insert
- Powder coated black (coated according to Section 00593 of the Oregon Standard Specifications For Construction)
- Three bolts, split washers, nylon insert lock-nuts of stainless steel with 2 stainless steel backing washers

**Drawing:**
- Meet requirements shown on Standard Drawing TM463

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
# Cables, Wires, Grounding/Bonding & Appurtenances

## Bond Wire

<table>
<thead>
<tr>
<th>Standard:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Compliance with ASTM B3 “Standard Specification for Soft of Annealed Copper Wire”</td>
<td></td>
</tr>
<tr>
<td>• Compliance with ASTM B8 “Standard Specification for Concentric-Lay-Stranded Copper Conductors, Hard, Medium Hard, or Soft”</td>
<td></td>
</tr>
<tr>
<td>• Compliance with ASTM B33 “Standard for Tin-Coated Soft or Annealed Copper Wire for Electrical Purposes”</td>
<td></td>
</tr>
<tr>
<td>• Minimum size of No. 6 AWG</td>
<td></td>
</tr>
<tr>
<td>• Bare stranded copper wire (for use outside of conduits) or insulated stranded copper wire UL listed as THWN (for use inside of conduits)</td>
<td></td>
</tr>
<tr>
<td>• Insulation color shall be green</td>
<td></td>
</tr>
</tbody>
</table>

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Ground Rod

<table>
<thead>
<tr>
<th>Standard:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Compliance with UL 467 “Grounding and Bonding Equipment”</td>
<td></td>
</tr>
<tr>
<td>• Copper coated steel rod</td>
<td></td>
</tr>
<tr>
<td>• 5/8 inch diameter</td>
<td></td>
</tr>
<tr>
<td>• 8 to 10 feet long</td>
<td></td>
</tr>
<tr>
<td>• Bronze grounding wire clamp</td>
<td></td>
</tr>
<tr>
<td>• UL listed</td>
<td></td>
</tr>
</tbody>
</table>

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Ground Rod Clamp

<table>
<thead>
<tr>
<th>Standard:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Bronze</td>
<td></td>
</tr>
<tr>
<td>• Hex head bolts</td>
<td></td>
</tr>
<tr>
<td>• UL listed for direct burial</td>
<td></td>
</tr>
<tr>
<td>• Accommodate No. 6 AWG stranded wire</td>
<td></td>
</tr>
</tbody>
</table>

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Control Cable

**Standard:**
- Multi-conductor cable with assorted individual stranded copper wires
- Compliance with IMSA 19-1 or IMSA 20-1
- Outside jacket insulation shall be black in color
- UL Listed

**Drawing:**
- Individual stranded copper wires shall meet color code on standard drawing TM470

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Industrial Ethernet Cable

**Standard:**
- Water block/direct burial rated, shielded enhanced
- Category-6 cable
- 24 AWG solid bare copper conductors
- PE inner jacket
- Overall shield
- Sunlight and oil resistant PE jacket
- Terminate cable with factory installed RJ-45 connectors

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Interconnect Cable

**Standard:**
- Compliance with REA specifications PE-38 or PE-39 (water block, underground) cable
- No. 19 AWG stranded or solid individual conductors
- The cable shall contain 6 (or more) number of wire pairs

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
**TFFN Wire (Tracer/Locate Wire)**

<table>
<thead>
<tr>
<th>Standard:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Insulated stranded copper wire rated for 194 °F operation in dry locations and be UL listed as TFFN</td>
</tr>
<tr>

