

The Oregon Real-time GNSS Network (ORGN) provides RINEX files in 1hr 5sec format for the stations that the Oregon Department of Transportation (ODOT) manages. ORGN partners provide RINEX data from the stations they manage, links to partner RINEX data can be found on our [All Station List](#). Since ftp is no longer supported by web browsers, we suggest using an ftp client such as FileZilla or WinSCP to access our ftp server. The following Document will help you navigate either of the two ftp clients.

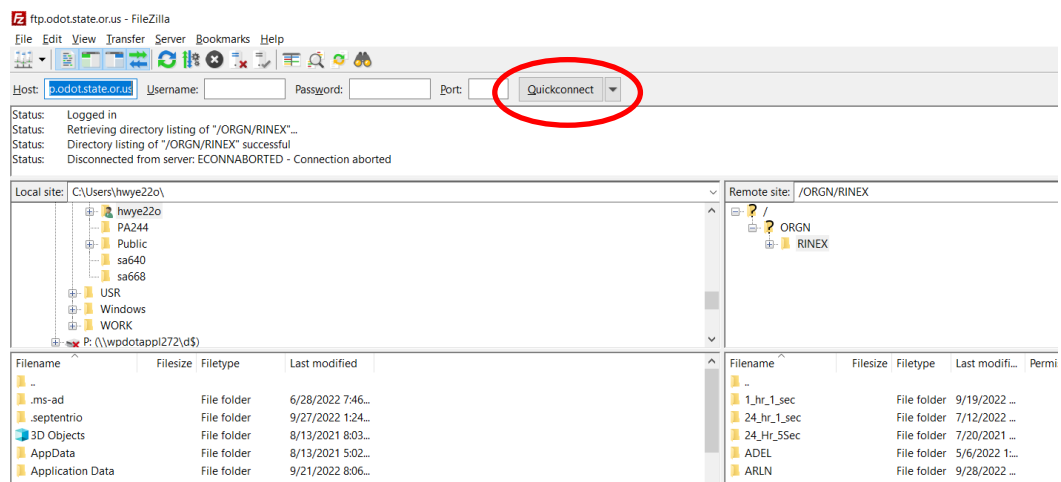

Using FileZilla

Copy this into the host: <ftp://ftp.odot.state.or.us/ORGN/RINEX/>

