

Modified Determination of Eligibility

Site Number: 35DS1993 (field designation 08/1620-4)

Site Type: Historic-period trash dump

Date Identified: 10/13/2009

Identified By:

Jeff Lloyd-Jones

Dave Cox

Duties:

Senior Archaeologist

Staff Archaeologist

Description of Artifacts/Features:

The site is a small scatter of historic-period artifacts including hole-in-cap cans (pre-1920), matchstick-filler or hole-in-top cans (early to mid-twentieth century), fragments of amethyst bottle glass (late-nineteenth to early-twentieth century), an aqua Lea & Perrins Worcestershire sauce bottle stopper (late-nineteenth to early-twentieth century), and non-diagnostic whiteware ceramic fragments. The artifacts were scattered across a basalt outcrop with the greatest concentration in the southeast quarter of the site.

Meets NRHP Criteria? (box checked if yes, shaded if unknown)

- A Discussion:** The site is not known to be associated with any specific events in American history, nor is it associated with a pattern of events that made a significant contribution to the development of the area.
- B Discussion:** The site is not associated with the lives of persons whose achievements are demonstrably important within a local, state, or regional context.
- C Discussion:** These historic-period materials are types that are commonly found in trash dump sites that may be associated with a homestead or a casual trash disposal area.
- D Discussion:** The site is unlikely to provide additional important information that will contribute to our understanding of the history of the area beyond what can be learned from historical records.

Discussion of Integrity:

The items found at the site do not retain integrity of design and do not have intrinsic integrity of setting, workmanship, feeling, or association.

Statement of Significance:

Based on the information gathered about the resource, as described above, AINW recommends site 35DS1993 to be not eligible for listing in the NRHP.
