

IMPORTANT NEW REQUIREMENTS FOR OREGON REGISTRATION

PLEASE READ INSTRUCTIONS CAREFULLY!

Oregon is a Performance and Registration Information System Management (PRISM) compliant jurisdiction.

The following will be required for all Oregon applications and renewals before they will be processed:

- USDOT numbers for Motor Carrier Responsible for Safety (MCRS).
- Federal Employer Identification Number.

What is PRISM?

PRISM was developed by the United States Department of Transportation (USDOT) Federal Motor Carrier Safety Administration (FMCSA) to:

- Improve safety performance through education, safety monitoring and registration sanctions.
- Reduce the number of commercial vehicle crashes by getting the unsafe driver off the road.
- Enhance the process for targeting high-risk, non-compliant motor carriers.

By identifying the motor carriers responsible for safety of these vehicles, PRISM facilitates the use of information collected from FMCSA to:

- Determine motor carrier safety ratings.
- Place unsafe motor carriers in the Motor Carrier Safety Improvement Process (MCSIP).
- Allow systematic tracking of unsafe motor carriers and their improvement.

How does PRISM affect the registration process?

This new registration requirement assists FMCSA by collecting information to:

- Identify the account registrant (entity to whom the vehicle registration and the plate is issued) through a USDOT number.
- Identify the MCRS (the person or company who pays for the load on the truck) of the vehicle at the time of registration through a USDOT number.
- Determine the safety fitness rating of the vehicle/operator prior to issuing vehicle registration.
- Suspend vehicle registration when an FMCSA out-of-service order is issued.

FMCSA requires USDOT registration information to be updated biennially by completing a Motor Carrier Identification Report (MCS-150).

CARRIERS WHO DO NOT UPDATE THEIR INFORMATION WILL BE DENIED REGISTRATION

To ensure that 2021 registration renewals are processed without any delay, registrants must have updated USDOT registration information since 2019. New applicants and all updates to the MCS-150 should be completed online for immediate processing at:

https://li-public.fmcsa.dot.gov/LIVIEW/PKG_REGISTRATION.prc_option

DO NOT SEND YOUR MCS-150 FORM TO ODOT

What additional information is needed to register?

A. If the account registrant and MCRS are the same:

Account registrant is responsible for the following before submitting the renewal application:

- Update USDOT registration information (MCS-150).
- Provide USDOT number and Federal Employer Identification Number (FEIN) for each vehicle.
- Indicate if MCRS of each vehicle will change during the year.

B. If the account registrant and MCRS of all or some of the vehicles are different:

Account registrant is responsible for the following before submitting the renewal application:

- Update USDOT registration information (MCS-150).
- Provide MCRS USDOT number and FEIN for each vehicle (each vehicle could have a different USDOT and FEIN).
- Indicate if MCRS of each vehicle will change during the year.