# Pedestrian Equipment

## Pedestrian Signal

<table>
<thead>
<tr>
<th>Standard:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Acceptable Material Types:</td>
</tr>
<tr>
<td>1. One-piece die-cast aluminum alloy housing and sealed door. Powder coated flat black to meet Federal Standard 595b-37038 (dull black) according to Section 00593 of the Oregon Standard Specifications For Construction.</td>
</tr>
<tr>
<td>2. Polycarbonate</td>
</tr>
<tr>
<td>• The housings, including doors and hoods, shall have a smooth homogeneous black finish</td>
</tr>
<tr>
<td>• All parts shall be clean, smooth, and free from flaws, cracks, blow holes, and other imperfections</td>
</tr>
<tr>
<td>• All fasteners not specifically noted as hot-dip galvanized shall be Type 304 or 316 stainless steel installed with anti-seize compound</td>
</tr>
<tr>
<td>• All fasteners shall have either square or hex heads</td>
</tr>
<tr>
<td>• provides a dustproof and weatherproof enclosure</td>
</tr>
<tr>
<td>• Allow easy access for maintenance of the interior components with the door open</td>
</tr>
<tr>
<td>• Include a hex head pipe plug with 1/4 inch drain hole drilled in the bottom of the plug when pedestrian signal heads are not utilizing the bottom opening for mounting</td>
</tr>
<tr>
<td>• Include terminal blocks to accommodate wire terminations</td>
</tr>
<tr>
<td>• one-piece z-crate or egg crate type polycarbonate plastic visor</td>
</tr>
<tr>
<td>• Include vertical (or angled) and horizontal members spaced to provide the required shielding and strength. Be held securely to the door assembly.</td>
</tr>
<tr>
<td>• The mounting shall be designed to use either a bracket assembly or a clamshell mounting</td>
</tr>
</tbody>
</table>

LED Module (Pedestrian Signal)

**Standard:**
- LED filled hand/man style
- Flange mount
- Compliance with Institute of Transportation Engineers (ITE) specifications for LED Pedestrian Signals
- Compatible with all other controller equipment
- 16 inch by 18 inch module
- LED overlaid filled countdown style. Overlaid filled hand/man on the left with countdown on the right.
- Countdown only in the flashing don't walk interval

**To Request TRS Evaluation:**

*Note: Due to testing requirement timelines, no write-in products are allowed for projects under contract – only prequalified products already listed on the blue sheets will be approved for use for projects under contract:*

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
- Installation Instructions
- Independent test results showing compliance with the standards listed above. Test results required from a Nationally Recognized Testing Laboratory (NRTL) recognized by the United States Department of Labor Occupational Safety & Heath Administration (OSHA) and ODOT:
  

  See Intertek Testing Services NA, Inc. (ITSNA) http://www.intertek-

  Directory_Traffic_Signal_Modules_Certified_Products.pdf

Pedestrian Signal Mount

**Standard:**
- 3 position terminal block
- Two-piece, cast aluminum alloy assembly
- Powder coated flat black to meet Federal Standard 595b-37038 (dull black) (coated according to Section 00593 of the Oregon Standard Specifications For Construction)
- Closed cell neoprene gasket to complete a rain tight fit

**Drawing:**
- Meet requirements as shown in standard drawing TM467

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Pushbutton

**Standard:**
- Free of levers, handles, or toggle switches externally or internally
- Direct contact type
- Push button contacts:
  - Entirely insulated from the housings and operating buttons
  - Normally open
  - Closed only when push buttons are operated by pressure
  - Restored immediately to the normal open position when pressure is released
- External Button:
  - Constructed of durable materials able to withstand the typical abuse inflicted by the general public
  - Removable from the housing with simple tools
  - At least 2 inches in diameter
  - Operate a momentary contact switch by direct contact
  - Contain a guard completely encircling the push button, and extending far enough to prevent prying under the push button
  - Resistant to damage associated to striking it with an object other than the hand

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

---

### Pushbutton Mount

**Standard:**
- Includes 9 inch x 12 inch sign
- Accommodates a 2 inch pushbutton
- Aluminum black powder coating to meet Federal Standard 595b-37038 (dull black) (coated according to Section 00593 of the Oregon Standard Specifications For Construction)
- Stainless Steel Mounting hardware
- Includes an extension bracket option that allows for proper mounting on small diameter poles (pedestrian pedestals) or to extend button to comply with ADA reach requirements

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
## Vehicle Signal Equipment

### Vehicle Signal Housing

<table>
<thead>
<tr>
<th>Standard:</th>
</tr>
</thead>
</table>
| • Acceptable Material Types:  
  2. Polycarbonate  

