The following guidelines are to be applied on a case-by-case basis:

I. The Oregon Transportation Commission generally will not name highway facilities after individuals.

II. The Oregon Transportation Commission may elect to suspend Guideline 1 if a requester can show compliance with the following criteria:

1. Demonstrated statewide support for naming a facility.

2. The honored individual shall have made a lasting contribution, with a significant and historic impact on Oregon.

3. The honored individual shall have been deceased for at least one year.

4. The facility is long enough to merit a title, such as a bridge or tunnel more than one-half mile long, or a highway section with defined end-points which was completed as a whole.

III. The comments of the Oregon Geographic Names Board will be solicited prior to naming any highway facility. (Any federal recognition will be contingent upon their approval.)
