

# DD11 INQUIRY PROGRAM

**2018 - 2019**

**DRIVER AND MOTOR VEHICLE SERVICES**

## INTRODUCTION

This publication is designed to help department employees interpret entries on driving records when using the DD11 record inquiry program.

Entries on DMV driver/identification records are separated into two sections, as follows:

### 1. FIXED ENTRIES

Fixed entries generally include information we record for every record holder; such as name, address, and date of birth. This portion of the record also contains information about any identification card or Oregon driving privilege the person holds, as well as endorsements, restrictions and expiration dates.

### 2. VARIABLE ENTRIES

Variable entries are those that make up an individual's driving history; such as accidents, convictions, suspensions, revocations, cancellations and other administrative actions. Variable entries may also include information about the type(s) of license, permit, and/or endorsement the person holds (or has held in the past).

To order additional copies of this manual, send your request to: Driver Programs Unit, 1905 Lana Avenue NE, Salem, OR 97314.

**This manual is only for Oregon Department of Transportation employees who access driving records and IS NOT distributed to the public.**

**A similar manual for public use is The Guide to Oregon Driving Records and is available on-line at [www.OregonDMV.com](http://www.OregonDMV.com).**

## ACCIDENT SEGMENTS

Accident segments are posted to a driver's record after a reportable accident. An accident is reportable when one or more of the following occurs:

- An injury or death to any person;
- Damage to the vehicle you were driving is greater than \$2500;
- Property damage (not including a vehicle involved in the accident) is greater than \$2500; or
- Damage to any vehicle is greater than \$2500 and any vehicle is towed from the scene of the accident due to damages.

The following entries show the formats that Oregon uses to post accidents to driving records. The first format is an example of an accident which occurred in Oregon. The second example is an out of state accident in which the information has been transferred to Oregon. For information regarding accident related suspension entries, see the individual suspension types in Appendix 1, Suspension Abbreviation Table.

### Oregon Accident Display Format

Conviction Entries	1 of 3

Convictions are recorded when DMV receives notice from a court or another state that the driver has been convicted of violating a motor vehicle law. Convictions are displayed in two different formats:

**Oregon Conviction Display Format**

This format is used to display convictions which occurred in Oregon.

(a) (b) (c) (d) (e) (f) (g) (h) (i) (j)

**Out-of-State Conviction Display Format**

This format is used to display convictions received from another state, whether manually entered by Oregon or electronically transmitted from another state.

(a) Displays one of the following:

<b>CONVICTION</b>	The driver has been found guilty of a traffic offense.
<b>SIM CONV</b>	“Simulated” conviction. This segment is NOT based on a court notice. DMV creates this segment in limited circumstances <i>ONLY</i> to comply with CDP/CMV federal reporting requirements.
<b>APPEALD CONV</b>	The driver appealed the conviction after it was entered on the record. If driver loses the appeal, CONVICTION replaces APPEALD CONV. If the driver wins the appeal, field (e) will show VACATED.
<b>AQUITTD CONV</b>	Indicates receipt of a ‘court order of dismissal’ or ‘judgment of acquittal’ on a DUII charge received on or after 9/27/87.

**Note:** One asterisk following CONVICTION means that it is counted in the Driver Improvement and Habitual Offender Programs as a traffic "violation". Two asterisks following CONVICTION means that it is counted in the Habitual Offender Program as a traffic “crime” (major offense).

(b) Date of offense.

(c) Date of conviction, acquittal, or appealed decision (if decision was against the person).

(d) Offense: Oregon abbreviation or ACD code if offense was in another state. Refer to Appendix 2 for definition of Oregon offenses and Appendix 3 for definition of ACD codes.

Standard Conviction Abbreviations Table	1 of 12

The Standard Convictions Abbreviations table is made up of five columns as follows:

### **COLUMN 1 (LITERAL)**

This column contains the abbreviation (literal) for Oregon convictions. The Oregon literal is a three to twelve character alpha/numeric abbreviation of the offense.

DMV uses ACD codes to record convictions occurring in another state on an Oregon driver. See the ACD Code table (Appendix 3) for definitions and additional information.

### **COLUMN 2 (CITE)**

This column references the Oregon Revised Statutes (ORS) or other citing authority for the offense. The following are examples of the entries found in this column.

**807.610**.....ORS Chapter 807, Section 610

**F397.5**.....Federal Motor Carrier Safety Regulations as contained in Title 49  
of the Code of Federal Regulations, Part 397, Section 5.

**L O**.....Local (town/city) Ordinance

### **COLUMN 3 (CLASSIFICATION)**

This column lists the maximum (most serious) classification (class) type and code allowed for the offense. **Note:** The driving record may display a *lesser* class type and code for the offense than the one noted in the table column, but not higher.

<b>Class Types</b> (‘F’ being the most serious)
F – Felony
M – Misdemeanor
V – Violation
LO - Local Ordinance

<b>Class Codes</b> (‘A’ being the most serious)
A
B
C
D

**Note:** As of January 1, 2000, the Class Type “Infractions” became “Violations.” Any infraction appearing on an Oregon driving record (noted as “I” next to the Class Code on the conviction) should be construed to be a “Violation.”

### **COLUMN 4 (TEXT)**

This column contains a summary of the offense as written in applicable law, regulation or rule.

### **COLUMN 5 (RETAINED)**

Indicates the number of years, *from conviction date*, the conviction will show on the record.

Note:

- The program to delete record segments is conducted only once a year at the beginning of each year.
- An “\*” indicates the retention is 55 years if conviction involved operation of a commercial motor vehicle.

Conviction information shown in *SUBSCRIPT* text indicates the entry type is obsolete or invalid. Obsolete or invalid entry types are no longer used (entered on records), but may still appear on some driving records.

ACD Conviction and Withdrawal Codes	1 of 7

**ACD CODES:** AAMVA (American Association of Motor Vehicle Administrators) Code Dictionary. These are the national standardized codes used to communicate conviction and/or withdrawal of driving privileges information from state to state. These codes appear on Oregon driving records as convictions and/or withdrawals:

- When a driver licensed in another state moves to Oregon and the driver's previous state driving record is transferred electronically to Oregon.
- When an Oregon licensed driver receives a conviction in another state. The out-of-state conviction is recorded on the Oregon driver record using ACD codes.
- When an Oregon licensed driver receives a withdrawal in another state. The out-of-state withdrawal is recorded on the Oregon driver record using ACD codes.

A "**Withdrawal**" is an action taken in another state. DMV only records "Withdrawals" for historical/ informational purposes. Do not use "*Withdrawal*" entries to determine if a driver has valid driving privileges in Oregon or in another state.

The ACD code table is made up of three columns, as follows:

### **COLUMN 1 (ACD)**

This column contains the ACD code for the out-of-state conviction or withdrawal.

### **COLUMN 2 (DEFINITION)**

This column contains a summary of the offense as defined in the AAMVA Code Dictionary.

### **COLUMN 3 (RETAINED)**

Indicates the number of years, *from conviction date*, the conviction will show on the Oregon record. Note: The program to delete record segments is conducted only once a year at the beginning of each year.

ACD codes and information shown in *SUBSCRIPT* text indicates the entry type is obsolete or invalid. Obsolete or invalid entry types are no longer used (entered on records), but may still appear on some driving records.
