The movement of wide loads exceeding 12 feet in width traveling in opposing directions through the City of Sisters is not allowed through a six-block section of the downtown merchant area between South Pine Street and South Larch Street due to horizontal width constraints. The lead pilot vehicle operator is responsible for ensuring that there are no oversize loads over 12' in width entering this restricted section from the opposite direction before the permitted vehicle enters the width restricted section. Pilot vehicles escorting wide loads exceeding 12' in width must announce their approaching presence on CB radio channel 17 prior to entering the six block section of the downtown merchant area between South Pine Street and South Larch Street. In the event of an encountering oversize load, one of the lead pilot vehicle operators must direct his piloted load to wait and allow the approaching oversize load to pass safely before proceeding.