  • Shall be of the one-section expandable type  
  • Shall be of one-piece construction adjustable through 360 degrees about a vertical axis  
  • The design shall be such that at any time and without the use of other than simple tools, it shall be possible to convert any housing into a one-, two-, three-, four- or five-section housing by the addition or subtraction of housing sections  
  • The entire housing shall be made dust and water resistant with a gasket on each door  
  • Vehicle signal heads not utilizing the bottom opening for mounting shall have a screw hole plug installed and shall have a 1/4 inch drain hole drilled in the bottom of the plug  
  • All fasteners not specifically noted as hot-dip galvanized shall be Type 304 or 316 stainless steel installed with anti-seize compound, except for brass terminal screws  
  • All fasteners shall have either square or hex heads  
  • Signal housing doors, with visors attached, shall be capable of being opened a minimum of 90 degrees  
  • Smooth homogeneous black finish |

### To Request TRS Evaluation:

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

| • Geometrically programmed louvers  
• Capable of x degree range view cut off |

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

**Tattle Tale Lights**

<table>
<thead>
<tr>
<th>Standard:</th>
</tr>
</thead>
</table>
| • Housing of power coated aluminum, stainless steel 304/316, or UV stable polymer  
• LED display must be able to be aimed for a specific viewing angle (360 degree visibility is not permitted)  
• 2 inch diameter LED display  
• White LEDs  
• Minimum of 6 feet of factory wire  
• All nuts, bolts, and washers shall be 304/316 stainless steel  
• Can be mounted on an 1 ½ inch diameter conduit/tube (for signals mounted with an adjustable bracket assembly or span wire mount) or directly into bottom signal housing (for signals mounted with a plumbizer) |

**Drawing:**
- Meet requirements of standard detail DET4400

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
# Loop Detection

## Loop Feeder Cable

**Standard:**
- Compliance with IMSA 50-2 “Polyethylene Insulated, Polyethylene Jacketed, loop detector lead-in cable”
- No. 14 AWG (standard application) or No. 18 AWG (retro-fit application) conductor size
- UL Listed

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Loop Wire

**Standard:**
- Compliance with IMSA Specification No. 51-7 “Cross linked polyethylene insulated loosely encased in a polyvinyl chloride or a polyethylene tube loop detector wire”
- Wire and tube must be labeled
- No 14 AWG size conductor

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Loop Splice

**Standard (Two Categories):**

<table>
<thead>
<tr>
<th>Two Piece Enclosure</th>

</table>

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
# Illumination

## In-line Fuse Holder

**Standard:**

- Rated for 30 A at 600 V
- Designed to hold a 13/32 inch by 1 1/2 inch 10 A KTK type fuse
- In-line fuse connectors to be used on single phase 120/240 V and 240/480V lighting circuits shall be designed for two-pole fusing so both poles disconnect simultaneously from both legs of the line side
- The case shall be rigid plastic with a threaded coupling for joining the two halves
- When threaded together, the two halves shall completely enclose the fuse and exert pressure against a neoprene "O" ring to provide a waterproof seal
- The load side holder shall hold the fuse securely in place, so when the two halves are disconnected, the load side holder will retain the fuse
- The line side contact point shall be spring- loaded to provide pressure between the fuse and the contact points
- Wire terminals shall be set screw type rated for copper wire

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## TC Cable

**Standard:**

- Type TC cable in compliance with UL 1227 “Electrical Power and Control Cables”
- 3 conductors
- No. 10 AWG XHHW conductors
- Overall PVC jacket
- UL listed

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Photoelectric cell

**Standard:**

- Attach to a three-pole locking receptacle by a twisting motion
- Built-in surge protective device for protection from induced high voltages and follow-through currents
- Meet or exceed the requirements of ASNI C136.10 “Roadway and Area Lighting Equipment – Locking Type Photocontrol Devices and Mating Receptacles – Physical and Electrical Interchangeability and Testing”
- Factory set turn-on lights shall be 1.4 foot-candle + 0.2 foot-candle at 120V AC
- Factory set turn-on shall lights shall be 1.4 foot-candle +0.03 foot-candle at 240V AC
- Maximum off-to-on ratio shall be 1.5:1
- Shall be a cadmium-sulfide photocell encapsulated for humidity protection or a silicon junction type photo-transistor
- Designed for dual voltage operation of 105V – 285V, 60Hz
- Power consumption less than 1W
- Shall be capable of controlling a minimum mercury vapor, fluorescent or incandescent lamp load of 1000W
- Minimum operating temperature range of -40 degrees to 150 degrees Fahrenheit
- Provide a time delay circuit to prevent false turn-offs by transient light conditions
- Provide a fail-safe circuit for the lighting load to remain on or become energized if any functional failure of the photoelectric cell occurs

**To Request TRS Evaluation:**

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
# Cabinets & Appurtenances (Service, Terminal, Etc.)