No User name or Password

Quickconnect

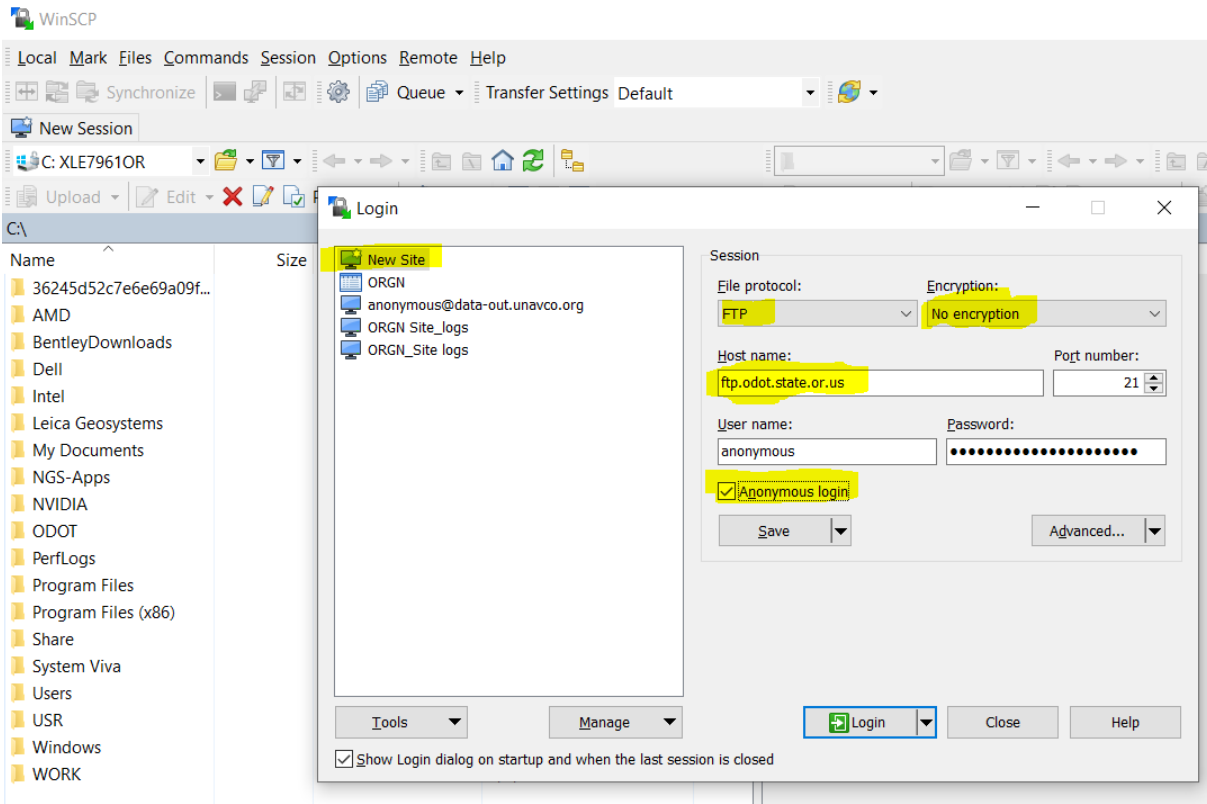

Using WinSCP

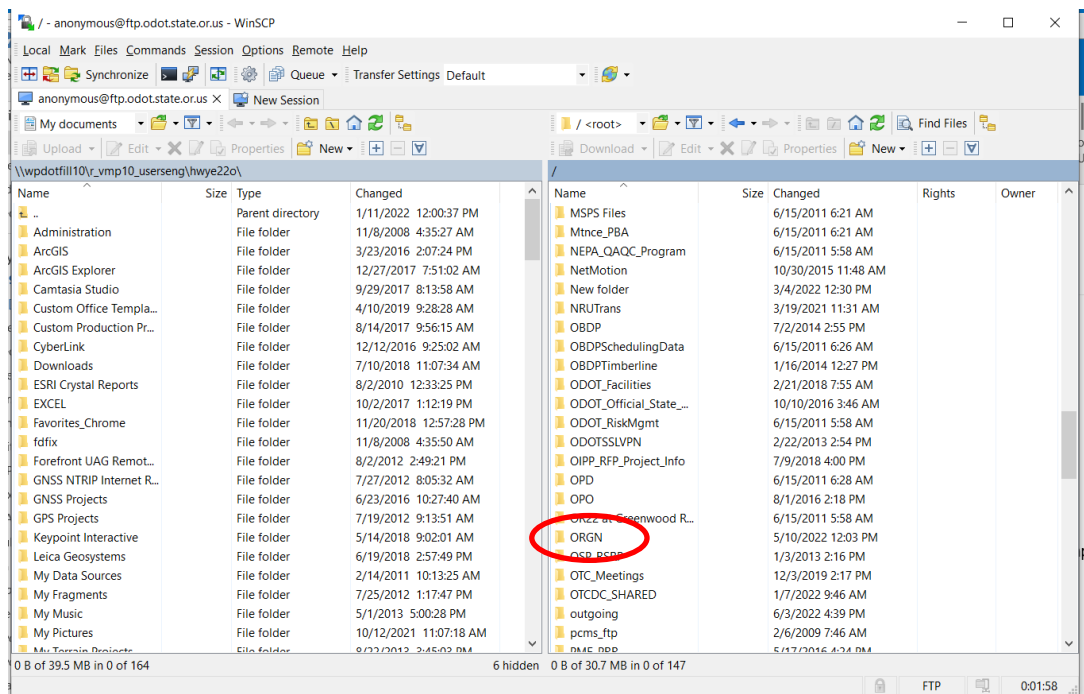

Download WinSCP here <https://winscp.net/>

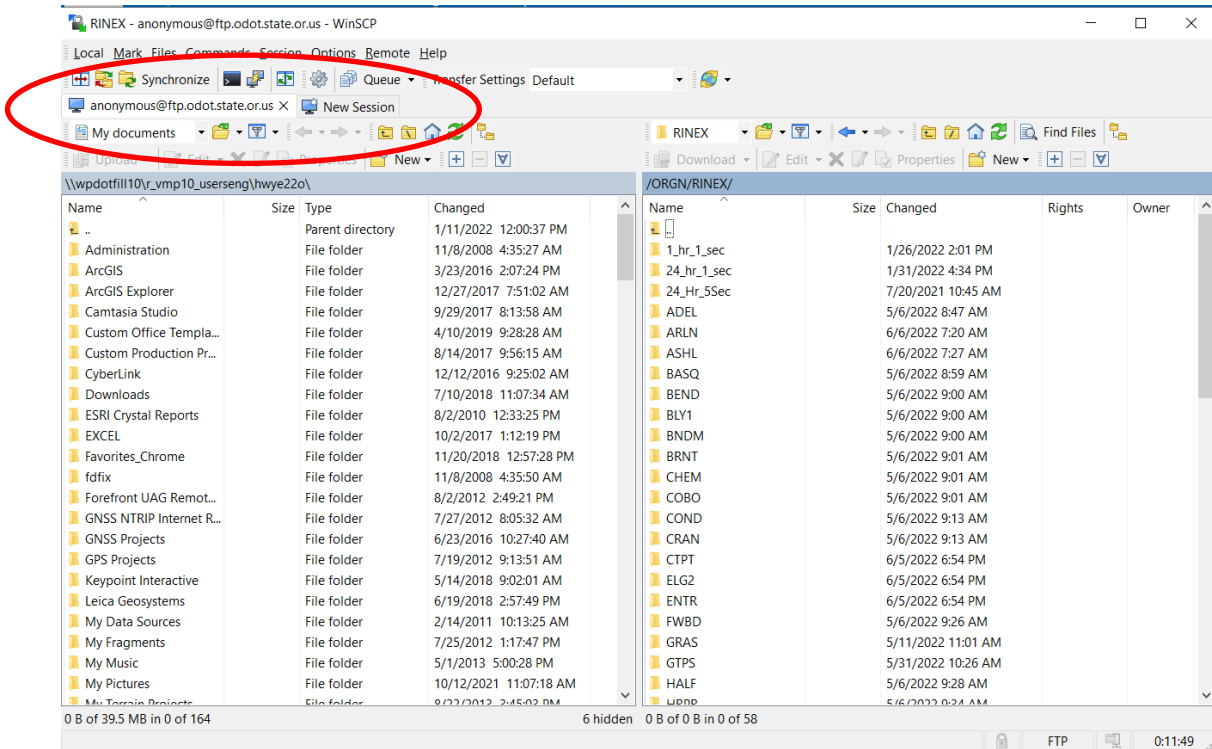

Host name: ftp.odot.state.or.us

Anonymous login

