

Just like your car,  
roads need  
maintenance to  
stay safe and  
functional.

## Road Trip & Road Funding ACTIVITIES

## Crunch THE Numbers

▶ On your next road trip, complete these activities to learn more about road funding in your daily life.

Check out our online OReGO calculator:  
[myOReGO.org/calculator](http://myOReGO.org/calculator)

### YOUR CONTRIBUTION to roads

▶ How many gallons of gas did you purchase? Multiply by .36.  
**That's how much you paid in fuel tax.**

\_\_\_\_\_ gallons x .36  
= \$ \_\_\_\_\_ fuel tax paid

▶ How many miles did you drive? Multiple by .018.  
**That's what you would pay with OReGO.**

\_\_\_\_\_ miles x .018  
= \$ \_\_\_\_\_ mileage charge

### TIME FOR A *tune up!*

▶ Multiply the total miles you drove by 200,000. **That's how much it costs to maintain the roads you drove.**

\_\_\_\_\_ miles driven x 200,000  
= \$ \_\_\_\_\_ cost to maintain

▶ Now multiply by 1,500,000.  
**That's how much it could cost to rebuild them.**

\_\_\_\_\_ miles driven x 1,500,000  
= \$ \_\_\_\_\_ cost to rebuild

The more regular the maintenance,  
*the less it costs.*