## Riser Frame

**Standard:**
- Aluminum (Alloy 5052-H32 or 6061-T6) framework of 1/4 inch channel or 1/8 inch sheet stock
- One piece welded construction (for new installations) or two-piece bolt together (for retrofit)
- Anodized after fabrication
- Match the profile of the 332S cabinet bottom
- 8 inches tall

**Drawing:**

![Diagram of Riser Frame](image)

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
Base Mounted Service Cabinet

**Standard:**
- Base mounted service cabinet with integral meter base
- Construct cabinet from 14 gauge Type 304 stainless steel, or 10 gauge sheet steel
- Hot dip galvanize after fabrication according to 02530.70, or 8 gauge 5052 - H32 powder coated aluminum (coated according to Section 00593 of the Oregon Standard Specifications For Construction)
- Cabinets shall be weatherproof, NEMA type 3R rated
- The internal wiring of cabinets shall be done by a UL listed facility. Cabinets shall conform to one or more of the following standards where appropriate: UL 50 “Cabinets and Boxes”, UL 67 “Panel Boards” or UL 869A “Service Equipment”.
- Live parts exposed shall have a dead-front panel installed with cutouts for operating handles
- Dead-front panels up to and including 120 square inches in size shall have a minimum of three holding studs
- Install panels larger than 120 square inches in size using an adequate number of studs to maintain rigidity of the panel
- Construct the dead-front panels of stainless steel or galvanized steel and treat all cut galvanized steel edges with zinc-rich paint
- Prime galvanized steel dead-front panels with vinyl wash primer and finish with exterior polyurethane enamel. The finish color of galvanized steel shall be grey.
- Mounting pans or false backs are required for circuit breakers, contactors, relays, switches, transformers or other types of electrical equipment. They shall be securely mounted inside the cabinet.
- Provide each cabinet with a latching device for a standard Agency padlock
- **Circuit Breakers** –
  - Compliance with UL 489 “Molded-Case Circuit Breakers, Molded-Case Switches, and Circuit-Breaker Enclosures”
  - UL Listed
  - Of the rating specified on Standard Drawing TM485
  - Unenclosed, molded case bolt-on type with end conductor terminals, suitable for surface mounting in the cabinet on a false back or bracket

**Drawing:**
- Includes circuit breakers, contactors, test switches, neutral and ground bars as shown in Standard Dwg TM485

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Terminal Cabinet

**Standard:**
- Constructed of 1/8 inch stainless galvanized steel or powder coated aluminum (coated according to Section 00593 of the Oregon Standard Specifications For Construction)
- Allow for installation of terminal blocks
- Weatherproof fittings at the bottom

**Drawing:**
- Meet requirements of standard drawing TM488

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Terminal Blocks

**Standard:**
- 600 volt rated
- Solderless connections
- Tubular clamp fit inside RTC or TC mounting locations
- Sized for wire being terminated
- Channel mount assembly
- UL recognized

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
Signs

PTR Sign

Standard:

- Flat black painted, aluminum alloy case
- LED illuminated legend
- Single phase, predetermined sign legend in compliance with the Federal “Standard Highway Signs and Markings” book
- Sign size 30 x 30 inch (retro-fits only) or 36 x 36 inch (standard)
- Compliance with MUTCD section 2L.03 and 2L.04 for LED visibility, legibility, and design
- Able to mount to signal appurtenances with an adjustable vehicle signal bracket

Drawing:

To Request TRS Evaluation:

Note – due to testing requirement timelines, no write-in products are allowed for projects under contract – only prequalified products already listed on the blue sheets will be approved for use for projects under contract:

- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
- Submit 1 sample for testing
- Installation instructions