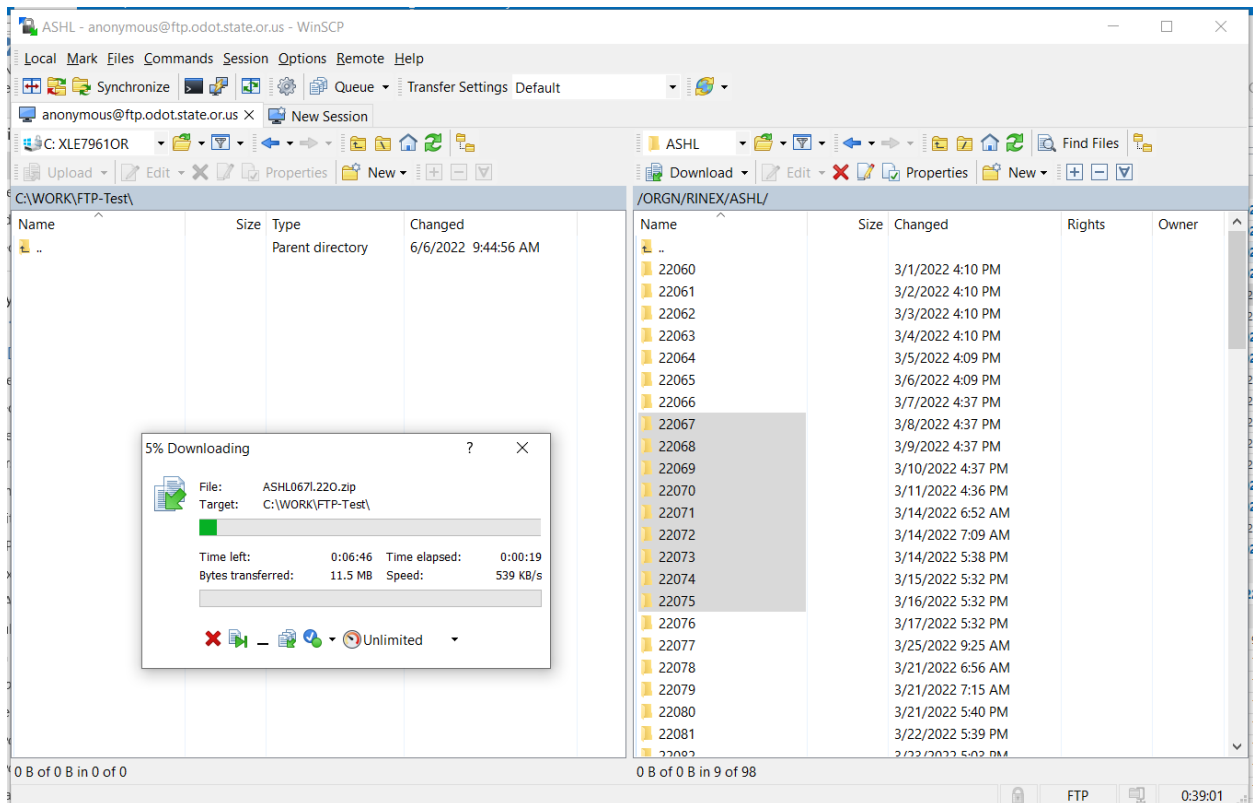

From the root directory navigate to ORGN/RINEX

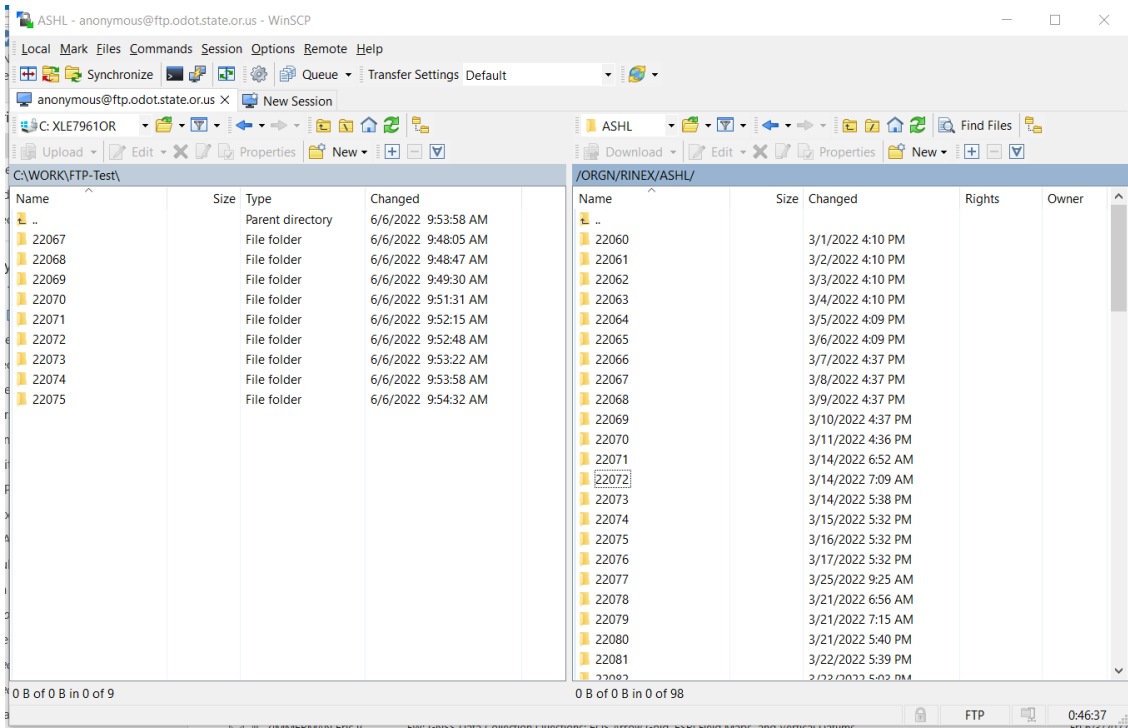

Navigate to where you want to move the files or create a new folder.

Select the file you want to copy from the right and drag and drop them into the folder on the left.

Success!
