Interim Director

SUBJECT: **Agenda Item G –** 2026 June Quarterly STIP Amendments

PRESENTED BY: Delivery & Operations Division Administrator, Tova Peltz
Interim Statewide Capital Program Engineer, Omar Ahmed

Requested Action: Decision
Approve the attached list of added, modified or canceled projects to the STIP.

Background:
Historically, the practice of the agency has been to bring projects one at a time to the OTC when new project opportunities arose. In order to streamline this process, in July 2023, the Commission agreed to quarterly aggregated STIP amendments for necessary project and program amendments.

This is the quarterly amendment for June 2026. There are 24 actions on the STIP amendment list that add, modify or cancel funds from projects. There are 2 actions on the ADA Amendment list that move program funds and extra project funds to address settlement ramps and pedestrian signals.

The attached lists of projects for the 2024-2027 STIP consists of time-sensitive actions associated with adjusting funding to capital projects in the Regions and programs statewide. Financial changes to projects occur through existing funding programs. These amendments have been vetted through the appropriate Division Administrators and elevated through ODOT to the Commission.

Included in these actions is an amendment to add funds to the OR99W: Corridor Safety and Intersection Improvements Project in Region 2, in order to construct safety improvements at four intersections on OR99W near OR 18 in Yamhill County. This project addresses a history of serious and fatal crashes in the corridor. The project was originally funded to design improvements at four intersections and phase construction to complete two of these intersection improvements in the near term. As the result of recent cost savings on other Region 2 projects, we propose adding $14 million from Region 2 Fix-It and ARTS to construct all four intersection improvements at this time. Utilizing these cost savings to efficiently deliver the

corridor safety improvements in the near-term is a benefit to travelers and communities in Yamhill County.

Previous Commission Action and Discussion:
These batched amendments are brought to the Commission on a quarterly basis, most recently in March 2026.

Outcomes:
With approval, ODOT will add, modify or cancel the attached projects in the 2024-2027 STIP.

Without approval, the OTC, Director, or Delivery & Operations Division Administrator will review and act upon each project as a separate amendment.