# Materials That Are Rarely or No Longer Used For Traffic Signal Installations

## Conduit (Metallic)

<table>
<thead>
<tr>
<th>Standard (Two Categories):</th>
<th></th>
</tr>
</thead>
</table>
| **Rigid Metal** | • Compliance with UL 6 “Electrical Rigid Metal Conduit-Steel”  
• UL listed and labeled  
• Galvanized rigid metal manufactured of mild steel  
• Includes coupling designed for below ground, direct buried |
| **Liquid-Tight Flexible Metal** | • Compliance with UL 360 “Standard for Liquid-Tight Flexible Metal Conduit”  
• UL listed and labeled |

**To Request TRS Evaluation:**  
• Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

## Conduit Bushings (Metallic)

<table>
<thead>
<tr>
<th>Standard (Two Categories):</th>
<th></th>
</tr>
</thead>
</table>
| **Bond Bushings** | • Compliance with UL 514B “Conduit, Tubing, and Cable Fittings”  
• Compliance with UL 467 “Grounding and Bonding Equipment”  
• UL Listed  
• Galvanized steel or die cast zinc  
• Insulated throat  
• Bonding lug  
• 304/316 stainless steel lug screw with square or hex head |
| **Metallic Bushings** | • Compliance with UL 514B “Conduit, Tubing, and Cable Fittings”  
• Galvanized steel or die cast zinc  
• Insulated throat |

**To Request TRS Evaluation:**  
• Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
**Conduit Hub**

**Standard:**
- Compliance with UL 514B “Conduit, Tubing, and Cable Fittings”
- UL Listed
- Nylon insulated steel or hot-dip galvanized malleable iron
- Screw-on style
- Neoprene "O" ring to provide a watertight threaded hub into enclosures

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

---

**Conduit Plug (Clay/Putty Device)**

**Standard:**
- Designed to keep dust and debris out of conduit
- Non-hardening sealant material that can be reused and remolded
- Adheres to rigid metal or rigid non-metallic conduit
- Non-corrosive, non-toxic, and no asbestos
- UL Listed or Recognized

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

---

**Expansion Fitting (Metallic)**

**Standard:**
- Compliance with UL 467 “Grounding and Bonding Equipment”
- Compliance with UL 514B “Conduit, Tubing, and Cable Fittings”
- Weatherproof, hot dip galvanized malleable iron head and body
- Provide expansion for galvanized conduit with a bond, either internally or with an external jumper
- UL listed
- The expansion fitting shall permit a 4 inch conduit movement minimum

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
### Junction Box (Cast Iron)

**Standard:**
- Rated for AASHTO H-20 highway loading
- Construct boxes of cast iron or 1/8 inch nominal welded sheet steel
- Make covers from reinforced non-slip steel plate
- Hot-dip galvanize boxes and covers after fabrication according to AASHTO M 232 (ASTM A 153)
- Each box shall have a cover gasket that will, with cover in place, form a NEMA 4 watertight fit
- Provide covers with stainless steel hex-head cap screws
- Recess screw heads in the cover
- Recessed covers shall fit the box so that when the cover is set in the box, the top of the cover shall be even with the top of the box, with not more than a 1/8 inch gap between any part of the top edge of the cover and the inside lip edge of the box
- Covers shall have the legend "SIGNS", "STREET LIGHTING", etc. stamped or embossed on the cover as appropriate. Letter size shall be no smaller than 1/16 of the box width.
- Surface-mounted boxes shall have overlapping covers
- Flush-mounted boxes shall be outside-flanged with recessed, checkered steel covers
- UL listed

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
- Independent test results showing compliance with AASHTO H-20 loading

### Preformed Vehicle Detector Loop

**Standard:**
- No. 14, No. 16, or No. 18 TFFN or XHHW wire encased in either Schedule 40 PVC or rubber hydraulic hose filled totally with loop sealant
- Each loop can be fabricated to custom dimensions (i.e. size, number of turns, and lead-in length)

**Drawing:**
- Meet requirements of standard detail DET4435

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above

### Programmed Vehicle Signals

**Standard:**
- Meet requirements of standard vehicle signal
- Permit selective programming of the visibility zone of the projected indication anywhere within 15 degrees of the optical axis of each signal section

**To Request TRS Evaluation:**
- Manufacturer’s product data sheet (cut-sheet) showing compliance with standards listed above
**Pushbutton Mount (H-Frame)**

<table>
<thead>
<tr>
