

Application Form Won't Open?

There is a known problem with opening forms using Chrome or Edge, it has to do with the lack of a PDF plug-in in these applications. There is nothing that we can do to fix this problem but if you are unable to open the Application Form please follow the appropriate step below:

1. **Chrome** fix: In Chrome, go to this link:

`chrome://settings/content/pdfDocuments`

Slide the button to the right until it turns blue. This will download the PDF to your computer; the download is visible in the lower-left corner of the browser window. Click on the PDF icon to open and file>save to your computer. You only have to do this once, not every time you get a PDF.

2. **Edge** fix (very similar) In Edge, go to this link:

`edge://settings/content/pdfDocuments`

Slide the button to the right until it turns blue. This, as in Chrome, will cause the PDF to download to your computer so it will open in your Acrobat DC or Adobe Reader. As with Chrome, you only have to do this once.

3. If the PDF is on a web page, right-click on the link to the PDF and select "Save link as" to save it to your computer.
