26 feet	193.00	44 feet	319.00
27 feet	200.00	45 feet	326.00

CAMPER AND TRAVEL TRAILER INFORMATION

- A **camper** is a structure that:
  a) Has a floor;
  b) Is designed to be mounted upon a motor vehicle;
  c) Is not permanently attached to the motor vehicle on which it is mounted;
  d) Is designed to provide facilities for human habitation (permanent sleeping and cooking facilities);
  e) Is 6 feet or more in overall length;
  f) Is 5.5 feet or more in height from floor to ceiling at any point; and
  g) Has no more than one axle designed to support a portion of the weight of the camper.

  Campers are measured from the extreme front to the extreme rear of the camper body. Any fraction of a foot in length is rounded down to the nearest foot.

  A camper permanently attached to a pickup or other motorized vehicle is registered as a motorhome. A camper permanently mounted on a trailer is registered as a travel trailer.

- A **travel trailer** is a recreational vehicle or prefabricated structure that is 8.5 feet wide or less and is not used for commercial or business purposes. A recreational vehicle must be designed for use as temporary living quarters, to be easily transported and set up on a daily basis, and comply with the applicable NFPA 1193 or 501C, or ANSI 119.2 standard in effect at the time of manufacture.

  DMV will not issue title or registration for a travel trailer over 8.5 feet wide. If a trailer is considered a park model recreational vehicle, it can be titled, but not registered.

  Measure the width and length with slide outs or tent fold outs in travel position. Measure the length from the foremost point of the trailer hitch to the rear extremity of the trailer body, not including any spare tire. A fraction of a foot is rounded down to the nearest foot when measuring length. **Travel trailers cannot be more than 45 feet long.**
